CITIZENS SUMMARY

Findings in the audit of the Department of Economic Development, Division of Workforce Development

Contract Monitoring

The Division of Workforce Development (DWD) did not adequately monitor the status of a software development contract and paid $3.8 million to a vendor for two computer systems it could not use. The DWD salvaged the project by paying another vendor $570,000 to complete the project and implement the systems. If the DWD had paid the first vendor only as the agreed upon milestones were met, the DWD should have realized early on that the project was not being completed as stipulated in the contract.

Since this contract was procured, the state's process has changed and information technology contracts are monitored by the Office of Administration Information Technology Services Division and are paid only upon completion of defined milestones.

Payment of Operating Costs of the Governor's Office

The DWD paid over $1,630 in travel costs for the Governor and a Department of Labor and Industrial Relations official for air travel to promote an information technology training program to be administered by the DWD. It does not seem appropriate for the DWD to pay for flights that include no DWD employees. Shifting costs among departments circumvents the appropriations process and distorts the actual costs of operating the DWD, the Department of Labor and Industrial Relations, and the Governor's office.

In the areas audited, the overall performance of this entity was **Good**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

All reports are available on our website: http://auditor.mo.gov

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

The DWD was awarded approximately $98.8 million in federal stimulus funds ($32,706,284 in 2009 and $66,265,250 in 2010) and spent approximately $3.9 million in FY2009 and $52.8 million in FY2010. Appropriations to the DWD from the Federal Stimulus-DED Fund were expended on: personal service ($3,483,625 in 2010); expense and equipment ($22,056 in 2009 and $2,093,447 in 2010); job training (3,890,786 in 2009 and $46,057,513 in 2010); dislocated workers assistance ($818,425 in 2010); emerging industry grants ($74,124 in 2010); and temporary assistance for needy families summer youth program ($295,000 in 2010).

While most of the DWD federal stimulus funds went to fund existing programs and fill budget gaps, according to the DWD, federal stimulus funding helped create or retain an average of 813.5 full-time equivalent jobs in FY2010. These positions were related primarily to temporary jobs in the Workforce Investment Act Summer Youth program intended to provide work experience for youth to prepare them for the workforce.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
David Kerr, Director
Department of Economic Development
and
Julie Gibson, Director
Division of Workforce Development
Jefferson City, Missouri

We have audited certain operations of the Department of Economic Development, Division of Workforce Development, in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the 2 years ended June 30, 2010. The objectives of our audit were to:

1. Evaluate the division's internal controls over significant management and financial functions.

2. Evaluate the division's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the division, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the division's management and was not subjected to the procedures applied in our audit of the division.

For the areas audited, we identified (1) no significant deficiencies in internal controls, (2) no significant noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the Department of Economic Development, Division of Workforce Development.

Thomas A. Schweich

Division of Workforce Development
Management Advisory Report
State Auditor's Findings

1. Contract Monitoring

The Division of Workforce Development (DWD) did not sufficiently monitor the status of a software development contract and did not determine the usability of project deliverables[1] before paying the vendor. The DWD paid a total of $3.8 million to the vendor to develop the Toolbox and Great Hires systems to track program participants and match participants with appropriate employers. The contract was entered into in August 2005 with a scheduled completion date of June 2006. However, DWD officials attempted to withhold the final $1.75 million payment when they determined neither system was usable. After negotiating with the vendor and consulting with the U.S. Department of Labor, the final payment was made in June 2010. The DWD paid an additional $570,000 to another software company to complete the project and implement the systems. This contract was entered into in April 2007 and completed in 2008.

The Office of Administration (OA), Division of Purchasing and Materials Management, was responsible for the procurement of the systems. Although project deliverables were clearly defined in the contract, the DWD agreed to pay the vendor on a monthly basis rather than based on the completion and acceptance of project deliverables. In addition, the DWD did not monitor the status of the project before making monthly payments to ensure the division was receiving functional deliverables as defined in the contract.

Paying vendors based on the status of deliverables and achievement of milestones helps ensure the project is being completed as expected, and helps to avoid unnecessary costs and ineffective products. The state's process for information technology contracts, such as the one in question, have changed since this contract was procured. Current practices dictate projects be monitored by the OA Information Technology Services Division and paid only as milestones are achieved.

Recommendation

In any future contracts, the DWD should make payments to contractors based on the status of project deliverables to ensure the product received meets contract specifications.

Auditee's Response

The DWD paid the vendor in accordance with the terms of the contract; however, DWD accepts the recommendation and future contracts will be based on the status of contract deliverables.

[1] A product or service that is prepared for and delivered to the government under the terms of a contract; National Institute of Standards and Technology, Special Publication 800-64 p.63/71

2. Payment of Operating Costs of the Governor's Office

In fiscal year 2010, the DWD paid more than $1,630 related to travel costs of the Governor's office and another state agency, thus circumventing the appropriation process established by the General Assembly. The trip billed to the DWD was for the Governor and a Department of Labor and Industrial Relations (DLIR) official to promote an information technology training program to be administered by the DWD. Documentation of the flight shows no DWD personnel were on the flight.

It does not appear appropriate for the DWD to bear the cost of flights that include no DWD employees. This practice distorts the actual costs of operating the DWD, the DLIR, and the Governor's office.

Recommendation

The DWD work with the Governor's office to discontinue the practice of using DWD appropriations to pay operating costs of the Governor's office and the DLIR.

Auditee's Response

The Office of Administration, Division of Budget and Planning determines the allocation of expenses incurred by the Governor's office for providing services to state departments. The Division of Budget and Planning informed the Department of Economic Development of its share of those expenses. Travel expenses benefitting state departments and their constituents are allocated to the departments. The Department of Economic Development believes the costs are an appropriate expense.

Division of Workforce Development
Organization and Statistical Information

The Division of Workforce Development (DWD) is a division of the Department of Economic Development (DED). The DWD is responsible for providing services to businesses and individuals to increase workforce skills necessary for various industries. The DWD has seven sections; Business and Industry, Workforce Services, Planning and Performance Management, Workforce Development Board, Equal Employment Officer, Policy Communications, and Financial Management.

Julie Gibson has served as the Director of the DWD since March 2009. Mark Bauer served as interim Director from February 2009 to March 2009. Dawn Busick was Director during the remainder of the 2 years ended June 30, 2010. At June 30, 2010, the DWD had 432 employees.

DWD services are provided through 43 career centers, 14 local workforce investment boards (WIB), and 12 community college districts. The DWD has contracts with the WIB's to provide guidance to the career centers. The career centers administer several federal programs including the Workforce Investment Act and the Wagner-Peyser programs.

The DWD administers three state-funded programs aimed at job creation and retention. These three programs are; Missouri Customized Training Program, Community College New Jobs Training Program (NJTP), and Community College Job Retention Training Program (JRTP). The Missouri Customized Training Program is funded through the Missouri Job Development Fund (MJDF).

Missouri Customized Training Program

The MJDF is established and defined by sections 620.470 through 620.481, RSMo. The MJDF provides assistance to eligible businesses to train workers with a focus on job creation and retention. The DWD receives appropriations from the General Revenue Fund to fund this program. Businesses submit training program applications that are evaluated for potential program awards. Appropriations totaled $13.9 million for fiscal year 2010. This funding assistance can help lower the cost of locating a new facility or keeping a facility in Missouri. Funding assistance is available for a variety of training costs, including instructional salaries, curriculum development, and training materials.

The MJDF is operated by Local Educational Agencies (LEAs). LEAs are primarily community colleges, area career schools, and some 4-year universities that provide training and locally administer funding assistance. Companies can choose from a variety of training options to best meet their needs. Many of Missouri's LEAs have developed specialized resources for providing instruction, curriculum development, or training materials to businesses. In other instances, the individual company or a private vendor may be the best match for meeting training goals.

To be eligible for training funding, businesses must be located in Missouri and employ Missouri residents as full-time employees. Businesses should be either creating new jobs or retraining employees after making a significant capital investment. The DWD has established certain criteria to help with determining how MJDF resources should be distributed. Factors such as new job creation, substantial capital investment, high wages (at or above the county average), and a written commitment to support a program are considered. If any jobs for which training assistance has been received are moved out of Missouri or eliminated within 5 years of the date the project is approved, a company may be responsible for repayment of all training assistance received through the program.

Community College New Jobs Training Program

The NJTP is authorized by Sections 178.892 through 178.896, RSMo. The NJTP provides assistance in reducing the cost associated with training to expand a workforce. Under the NJTP, revenue from the diverted withholding taxes from employees in the newly created jobs is used to pay training expenses. The amount of withholding taxes diverted totaled $3.2 million for fiscal year 2010. The NJTP is considered a tax credit program, and was separately audited in 2003.[2]

The NJTP is operated by community colleges and monitored by the DWD. Provided training can include skill assessments, instruction costs, curriculum development, pre-employment training and on-the-job training (not to exceed 50 percent of project training costs). Training may be provided by the company, an LEA, or a training vendor.

Recipients can involve a company that is locating a new facility or expanding existing workforce in Missouri. Companies must be in the industries of manufacturing, processing, or assembling of products, or research and development, or provide services of interstate commerce to be eligible. They must be located in Missouri and have a sound credit rating. Generally, companies selected to receive funding should be creating at least 100 jobs at or above the county average wage rate.

Community College Job Retention Training Program

The JRTP is authorized by Sections 178.760 through 178.764, RSMo. The JRTP provides assistance in reducing the cost associated with retraining an existing workforce for the purpose of retaining jobs in Missouri. Under the JRTP, revenue from the diverted withholding taxes from employees in retained jobs is used to pay training expenses. The amount of withholding taxes diverted totaled $8.1 million for fiscal year 2010.

The JRTP is operated by community colleges and monitored by the DWD. Provided training can include skill assessments, instruction costs,

[2] *New Jobs Training Program Tax Credit,* April 2003 (Report No. 2003-32).

curriculum development, and on-the-job training (not to exceed 50 percent of project training costs). Training may be provided by the company, an LEA or a training vendor.

To be eligible for the JRTP, companies must (1) be in the industries of manufacturing, processing, or assembling of products, research and development, or provide services of interstate commerce; (2) be located in Missouri and have a sound credit rating; (3) generally be creating at least 100 jobs at or above the county average wage rate, and (4) meet one of the following criteria: have made a capital investment of at least $1 million, be located in a border county of the state and represent a potential risk of relocation from the state, or be determined by the DWD to represent a substantial risk of relocation from the state.

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

The DWD was awarded approximately $98.8 million in American Recovery and Reinvestment Act of 2009 monies, and has spent approximately $3.9 million and $52.8 million of those funds during the years ended June 30, 2009 and 2010, respectively. These monies were appropriated to the DWD from the Federal Stimulus - DED Fund (see Appendix B). The funds were used primarily for job training purposes as part of the Workforce Investment Act grant from the United States Department of Labor, although portions were used for general administration of the DWD. According to DWD documents, ARRA funding helped to create or retain an average of 813.5 full-time equivalent jobs during fiscal year 2010.[3] The majority of the jobs reported were associated with the summer youth program, which is intended to provide employment-related services and high quality work experience for youth to prepare them for the workforce. Accordingly, these jobs were designed to be temporary.

[3] Job data was not available for fiscal year 2009 activity.

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the review of Article X, Sections 16 through 24, Constitution of Missouri

Background

The Constitution of Missouri was amended in 1980 to add Article X, Sections 16 through 24, commonly referred to as the Hancock Amendment. This tax limitation amendment imposes restrictions on the amount of personal income used to fund state government and the amount by which fees and taxes can be increased. Mathematical formulas are used to determine the relevant threshold amounts each year.

The Hancock Amendment limits the amount of Missourian's personal income that may be used to fund state government to no greater than the portion used to do so in 1981. In other words, since 5.6 percent of Missourian's personal income went to fund state government in 1981, then no more than 5.6 percent can be used to do so in future years, unless revenues are specifically excluded by a vote of the people.

The Hancock Amendment also requires voter approval before taxes or fees can be increased by the General Assembly beyond a certain annual limit. Based upon the calculation provided by the Office of Administration, Division of Budget and Planning, the relevant annual revenue limit for fiscal year 2010 was $96 million.

Fiscal Year 2010 Findings

For the fiscal year ended June 30, 2010, our review determined no refunds were due. In fact, total state revenue was $4.4 billion under the refund threshold. In addition, the Office of Administration, Division of Budget and Planning determined that net taxes and fees increased by $1.9 million, well below the $96 million annual limit. As a result, our review concluded the state complied with these provisions of the Hancock Amendment.

Because of the limited objective of this review, no overall rating is provided.

Article X, Sections 16 through 24, Constitution of Missouri (Adopted November 4, 1980, Amended April 2, 1996) 26

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly
and
Kelvin L. Simmons, Commissioner
Office of Administration
Jefferson City, Missouri

We have conducted a review of revenues of the state of Missouri for the year ended June 30, 2010, and the application to those revenues of Article X, Sections 16 through 24, Missouri Constitution, more commonly referred to as the Hancock Amendment (included as an Appendix). We had previously reported on revenues of the state for the years ended June 30, 1982 through 2009. The amendment, which was adopted by the voters of Missouri on November 4, 1980, limits the growth of state revenues collected in any fiscal year. The objectives of this review were to:

1. Evaluate the formula to calculate the state's revenue limit.

2. Determine the specific items included in total state revenues.

3. Verify the accuracy of the revenue limit computation and compare that limit to total state revenues.

4. Review the state's overall compliance with the provisions of the amendment.

Our review included only the application of the revenue limit to state revenues and, accordingly, did not include a review of the effects of the amendment on any local governmental unit.

Our methodology to accomplish these objectives included discussions with personnel of the Office of Administration, Division of Budget and Planning, inspecting relevant records and reports compiled by that office, and reviewing data and reports from the statewide accounting system. We reviewed this information to the extent necessary to satisfy ourselves that the information in the Exhibits is fairly stated in all material respects.

The Executive Summary and the Background, Methodology, and Conclusions present our comments, findings, and conclusions concerning the state's overall compliance with the provisions of Article X, Sections 16 through 24, Missouri Constitution.

Thomas A. Schweich
State Auditor

Executive Summary

The amendment, commonly referred to as the Hancock Amendment, requires that no greater portion of Missourians' personal income (MPI) be used in any future year to fund state government than was the case in fiscal year 1981, except as authorized by a vote of the people.

The results of our review determined that for the year ended June 30, 2010, total state revenue (TSR) was approximately $4.4 billion under the refund threshold. As a result, no refund is due for the year ended June 30, 2010.

The amendment also imposes an additional revenue limit, which states the general assembly shall not increase taxes or fees in any fiscal year without voter approval that in total produce new annual revenues greater than $50 million adjusted annually by the percentage change in the personal income of Missouri for the second previous year, or one percent of total state revenues for the second fiscal year prior to the general assembly's action, whichever is less.

For the year ended June 30, 2010, the Office of Administration, Division of Budget and Planning has determined that as a result of legislative actions net taxes and fees increased by a total of $1.9 million. As a result, it appears the state also complied with this provision of the amendment.

The revenue limit has not been exceeded since the year ended June 30, 1999. Over the last 5 years the amount of TSR under the refund threshold has increased from $1.4 billion to $4.4 billion.

A bar graph of TSR compared to the refund threshold follows:

Review of Article X, Sections 16 Through 24, Constitution of Missouri Background, Methodology, and Conclusions

The following identifies the various components of the amendment and the application of the amendment to state revenues.

Formula

Article X, Section 18(a), Missouri Constitution, establishes the revenue limit formula as follows:

$$\text{Revenue limit for FY 20XX} = \frac{\text{Total state revenue (TSR) in FY 1981}}{\text{CY 1979 Missouri personal income (MPI)}} \times \text{The greater of MPI in the calendar year (CY) prior to the CY in which appropriations are made for FY 20XX or Average MPI for three CYs preceding FY 20XX.}$$

The formula is composed of two principal parts. The first part of the formula, the base year ratio (BYR), is as follows:

$$\frac{\text{TSR in FY 1981}}{\text{CY 1979 MPI}}$$

The application of this ratio to the second part of the formula (future years' MPI) ensures that no greater portion of a future year's personal income will be used to fund state government than was the case at the time of passage of the amendment. The MPI amounts used in the formula for the base year and subsequent years are reported by the U.S. Department of Commerce (DOC).

The Office of Administration, Division of Budget and Planning (OA-BP) does not adjust the BYR for changes already made or for future changes or adjustments to this amount by the DOC. Article X, Section 17(2) refers to ". . . total income . . . as defined and officially reported by" the DOC. Even though the amendment does not specifically refer to such adjustments, this wording suggests that the BYR should be adjusted whenever CY 1979 MPI is adjusted by the DOC. The use of the initial reporting of MPI does provide an unchanging BYR for future years, which provides at least two benefits. First, the state can more easily plan and make appropriate adjustments to stay under the revenue limit. Second, if the initial MPI is subsequently adjusted, retroactive refunds are a possibility. That is, an adjustment to MPI for any prior year (including the base year) could reduce the revenue limit for a prior year below that year's TSR, providing a refund where one previously was not due. Therefore, we find this approach reasonable so long as it is followed consistently.

As with the BYR, the OA-BP uses the MPI first officially published by the DOC after the close of the CY to calculate the revenue limit for the applicable fiscal year. For the reasons expressed in the preceding paragraph, we find this approach reasonable so long as it also is followed consistently.

The BYR was calculated by the OA-BP as follows (dollar amounts are in billions):

$$\frac{\$2{,}232.204096}{\$\ 39{,}581.0} = .05639584891$$

In its calculations of the revenue limit the OA-BP rounded the BYR to .056395.

Article X, Section 18(b) allows the state to exceed the revenue limit by 1 percent before a refund is due. Therefore, to determine the point at which the refund provision takes effect (the refund threshold) the revenue limit is adjusted upward by 1 percent. However, should TSR exceed the refund threshold, all revenues in excess of the revenue limit are subject to refund.

Adjustments

Article X, Section 18(d) provides that the revenue limit may be adjusted, ". . . if responsibility for funding a program or programs is transferred from one level of government to another, as a consequence of constitutional amendment . . . provided that the total revenue authorized for collection by both state and local governments does not exceed that amount which would have been authorized without such a change."

The OA-BP has adjusted the revenue limit for the transfer of deputy circuit clerks from the county payroll to the state payroll under Section 483.245, RSMo, which was effective on July 1, 1981. In past years, the SAO disagreed with this adjustment because state funding of these salaries was required by statute instead of by consequence of constitutional amendment. In addition, the Judicial Article Amendment was effective on August 3, 1976, which was prior to the time the Hancock Amendment was adopted by the voters on November 4, 1980. However, the Supreme Court ruled in its decision on January 27, 1998, that an adjustment to the revenue limit for the transfer of deputy circuit clerks from the county payroll to the state payroll is appropriate.

Composition of Total State Revenues

An integral part in applying the provisions of the amendment to state revenues is to determine what constitutes TSR. The amendment does not specify the methodology to be used to determine TSR. Consequently, procedures to calculate TSR have been established and certain decisions as to items that would be either included or excluded have been made, except for items ruled on by the Attorney General or the Missouri courts.

TSR includes all revenues recorded in the Statewide Accounting System for Missouri (SAM II) and receipted by the state treasurer, which may only be withdrawn pursuant to an appropriation or which stand appropriated by the Constitution of Missouri. Various funds not in the state treasury are not included in TSR. These funds include university local funds, local sales tax

fund collections made by the Department of Revenue, various funds held in trust for inmates, patients, etc., and various quasi-governmental agencies such as the Board of Public Buildings, the Housing Development Commission, the Higher Education Loan Authority, the Health and Educational Facilities Authority, and the state's retirement systems. The Hancock Amendment states the composition of TSR is, "defined in the budget message of the governor for fiscal year 1980-81." The funds described above were not addressed in the governor's budget message for that year since the funds were not in the state treasury and were not appropriated. Thus, it seems reasonable to conclude that these funds should not be included in TSR.

Excluded Funds

From the revenue amounts obtained from SAM II, certain funds are entirely excluded to arrive at TSR, as defined in Article X, Section 17(1), Missouri Constitution, as follows:

A. Lottery

In November 1984, the voters approved Article III, Section 39(b), Missouri Constitution, which authorized the creation of the Missouri State Lottery. This provision states that revenues produced from the conduct of a state lottery shall not be a part of TSR. Since the voters approved the state lottery, all revenue and expenditure refunds related to the state lottery are excluded.

B. Alternative Care Trust Fund

The Alternative Care Trust Fund was established in 1989 under Section 210.560, RSMo. The Department of Social Services uses this fund to account for funds held in trust for the benefit of children who have been placed in the legal custody of the state. The Department of Corrections, Department of Mental Health, and the Division of Veteran's Affairs hold funds in trust for inmates and patients; however, these funds are not in the state treasury and are not included in TSR. Funds held in trust are not state funds since the funds remain the property of the individual. Since the Alternative Care Trust Fund does not account for state funds, it is excluded.

C. State Guaranty Student Loan Funds

Federal legislation passed in 1997 made changes in the accounting required for federal education loans. Starting in federal fiscal year 1998, the federal government considers all monies in these funds as property of the federal government or guaranty agency. As a result, the state excludes these funds held in trust.

D. Pansey Johnson-Travis Memorial State Gardens Trust Fund

The state received an endowment in 1987 for the purpose of establishing a memorial state garden. The state is to invest the endowment for 100 years before using the funds to establish the memorial garden. Since the funds cannot be appropriated until 2087, the revenue is excluded from TSR.

Excluded Revenues

From the revenue amounts obtained from SAM II, certain types of revenues are excluded to arrive at TSR, as defined in Article X, Section 17(1), Missouri Constitution, as follows:

E. Federal Funds

Article X, Section 17, Missouri Constitution, specifically excludes federal funds.

F. Proposition C Sales and Use Tax/Interest

In November 1982, the voters approved Proposition C, which increased the state sales and use tax by 1 percent. Since Proposition C received direct voter approval as provided in Article X, Section 16, Missouri Constitution, the proceeds from the additional 1 percent sales and use tax, including any interest earned on the investment of such taxes, are excluded.

G. Proposition A Gas Tax and License Fee Increases

In April 1987, the voters approved Proposition A, which increased the motor fuel tax by 4 cents per gallon and increased the annual registration fee for certain motor vehicles, effective July 1, 1987. Since the increase in tax and fees received direct voter approval, these revenues are excluded. Also, see item BB. below.

H. Bond Sales

An attorney general opinion concluded that proceeds of the state's general obligation bonds were not to be included in TSR.

I. Refunds

Refunds received due to the overpayment of obligations by the state, as identified by certain revenue source codes, are excluded.

J. Interagency Sales and Receipts

Since interagency transactions do not generate additional revenue for the state as a whole, interagency sales and receipts, as identified by certain revenue source codes, are excluded.

K. Soil and Water Sales and Use Tax/Interest
and
L. Parks Sales and Use Tax/Interest

In August 1984, the voters approved a one-tenth of 1 percent sales tax for soil and water conservation and state parks. Article IV, Section 47(c), Missouri Constitution, states that the additional revenue provided by the tax shall not be part of TSR. Since the voters approved the sales tax, the sales tax and any interest earned on the investment of the balance in these funds are excluded.

M. Redeposit of Investment Principal

The redeposit of investment principal is excluded.

N. Outlawed Checks

Outlawed checks, which are state checks that were not cashed by the payee within the time allowed, are redeposited in the state treasury and are excluded.

O. Redeposit of Loan Principal

Redeposits of loan principal are excluded.

P. Bingo

The August 1992 amendment to Article III, Section 39(d), Missouri Constitution, related to gaming activities also applies to bingo games, in that all state revenues derived from the conduct of gaming activities shall be appropriated beginning July 1, 1993, solely for public education and shall not be included in TSR. Section 313.007, RSMo, requires the bingo tax to be deposited in the Bingo Proceeds for Education Fund. The bingo tax, certain fees, and the interest earned on the investment of the fund are excluded from TSR.

Q. Riverboat Gambling

In August 1992, the voters approved an amendment to Article III, Section 39(d), Missouri Constitution. This constitutional amendment requires that all state gaming revenues must be appropriated for public education and excludes these revenues from TSR.

In 1993, the Missouri General Assembly enacted Senate Bills 10 and 11. This comprehensive gaming legislation established riverboat gaming in the state. This law repealed House Bill 149 related to riverboat gaming which had been enacted by voters as Proposition A in November 1992.

Under Senate Bills 10 and 11, the legislature imposed a 20 percent tax on adjusted gross receipts from gambling games. In November 2008, the voters approved increasing the tax to 21 percent. The state treats 90 percent of this revenue as state gaming revenues under Article III, Section 39(d), Missouri Constitution, and earmarks the revenues to the Gaming Proceeds for Education Fund. The remaining 10 percent of this revenue is allocated to the home dock city or county. Under Article III, Section 39(d), Missouri Constitution, the 90 percent portion of the adjusted gross receipts tax is exempted from TSR. The remaining 10 percent portion of the adjusted gross receipts tax is also excluded from TSR because these funds are distributed by the Department of Revenue without deposit in the state treasury and without appropriation.

Under Senate Bills 10 and 11, the legislature also established a Gaming Commission Fund in the state treasury and authorized gaming commission license fees, penalties, administrative fees, reimbursements, and admission fees to be deposited in this fund and expended pursuant to state appropriation for various purposes.

On November 24, 1998, the Missouri Court of Appeals, Western District entered its final decision in Kelly v. Hanson, et. al., 984 S.W. 2d 540 (Mo. 1998). The Missouri Court of Appeals, Western District ruled that revenue from the one dollar portion of the state imposed two dollar admission fee payable to the state is not included in TSR, while the revenue from the payments to the state to recoup public safety and regulatory enforcement costs is included in TSR. The remaining one dollar portion of the two dollar admission fee is also excluded from TSR because these funds are distributed

by the Department of Revenue without deposit in the state treasury and without appropriation.

R. Redeposit of State Funds	The redeposit of state funds for which a state expenditure was originally incurred, such as from closing a petty cash fund and returning the funds to the state treasury, is excluded.
S. Loan Proceeds	The state receives loans or advancements from the federal government, local governments, or private sources, to finance the acceleration of state projects. Since the loans must be repaid in the future, they are excluded.
T. Conservation Sales and Use Tax/Interest	Pursuant to the Supreme Court decision in Conservation Federation of Missouri, et. al., v. Richard Hanson, et. al., 994 S.W. 2d 27 (Mo. Banc. 1999), the revenue derived from the one-eighth of one percent conservation sales tax, and any interest earned on the investment of these funds, are excluded.
U. State Employee Expense Reimbursement	The state receives reimbursement from private individuals, firms, partnerships, corporations, etc., for state employee expenses incurred in providing testimony in a court of law, for which the employee has already been reimbursed by a state expense account. These reimbursements are excluded.
V. Recovery Costs	Monies received from others for costs incurred by the state or to be incurred by the state are excluded. Also, see item W. below.
W. Cost Reimbursements	Monies received from other governments for reimbursements of costs incurred by the state are excluded. Regarding items V. and W., the state has excluded from TSR receipts for cost reimbursements since fiscal year 1982 and receipts for recovery costs since fiscal year 1988. Although the constitution does not specifically mention cost reimbursements and recovery costs and they have not been the subject of a court decision, we have agreed with such exclusions because from an accounting standpoint, they would not be considered revenue.
X. Canceled Checks	Receipts derived from the redeposit of state checks that have been canceled are excluded.
Y. Local Match	Local governments provided funds to the state to use as a local match to qualify for federal or state funding. Since these local match funds are not state funds, they are excluded.
Z. Proceeds of Surplus Property Sales	The proceeds from some sales of surplus property are initially deposited into the Proceeds of Surplus Property Sales Fund then disbursed from this fund to the state fund that owned the property. To avoid counting the same

receipts in TSR twice, the state excludes amounts disbursed from the Proceeds of Surplus Property Sales Fund to other state funds.

AA. WIC Rebates

The Department of Health and Senior Services (DHSS) issues food instruments for the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) to program participants who use them to obtain formula at participating grocery stores and pharmacies. The participating grocery stores and pharmacies then redeem the food instruments. The food instruments are processed through the Federal Reserve System and the WIC program is charged for the food instruments presented. The DHSS records the redeemed food instruments and sends a monthly invoice to the contracted infant formula manufacturer who then rebates a portion of the sales proceeds to the state.

BB. Amendment 3 Revenue Derived From Highway Users

In November 2004, the voters approved an amendment to Article IV, Sections 29 and 30(a) through 30(c) and added Section 30(d), Missouri Constitution, effective July 1, 2005.

Section 30(a) provides for the apportionment and distribution of net proceeds of motor fuel tax. This section further provides that, ". . . The net proceeds of fuel taxes apportioned, distributed and deposited under this section to the state road fund, counties, cities, towns and villages shall not be included within the definition of "total state revenues". . . ."

Section 30(b) provides for the use and distribution of revenue derived from highway users as an incident to their use or right to use the highways of the state (including all state license fees and taxes on motor vehicles, trailers and motor vehicle fuels and excepting sales tax on motor vehicles and trailers which are not distributed to the state road fund). This section further provides that, ". . . The moneys apportioned or distributed under this section to the state road fund, the state transportation fund, the state road bond fund, counties, cities, towns or villages shall not be included within the definition of "total state revenues". . . ."

As a result, motor vehicle sales tax and special fuel non-gas tax, and fees from motor vehicle licenses or permits, interstate transportation licenses or permits, driver's licenses or permits, overdimension/overweight permits, other licenses and permits, and non-motor fuel decals credited to the State Road Fund, State Road Bond Fund, and/or State Transportation Fund are excluded from TSR.

The increase in interstate transportation license or permits for certain motor vehicles excluded under this section were previously excluded and, as a result, have no impact on TSR. (See item G. above.)

Sections 29, 30(c), and 30(d) have no apparent Hancock implications.

Other Exclusions and Limits

Other exclusions and limits have been considered to arrive at TSR, as follows:

Cash Management Improvement Act

The state has to enter into an agreement with the federal government which governs the timing of when the state can obtain federal grant monies. If the state holds federal funds longer than needed, the state has to reimburse the federal government for interest earnings. Since the interest was earned on federal funds and has to be returned to the federal government, it is excluded from TSR.

Agency Remitted Sales Tax

Some state agencies sell goods or services to the public and collect sales tax. To avoid counting the same receipts in TSR twice, the sales tax remitted by state agencies to the Department of Revenue is excluded from TSR.

Abandoned Funds Claim Payments

Under Section 447.543, RSMo, the state receives abandoned funds from various sources (banks, businesses, insurance companies, etc.). These funds are placed in the state Abandoned Fund Account. The rightful owner may receive these funds if properly claimed. The state includes the receipts in TSR. Starting in fiscal year 1998, the state excludes from TSR amounts paid to the rightful owner.

Expenditure Refunds

According to Article X, Section 17(1), Missouri Constitution, total state revenue shall exclude the amount of any credits based on actual tax liabilities. Refunds disbursed due to the excess collection by the state of liabilities owed the state, largely tax refunds, as identified by certain expenditure object codes are excluded. The method used to determine expenditure refunds is not specified in the amendment. Although the OA-BP initially used the appropriation basis to determine expenditures refunds, during fiscal year 1984, the OA-BP changed to the cash basis. The SAO had consistently used the appropriation basis to measure refunds. As a result, a difference existed. However, in its decision of January 27, 1998, the Supreme Court indicated that a cash basis of accounting should be used to determine compliance with the Hancock Amendment. As a result, the SAO changed its calculation of expenditure refunds to the cash basis.

Tobacco Master Settlement Agreement Proceeds

The OA-BP has excluded $140,318,927 received from tobacco companies during fiscal year 2010. The Master Settlement Agreement was entered into effective November 23, 1998, between the major cigarette manufacturers and the states' Attorney Generals. Missouri received its first payments under the settlement agreement during fiscal year 2001 and future payments from tobacco companies extend in perpetuity. The payment received in 2001 included amounts under the settlement agreement for 1998, 2000, and 2001. The settlement agreement did not require a payment for 1999. Payments for fiscal years 2001 through 2009 were as follows:

Fiscal Year	Amount
2001	$ 338,230,653
2002	172,679,543
2003	166,895,179
2004	142,829,966
2005	144,964,644
2006	133,078,222
2007	139,292,616
2008	153,277,453
2009	168,066,958

The amounts received were coded in the state's accounting system to revenue source code 1806 - recovery costs, which is excluded from TSR. Recovery costs are defined under revenue source code 1806 as, "*all money recovered from others for costs incurred by the state or to be incurred by the state."* The OA-BP believes these receipts should be excluded from TSR because the amounts represent a recovery of health care costs previously incurred or to be incurred by the state attributable to smoking.

Public information was not readily available to determine if the amounts recovered from the tobacco companies under the master settlement agreement were more or less than the health care costs incurred. In our audit for 2001, we reviewed three extensive research projects conducted by experts. We limited our analysis to Medicaid costs incurred in fiscal years 1998 through 2001. We did not consider Medicaid costs from past years prior to 1998. In addition, we did not consider other costs incurred by the state, such as employee health care costs attributable to smoking. These three research projects showed that Medicaid costs attributable to smoking were higher than the amount the state received from the tobacco companies under the settlement agreement. As a result, in our 2001 report we concluded it was proper for the OA-BP to exclude the amounts received from the tobacco companies as a recovery cost.

A study, "Tobacco Damages to the State of Missouri" by Glenn W. Harrison, was commissioned by the Missouri Attorney General's Office for use in a lawsuit against tobacco companies filed May 12, 1997. This lawsuit was dropped because Missouri joined a consortium of states in December 1998, in the Master Settlement Agreement with the tobacco companies. As a result, the Harrison study was not fully completed. However, the draft report provided an estimate of Medicaid costs attributable to smoking for 1970 through 2007 and an estimate of state employee health care costs attributable to smoking for 1970 through 1997. This study estimates that state costs attributable to smoking were higher than the amount the state received. OA officials could not locate any current studies but believe continued exclusion is reasonable.

Federal Reimbursement Allowance and Nursing Facility Reimbursement Allowance

The Federal Reimbursement Allowance and the Nursing Facility Reimbursement Allowance tax imposed by the state to pay the state's share of the costs of the Medicaid program is collected by an offset against Medicaid claims and is not directly deposited in the state treasury. As a result, this revenue is not included in TSR.

Local use tax

The local use tax imposed by the state under Section 144.748, RSMo, until repealed on May 21, 1996, and distributed to local governments is not deposited in the state treasury and is not appropriated. As a result, this revenue is not included in TSR.

Compliance

On November 4, 1980, the voters of Missouri passed Constitutional Amendment No. 5 which added Article X, Sections 16 through 24 to the Constitution of Missouri. The amendment, commonly referred to as the Hancock Amendment, requires that no greater portion of Missourians' personal income (MPI) be used in any future year to fund state government than was the case in fiscal year 1981, except as authorized by a vote of the people.

Exhibit A presents a summary of the calculations of limited total state revenue (TSR) for the years ended June 30, 2010, 2009, 2008, 2007, and 2006. The results of our review determined that for the year ended June 30, 2010, TSR was approximately $4.4 billion under the refund threshold. As a result, no refund is due for the year ended June 30, 2010.

Article X, Section 18(e), Missouri Constitution, imposes an additional revenue limit, which states the general assembly shall not increase taxes or fees in any fiscal year without voter approval that in total produce new annual revenues greater than $50 million adjusted annually by the percentage change in the personal income of Missouri for the second previous year, or 1 percent of total state revenues for the second fiscal year prior to the general assembly's action, whichever is less. For fiscal year 2010, the OA-BP calculated these limits at $97.3 million for the Missouri Personal Income amount and $96 million for the 1 percent of total state revenues amount.

For fiscal year 2010, the OA-BP has determined that as a result of legislative actions net taxes and fees increased by a total of $1.9 million. As a result, it appears the state complied with Article X, Section 18(e).

Article X, Sections 16 through 24, Constitution of Missouri (Adopted November 4, 1980, Amended April 2, 1996*)

TAXATION

Section 16. Taxes and state spending to be limited--state to support certain local activities--emergency spending and bond payments to be authorized. Property taxes and other local taxes and state taxation and spending may not be increased above the limitations specified herein without direct voter approval as provided by this constitution. The state is prohibited from requiring any new or expanded activities by counties and other political subdivisions without full state financing, or from shifting the tax burden to counties and other political subdivisions. A provision for emergency conditions is established and the repayment of voter approved bonded indebtedness is guaranteed. Implementation of this section is specified in sections 17 through 24, inclusive of this article.

Section 17. Definitions. As used in sections 16 through 24 of Article X:

(1) **"Total state revenues"** includes all general and special revenues, license and fees, excluding federal funds, as defined in the budget message of the governor for fiscal year 1980-1981. Total state revenues shall exclude the amount of any credits based on actual tax liabilities or the imputed tax components of rental payments, but shall include the amount of any credits not related to actual tax liabilities.

(2) **"Personal income of Missouri"** is the total income received by persons in Missouri from all sources, as defined and officially reported by the United States Department of Commerce or its successor agency.

(3) **"General price level"** means the Consumer Price Index for All Urban Consumers for the United States, or its successor publications, as defined and officially reported by the United States Department of Labor, or its successor agency.

Section 18. Limitation on taxes which may be imposed by general assembly--exclusions--refund of excess revenue--adjustments authorized.
(a). There is hereby established a limit on the total amount of taxes which may be imposed by the general assembly in any fiscal year on the taxpayers of this state. Effective with fiscal year 1981-1982, and for each fiscal year thereafter, the general assembly shall not impose taxes of any kind which, together with all other revenues of the state, federal funds excluded, exceed the revenue limit established in this section. The revenue limit shall be calculated for each fiscal year and shall be equal to the product of the ratio of total state revenues in fiscal year 1980-1981 divided by the personal income of Missouri in calendar year 1979 multiplied by the personal income of Missouri in either the calendar year prior to the calendar year in which appropriations for the fiscal year for which the calculation is being made, or

the average of personal income of Missouri in the previous three calendar years, whichever is greater.

(b). For any fiscal year in the event that total state revenues exceed the revenue limit established in this section by one percent or more, the excess revenues shall be refunded pro rata based on the liability reported on the Missouri state income tax (or its successor tax or taxes) annual returns filed following the close of such fiscal year. If the excess is less than one percent, this excess shall be transferred to the general revenue fund.

(c). The revenue limitation established in this section shall not apply to taxes imposed for the payment of principal and interest on bonds, approved by the voters and authorized under the provisions of this constitution.

(d). If responsibility for funding a program or programs is transferred from one level of government to another, as a consequence of constitutional amendment, the state revenue and spending limits may be adjusted to accommodate such change, provided that the total revenue authorized for collection by both state and local governments does not exceed that amount which would have been authorized without such change.

(e). **Voter approval required for taxes or fees, when, exceptions--compliance procedure.**

1. In addition to the revenue limit imposed by section 18 of this article, the general assembly in any fiscal year shall not increase taxes or fees without voter approval that in total produce new annual revenues greater than either fifty million dollars adjusted annually by the percentage change in the personal income of Missouri for the second previous fiscal year, or one percent of total state revenues for the second fiscal year prior to the general assembly's action, whichever is less. In the event that an individual or series of tax or fee increases exceed the ceiling established in this subsection, the taxes or fees shall be submitted by the general assembly to a public vote starting with the largest increase in the given year, and including all increases in descending order, until the aggregate of the remaining increases and decreases is less than the ceiling provided in this subsection.

2. The term "new annual revenues" means the net increase in annual revenues produced by the total of all tax or fee increases enacted by the general assembly in a fiscal year, less applicable refunds and less all contemporaneously occurring tax or fee reductions in that same fiscal year, and shall not include interest earnings on the proceeds of the tax or fee increase. For purposes of this calculation, "enacted by the general assembly" shall include any and all bills that are truly agreed to and finally passed within that fiscal year, except bills vetoed by the governor and not overridden by the general assembly. Each individual tax or fee increase

shall be measured by the estimated new annual revenues collected during the first fiscal year that it is fully effective. The term "increase taxes or fees" means any law or laws passed by the general assembly after May 2, 1996, that increase the rate of an existing tax or fee, impose a new tax or fee, or broaden the scope of a tax or fee to include additional class of property, activity, or income, but shall not include the extension of an existing tax or fee which was set to expire.

3. In the event of an emergency, the general assembly may increase taxes, licenses or fees for one year beyond the limit in this subsection under the same procedure specified in section 19 of this article.

4. Compliance with the limit in this section shall be measured by calculating the aggregate actual new annual revenues produced in the first fiscal year that each individual tax or fee change is fully effective.

5. Any taxpayer or statewide elected official may bring an action under the provisions of section 23 of this article to enforce compliance with the provisions of this section. The Missouri supreme court shall have original jurisdiction to hear any challenge brought by any statewide elected official to enforce this section. In such enforcement actions, the court shall invalidate the taxes and fees which should have received a public vote as defined in subsection 1 of this section. The court shall order remedies of the amount of revenue collected in excess of the limit in this subsection as the court finds appropriate in order to allow such excess amounts to be refunded or to reduce taxes and/or fees in the future to offset the excess monies collected.

Section 19. Limits may be exceeded, when, how. The revenue limit of section 18 of this article may be exceeded only if all of the following conditions are met: (1) The governor requests the general assembly to declare an emergency; (2) the request is specific as to the nature of the emergency, the dollar amount of the emergency, and the method by which the emergency will be funded; and (3) the general assembly thereafter declares an emergency in accordance with the specifics of the governor's request by a majority vote for fiscal year 1981-1982, thereafter a two-thirds vote of the members elected to and serving in each house. The emergency must be declared in accordance with this section prior to incurring any of the expenses which constitute the emergency request. The revenue limit may be exceeded only during the fiscal year for which the emergency is declared. In no event shall any part of the amount representing a refund under section 18 of this article be the subject of an emergency request.

Section 20. Limitation on state expenses. No expenses of state government shall be incurred in any fiscal year which exceed the sum of the

revenue limit established in sections 18 and 19 of this article plus federal funds and any surplus from a previous fiscal year.

Section 21. State support to local governments not to be reduced, additional activities and services not to be imposed without full state funding. The state is hereby prohibited from reducing the state financed proportion of the costs of any existing activity or service required of counties and other political subdivisions. A new activity or service or an increase in the level of any activity or service beyond that required by existing law shall not be required by the general assembly or any state agency of counties or other political subdivision, unless a state appropriation is made and disbursed to pay the county or other political subdivision for any increased costs.

Section 22. Political subdivisions to receive voter approval for increases in taxes and fees--rollbacks may be required--limitation not applicable to taxes for bonds.
(a). Counties and other political subdivisions are hereby prohibited from levying any tax, license or fees, not authorized by law, charter or self-enforcing provisions of the constitution when this section is adopted or from increasing the current levy of an existing tax, license or fees, above that current levy authorized by law or charter when this section is adopted without the approval of the required majority of the qualified voters of that county or other political subdivision voting thereon. If the definition of the base of an existing tax, license or fees, is broadened, the maximum authorized current levy of taxation on the new base in each county or other political subdivision shall be reduced to yield the same estimated gross revenue as on the prior base. If the assessed valuation of property as finally equalized, excluding the value of new construction and improvements, increases by a larger percentage than the increase in the general price level from the previous year, the maximum authorized current levy applied thereto in each county or other political subdivision shall be reduced to yield the same gross revenue from existing property, adjusted for changes in the general price level, as could have been collected at the existing authorized levy on the prior assessed value.

(b). The limitations of this section shall not apply to taxes imposed for the payment of principal and interest on bonds or other evidence of indebtedness or for the payment of assessments on contract obligations in anticipation of which bonds are issued which were authorized prior to the effective date of this section.

Section 23. Taxpayers may bring actions for interpretations of limitations. Notwithstanding other provisions of this constitution or other law, any taxpayer of the state, county or other political subdivision shall have standing to bring suit in a circuit court of proper venue and

additionally, when the state is involved, in the Missouri supreme court, to enforce the provisions of sections 16 through 22, inclusive, of this article and, if the suit is sustained, shall receive from the applicable unit of government his costs, including reasonable attorneys' fees incurred in maintaining such suit.

Section 24. Voter approval requirements not exclusive--self-enforceability.

(a). The provisions for voter approval contained in sections 16 through 23, inclusive, of this article do not abrogate and are in addition to other provisions of the constitution requiring voter approval to incur bonded indebtedness and to authorize certain taxes.

(b). The provisions contained in sections 16 through 23, inclusive, of this article are self-enforcing; provided, however, that the general assembly may enact laws implementing such provisions which are not inconsistent with the purposes of said sections.

* The 1996 amendment added Section 18(e).

Thomas A. Schweich

Missouri State Auditor

City of University City

April 2011

Report No. 2011-14

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the city of University City

Trash Service Billing and Collection	Although the city has made a concerted effort to improve collections, 3,373 citizen accounts for trash service were delinquent as of June 2010, totaling $1.6 million. Without collection enforcement, customers have less incentive to pay their accounts, which may reduce city revenues and increase the rates charged to paying customers.
Employment Contract	The city paid $97,400 in severance pay to its former City Manager and included the same severance package clause in the new City Manager's employment agreement. If the former City Manager's termination date had been just 8 days later, the city would have saved $28,600.
Cost Allocations and Administrative Transfers	The city allocated over $900,000 in costs to various departments based upon estimates and without adequate supporting documentation. This makes it difficult to determine if the individual department or program is charged the right amount for the benefit it is receiving.
Legal Services	The city paid outside law firms over $230,000 in fiscal year 2010 (FY10), including $43,000 for City Attorney services, but it has not done an analysis to determine if outsourcing legal services makes fiscal sense. The city did not solicit proposals for legal services to make sure it gets the best value and does not have written agreements with its legal services providers. The city retained the City Attorney on a contingency fee basis to represent it in a class-action lawsuit, but there is no documentation the City Council formally approved the retainer agreement or had it reviewed by an independent attorney until 5 years after it was signed. To avoid conflict of interest concerns, an independent attorney should review any contracts between the city and City Attorney. The city paid $146,000, including legal fees, to settle a discrimination case, instead of only paying the $15,000 deductible, because it failed to notify its insurance company promptly.
Parking Garage Operations	The city does not adequately supervise the operations of the parking facility. Monthly reports of receipts and disbursements do not contain detailed supporting documentation, making it difficult to determine if all receipts are accounted for and all disbursements are necessary. The city has not conducted an analysis to determine whether outsourcing management of the parking facility makes fiscal sense and has not rebid the contract since 1997.
Accounting Controls	The city needs to improve its accounting controls in order to ensure transactions are accounted for properly. When the Collector's Office collects monies from other departments, the amounts are not immediately verified and entered into the system, and receipt slips are not given to the departments. The Community Development Department does not adequately segregate duties, and some departments do not account for the numerical sequence of receipt slips. Bank reconciliations are not performed timely. Services are provided to local businesses without first ensuring there are adequate funds in the businesses' escrow accounts.

City Budget and Financial Reports	The Finance Director increased the fiscal year 2011 budgeted expenditures by $276,000, after the budget had been approved by the City Council. The City Council only receives quarterly financial reports, which impairs its ability to make effective management decisions.
Minutes, Meetings and Public Records	The City Council did not document the reasons or the votes regarding meeting closures, as required by state law. The city should maintain a public request log to document its compliance with the Sunshine Law and should ensure copies of meeting minutes of affiliated boards, committees, and commissions are maintained by the City Clerk.
Personnel	The city salary survey did not use cities of comparable size, so it is unclear if salaries are in line with salaries in similar cities. The city did not comply with its regulations regarding vacation and sick leave accumulation limits.
Emergency Plan	The city does not have an approved formal emergency contingency plan for its computer systems. The city relies heavily on technology and needs to plan for a rapid recovery from disasters or other extraordinary situations.

In the areas audited, the overall performance of this entity was **Fair**.*

American Recovery and Reinvestment Act 2009 (ARRA or Federal Stimulus)	The city was awarded over $3.4 million in ARRA funds in four grants: • Assistance to Firefighters Fire Station Construction Grant-$2,612,197 for construction of a fire station. In FY10, $4,117 was received and $17,711 was expended. • Community Oriented Policing Services Hiring Recovery Program-$559,785 to pay 100 percent of three police officer salaries for 3 years for positions that would have been eliminated. The city must maintain the positions for at least 1 year after the grant period ends. In FY10, $49,682 was received and $96,796 was expended. • Recovery Act: Edward Byrne Memorial Justice Assistance Grant Program Local Solicitation-$122,673 for police equipment. In FY10, $122,673 was received, but no funds were expended. • Energy Efficiency and Conservation Block Grant-$149,600 for energy savings. In FY10, $16,253 was received and $17,998 was expended toward a greenhouse gas inventory and street lighting evaluation. An energy audit will also be funded through this grant.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 21

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Mayor
and
Members of the City Council
City of University City, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the City of University City. We have audited certain operations of the city in fulfillment of our duties. The city engaged Hochschild, Bloom & Company LLP, Certified Public Accountants (CPAs), to audit the city's financial statements for the years ended June 30, 2010 and 2009. To minimize duplication of effort, we reviewed the audit report and substantiating working papers of the CPA firm for the year ended June 30, 2009, since the year ended June 30, 2010, audit had not been completed. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2010. The objectives of our audit were to:

1. Evaluate the city's internal controls over significant management and financial functions.

2. Evaluate the city's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the city, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the city's management and was not subjected to the procedures applied in our audit of the city.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the City of University City.

An additional report, No. 2010-53, *Twenty-First Judicial Circuit, City of University City, Municipal Division*, was issued in May 2010.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Susan J. Beeler, CPA, CIA
In-Charge Auditor:	Carl Zilch Jr., CIA
Audit Staff:	Albert Borde-Koufie, MBA
	M. M. Williams

1. Trash Service Billing and Collection

While significant progress has been made in reducing the delinquent trash service balance, the city needs to continue these efforts to ensure all users are paying for the services provided. The city trash collection service had approximately $1.6 million in delinquent citizen accounts as of June 2010, which is an improvement from the $2 million delinquent balance during 2007.

The city provides trash service to its citizens and bills for this service twice a year, with the majority of the bills ranging between $68 and $96 every 6 months. The city has taken steps over the last several years to reduce the delinquent trash accounts receivable balance. Most of these efforts have been concentrated on the more significant delinquent accounts (those with three or more outstanding bills). As of June 2010, 1,058 (or 31 percent) of the 3,373 delinquent accounts have three or more outstanding bills.

As established by city ordinance, there are several steps the city can take in an effort to collect a delinquent account. After a bill is 60 days overdue, the city can discontinue service to the account. When an account is 90 days delinquent, the city can put a lien on the property. In addition, the city can remove trash containers from properties after service is discontinued. In February 2008, the city updated the city municipal code to include specific procedures for removing trash containers from the properties after discontinuation of service and to require trash to be hauled by the citizen. The citizen can either purchase trash bags at city hall, which are accepted at the city transfer station, or take the trash to a landfill and obtain a receipt slip providing proof of the transaction. In either case, the citizen must keep the related documentation, which can be audited by the city in an effort to confirm the citizens are taking trash to a landfill or the city transfer station. The city attorney can bring legal proceedings against the property 150 days after service is discontinued. The city works with residents to place them on payment plans whenever possible. In addition, in February 2008, the City Council passed an ordinance significantly increasing delinquent penalties.

The city has used these procedures to reduce delinquent accounts. As of July 2010, the city had discontinued service to approximately 500 accounts, placed approximately 140 accounts on payment plans, and started approximately 380 audits of accounts with discontinued service. Our review of the largest 100 delinquent accounts noted that for all of these accounts service had been discontinued, the account had been placed on a payment plan or paid in full, or a lien had been placed on the property. Seventy-two of these accounts had two of these actions taken against the property. In addition, in March 2008, the city did a one-time partial forgiveness program and waived half of the interest owed on delinquent accounts for residents who paid the entire outstanding principal plus the remaining half of the interest owed. Also, starting in April 2008, the city began offering a low-income program which waives interest and penalties for those who meet the

requirements. A monthly payment plan is established for the remaining principal amount owed.

Allowing customers to receive service without payment reduces the incentive to make payments, results in loss of city revenue, and could impact the trash rates for other paying customers.

Recommendation

The City Council should continue these efforts to ensure all users are paying for services provided.

Auditee's Response

The City Council provided the following written response:

City Council will continue its efforts to ensure that all users are paying for the services provided. The City will also examine the possibility of either selling the debt to another entity or utilizing the services of a collection agency to collect outstanding payments for trash service.

2. Employment Contract

The employment contract with the former city manager contained a significant severance payout clause, and she was paid $97,400 in severance pay in 2010. In addition, the current city manager's contract includes a similar severance payout clause.

In March 2006, the city entered into an employment contract with the former City Manager. The contract provided for 2 years of salary as severance pay if the employee was terminated by the city within the first 18 months of employment. If the employee was terminated with 18 to 48 months of employment, the severance pay would be 9 months of salary. Termination after 48 months of employment resulted in severance pay equal to 6 months of salary. In addition, the severance provision included 6 months of health insurance benefits and a contribution to the employee's 401(a) retirement plan.

In April 2010, the former City Manager and City Council agreed to a resolution for termination of employment. The effective termination date was only 8 days before the former City Manager's completion of 48 months of employment. If the City Council had waited to agree to this resolution, the former City Manager would have been entitled to only 6 months of severance instead of 9 months. As a result, the city paid a severance amount to the former City Manager of approximately $97,400, instead of approximately $68,800.

In July 2010, a new City Manager was hired and his employment contract contains the same severance package. The employment contract does not provide for a probationary period which would allow the City Council to terminate employment without paying a severance package.

State law does not expressly prohibit severance package provisions in contracts for top administrative employees; however, should the City Council wish to terminate the contract, buyout terms can prove costly. As a result, the City Council needs to reevaluate its practice of providing large severance packages.

Recommendation

The City Council should ensure the employment contract for its city manager is in the best interest of the city, and limit the city's potential liability for termination pay.

Auditee's Response

The City Council provided the following written response:

The employment contract with the current City Manager has been approved by the City Council and entered into with the new City Manager. Further consideration will be given to reviewing the severance provisions in future contracts.

3. Cost Allocations and Administrative Transfers

While some central service department costs (such as accounting, payroll, and the city garage) are allocated to various departments of the city based on full time equivalent positions or other documented methods, other costs including salaries and benefits are allocated based only on estimates. Allocations without appropriate supporting documentation totaled over $900,000.

Timesheets do not indicate hours worked by activity for each employee nor has the city performed a time study to serve as a basis for allocating salary and fringe benefits to the appropriate funds. Administrative transfers from the Solid Waste Fund and the Sewer Lateral Fund to the General Fund totaled approximately $177,000 and $47,000, respectively, during the year ended June 30, 2010.

Other expenses are also allocated to functions based on estimates without documentation of how the allocation was determined. The cost of the city's annual audit, approximately $43,000 during 2010, was allocated to various city funds. In addition, the city allocated $40,000 from the Economic Development Sales Tax Fund and $4,000 from the Library Fund to the General Fund for administration costs. There were also allocations of administrative costs from the Commission for Access and Local Original Programming Fund to the General Fund of approximately $9,000. Financial system maintenance fees of approximately $2,800 are charged to the Library Fund without any supporting documentation. Further, contributions to the Non-Uniformed Pension Fund, totaling approximately $593,000, were allocated to various city funds and departments based on estimates from several years ago.

To ensure restricted funds are spent appropriately and expenditures are allocated to various funds in proportion to the benefits received, the city should ensure the allocation of costs is supported by adequate documentation.

Recommendation

The City Council ensure all expenditures are properly allocated to the various funds and all transfers between funds are adequately documented.

Auditee's Response

The City Council provided the following written response:

The City concurs with this recommendation and will implement this procedure with the fiscal year 2011-2012 budget.

4. Legal Services

Legal services are procured without a competitive process, the city does not have written contracts for legal services provided, and the city has not performed a cost analysis to determine if outsourcing legal services is cost beneficial. In addition, an agreement with the City Attorney was not reviewed by an independent attorney prior to execution, and the city incurred unnecessary legal and settlement costs due to not filing an insurance claim timely. The city employs a City Prosecutor on a full time basis at a salary of approximately $35,000 per year. This person also serves as City Attorney on a fee for service basis and was paid approximately $43,000 for City Attorney services during the year ended June 30, 2010. The city paid for additional legal services, totaling approximately $189,000, during the year.

4.1 Proposals for legal services

The city has not obtained proposals for legal services. The city hires various law firms based on the type of specialized services needed. In addition, the City Attorney is also considered a contracted position and is paid at an hourly rate. However, the city does not solicit proposals for legal services and has used the same individual as City Attorney since 1994 without periodically soliciting proposals for this position.

While professional services, such as attorneys, may not be subject to standard bidding procedures, the city should solicit proposals for legal services to the extent practical. Soliciting proposals and subjecting such services to a competitive selection process does not preclude the city from selecting the vendor or individual best suited to provide the service required. Such practices help provide a range of possible choices and allow the city to make a better-informed decision to ensure necessary services are obtained from the best-qualified vendor at the lowest and best cost.

4.2 Retainer Agreement

The city did not have an independent attorney review a retainer agreement with the City Attorney until 5 years after the agreement was signed. The agreement related to a class-action lawsuit including several cities against various telephone companies and provided a contingency fee of 25 percent

of any such recovery, based on various criteria provided in the agreement, be paid to the two lead special counsel (one of whom was the City Attorney) and an associate special counsel. Because the settlement fees are not paid directly by the city, the city did not have the records documenting the total attorney fees. The net amount received by the city from this litigation through June 30, 2010, was approximately $2.9 million. In addition, there is no documentation in the meeting minutes to indicate this retainer agreement was formally approved by the City Council.

Considering the City Attorney's advisory relationship with the City Council and to avoid the appearance of a conflict of interest, an independent attorney should be retained to review any potential contracts with the City Attorney which provide for legal services in addition to normal City Attorney duties. Additionally, all legal services contracts should be formally approved by the City Council.

4.3 Contracts for legal services

The city has not entered into written contracts with the various law firms providing legal services to the city. While there is some documentation of the fee amounts charged by these firms, there are no formal contracts specifying the terms of service and related compensation. For example, the only documentation of the city attorney's hourly rate is an email dated July 2006 from the City Manager indicating the City Council approved a rate of $135 per hour.

Section 432.070, RSMo, requires contracts of political subdivisions be in writing. A written contract, signed by the parties involved, should specify the services to be rendered and the manner and amount of compensation to be paid. Written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to provide protection to both parties.

4.4 Cost analysis

The city has not performed a cost analysis to determine if legal services should be performed in-house or continue to be outsourced. All legal services are outsourced including general services provided by the City Attorney. Without a cost analysis, the city cannot ensure the services are obtained in the most economical way.

4.5 Litigation procedures

Due to the failure to inform its insurance company of a claim in a timely manner, the city incurred approximately $146,000 in legal and settlement fees. A city employee filed a discrimination lawsuit against the city in May 2009. The city was required to notify the insurance company of possible litigation within 30 days after the end of a policy period. The policy period expired on June 30, 2009, but a claim was not filed by the city with the insurance company until September 2009. As a result, the costs of the litigation and settlement were not covered under the insurance policy. The insurance policy would have limited the costs of the litigation and settlement to a $15,000 deductible.

To reduce the city's exposure to unnecessary legal expenses, the city should ensure all insurance claims are filed timely.

Recommendations

The City Council:

4.1 Periodically solicit proposals for legal services and maintain all related documentation, including reasons for the city's decisions.

4.2 In the future, retain an independent attorney to review potential contracts which could result in a conflict of interest for the City Attorney and ensure approval of all legal service contracts are formally documented.

4.3 Enter into written agreements for all services.

4.4 Perform a cost analysis to determine the most cost effective method of obtaining legal services.

4.5 Improve procedures to ensure insurance claims are filed in a timely manner.

Auditee's Response

The City Council provided the following written responses:

4.1 The City concurs with this recommendation and plans to solicit proposals for legal services and document the City's decisions during 2011.

4.2 The City agrees with this recommendation. Whenever an issue arises regarding legal work outside the City Attorney's normal duties or where a potential conflict of interest might exist with the City Attorney, the City Council will be advised of the situation and will authorize hiring an independent attorney to review the issue. This authorization will be documented in meeting records.

4.3 All future legal services contracts will be handled through written agreements.

4.4 The City agrees to perform a cost analysis to determine whether in-house or outsourced services are most cost effective for the City by September 2011.

4.5 The City has implemented improved procedures to assure the timely filing of insurance claims.

5. Parking Garage Operations

A review of the city parking facility identified weaknesses in oversight of the parking facility management contract. In addition, the management contract has not been rebid since 1997, and the city has not performed a cost benefit analysis to determine if the city should manage the parking garage in-house or if the management should continue to be outsourced. According to city records, for the year ended June 30, 2010, revenues and expenses for parking facility operations totaled approximately $222,000 and $148,000, respectively.

The city entered into an agreement with a company to manage the day-to-day operations of the parking facility. The management company collects receipts from monthly permits and daily users, and the city collects receipts from the parking facility for parking meters, retail rental, etc. The management company is entitled to operational expenses plus a management fee and sends the city a check for receipts in excess of expenses.

5.1 Contract oversight

The city has not adequately monitored the operations of the parking contractor. In addition, monthly reports showing receipt and operating expense information submitted by the company contain only general information and do not contain detailed supporting documentation, such as invoices. The contract does not currently require detailed supporting documentation be submitted with the monthly reports; however, without this documentation, the city cannot be assured the related operating expenses are necessary and reasonable for the parking garage operations.

The agreement with the parking facility contractor provides the city the right to examine the accounting records of the management company at any time; however, the city has not performed a review of these accounting records, or of parking cash collections and receipt transmittal procedures. If monthly revenues of the parking garage exceed expenses and the management fee, the difference is remitted to the city along with the monthly report. However, if the monthly revenues are insufficient to cover the monthly operating expenses and the management fee, the city pays the contractor the difference. Operating expenses and management fees for the year ended June 30, 2010, totaled $142,000, and $6,000, respectively.

By not conducting a review of the management company's receipt procedures and accounting records, the city cannot ensure the amount of revenues and operating expenses are accurate. A periodic review of the accounting records would help ensure the city is receiving the proper amounts. In addition, adding language to the contract to require the submission of supporting documentation with monthly reports would help ensure only actual and necessary operating expenses of the parking contractor are incurred.

5.2 Rebidding

The city has been using the same management company to run the day-to-day operations of the parking facility since 1997, and has not periodically rebid this service. According to the contract, the company receives $500 per month unless gross revenues exceed $150,000 per year, in which case the rate increases to $650 per month. Periodically rebidding ongoing services helps ensure the city receives these services at the lowest and best price.

5.3 Cost benefit analysis

City management has not performed a cost analysis to determine if parking facility management should be performed by city employees or continue to be outsourced. In addition, a formal analysis of the parking facility's profit or loss is not prepared and presented to the City Council. Without a cost analysis which could be presented to the City Council for review, the city cannot ensure the services are provided in the most economical way.

Recommendations

The City Council:

5.1 Ensure a periodic review is conducted of the parking facility management company's records and cash collection and transmittal procedures, as allowed by the contract. In addition, the City Council should update the contract to require reimbursement requests include adequate supporting documentation.

5.2 Ensure bids are periodically obtained for management services provided to the city.

5.3 Perform a cost analysis to determine the most cost effective method of managing the parking garage.

Auditee's Response

The City Council provided the following written responses:

5.1 The City will begin performing reviews of the current contractor's procedures and records by April 2011 and will immediately work to update the contract to include requiring supporting documentation on reimbursement requests from the management company.

5.2 The City concurs with this recommendation and plans to solicit proposals for a parking management contract during 2011.

5.3 The City agrees to perform a cost analysis to determine whether in-house or outsourced parking management services are the most cost effective by August 2011.

6. Accounting Controls

Concerns were noted with various accounting issues including transmittals, receipt slips, segregation of duties, bank reconciliations, and escrow accounts.

6.1 Collector's Office

Controls over receipts in the Collector's Office are not sufficient. The Collector's Office, which is part of the Finance Department, is the central collection point in the city for trash bills, permits, licenses, etc. In addition, the Collector's Office receives transmittals of monies collected by other city departments such as Community Development and Parks, Recreation, and Forestry. All monies received are entered into the computer accounting system which generates a receipt number. For the year ended June 30, 2010, the Collector's Office collected approximately $12.2 million.

- The Collector's Office does not print and return the computer generated receipt slip to other city departments for transmittals of monies. As a result, there is no assurance the amounts transmitted to the Collector's Office from the various city departments are properly recorded into the accounting system and deposited.

  Transmittals are dropped off at the Collector's Office by the various departments, but are counted and entered into the accounting system by the Collector's Office employees at a later time. The transmittal forms are stamped as received by the Collector's Office and are sent back to the respective city departments the next day without a receipt slip. Therefore, the departments cannot perform a reconciliation between the transmittals submitted to the Collector's Office and the receipt slips generated from the Collector's Office accounting system.

- The numerical sequence of receipt slips in the Collector's Office is not accounted for properly. Personnel indicated that since the computer system issues the receipt slip numbers and the daily reports show the receipts issued for the day, they did not think a review of the sequence was necessary. However, our review noted some receipt slip numbers missing from the daily reports.

To provide assurance that all monies have been transmitted and deposited, transmittals should be counted immediately by the Collector's Office and a receipt slip should be issued to the city departments for each transmittal of monies, with the total reconciled to receipts collected by the departments. In addition, to ensure all monies received are properly recorded and deposited, the numerical sequence of receipt slips should be accounted for properly.

6.2 Segregation of duties

Cash custody and accounting duties have not been adequately segregated in the Community Development Department. There are several clerks in the department with responsibilities for collecting monies; however, the Executive Secretary also records transactions, approves voids, and prepares transmittals to the Collector's Office in addition to collecting monies. There is no documented supervisory review or comparison of the monies received

by the Executive Secretary to amounts transmitted to and received by the Collector's Office.

Proper segregation of duties is necessary to ensure all transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of duties cannot be achieved, an effective supervisory review should be performed and documented.

6.3 Numerical sequence of receipt slips

Various concerns were noted related to the numerical sequence of receipt slips.

The Parks, Recreation, and Forestry and the Community Development Departments do not account for the numerical sequence of receipt slip numbers. The Parks, Recreation, and Forestry Department collects monies at both the golf course and the recreation center. These two separate locations share the numerical sequence of receipt slips through a computer system. As each location issues a receipt slip, it is given the next number in the sequence. There is no procedure at the recreation center to account for the numerical sequence of receipt slips issued. The golf course manager stated he conducts random checks of cash register drawer monies and receipts, but does not document his review. For the year ended June 30, 2010, the Parks, Recreation and Forestry Department collected approximately $1.7 million in fees and the Community Development Department collected approximately $627,000 for permits, inspections, etc.

Personnel in each department told us all receipt numbers are issued in numerical sequence by the computer system and are included in the system-generated daily reports reviewed by management; therefore, they did not think a review of the numerical sequences was necessary. However, we noted the daily reports do not always include all transactions, and therefore, the reports reviewed by management are not always accurate and cannot be relied upon to ensure all transactions are reviewed.

To ensure all monies received are properly recorded and deposited, the numerical sequence of receipt numbers should be accounted for properly.

6.4 Bank reconciliations

Bank reconciliations have not been performed on a timely basis for the General Fund bank account. The Finance Director indicated as of July 2010, the General Fund account was reconciled through August 31, 2009, but reconciliations had not been performed on the account since then. The city was behind in performing the reconciliations due to needing to post various journal entries, as well as changes in personnel who were performing the work in the Finance Department.

Monthly bank reconciliations are necessary to ensure the accounting records are in agreement with bank records and to help detect errors on a timely basis.

6.5 Escrow accounts

The Community Development Department does not have access to view escrow account balances in the Finance Department accounting system; therefore, Community Development personnel cannot verify monies held in trust for various local businesses are sufficient to cover the services requested by these businesses.

The Community Development Department receives monies from local businesses which are deposited with the city in an escrow account. The businesses then access services through the Community Development Department such as obtaining inspections, permits, etc. The fees for these services are deducted from the applicable business account with the city. However, the Community Development Department does not have access to view these accounts in the city's computerized general ledger account, and must authorize these services without knowing if the business has an adequate balance in its account to cover the related fees.

The Community Development Department provides the Finance Department with daily reports of authorized services for which the Finance Department reduces the applicable account balances. As of June 30, 2010, the overall escrow account had a balance of approximately $33,000 covering 13 accounts with local businesses. Our review of the 13 accounts noted 6 had negative balances totaling approximately $8,100. If the Community Development Department had access to the computer general ledger accounts, personnel could verify the accounts had positive balances before authorizing services, thereby ensuring the city is receiving proper compensation for all services rendered.

To ensure proper accounting and reporting of escrow account transactions, the Community Development Department should have access to view the escrow account balances maintained in the Finance Department accounting system. Without this access, the city is at risk of providing services without proper payment.

Recommendations

The City Council:

6.1 Require the Collector's Office to immediately issue receipt slips for all monies transmitted from other city departments, and ensure these receipt slips are reconciled to amounts transmitted by the city departments. In addition, the City Council should ensure the numerical sequence of receipt numbers are accounted for properly.

6.2 Segregate the accounting duties of the Community Development Department to the extent possible. If proper segregation of duties cannot be achieved, timely supervision or independent review of the work performed and investigation into unusual items and variances is necessary.

6.3 Ensure the numerical sequence of receipt numbers are accounted for properly.

6.4 Ensure bank reconciliations are prepared monthly and retained for all accounts.

6.5 Ensure the Community Development Department is granted access to view escrow balance data from the Finance Department accounting system.

Auditee's Response

The City Council provided the following written responses:

6.1 This recommendation will be implemented by April 2011.

6.2 This recommendation has been implemented.

6.3 The City will perform a monthly analysis of receipt numbers and permits by April 2011 to assure proper accounting.

6.4 All reconciliations have been completed for the period under the audit. This recommendation is under implementation currently and will be complete by June 2011.

6.5 This recommendation has been implemented.

7. City Budget and Financial Reports

Concerns were noted with the approval of the city budget and submission of financial reports to the City Council.

7.1 City budget

Due to an oversight in budget preparation, the Finance Director made changes to the city budget without approval by the City Council. As a result, the fiscal year 2011 city budget did not agree with the budget resolution approved by the City Council on June 21, 2010. The resolution approved total budgeted expenditures for all funds of $43,107,340; however, the budget used by city employees and presented on the city website had total budgeted expenditures for all funds of $43,383,340, or a difference of $276,000. This difference is due to a streetscape project in the Economic Development Sales Tax Fund, which was added by the Finance Director after the City Council approved the budget. City Charter, Article 6, Section

35 provides the City Council will adopt the city budget which will be in effect for the fiscal year.

A thorough review process should be implemented to ensure budget documents are accurate and complete prior to approval. If changes need to be made to the budget after initial approval, a budget amendment should be formally approved by the City Council.

7.2 Financial reports

The City Council does not receive financial reports in a timely manner. A budget-to-actual financial report, summarizing revenues and expenditures by fund, is prepared quarterly by the Finance Director for review by the City Council and City Manager; however, a quarterly review of financial reports is not often enough for the City Council to make proper management decisions.

Financial reports showing revenue sources and expenditures should be prepared for each fund on a monthly basis and used for comparison to budgeted amounts and overall review of city operations. These reports are necessary to provide accurate and timely financial information to city officials upon which effective management decisions may be made.

Recommendations

The City Council:

7.1 Ensure proper compilation and review procedures are in place and the entire budget is properly approved.

7.2 Ensure financial reports are presented and approved by the City Council on a timely basis.

Auditee's Response

The City Council provided the following written responses:

7.1 The City concurs with the Auditor recommendation and will assure future budget documents are accurate.

7.2 The City will begin distributing monthly reports to the City Council in February 2011.

8. Minutes, Meetings, and Public Records

Concerns were noted with procedures regarding closed City Council meetings, the failure to maintain a log of public records requests, and the retention of auxiliary minutes.

8.1 Closed meetings

From July 2009 through October 2010, the city did not document the reasons or the votes regarding meeting closure for six closed meetings of the City Council. The Council went directly into closed meetings without first starting in open session and holding a vote to close the meeting, as required by law. As a result of these issues, the public may not be aware of the

discussions and votes held in these closed meetings. In addition, documented public notices were only retained for one of the meetings.

Section 610.022, RSMo, requires that before any meeting may be closed, the question of holding the closed meeting and the reason for the closed meeting shall be voted on at an open session. In addition, Section 610.020, RSMo, requires public notice of all meetings to assure public awareness of the meetings.

8.2 Sunshine request log

Although city personnel indicated public requests are handled in a timely manner, the city does not maintain a log of public requests to ensure all requests are handled in compliance with the Sunshine Law.

Section 610.023, RSMo, provides each request for access to public records shall be acted upon as soon as possible, but in no event later than the end of the third business day following the date the request was received by the custodian of records of a public governmental body. If access to the public record is not granted immediately, the custodian shall give a detailed explanation of the cause for further delay and the place and earliest time and date that the record will be available for inspection.

To ensure compliance with state law, the city should document adequate information in a log to determine if requests are completed timely and all requests are adequately filled. Necessary information includes, but is not limited to, the date of request, a brief description of the request, the date the request is completed or reason why the request cannot be completed, and any associated costs of filling the request.

8.3 Custody of minutes

The minutes and records of meetings of city affiliated boards, committees, and commissions were not always maintained by the City Clerk, the official custodian of records.

Complete and accurate minutes provide an official record of board, committee, and commission actions. In addition, Section 610.020, RSMo, requires minutes be taken and include the date, time, place, members present, members absent, and a record of votes taken.

Recommendations

The City Council:

8.1 Ensure votes to close a session are documented in open meeting minutes, along with the reason for closing the session.

8.2 Maintain a public request log to help ensure the city is complying with state law.

8.3 Ensure copies of meeting minutes of city affiliated boards, committees, and commissions are maintained by the City Clerk.

Auditee's Response

The City Council provided the following written responses:

8.1 This recommendation has been implemented.

8.2 This recommendation has been implemented.

8.3 This recommendation will be implemented by May 2011.

9. Personnel

Concerns were noted with personnel issues including the city salary survey and leave balances.

9.1 Salary survey

The salary survey conducted by the city in the spring of 2008 did not use cities of comparable size. As a result, it is unclear if the salaries of higher level city employees are in line with the same positions in similar cities. According to city personnel, the city's goal is to pay employees in the top 20 percent of surveyed cities. The city used a website service which compiled average salary information of various similar positions (as applicable) in 42 other cities in the St. Louis Metropolitan area. However, city personnel could not demonstrate the survey results were comparable to University City since many of the cities used as the basis for the average salaries were much larger or much smaller than University City. Our review of 12 positions included in the survey indicated the city's salaries ranked in the top 3 for 10 of these positions compared to other cities with similar positions. The city was ranked number one for four of these positions.

A salary survey should only include cities which are similar in size and organization. The results would better reflect the salaries paid in the region and allow the city to make a more informed decision regarding salary levels of employees.

9.2 Leave balances

Accumulated vacation and sick leave balances for some employees exceeded maximums allowed by the city. Administrative Regulation number 9 states vacation time will not be permitted to accrue beyond the amount granted annually. The maximum amount of vacation which can be earned in a year for employees with 20 years of service is 24 days or 192 hours. The leave balance report for June 14, 2010, showed five individuals with vacation balances exceeding this maximum, ranging from 277 to 376 hours. City personnel indicated the normal practice is to enforce the vacation maximum only on a cut-off date of December 31 each year. Employees are allowed to accumulate above the maximum during the year until the cut-off date. However, the city regulation does not specifically discuss or allow this practice. In addition, city regulations do not clearly indicate how much vacation time will be paid out to a terminated employee if accrued vacation leave is above the maximum allowed.

In addition, Administrative Regulation number 8 indicates unused sick leave may be accumulated to a total not to exceed 720 hours for full-time

employees. However, the leave balance report for June 14, 2010, showed a sick balance of 736 hours for several employees. City personnel indicated this was a computer error which occurred with the conversion to a new payroll accounting system in January 2010; however, as of July 2010, this error had not been corrected.

To ensure all employees are treated consistently, the city should comply with its administrative regulations. City regulations should be updated to reflect practices of the city regarding the maximum vacation cut-off date and how much vacation will be paid out if an employee is terminated. In addition, by allowing accumulation of leave balances in excess of the maximum hours provided by city regulations, the city risks incurring unnecessary leave liability expense.

Recommendations

The City Council:

9.1 Ensure cities included in future salary surveys are similar in size and perform additional analysis regarding salaries.

9.2 Ensure city administrative regulations are followed regarding maximum vacation and sick leave balances. In addition, regulations should be updated to reflect city practices regarding cut-off dates for maximum vacation accruals and how much vacation will be paid out to employees upon termination.

Auditee's Response

The City Council provided the following written responses:

9.1 The City concurs with this recommendation and during 2011 will choose comparable cities with which to use in future salary analysis.

9.2 The City concurs with this recommendation and will address this policy by June 2011.

10. Emergency Plan

The city does not have an approved formal emergency contingency plan for its computer systems. The city has been in the process of developing a plan for several years, but a plan had not been finalized as of December 2010. Contingency plans should include consideration for a variety of situations, such as short- and long-term plans for backup hardware, software, facilities, personnel, and power use. Involvement of users in contingency planning is important since users will likely be responsible for maintaining at least a portion of the backup under various contingencies. The major benefit of a thorough disaster recovery plan is the ability of the city to recover rapidly from disaster or extraordinary situations that might cause considerable loss or disruption to the city. Because of the city's degree of reliance on technology, the need for contingency planning is evident.

Recommendation

The City Council develop a formal contingency plan for the various computer systems.

Auditee's Response

The City Council provided the following written response:

The City concurs with this recommendation and will complete a formal disaster contingency plan during 2011.

City of University City
Organization and Statistical Information

The City of University City is located in St. Louis County. The city was incorporated in 1906 and is currently a constitutional charter city. The city employed 263 full-time employees and 143 part-time employees on June 30, 2010.

City operations include fire services, law enforcement services, trash collection, street maintenance, permits and inspections, recreational facilities, and community and economic development activities.

Mayor and City Council

The city government consists of a mayor and six-member city council. The city has a council-city manager government. The city manager is appointed by the city council for an indefinite term, and, among other things, is responsible for the day to day operations of the city, ensures the municipal code is implemented, prepares an annual budget to be submitted to the city council, and supervises department heads and other city employees. The acting City Manager at June 30, 2010, was Janet Watson.

The members of the city council are elected for 4-year terms. The mayor is elected for a 4-year term, presides over the city council, and votes on all matters. The Mayor and City Council at the year ended June 30, 2010, are identified below. The Mayor is paid $400 per month and the City Council members $200 per month. The compensation of these officials is established by the city charter.

Shelley Welsch, Mayor
Stephen Kraft, Councilmember
Terry Crow, Councilmember
L. Michael Glickert, Councilmember
Lynn Ricci, Councilmember
Arthur Sharpe, Jr., Councilmember
Byron Price, Councilmember

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

According to city personnel, the city was awarded the following American Recovery and Reinvestment Act of 2009 funding:

A $2,612,197 Assistance to Firefighters Fire Station Construction Grant was awarded by the U.S. Department of Homeland Security for construction of a replacement fire station. During the year ended June 30, 2010, $17,711 was expended for architectural design work and $4,117 was received by the city related to this grant.

A $559,785 Community Oriented Policing Services (COPS) Hiring Recovery Program (CHRP) grant was awarded by the U.S. Department of Justice to pay 100 percent of three police officer salaries and benefits for 3 years beginning December 2009. This grant funds one position that had previously been eliminated and maintains two other positions previously

planned for elimination. The grant requires these positions be maintained for at least a year after the end of the grant period. During the year ended June 30, 2010, $96,796 was expended and $49,682 was received by the city related to this grant.

A $122,673 Recovery Act: Edward Byrne Memorial Justice Assistance Grant Program Local Solicitation grant was awarded by the U.S. Department of Justice for the purchase of police equipment. During the year ended June 30, 2010, no funds were expended and $122,673 was received by the city related to this grant.

A $149,600 Energy Efficiency and Conservation Block Grant was awarded by the U.S. Department of Energy for energy savings. The city is performing a green house gas inventory, evaluating street lighting, and contracting for an energy audit. During the year ended June 30, 2010, $17,998 was expended to purchase a GPS device and pay the salary of an intern to map city street lights and perform data entry for a green house gas inventory. A total of $16,253 was received by the city related to this grant.

Thomas A. Schweich

Missouri State Auditor

Transportation Development Districts

March 2011

Report No. 2011-13

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Transportation Development Districts as of December 31, 2008

Background	As of December 31, 2008, 154 Transportation Development Districts (TDDs) had been established, with reported total estimated transportation project costs of over $1.5 billion and reported total anticipated revenues of over $1.8 billion. The 2008 TDD audit report provides information regarding the 154 TDDs and presents audit results for 16 specific TDDs: Lee's Summit Missouri New Longview; Branson Regional Airport; BaratHaven; College Station; Briarcliff Parkway and Highway 9; Fulton South Business 54; Crackerneck Creek; Arnold Triangle; Broadway Hotel; University Place; U.S. Highway 50/63 and City View; Cornerstone Pointe; Town and Country Crossing; Belton/Raymore Interchange; 1200 Main/South Loop; and Gans Road and U.S. 63.
Construction Contracts and Expenditures	TDDs need to improve their procurement practices. Some TDDs did not solicit proposals for construction management, choosing instead a related party of the developer or a service provider the owner/developer used before. State law requires competitive bidding for certain TDD construction contracts, and competitive bidding helps ensure the district is getting the best value and gives all parties an equal chance to participate in district business.
Engineering Services	Four TDDs failed to document the evaluation and selection of engineering services.
Budgetary Matters	Several TDDs exhibited problems with their budgets, including mathematical errors, deficits, or overspending. One TDD did not prepare a budget at all, while other budgets were incomplete or untimely.
Financial Reporting	The following 11 TDDs failed to file the required financial report for 2008: Truman Road; Country Club Plaza of Kansas City, Missouri; CenterState; 71 Highway & 150 Highway; Southtown; St. Charles Riverfront; Northwoods; 1717 Market Place; Tuscany Village; Harrisonville Market Place A; and Harrisonville Market Place B. Another five filed their 2008 financial reports after the deadline, and an additional five failed to file their 2007 financial reports.
Related Party Transactions	One TDD selected a subsidiary of the developer as its construction manager. Such related party transactions can create conflicts of interest and lead to questions regarding whether the TDD is receiving the best value for its dollars.

Financial Condition	One TDD may not be able to meet its financial obligations and fully reimburse the developer for transportation-related costs unless it improves its revenue streams.
Compliance with Prevailing Wage Laws	One TDD was unable to document that contractors complied with prevailing wage laws because it did not retain the affidavits of compliance it received from the contractors.
Additional Comments	The Crackerneck Creek TDD did not maintain and was unable to obtain documentation to verify project costs, bidding of contracts, or debt service obligations, which impaired the audit staff's ability to conduct a thorough audit. On a positive note, audits of the following TDDs noted no matters which required reporting: Branson Regional Airport; College Station; University Place; U.S. Highway 50/63 and City View; and 1200 Main/South Loop.

Because of the compound nature of this audit report, no overall rating is provided.

American Recovery and Reinvestment Act (Federal Stimulus)	The TDDs did not receive any federal stimulus monies during the audited time period.

STATE AUDITOR'S REPORT

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly

We have audited transportation development districts (TDDs) established in the state of Missouri. The audit was conducted relative to our responsibilities pursuant to Section 238.272, RSMo. The scope of our audit included, but was not necessarily limited to, TDDs established since the inception of the Transportation Development District Act in 1990 through December 31, 2008. The objectives of our audit were to:

1. Report selected information regarding the various TDDs.

2. Determine and report the TDDs' estimated transportation project costs, as well as the total revenues those entities expect to collect, as reported by the individual TDDs.

3. Provide an update on the status of public awareness/involvement, accountability, and compliance issues which were reported in our initial audit of TDDs (Report No. 2006-12, *Transportation Development Districts*, issued in March 2006).

4. Perform and report on audit work related to 16 selected TDDs that were established in 2006 or prior, involving a more in-depth review of the districts' transportation projects, financial activity, procurement practices, and statutory compliance.

Our methodology included reviewing financial reports or audits filed with the State Auditor's office and information maintained by the Missouri Department of Transportation (MoDOT); reviewing minutes and financial records and other information maintained by or received from various TDD officials/representatives and municipal officials; testing selected transactions; and interviewing various TDD officials/representatives and municipal officials. Some of the selected TDDs had engaged independent auditors to audit their financial statements for the years under review. To minimize duplication of effort, we reviewed the reports and substantiating working papers of the applicable independent auditors.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the

P.O. Box 869 • Jefferson City, MO 65102 • (573) 751-4213 • FAX (573) 751-7984

United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Scope and Methodology and Observations and Results sections present our comments, observations, and results regarding our audit of the transportation development districts.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Gregory A. Slinkard, CPA, CIA
In-Charge Auditor:	Jennifer Carter
	Robert L. McArthur II
Audit Staff:	Kenneth Erfurth

SCOPE AND METHODOLOGY

TRANSPORTATION DEVELOPMENT DISTRICTS
SCOPE AND METHODOLOGY

Sections 238.200 to 238.280, RSMo, allow for the formation of transportation development districts (TDDs). These entities are separate political subdivisions established and organized for the construction of roads, bridges, interchanges, or other transportation-related projects. The construction of these transportation-related projects may include the acquisition of property (generally right-of-way and/or easements). The projects are generally financed through the issuance of notes, bonds, or other debt securities for a period not to exceed 40 years. Therefore, most TDDs generally will not exist for more than 40 years. A TDD is governed by a board of directors of not less than 5 nor more than 15 members. The boards have the authority (after qualified voter approval[1]) to impose sales taxes or tolls, or levy property taxes or special assessments within the boundaries of the TDD to pay the expenditures of the entity, including the liquidation of debt incurred to fund the transportation-related projects. The revenues of a TDD, the majority of which are sales taxes, can only be used for transportation-related projects.

The process of establishing a TDD is initiated by the filing of a petition in the circuit court of the county where the proposed district is located. Such a petition can be filed by: (1) not less than 50 registered voters within the proposed TDD; (2) by all the owners of real property located within its proposed boundaries, if there are no eligible registered voters residing within the proposed district; (3) a local transportation authority; or (4) two or more local transportation authorities. A local transportation authority includes a county, city, special road district, or any other local public authority having jurisdiction over transportation projects and services.

For those TDDs established as of December 31, 2008, most of the petitions initiating their establishment were filed by the owners of the property located within the proposed district. See Appendix A for a complete list of all TDDs established as of December 31, 2008, and information regarding their establishment.

State law requires a copy of the petition filed to establish a TDD be provided to the Missouri Highways and Transportation Commission (highway commission) and each affected local transportation authority. Those entities are then allowed to file an answer stating agreement with or opposition to the creation of the TDD. In addition, any resident, taxpayer, or any other entity within the proposed TDD may join in or file a petition supporting or answer opposing the creation of the district. The circuit court subsequently hears the case, if necessary, and makes a decision whether to authorize the establishment of the TDD.

Many TDDs are located within a tax increment financing redevelopment (TIF) area. Tax increment financing is authorized pursuant to Sections 99.800 to 99.865, RSMo, and these statutes allow a municipality (a city or county) to approve TIF plans and use new tax revenues generated by development to reimburse certain costs related to that development. See Appendix A for information regarding whether a particular TDD is located within a TIF area.

[1] Section 238.202, RSMo, currently defines qualified voters as any persons residing within the proposed or established TDD who have registered to vote pursuant to Chapter 115, RSMo, and the owners of real property, who shall receive one vote per acre, provided that any registered voter who also owns property must elect whether to vote as an owner or a registered voter.

Section 67.010, RSMo, requires each TDD to prepare an annual budget which represents a complete financial plan for the ensuing fiscal year. In addition, Section 105.145, RSMo, requires each TDD to file an annual financial report with the State Auditor's office (SAO).

Although there is no statutory annual audit requirement, many TDDs have issued bonds and are required to obtain annual audits by the bond covenants or bond underwriter. In addition, Section 238.272, RSMo, provides the SAO shall audit each TDD once every 3 years, and may audit more frequently if deemed appropriate.

Section 238.275, RSMo, provides for the abolishment of a TDD once its projects are completed, ownership of the projects has been transferred to the highway commission or the local transportation authority, and the district has no outstanding liabilities. In addition, a TDD can be abolished if the board of directors determines the projects cannot be completed due to lack of funding or for any other reason. Prior to a TDD submitting the question to abolish the district to the applicable voters, the SAO must audit the TDD to determine its financial status, and whether it can be abolished.

As noted in our previous reports, in April 2007, the SAO was advised of plans to abolish the Eureka South I-44 TDD, in St. Louis County. Because no taxes had been imposed by this TDD nor had any other financial activity occurred, no final audit was required and the TDD was formally abolished in June 2008. In addition, in March 2008, the SAO was advised of plans to abolish the Troy/Lincoln County TDD. The SAO subsequently performed an audit of this TDD (Report No. 2008-71, *Troy/Lincoln County Transportation Development District*, issued in October 2008), and this TDD was formally abolished in January 2009.

Scope

The scope of this audit included, but was not necessarily limited to, those TDDs established since the inception of the Transportation Development District Act in 1990 through December 31, 2008. At December 31, 2008, 154 TDDs had been established in the state of Missouri. Fifty-five of these TDDs were established in 2006 or prior, had existed for portions of at least 3 fiscal years, and had not previously been considered or selected for review by the SAO for at least 3 fiscal years.

Information used to complete this report included:

- TDD annual financial reports or audit reports and related information submitted to and maintained by the SAO.

- The provisions of the Transportation Development District Act, which include Sections 238.200 through 238.280, RSMo.

- A TDD database, petitions, court orders, and related information maintained by the Missouri Department of Transportation (MoDOT).

- Completed questionnaires, received from officials or representatives of the TDDs, which requested information including, but not limited to, estimated project costs, financing obligations, anticipated revenues, and expected life of the respective TDD.

- Communications with, and information received from, various TDD officials/representatives and municipal officials.

- TDD records, including but not limited to agendas and minutes, bank statements, financial records, invoices, budgets, contracts, bid documentation, and/or debt service agreements. These records were maintained by the TDDs or their records custodian.

Methodology

During our audit, we used annual financial reports or audit reports filed by the various TDDs with the SAO as well as an internal database established by the SAO, to identify those TDDs established in 2008 and prior and to account for the various financial reports/audits received.

We gathered additional information regarding the TDDs established in 2008 through discussions with various MoDOT officials and files maintained by that agency. Information obtained included TDD name, location, applicable county/municipality, date established; identity of the individual(s)/entity who filed the petition; the type of funding (i.e., sales taxes, property taxes, etc.); and the funding rate (e.g., 1 percent). Some of this information is presented in Appendix A.

Survey questionnaires were sent to each TDD established in 2008 requesting information including, but not limited to, the geographic location of the TDD, estimated total project costs, how project costs were financed and the amount of that financing, estimated total revenues to be collected and over what period of time, when the collection of revenue and incurrence of expenses started, who was responsible for collection of the revenues and the administering of the funds, whether financial audits have been conducted by an independent auditor, the name of the development and type of businesses in the district, and whether or not the TDD is located in a TIF redevelopment area. Some of the survey information received from the TDDs is presented in Appendix A.

Relative to our audit responsibilities pursuant to Section 238.272, RSMo, we selected and conducted audit work related to various TDDs (the selected districts) based on the significance of their financial activity and/or because their transportation projects had been substantially completed by the end of fiscal year 2008. Those TDDs not selected for review did not have as significant a level of financial activity and/or their transportation projects were not substantially completed by the end of fiscal year 2008.

The selected TDDs included 4 of 26 TDDs that were audited by an independent auditor and 12 of 29 TDDs that were unaudited. The audited TDDs were selected because of the significance of their financial activity, with all of them having recorded project cost expenses in excess of $5 million during the 3 fiscal years ended 2008. The 12 unaudited TDDs were selected because their transportation projects had been substantially completed and significant financial activity

had been incurred by either the district or developer through the end of fiscal year 2008 (these TDDs were established in 2006 or prior). The reported disbursements of the 17 unaudited TDDs that were not selected totaled approximately $9.3 million during the 3 fiscal years ended 2008.

The following table includes the 55 TDDs considered for review during our current audit, including the 16 TDDs selected for review. The TDDs established prior to 2006 were considered for review during a previous audit.

			F/S Audits Performed	Unaudited

(1) Independently audited for fiscal years 2007 and 2008 only.
(2) Independently audited for fiscal year 2007 only.
(3) Independently audited for fiscal year 2008 only.

For the selected TDDs, we obtained requested information through communications with various TDD officials or representatives and municipal officials who have been involved with TDD activities. In addition, we reviewed such information and performed audit work, if determined necessary, on TDD records at TDD/representatives' offices.

This additional review of the selected TDDs was performed to (1) determine and report information including, but not limited to: the establishment of the applicable TDD and taxes imposed, the transportation projects and related costs, how the transportation projects were financed, whether periodic financial audits are conducted, and the extent of any independent financial oversight; (2) report the results of audit work on the selected TDDs in the following areas, including, but not limited to: internal controls, cash, receipts, disbursements, the bidding of construction work and related contracts, and the solicitation of proposals for professional services; (3) determine compliance with certain statutory requirements; and (4) review and report financial data of the selected TDDs. If independent audits were performed of a selected TDD, the supporting working papers were reviewed, and any additional audit procedures were performed as considered necessary.

A Schedule of Receipts, Disbursements, and Cash Balances for the 16 selected TDDs is presented in Appendix C. The financial information presented on this appendix reflects the financial activity and balances of the selected TDDs during the applicable years; however, it does not reflect any project-related costs incurred by the developers that had not yet been reimbursed by the applicable TDDs. In some cases, those unreimbursed developer-incurred costs are substantial. A summary of audit findings reported by the various independent auditors (of the applicable four selected TDDs) is presented in Appendix D.

The 16 selected TDDs did not receive any federal stimulus monies (pursuant to the American Recovery and Reinvestment Act) during the 3 fiscal years ended 2008. However, one instance (Briarcliff Parkway and Highway 9 TDD) was noted during the review of the 16 selected TDDs where MoDOT will fund a related transportation project costing $2.5 million with federal stimulus monies.

Limitations

Some data presented in Appendixes A and C was compiled from survey information submitted by officials/representatives of the various TDDs and the annual financial or audit reports submitted by those districts. This information was not verified for accuracy by us. If any information presented in Appendix A of the prior report was found to have changed since the previous audit, that information was updated on the current appendix. The financial data presented in Appendix C is presented as classified by the TDDs or the independent auditors, if applicable; therefore, some disbursements may be classified in an inconsistent manner. The comments included in Appendix D were extracted from the independent auditors' reports (i.e. non-compliance required to be reported under generally accepted government auditing standards (GAGAS)) or management letters (i.e. internal control weaknesses not required to be reported under GAGAS). These comments were not verified by us through additional audit procedures for accuracy, validity, or completeness.

OBSERVATIONS AND RESULTS

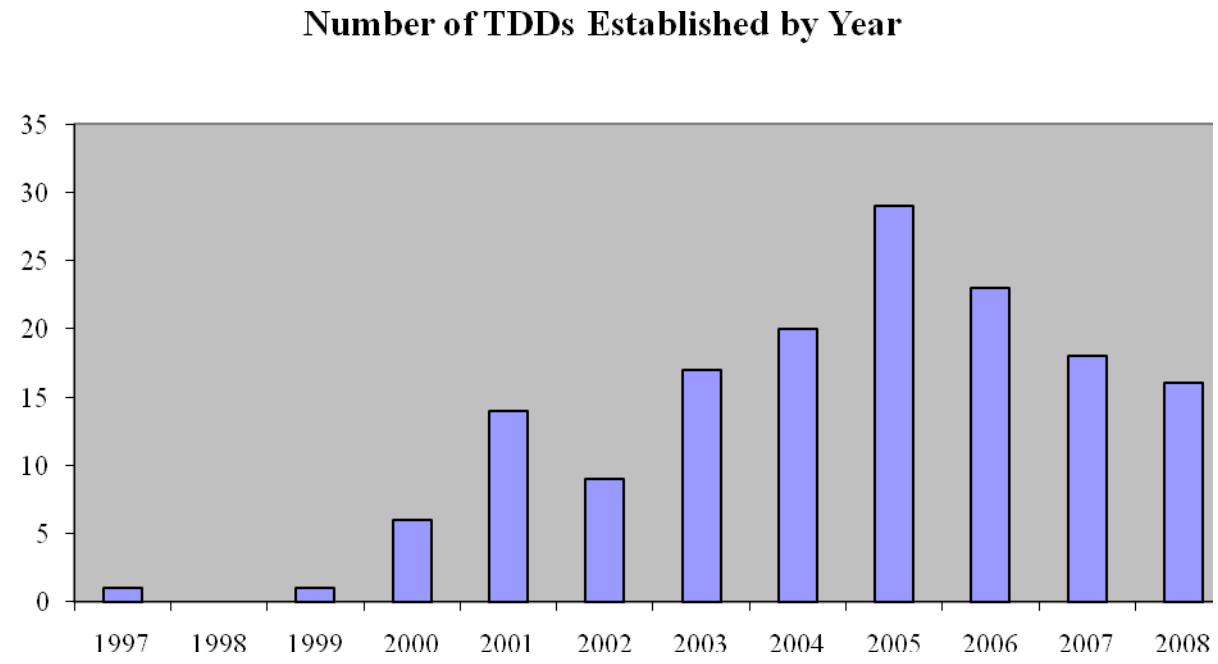
TRANSPORTATION DEVELOPMENT DISTRICTS
OBSERVATIONS AND RESULTS

Background

As of December 31, 2008, 154 transportation development districts (TDDs) had been established in Missouri, including 16 TDDs established in 2008. Over 68 percent of the TDDs have been established in the state's two biggest metropolitan areas, with 71 and 34 of the TDDs being located in the St. Louis and Kansas City metropolitan areas,[1] respectively.

As noted in our previous reports, even though the Transportation Development District Act was enacted in 1990, the first TDD was not established until 1997, apparently the result of statutory changes the General Assembly made that year. In those legislative changes, the General Assembly established another means of creating a TDD, allowing the owners of the real property located within the proposed district to petition for its creation, if there were no registered voters residing within the TDD. Previously, a petition to establish a TDD could only be filed by not less than 50 registered voters residing within the proposed district or by a local transportation authority.

This statutory change resulted in a dramatic increase in the number of TDDs established, with the rate of growth peaking in 2005 and declining since that time, as shown in the following graph.



[1] The St. Louis metropolitan area is defined here as the geographic area that includes the City of St. Louis, St. Louis County, St. Charles County, Jefferson County, and Franklin County. The Kansas City metropolitan area is defined here as the geographic area that includes Jackson County, Platte County, Clay County, and Cass County.

The rate of decline in the number of newly-established TDDs that began in 2006 continued in 2008, with only 16 additional TDDs established during that year. Of the 154 TDDs established as of December 31, 2008, 146 (or 95 percent) were initiated by a petition filed by the property owners.

In a survey of the 154 TDDs established as of December 31, 2008, officials/representatives of the TDDs reported total estimated transportation project costs of over $1.5 billion. In addition, those officials/representatives reported total estimated revenues of over $1.8 billion would be collected over the duration of the respective TDDs. Estimated project costs and anticipated revenue information was not reported for a few of the TDDs because the information had not been determined or could not be located. In one instance, the TDD was determined no longer to be feasible at the present time. Two other TDDs (Harrisonville Market Place A and Harrisonville Market Place B) did not respond to our survey.

The total estimated project costs and anticipated revenue amounts provided by the various TDDs are presented in Appendix A. It appears interest costs on debt and administrative expenses of various TDDs account for the difference when total anticipated revenues exceed total estimated project costs. In other instances where total estimated project costs exceed total anticipated revenues, TDD sales tax revenues are most likely used to pay only a portion of the total project costs, with the remaining project costs funded from other revenue sources (i.e. private financing, other government or TIF funding, etc.).

The table below breaks down the total estimated project costs and anticipated revenues of the 154 TDDs into various dollar ranges.

	Number of TDDs	
Dollar Range	Estimated Transportation Project Costs	Expected Revenues
$0 to $1million	20	14
$1 million to $5 million	61	42
$5 million to $10 million	23	31
$10 million to $15 million	18	12
$15 million to $35 million	21	25
More than $35 million	7	12
Not reported	4	18

In our survey, TDD officials/representatives reported the number of years their respective districts expected to collect revenue (i.e. sales taxes, etc.), which should correlate with the expected duration of the TDDs. Based on this information, the expected duration of the 154 TDDs ranges from 5 to 40 years. Based on information provided, all but six of the TDDs established as of December 31, 2008, have imposed a sales tax, with rates ranging from 1/8-cent (0.125 percent) to 1-cent (1 percent) on retail items sold within TDD boundaries (two TDDs had not yet imposed a sales tax and four have not provided us information regarding whether a sales tax has been imposed or the rate). As a result, all retail establishments located within a TDD that has imposed a sales tax charge a higher total sales tax than retail establishments that lie outside

TDD boundaries. Also, based on information provided by the TDDs, 13 of the 154 TDDs receive revenue from a source in addition to/or in lieu of a sales tax (i.e. special assessment, property tax, parking fee, airport fee, or other related fee).

The boundaries of 63 (41 percent) TDDs, established as of December 31, 2008, were located either completely or partially in a tax increment financing redevelopment (TIF) area. Pursuant to Section 99.845, RSMo, 50 percent of the additional tax revenues generated in such areas are to be used for the purposes of that particular TIF area. After the TIF portion of the TDD revenues are disbursed to the applicable city for deposit into a TIF account, the remaining portion is to be used by the TDD to fund its transportation project(s). However, as noted in previous audits, in some instances the applicable city has allowed the TDD to apply most, if not all, of its sales tax revenue to its own transportation project costs.

Previously Reported Public Awareness/Involvement, Accountability, and Compliance Issues

In our initial audit of TDDs (Report No. 2006-12, *Transportation Development Districts*, issued in March 2006), we reported various issues regarding TDDs in the areas of public awareness/involvement, accountability, and compliance. As reported in our previous audit of TDDs (Report No. 2010-22, *Transportation Development Districts*, issued in February 2010), legislation was passed during the 2009 legislative session, and subsequently signed into law which addressed some of the most significant issues/concerns previously reported. However, one of the issues reported which has not been corrected by legislative action relates to notifying the SAO when a TDD is established.

Section 238.272, RSMo, requires the SAO to audit each TDD at least every 3 years, and more frequently if deemed necessary, and Section 238.275.3, RSMo, requires the SAO to audit a TDD prior to a vote regarding its abolishment. Also, Section 105.145, RSMo, requires all political subdivisions in the state to file an annual financial report with the SAO. Despite these statutory responsibilities given the SAO regarding TDDs, there is no statutory provision which requires the SAO to be notified when a TDD is established.

Although the SAO is contacted by some TDD representatives when a district is established, the SAO has generally had to consult with MoDOT officials to identify newly established TDDs. While these communications with MoDOT have allowed us to identify and track most of the TDDs, there have been a few instances where we later became aware of the existence of a TDD.

The General Assembly should consider further legislation to require the SAO to be notified by TDD officials when a TDD is established.

Current Audit Results

Our current audit disclosed various issues regarding the 16 selected TDDs in the areas of construction contracts, professional services, budgetary matters, financial reporting, and other matters as presented below. This section summarizes the results of the audit work performed

related to those selected TDDs. Some of the problems reported were similarly noted in previous audits.

1. Construction Contracts and Expenditures

Concerns were noted related to the competitive procurement of construction-related contracts and supporting expenditure documentation.

For one TDD, appropriate bidding procedures could not be verified because this information was not maintained by the TDD nor was it provided by the city which had overseen the construction contracts. In addition, adequate documentation to support construction expenditures reimbursed by the TDD were not provided by the TDD or the city. As a result of this situation, the appropriateness of the project costs incurred and reimbursed by the TDD could not be verified.

In addition, for three TDDs, proposals were not solicited for construction management services. In one of these instances, the construction manager was a subsidiary or related party of the developer. In the other two instances, the construction manager was chosen based on the property owner/developer's prior experience with the service provider. Soliciting proposals for such services helps provide a range of possible choices and allows the TDD to make a better-informed decision to ensure necessary services are obtained from the best qualified provider at the lowest and best cost.

Section 238.252, RSMo, requires all construction contracts in excess of $5,000 involving a TDD and a private contractor be competitively bid and awarded to the lowest and best bidder. Formal bidding procedures for major purchases provide a framework for economical management of resources and help ensure the TDDs receive fair value by contracting with the lowest and best bidders. Competitive bidding also helps ensure all parties are given equal opportunity to participate in the TDD's business. Complete documentation should be maintained of all bids received and reasons noted why a bid was selected. In addition, expenditure documentation should be maintained and made available to provide an audit trail.

2. Engineering Services

The evaluation and selection of engineering services was not documented for four TDDs. It is a common practice for substantial costs to be incurred prior to the formal establishment of the TDD, particularly costs related to professional services provided by engineers, architects, and surveyors. Sections 8.285 to 8.291, RSMo, provide guidance on the selection of engineering, architectural, and surveying services.

3. Budgetary Matters

Various problems were noted related to the annual budgets of seven TDDs, and some districts had multiple problems.

- Budgets were incomplete, with actual revenues and expenditures for the preceding 2 years and beginning and ending balances not included (four TDDs).

- The budget was overspent (two TDDs).

- Budgets were not prepared (one TDD).

- Budgets were not approved in a timely manner (two TDDs).

- A budgeted deficit was reflected (one TDD).

- The budget contained mathematical errors (one TDD).

Sections 67.010 to 67.040, RSMo, include provisions regarding annual budgets. These sections require each political subdivision of the state to prepare annual budgets with specific information. A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific cost expectations for each area.

In addition, Section 67.080, RSMo, provides that no expenditure of public monies shall be made unless it is authorized in the budget. The budget process provides a means to allocate financial resources in advance. Failure to adhere to the expenditure limits imposed by the budgets reduces the effectiveness of this process. To be of maximum benefit, budgets should be adopted prior to the beginning of the fiscal year.

4. Financial Reporting

As of December 31, 2009, we identified 21 of 154 TDDs (14 percent) that had not filed one or more annual financial reports with the SAO, as statutorily required. Section 105.145, RSMo, requires all political subdivisions file an annual financial report with the SAO, and 15 CSR 40-3.030 provides if a political subdivision is audited by an independent auditor, a copy of the audit report can be filed in lieu of a separate financial report. The annual financial report is to be filed within 4 months of the entity's fiscal year end, while an audit report can be filed within 6 months of the entity's fiscal year end.

The following table presents the 21 TDDs that had financial activity, but did not file a financial report[2] with the SAO by December 31, 2009, for fiscal years 2008 and/or 2007.

TDD Name	Fiscal Year End	FY 08	FY 07
Truman Road	12/31	X	X
Country Club Plaza of Kansas City, Missouri	12/31	X	X
CenterState	12/31	X	X
Boscherts Landing	12/31	X

Harrisonville Towne Center	12/31		X
Tuscany Village	12/31	X	
CB 5421/5975	12/31		X
Harrisonville Market Place A	12/31	X	X
Harrisonville Market Place B	12/31	X	X

[2] An X indicates a financial report was not filed for that fiscal year.

As of November 30, 2010, only five of the TDDs noted in the table above had provided 2008 and/or 2007 financial reports to the SAO. The TDDs should make every effort to ensure the required annual financial reports/audits are filed by the time frames specified in 15 CSR 40-3.030. There were also five other TDDs that had not filed a report(s) through fiscal year 2008 because no financial activity had occurred. In such situations, a TDD should notify the SAO that it had no financial activity.

The state regulation also provides an audit report submitted to satisfy the financial reporting requirements of Section 105.145, RSMo, should be prepared in conformity with generally accepted government auditing standards (GAGAS). Of the 55 TDDs included in the scope of our 2008 review, 27 districts received independent financial audits. Eight TDDs had audits conducted in accordance with generally accepted auditing standards (GAAS) rather than GAGAS. To fully comply with 15 CSR 40-3.030 reporting requirements, financial audits submitted in lieu of annual financial reports should be conducted in accordance with GAGAS.

5. Other Matters

Related Party Transaction As previously noted, the project construction manager was a subsidiary or related party of the developer in one instance.

Such transactions could represent actual or the appearance of conflicts, could compromise the financial interests of the TDDs, and should be avoided. If these situations cannot be avoided, discussions and decisions concerning situations where potential conflicts exist should be completely documented so the public has assurance that no TDD official has benefited improperly.

Financial Condition In one TDD, the revenues of the district may not be sufficient to meet the financial obligations of the district and fully reimburse the developer for transportation-related costs incurred. The TDD should continue to seek additional and/or improved revenue streams.

Compliance with Prevailing Wage Laws One TDD did not have documentation to indicate contractors complied with prevailing wage laws related to TDD projects. Affidavits of compliance with prevailing wage laws received from contractors were not retained. Sections 290.210 to 290.340, RSMo, include provisions regarding prevailing wages.

Audits of Selected TDDs

The following section reports information related to the 16 individual TDDs selected for review. The selected TDDs include (1) one TDD established in 2003 that had not previously been selected for audit by the SAO, (2) 14 TDDs established in 2006 that had not previously been audited by the SAO, and (3) one TDD selected for audit in a previous report (Report No. 2007-28, *Transportation Development Districts,* issued in July 2007) that had significant construction activity during the current audit period. The selected TDDs are presented in the order of date established. This information was shared with each applicable selected TDD and includes a response from the TDD if provided. A Schedule of Receipts, Disbursements, and Cash Balances for the selected TDDs is located at Appendix C.

- **Lee's Summit Missouri New Longview TDD**

  The Lee's Summit Missouri New Longview TDD was organized in July 2003 by petition of the owner/developer of the property within the proposed TDD. The Board of Directors and officers include associates and employees of the owner/developer.

  The qualified voter of the TDD, in this case the property owner, approved the imposition of a 1-cent (1 percent) sales tax on all transactions which are taxable within the boundaries of the TDD, effective January 2006. The sales tax is currently expected to remain in effect for 20 years, unless terminated sooner. The retail establishments collect the sales tax and forward the collections to the TDD collection agent, the City of Lee's Summit.

The TDD is located in the City of Lee's Summit, in Jackson County, near Missouri Highway 291 and 3rd Street. The New Longview development includes mixed retail, office space, and apartments. The TDD has a fiscal year end of December 31. The TDD has elected not to have separate financial audits conducted beyond the periodic audits performed by the SAO pursuant to Section 238.272, RSMo.

The TDD was formed for the purpose of acquiring property (right-of-way and/or easements) and constructing transportation projects, with a total cost of approximately $10.7 million. The City of Lee's Summit is the public entity with jurisdiction over these projects and accepted dedication of the completed projects.

The TDD is located within a TIF area, therefore, the City of Lee's Summit could claim 50 percent of the sales tax collected for purposes of the TIF. However, the city has agreed the TIF portion of the TDD sales tax will be remitted to the TDD bond trustee and applied to the TDD debt service costs. In addition, the city appropriated monies totaling $5.9 million from its excise tax and capital improvement sales tax funds in fiscal years 2004 through 2008 which were applied to TDD debt service costs related to the construction of Longview Boulevard.

The TDD issued $5.44 million in revenue bonds in 2003 to partially finance the construction of TDD projects. This financing was available as a result of the annual appropriations approved by the City of Lee's Summit. Project costs are paid by the developer and then a reimbursement is requested from the bond funds held by the TDD bond trustee. The developer has signed a reimbursement agreement with the TDD for repayment of the remaining project costs advanced over and above the original bond issue. This was approximately $4.2 million as of December 31, 2008.

The City of Lee's Summit was responsible for overseeing project construction. The city was also responsible for reviewing and approving invoices from the developer for project costs incurred. The TDD funds have been administered by the trustee.

During our audit work related to this TDD, we noted the following:

- The TDD may not generate sufficient revenues over its life to fully reimburse the developer for the project costs previously paid. As of December 31, 2008, the developer had incurred approximately $4.2 million in unreimbursed project costs. During 2008, the TDD had five retail/service establishments in operation which generated about $11,000 in total sales tax revenues. According to a district official, the TDD is considering extending the life of its sales tax to 40 years.

- TDD annual budgets for 2006, 2007, and 2008 did not include some required information, including actual revenues and expenditures for the 2 previous years. In addition, the annual budgets for all 3 years reflected budget deficits, with estimated expenditures exceeding projected revenues and beginning fund balances by substantial amounts.

Sections 67.010 to 67.040, RSMo, include provisions regarding annual budgets.

- The TDD did not submit its 2006, 2007, or 2008 annual financial reports to the SAO in a timely manner. The TDD submitted, at our request, all three reports, as well as the 2009 report, in March 2010.

  Section 105.145, RSMo, requires political subdivisions to file an annual financial report with the SAO and 15 CSR 40-3.030 provides that if a political subdivision is audited by an independent auditor, a copy of the audit report can be filed in lieu of a separate financial report. The annual financial report is to be filed within 4 months of an entity's fiscal year end, but an audit report can be filed within 6 months of an entity's fiscal year end.

Lee's Summit Missouri New Longview TDD did not provide a formal response.

- **Branson Regional Airport TDD**

  The Branson Regional Airport TDD was organized in December 2003 by petition of the owner of property within the proposed TDD (a private for-profit corporation). The Board of Directors and officers include employees of the corporation and its investors.

  A sales tax has not been imposed on transactions within the boundaries of this TDD. Instead, revenues relate to airport operations including contributions from the City of Branson and fees from private hanger rental, fueling, airline agreements, rental car agreements, and other collateral services. These revenues are collected by the corporation, which in turn leases the airport from the TDD. Rental payments are equal to TDD debt service requirements.

  The TDD is located in Taney County, south of the City of Branson between U.S. Highway 65 and Missouri Highway JJ. The Branson Regional Airport development includes the airport and its facilities. The TDD has a fiscal year end of December 31. Financial audits of the TDD were conducted by an independent auditor for fiscal years 2008 and 2007. The TDD had no financial activity for fiscal year 2006.

  The TDD was formed for the purpose of acquiring property and constructing a transportation project with a total cost of approximately $150 million. Taney County is the public entity with jurisdiction over this project and accepted dedication of the completed project.

  Prior to the issuance of TDD bonds, the private corporation financed some of the costs of the projects with monies from investors. The TDD subsequently issued a total of $114 million Airport Project revenue bonds in 2007 to finance most project costs. Any remaining project costs were funded with monies from additional investors who acquired an equity interest in the private corporation.

The private corporation was responsible for overseeing project construction. This corporation was also responsible for reviewing and approving payments from investor monies for initial costs. The construction manager, engineer, corporation, and bond trustee were responsible for reviewing and approving all other expenses.

During our audit work related to this TDD, we noted no matters which needed to be reported.

- **BaratHaven TDD**

The BaratHaven TDD was organized in January 2006 by petition of the owners of property within the proposed TDD. The Board of Directors and officers include representatives of the property owners and city officials.

The qualified voters of the TDD, in this case the property owners, approved the imposition of a 1-cent (1.0 percent) sales tax on all transactions which are taxable within the boundaries of the district, effective May 2006. However, no sales tax had been collected through 2008 because no retail businesses have been established. The sales tax is currently expected to remain in effect for 20 years, unless terminated sooner. The retail establishments will collect the sales tax and forward the collections to an administrator, the TDD collection agent.

The TDD is located in the city of Dardenne Prairie, in St. Charles County, between U.S. Highway 40/61 and Henning Road. It is planned the BaratHaven development will include hotel, restaurant, and retail establishments. The TDD has a fiscal year end of December 31. The TDD has elected not to have separate financial audits conducted beyond the periodic audits performed by the SAO pursuant to Section 238.272, RSMo.

The TDD was formed for the purpose of acquiring property (right-of-way and/or easements) and constructing transportation projects with a total estimated cost of approximately $4.2 million. In June 2007, the TDD authorized an additional project with an estimated cost of approximately $1.6 million. MoDOT and the City of Dardenne Prairie are the public entities with jurisdiction over these projects and will accept dedication of the completed projects.

The developer of the original transportation projects funded the project costs and has not yet been reimbursed for the costs incurred. In May 2006, the TDD authorized the issuance of special revenue notes not to exceed $4,215,000. At December 31, 2008, approximately $2.57 million was owed to the developer related to unreimbursed costs.

A second developer involved with the additional transportation project funded the related project costs and has not yet been reimbursed for the costs incurred. In December 2008, the TDD authorized the issuance of subordinate special revenue notes not to exceed $1,592,942 to pay these additional transportation project costs. At December 31, 2008, approximately $959,000 was owed to that developer related to unreimbursed costs.

MoDOT and the City of Dardenne Prairie are responsible for overseeing project construction. The TDD is responsible for reviewing and approving reimbursement requests from the developers for project costs incurred. The administrator reviews and approves all other expenses.

During our audit work related to this TDD, we noted the following:

- The TDD did not document its selection of engineering services for the related transportation projects. The provider of engineering and surveying services was chosen based on the fact the same engineer was used for the private portion of the project. Approximately $117,000 was expended for engineering and surveying services through December 2008.

  Sections 8.285 to 8.291, RSMo, provide guidance on the selection of engineering, architectural, and surveying services.

- The TDD did not have documentation to indicate contractors complied with prevailing wage laws related to district projects. Affidavits of compliance with prevailing wage laws received from contractors were not retained and attempts to obtain evidence of prevailing wage compliance from the developers were unsuccessful. Sections 290.210 to 290.340, RSMo, include provisions regarding the payment of prevailing wages on a public works project.

BaratHaven TDD did not provide a formal response.

- **College Station TDD**

The College Station TDD was organized in March 2006 by petition of the City of Springfield and owners of property within the proposed TDD. The Board of Directors and officers include three employees of the city and two members elected by voters of the TDD.

The qualified voters of the TDD, in this case the property owners and the City of Springfield, approved the imposition of a 1-cent (1 percent) sales tax on all transactions which are taxable within the boundaries of the district, effective September 2006. The sales tax is currently expected to remain in effect for 25 years, unless terminated sooner. The retail establishments collect the sales tax and forward the collections to the TDD collection agent, the City of Springfield.

The TDD is located in the City of Springfield, in Greene County, in the downtown area. The College Station development currently includes one business establishment, a movie theater. The TDD has a fiscal year end of June 30. The TDD has elected not to have separate financial audits conducted beyond the periodic audits performed by the SAO pursuant to Section 238.272, RSMo.

The TDD was formed for the purpose of constructing a multi-level parking structure, to be located south of College Street, with a total estimated cost of approximately $8.6 million. The City of Springfield is the public entity with jurisdiction over this project and accepted dedication of the completed project.

The city issued approximately $10.93 million in special obligation bonds in May 2007 to finance the costs of the project. The repayment of these bonds will be provided through the following funding sources:

- TDD sales tax
- Community Improvement District sales tax
- Parking deck participation payment
- Incremental increase in the city's general sales taxes collected within the redevelopment area
- One-half of Greene County's incremental increase in general sales taxes collected within the redevelopment area
- Parking fees generated from the operation of the parking structure

In addition, the parking structure is part of an approved Missouri Downtown Revitalization Preservation Program District. Therefore, the city may elect to use revenues from half of the incremental increase in the state general sales tax for the approved reimbursable projects.

The City of Springfield was responsible for overseeing project construction. The city verified reimbursement requests from the developer for project costs incurred before submitting the reimbursement requests to the Board of Directors to approve for payment. The Board of Directors reviews and approves all other expenses.

During our audit work related to this TDD, we noted no matters which needed to be reported.

- **Briarcliff Parkway and Highway 9 TDD**

The Briarcliff Parkway and Highway 9 TDD was organized in May 2006 by petition of the owner of property within the proposed TDD. The Board of Directors and officers are employees of the developer.

The qualified voter of the TDD, in this case the property owner, approved the imposition of a 1/2-cent (0.5 percent) sales tax on all transactions which are taxable within the boundaries of the district, effective January 2007. The sales tax is currently expected to remain in effect for 20 years, unless terminated sooner. The retail establishments, restaurants, and grocery stores collect the sales tax and forward the collections to the TDD collection agent, a private administrator.

The TDD is located in the City of Kansas City, in Clay County, at Missouri Highway 9 and Briarcliff Parkway. The Briarcliff Village development includes restaurants, grocery

stores, and retail establishments. The TDD has a fiscal year end of December 31. The TDD has elected not to have separate financial audits conducted beyond the periodic audits performed by the SAO pursuant to Section 238.272, RSMo.

The TDD was formed for the purpose of constructing transportation projects with a total estimated cost of approximately $7 million. In February 2008, the property owners approved an additional transportation project with a total cost of approximately $2.5 million. MoDOT and the City of Kansas City are the public entities with jurisdiction over these projects and will accept dedication of the completed projects.

Because the TDD is located within a TIF area, 50 percent of the sales tax collected has been paid to the City of Kansas City for deposit into the accounts relating to the TIF projects.

The developer funded the TDD portion of the costs of the original project. The developer has not yet been reimbursed for costs incurred, but signed a reimbursement agreement with the TDD for reimbursement of the project costs plus accrued interest. Under the agreement, project costs not reimbursed may accrue compounded interest at the prime lending rate to be adjusted monthly. At December 31, 2008, approximately $2.3 million was owed to the developer related to unreimbursed costs, including approximately $105,000 in accrued interest.

In addition to developer-funded costs, MoDOT provided 50 percent of the original project costs estimated to total approximately $3.5 million. MoDOT will fund the costs of the additional project totaling $2.5 million entirely with federal stimulus monies. The TDD is subsequently responsible for any cost overruns.

MoDOT and the City of Kansas City are responsible for overseeing project construction. The administrator is also responsible for reviewing and approving reimbursement requests from the developer for project costs incurred.

During our audit work related to this TDD, we noted the following:

- The TDD construction manager was not solicited through a competitive bidding process and it was determined the construction manager was a subsidiary and related party to the developer. An official of the developer estimated the total costs for construction management services related to the TDD projects would be less than $59,000, with approximately $39,000 paid to the construction manager through December 31, 2008. A TDD official indicated the hourly rate charged by the construction manager was below the fee charged for a related project and therefore cost effective.

  Transactions with related parties could represent conflicts or the appearance of conflicts, could compromise the financial interests of the TDD, and should be avoided. If these situations cannot be avoided, discussions and decisions

concerning situations where potential conflicts exist should be completely documented.

In addition, Section 238.252, RSMo, requires all construction contracts in excess of $5,000 between a TDD and a private contractor to be competitively bid and awarded to the lowest and best bidder.

Briarcliff Parkway and Highway 9 TDD provided the following written response:

While it is true that the district's construction manager was not solicited through a competitive bidding process, we interpret the Section 238.252, RSMo bidding requirement to apply to hard construction costs, as the term "construction" is not defined in chapter 238, RSMo. Furthermore, it should be noted that the district was reimbursed for the cost of the construction manager by Briarcliff Development Company. Our budget officer can confirm that the TDD was reimbursed for all of Underground Services' costs. That entry was dated 11/30/2009 and the district was audited only through 2008.

- **Fulton South Business 54 TDD**

The Fulton South Business 54 TDD was organized in June 2006 by petition of the City of Fulton and owners of property within the proposed TDD. The Board of Directors and officers include officials of the developer and officials of the city.

The qualified voters of the TDD, in this case the property owners, approved the imposition of a 1/2-cent (0.5 percent) sales tax on all transactions which are taxable within the boundaries of the district, effective August 2006. The sales tax is currently expected to remain in effect for 30 years, unless terminated sooner. The retail establishments collect the sales tax and forward the collections to the TDD collection agent, a private administrator.

The TDD is located in the City of Fulton, in Callaway County, on U.S. Business Loop 54, between Collier Street and Tennyson Road. The Fulton Commons development includes grocery, retail, and service establishments. The TDD has a fiscal year end of December 31. The TDD has elected not to have separate financial audits of the TDD conducted beyond the periodic audits performed by the SAO pursuant to Section 238.272, RSMo.

The TDD was formed for the purpose of acquiring property (right-of-way and/or easements) and constructing transportation projects with a total cost of approximately $1.4 million. MoDOT and the City of Fulton were the public entities with jurisdiction over these projects and accepted dedication of the completed projects.

Because the TDD is located within a TIF area, 50 percent of the sales tax collected has been paid to the City of Fulton for deposit into the accounts relating to the TIF projects. Pursuant to a formal agreement with the city, the TDD has agreed to disburse the TDD

portion of the sales tax revenues less administrative and collection costs, to the city to pay debt service on the TDD portion of the TIF bonds until they are retired.

The City of Fulton issued $8.77 million in TIF/TDD revenue bonds in November 2006. The TDD is responsible for paying no more than approximately $3.97 million in principal and interest on this debt. The remainder of the bonds will be paid by TIF revenues and city sales tax revenues. As of December 31, 2008, the TDD had repaid approximately $45,000 on the TDD portion of the TIF bonds.

MoDOT and the City of Fulton were responsible for overseeing project construction. The City of Fulton was also responsible for reviewing and approving reimbursement requests from the developer for project costs incurred. The Board of Directors reviews and approves all other expenses.

During our audit work related to this TDD, we noted the following:

- The TDD 2008 and 2007 budgets did not include some necessary information, including beginning available resources and estimated ending fund balance. In addition, the 2006 budget was not mathematically accurate.

  Sections 67.010 to 67.040, RSMo, include provisions regarding the annual budgets.

Fulton South Business 54 TDD did not provide a formal response.

- **Crackerneck Creek TDD**

The Crackerneck Creek TDD was organized in July 2006 by petition of the owners of property within the proposed TDD. The Board of Directors and officers include three employees of the City of Independence and two representatives of the owner/developer.

The qualified voter**s** of the TDD, in this case the property owners, approved the imposition of a 1-cent (1 percent) sales tax on all transactions which are taxable within the boundaries of the district, effective September 2006. The sales tax is currently expected to remain in effect for 30 years, unless terminated sooner. The retail establishments collect the sales tax and forward the collections to the TDD collection agent, the City of Independence.

The TDD is located in the City of Independence, in Jackson County, at Interstate 70 and Interstate 470. The Falls at Crackerneck development includes two major retail establishments. The TDD has a fiscal year end of June 30. A financial audit of the TDD was conducted by an independent auditor for fiscal year 2008.

The TDD was formed for the purpose of acquiring property (right-of-way and/or easements) and constructing transportation projects with a total cost of approximately

$15.2 million. MoDOT and the City of Independence were the public entities with jurisdiction over these projects and accepted dedication of the completed projects.

Because the TDD is located within a TIF area, 50 percent of the sales tax collected has been paid to the City of Independence for deposit into the accounts relating to the TIF projects. Pursuant to a formal agreement with the city, the TDD has agreed to disburse its portion of the TDD sales tax revenues, less administrative and collection costs, to the city to pay transportation project costs financed by the city.

As of June 30, 2008, the Missouri Development Finance Board had separately issued several Infrastructure Facilities Revenue Bonds totaling approximately $84.9 million in order to provide loans to the City of Independence to fund the Crackerneck Creek TIF projects. A portion of the proceeds from these bond issuances were used to finance TDD eligible costs.

MoDOT and the City of Independence were responsible for overseeing project construction. The City of Independence was also responsible for reviewing and approving transportation project costs incurred. The TDD Board of Directors reviews and approves the payments to the city and all other expenses.

During our audit work related to this TDD, we noted the following:

- Documentation was not provided to verify TDD eligible transportation project costs, bidding of contracts, or TDD debt service obligations. According to district legal counsel, the TDD was formed solely as a funding mechanism and did not maintain this documentation.

  Subsequently, the TDD and the SAO made several attempts to obtain applicable documentation directly from the City of Independence; however, the requested information was not provided. As a result, the appropriateness of the project costs incurred and reimbursable by the TDD, bidding and contracting for project construction, and the debt service obligations could not be verified.

Crackerneck Creek TDD provided a response which included information to clarify the make-up of the board, budgeting practices, and information related to matters after the audit period. However, the response did not comment on the matter discussed in the bullet point above.

- **Arnold Triangle TDD**

The Arnold Triangle TDD was organized in August 2006 by petition of the City of Arnold, the owner of property within the proposed TDD. During fiscal 2008 and prior, the Board of Directors and officers included various elected officials or employees of the city and developer. Subsequent changes to the composition of the board resulted in it being made up of only city officials and employees.

The qualified voter of the TDD, in this case the property owner, approved the imposition of a 1-cent (1 percent) sales tax on all transactions which are taxable within the boundaries of the district, effective October 2006. The retail establishments collect the sales tax and forward the collections to the TDD collection agent, the City of Arnold.

The TDD is located in the City of Arnold, in Jefferson County, and within an area bordered by Missouri Highway 141, Church Road, and Big Bill Road. The Arnold Triangle development includes grocery, retail, and commercial establishments. The TDD has a fiscal year end of August 31. The TDD has elected not to have separate financial audits conducted beyond the periodic audits performed by the SAO pursuant to Section 238.272, RSMo.

The TDD was formed for the purpose of acquiring property (right-of-way and/or easements) and constructing transportation projects with a total cost of approximately $7 million. MoDOT and the City of Arnold were the public entities with jurisdiction over these projects and accepted dedication of the completed projects.

Because the TDD is located within a TIF area, 50 percent of the sales tax collected was paid to the City of Arnold for deposit into the accounts relating to the TIF projects.

The developer paid the initial costs of the projects and the TDD issued $3 million in 2007A Sales Tax Revenue Notes in May 2007. At that time, the district note/bond trustee was given responsibility for collecting the revenues and paying the costs of the district. In September 2007, the TDD approved a resolution to establish a new joint TDD with the City of Arnold that would provide for the construction of additional transportation projects beyond the original scope of district projects. The Arnold Retail Corridor (ARC) TDD was subsequently established in March 2008, encompassing the boundaries of the district. The ARC TDD is overseen by a board consisting of the chief officer of the city and the Arnold Triangle TDD as well as one additional representative appointed by each entity. Therefore, ongoing existence of the Arnold Triangle TDD is required to properly constitute the board of the ARC TDD.

As a result of the ARC TDD establishment, the Arnold Triangle TDD sales tax was repealed and replaced by an ARC TDD sales tax. In addition, the ARC TDD authorized issuance of $7 million in 2008A Sales Tax Revenue Notes to refinance existing Arnold Triangle TDD revenue notes and reimburse the developer for the remaining costs of the projects. The ARC TDD has also subsequently issued notes and/or bonds to refinance other transportation-related projects.

In April 2008, the City of Arnold began collecting this new sales tax on the behalf of the ARC TDD. The sales tax revenues collected on behalf of the ARC TDD, within the boundaries of the Arnold Triangle TDD, are to be used first to pay any remaining operating costs of the Arnold Triangle TDD. The remaining revenues are then used to pay ARC TDD debt service.

MoDOT and the City of Arnold were responsible for overseeing project construction. The City of Arnold and Arnold Triangle TDD legal counsel were also responsible for reviewing and approving reimbursement requests from the developer for project costs incurred. The trustee reviewed and approved all other expenses.

During our audit work related to the Arnold Triangle TDD, we noted the following:

- The Arnold Triangle TDD did not solicit bids for its construction manager. The construction manager was chosen based on the developer's prior experience with the construction management company and its services. The construction manager provided these services for both the TDD and non-TDD-related portions of the entire project. Approximately $124,300 was expended for the TDD portion of the construction management services through December 2008.

  Section 238.252, RSMo, requires all construction contracts in excess of $5,000 between a TDD and a private contractor to be competitively bid and awarded to the lowest and best bidder.

- The Arnold Triangle TDD did not document its selection of engineering and surveying services for the related transportation projects. The engineers and surveyor were chosen based on the developer's prior experience with the service providers. These service providers also provided their respective services for both the TDD and non-TDD related portions of the entire project. Approximately $209,900 and $66,100 was expended for the TDD portion of engineering and surveying services through December 2008, respectively.

  Sections 8.285 to 8.291, RSMo, provide guidance on the selection of engineering, architectural, and surveying services.

Arnold Triangle TDD provided the following written response:

<u>Construction Manager</u> The district's project is part of a larger redevelopment project, for which the construction manager was also involved. The amount paid to the construction manager ($124,300) represents approximately 1.78% of the total district project cost and the district believes that had it solicited proposals for a construction manager, no other responsible bidder could have provided the same level of quality service for a lesser fee.

<u>Engineering and surveying services</u> As stated above, the district's project is part of a larger redevelopment project for which the engineering and surveying firms were previously engaged by the developer. The district is confident that, given each firm's previous work on the redevelopment project, no other firm could reasonably provide (a) the specialized experience, past record of performance and familiarity with the area and the redevelopment project necessary to integrate the district's project into the redevelopment project and (b) the capacity and capability to perform the work within the time limitations of the redevelopment project.

- **Broadway Hotel TDD**

  The Broadway Hotel TDD was organized in September 2006 by petition of the owner of property and improvements within the proposed TDD. The Board of Directors and officers include representatives of the owner.

  The qualified voter of the TDD, in this case the owner, approved the imposition of a 1-cent (1 percent) sales tax on all transactions which are taxable within the boundaries of the district, effective January 2007. The sales tax is currently expected to remain in effect for 25 years, unless terminated sooner. The retail establishments collect the sales tax and forward the collections to an administrator, the TDD collection agent.

  The TDD is located in the City of St. Louis at 1 South Broadway. The Broadway Hotel development includes a major service establishment. The TDD has a fiscal year end of December 31. The TDD has elected not to have separate financial audits conducted beyond the periodic audits performed by the SAO pursuant to Section 238.272, RSMo.

  The TDD was formed for the purpose of acquiring a leasehold interest in a parking garage of approximately 170 parking spaces and an alleyway containing approximately 20 parking spaces. The TDD issued approximately $3.69 million in revenue notes to finance the acquisition.

  The City of St. Louis was responsible for overseeing the acquisition. The TDD approved the acquisition and the issuance of the revenue notes to finance the cost. The TDD treasurer and administrator review and approve all other expenses.

  During our audit work related to this TDD, we noted the following:

  - The TDD annual budgets for 2007 and 2008 did not include some necessary information, including beginning and ending cash balances. In addition, actual revenues and expenditures for the preceding year (2007) were not presented in the 2008 budget. Part of the reason for the missing information was that the budgets were prepared in a written paragraph, narrative format instead of a tabular format.

    In addition, the TDD 2007 and 2008 budgets were not approved in a timely manner. The TDD Board of Directors did not approve its 2007 or 2008 budgets until its annual meetings in May 2007 and May 2008, respectively, approximately 5 months after the beginning of the fiscal year. The TDD should ensure its annual budget is approved at the beginning of the fiscal year.

    Sections 67.010 to 67.040, RSMo, include provisions regarding the annual budgets.

  Broadway Hotel TDD did not provide a formal response.

- **University Place TDD**

  The University Place TDD was organized in September 2006 by petition of the owner of property within the proposed TDD. The Board of Directors and officers include officials of the developer, a contractor official, a representative of the University of Missouri-St. Louis, and a representative from St. Louis County.

  In August 2006, the qualified voter of the TDD, in this case the property owner, approved the imposition of a 1-cent (1 percent) sales tax on all transactions which are taxable within the boundaries of the district. The sales tax is currently expected to remain in effect for 25 years, unless terminated sooner. However, according to a district representative, there are no plans for retailers to be established in the TDD as most of the district is occupied by the business offices of a corporation. As a result, in September 2006, the TDD established a special assessment on real property within the district. These payments began in fiscal year 2006 and are expected to remain in effect for 25 years.

  The TDD is located in the an unincorporated area of St. Louis County, between Interstate 70 and the Village of Bellerive. The TDD has a fiscal year end of December 31. Financial audits of the TDD were conducted by an independent auditor for fiscal years 2008, 2007, and 2006.

  The TDD was formed for the purpose of acquiring property (right-of-way and/or easements) and constructing transportation projects with a total estimated cost of approximately $15.4 million. St. Louis County is the public entity with jurisdiction over these projects and will accept dedication of the completed projects.

  The developer funded some of the initial project costs of the development prior to October 2006, when the TDD issued $13,415,000 in Transportation Sales Tax and Special Assessment Revenue Bonds. The TDD may also issue Subordinate Transportation Sales Tax and Special Assessment Revenue Notes, not to exceed $2 million, to fund any additional project costs. As of December 31, 2008, these notes have not been issued.

  St. Louis County is responsible for overseeing project construction. The Chairman of the Board of Directors, developer, project manager, and TDD legal counsel are responsible for reviewing and approving project costs incurred by the contractors. The Chairman of the Board of Directors reviews and approves all other expenses.

  During our audit work related to this TDD, we noted no matters which needed to be reported.

- **U.S. Highway 50/63 and City View TDD**

  The U.S. Highway 50/63 and City View TDD was organized in September 2006 by petition of the owner/developer of property within the proposed TDD. The Board of

Directors and officers include various employees of the owner/developer and a city official.

The qualified voter of the TDD, in this case the property owner, approved the imposition of a 1-cent (1 percent) sales tax on all transactions which are taxable within the boundaries of the district, effective July 2009. The sales tax is currently expected to remain in effect for 20 years, unless terminated sooner. The retail establishment collects the sales tax and forwards the collections to the TDD collection agent.

The TDD is located in the City of Jefferson City, in Cole County, at the intersection of City View Drive and U.S. Highway 50/63. The U.S. Highway 50/63 and City View development includes a large retailer. The TDD has a fiscal year end of December 31. The TDD has elected not to have separate financial audits conducted beyond the periodic audits performed by the SAO pursuant to Section 238.272, RSMo.

The TDD was formed for the purpose of acquiring property (right-of-way and/or easements) and constructing transportation projects with a total cost of approximately $11.7 million. MoDOT, the City of Jefferson City, and Cole County are the public entities with jurisdiction over these projects and will accept dedication of the completed projects.

The owner/developer initially funded a portion of the cost of the projects, which totaled approximately $5.3 million. In addition, MoDOT contributed approximately $5.6 million, Cole County contributed $300,000, and the City of Jefferson City contributed $600,000 towards the completion of the projects. The owner/developer costs will be reimbursed by TDD sales tax revenues; however, no reimbursements for costs had been paid as of December 31, 2008.

MoDOT, the City of Jefferson City, and Cole County are responsible for overseeing project construction. The Board of Directors is responsible for reviewing and approving reimbursement requests from the developer for project costs incurred. The Board of Directors also reviews and approves all other expenses.

During our audit work related to this TDD, we noted no matters which needed to be reported.

- **Cornerstone Pointe TDD**

The Cornerstone Pointe TDD was organized in October 2006 by petition of the owner/developer of property within the proposed TDD. The Board of Directors and officers include various employees of the developer.

The qualified voter of the TDD, in this case the property owner, approved the imposition of a 1-cent (1 percent) sales tax on all transactions which are taxable within the boundaries of the district, effective November 2006. The sales tax is currently expected to remain in effect for 25 years, unless terminated sooner. The retail establishments will

collect the sales tax and forward the collections to the TDD collection agent, the City of Belton.

The TDD is located in the City of Belton, in Cass County, at Missouri Highway Y and U.S. Highway 71. The Cornerstone Pointe development (located within the Belton Business Park) does not currently have any retailers. The TDD has a fiscal year end of December 31. The TDD has elected not to have separate financial audits conducted beyond the periodic audits performed by the SAO pursuant to Section 238.272, RSMo.

The TDD was formed for the purpose of acquiring property (right-of-way and/or easements) and constructing transportation projects with a total cost of approximately $2 million. The City of Belton and MoDOT were the public entities with jurisdiction over these projects and accepted dedication of the completed projects.

The developer funded the costs of the local transportation project. The developer has not yet been reimbursed for all costs incurred, but signed a reimbursement agreement with the TDD for reimbursement of the project costs plus accrued interest. Under the agreement, project costs not reimbursed may accrue compounded interest at a rate equal to 7 percent per year from the date paid by the developer. In addition to the reimbursement agreement, the TDD issued a promissory note to the developer in October 2006 for in the amount of $750,000. Once sales tax revenues are generated, the TDD will begin reimbursing the developer for transportation project costs.

The state transportation project was funded by MoDOT and the City of Belton (including $1.25 million paid by the city on behalf of the TDD).

The City of Belton and MoDOT were responsible for overseeing project construction. The Board of Directors was also responsible for reviewing and approving reimbursement requests from the developer for project costs incurred. The Board of Directors also reviews and approves all other expenses.

During our audit work related to this TDD, we noted the following:

- The TDD did not solicit bids for the construction manager on the local project. The construction manager was selected based on knowledge and experience with similar types of projects and long-standing business relationships with the property owner/developer. Through December 2008, approximately $20,800 was expended for construction management services.

  Section 238.252, RSMo, requires all construction contracts in excess of $5,000 between a TDD and a private contractor to be competitively bid and awarded to the lowest and best bidder.

- The TDD did not document its selection of engineering services for the related transportation projects. This service provider was also selected based on knowledge and experience with similar types of projects and long-standing

business relationship with the property owner/developer. Through December 2008, approximately $39,000 was expended for engineering services.

Sections 8.285 to 8.291, RSMo, provide guidance on the selection of engineering, architectural, and surveying services.

- The TDD 2007, 2008, and 2009 budgets were not approved in a timely manner. The 2007 budget was not approved until June 2007, halfway through the fiscal year. In addition, the 2008 and 2009 budgets were not approved until June 2009, after the 2008 fiscal year and halfway through the 2009 fiscal year. The annual budgets should be approved at the beginning of the fiscal year. Sections 67.010 to 67.040, RSMo, include provisions regarding annual budgets.

Cornerstone Pointe TDD did not provide a formal response.

- **Town and Country Crossing TDD**

The Town and Country Crossing TDD was organized in October 2006 by petition of the owner/developer of property within the proposed TDD. The Board of Directors and officers include representatives of the property owners and the developer, and a member designated by the City of Town and Country.

The qualified voter of the TDD, in this case the property owner, approved the imposition of a 1/2-cent (0.5 percent) sales tax on all transactions which are taxable within the boundaries of the district, effective April 2007. The sales tax is currently expected to remain in effect for 40 years, unless terminated sooner. The retail establishments collect the sales tax and forward the collections to the TDD collection agent, the City of Town and Country.

The TDD is located in the City of Town and Country, in St. Louis County, at Clayton Road and Missouri Highway 141. The Town and Country Crossing development includes major retail establishments. The TDD has a fiscal year end of December 31. A financial audit of the TDD was conducted by an independent auditor for fiscal year 2007.

The TDD was formed for the purpose of acquiring property (right-of-way and/or easements) and constructing transportation projects with a total cost of approximately $10.6 million. While the development is located entirely within the City of Town and Country, the TDD also signed intergovernmental cooperation agreements with MODOT and the City of Ballwin as part of the transportation improvements were within their respective jurisdictions, and these three public entities accepted dedication of the completed projects.

The developer initially funded the costs of the projects prior to the TDD issuing approximately $12.7 million in revenue bonds in September 2008. Prior to the issuance

of the bonds, the TDD issued notes to the developer. When the TDD revenue bonds were issued, these notes were paid and the developer was reimbursed.

MoDOT, the Cities of Town and Country and Ballwin, and St. Louis County were responsible for overseeing project construction. The City of Town and County and the Board of Directors were also responsible for reviewing and approving reimbursement requests from the developer for project costs incurred. The developer reviews and approves all other expenses.

During our audit work related to this TDD, we noted the following:

- The TDD did not document its selection of engineering services for the related transportation projects. This service provider was selected by the developer prior to the establishment of the TDD. We were informed this provider was chosen based on experience and expertise. Through December 2008, approximately $526,000 was expended for engineering services.

  Sections 8.285 to 8.291, RSMo, provide guidance on the selection of engineering, architectural, and surveying services.

- The TDD overspent its 2008 budget by approximately $4.9 million. The overspending was the result of the failure to adequately budget for the payment of notes held by the developer. A formal budget amendment was not approved authorizing these additional expenditures.

  In addition, the TDD annual budget for 2009 and 2008 did not include some necessary information, including actual revenues and expenditures for the 2 previous years in the 2009 budget or for the preceding year in the 2008 budget (there was no financial activity prior to fiscal year 2007), as required.

  Sections 67.010 to 67.040, RSMo, include provisions regarding annual budgets.

Town and Country Crossing TDD provided the following written response:

<u>Engineering services</u> The engineer engaged by the district had been intimately involved in the underlying development project for approximately four years prior to the establishment of the district, and its engagement by the district was continued based upon such engineer's specialized expertise, technical competence, capacity, capability, past record of performance and familiarity with the project. The developer initially reviewed the qualifications of at least two engineering firms and selected the engineering firm based upon its demonstrated competence and qualifications for the type of services required and at fair and reasonable prices. The district has complied with the policy set forth in Section 8.285, Revised Statutes of Missouri, regarding contracts for engineering services.

<u>Budgets</u> It is true that the district did not amend the 2008 budget. The district will review and revise future budgets when necessary.

The 2009 and 2008 budgets did not include comparisons for prior years. All budgets since 2009 have included the required comparisons.

- **Belton/Raymore Interchange TDD**

The Belton/Raymore Interchange TDD was organized in October 2006 by petition of the Cities of Belton and Raymore and owners of property within the proposed TDD. The Board of Directors and officers include the mayors of both cities, two individuals selected by the governing bodies of the two respective cities, and three non-voting members.

The qualified voters of the TDD, in this case the property owners, approved the imposition of a sales tax of up to 1-cent (1 percent) on all transactions which are taxable within the boundaries of the district. The Board of Directors subsequently passed a resolution that set the sales tax rate at 1/2-cent (0.5 percent) for 3 years, effective after the TDD revenue bonds were issued in 2008. After that initial 3-year period, the sales tax rate will be adjusted by the board to be sufficient for the sales tax revenues collected in each year to be approximately 125 percent of the principal and interest due on all bonds for each respective year. The sales tax is currently expected to remain in effect for 30 years, unless terminated sooner. Through fiscal year 2008 there were no retail businesses operating within the TDD, therefore, no sales tax revenues had been collected.

The TDD is located in the Cities of Belton and Raymore, in Cass County, at U.S. Highway 71 and Missouri Alternate Highway 58. The TDD has a fiscal year end of October 31. The TDD has elected not to have separate financial audits conducted beyond the periodic audits performed by the SAO pursuant to Section 238.272, RSMo.

The TDD was formed for the purpose of acquiring property (right-of-way and/or easements) and constructing transportation projects with a total cost of approximately $13 million. MoDOT and the Cities of Belton and Raymore are the public entities with jurisdiction over these projects and will accept dedication of the completed projects.

The TDD issued $3.3 million in transportation sales tax revenue bonds in 2008 to finance its portion of the related project costs. Additional funding was to be provided by MoDOT, the Cities of Belton and Raymore, and/or Cass County. As of December 31, 2008, TDD expenditures for project costs totaled approximately $2.1 million.

MoDOT and the Cities of Belton and Raymore are responsible for overseeing project construction. The two cities are also responsible for reviewing reimbursement requests from the developer for project costs incurred before forwarding the requests to the Board of Directors to approve for payment. The Board of Directors reviews and approves all other expenses.

During our audit work related to this TDD, we noted the following:

- The TDD received and disbursed proceeds from revenue bonds issued in fiscal year 2008; however, the district did not prepare and adopt an annual budget for that fiscal year. Sections 67.010 to 67.040, RSMo, include provisions regarding the annual budgets.

Belton/Raymore Interchange TDD provided the following written response:

Budgets During the period from district formation through issuance of the district's sales tax revenue bonds, the district had no revenues and no expenses. During that period, the district did not prepare a budget. In accordance with Article VI, Section 9 of the District Bylaws, the budget thus deemed adopted provides for application of District revenues in accordance with the prior year's budget. Upon issuance of the revenue bonds, the only moneys available to the district were the proceeds of the bonds which were immediately paid or deposited with the Missouri Department of Transportation in accordance with agreements with the Missouri Department of Transportation and approved by the Board to fund its share of the transportation project, or were deposited with the bond trustee in escrow to fund a reserve fund and provide contingency funds in case cost overruns were encountered for the transportation project. The district has prepared and adopted a budget for all fiscal years subsequent to issuance of its sales tax revenue bonds. The district's revenue bonds were issued pursuant to a bond trust indenture, a tax compliance agreement, a continuing disclosure agreement, a cooperative agreement, and a bond purchase agreement. These bond documents, approved pursuant to district resolution, set forth in detail the sources and uses of the bond proceeds and describe the budgetary categories to which such expenses pertain.

- **1200 Main/South Loop TDD**

The 1200 Main/South Loop TDD was organized in December 2006 by petition of the owners of property within the proposed TDD and the City of Kansas City. The Board of Directors and officers include employees of the property owners and city officials.

The qualified voters of the TDD, in this case the property owners and the City of Kansas City, approved the imposition of a 1-cent (1 percent) sales tax on all transactions which are taxable within the boundaries of the district, effective March 2008**.** The sales tax is currently expected to remain in effect for 25 years, unless terminated sooner. The retail, dining, and entertainment establishments collect the sales tax and forward the collections to the TDD bank for deposit.

The TDD is located in the City of Kansas City, in Jackson County, in the downtown area. The 1200 Main/South Loop development includes dining, retail, and entertainment establishments. The TDD has a fiscal year end of December 31. The TDD has elected not to have separate financial audits conducted beyond the periodic audits performed by the SAO pursuant to Section 238.272, RSMo.

The TDD was formed for the purpose of acquiring property (right-of-way and/or easements) and constructing transportation projects with a total cost of approximately $40.6 million. The City of Kansas City was the public entity with jurisdiction over these projects and accepted dedication of the completed projects.

Because the TDD is located within a TIF area, 50 percent of the sales tax collected has been paid to the City of Kansas City for deposit into the accounts relating to the TIF projects. Pursuant to a formal agreement with the city, the TDD has agreed to disburse the TDD portion of the sales tax revenues, less administrative and collection costs, to the city to pay debt service on the TDD portion of the TIF bonds until they are retired.

The City of Kansas City issued $45.5 million in revenue bonds in 2006 to finance the costs of the projects. As of December 31, 2008, approximately $29.8 million in bond proceeds had been used to pay for costs related to the transportation projects. Sales tax revenues generated by the TDD have been used to repay the debt service on the bond issuance. As of December 31, 2008, approximately $419,000 in sales tax revenues had been collected by the TDD. The amount of any debt service not paid by TDD sales tax collections will ultimately be paid by the city.

The City of Kansas City was responsible for overseeing project construction. The City of Kansas City was also responsible for reviewing and approving reimbursement requests from the developer for project costs and other expenses incurred.

During our audit work related to this TDD, we noted no matters which needed to be reported.

- **Gans Road and U.S. 63 TDD**

The Gans Road and U.S. 63 TDD was organized in December 2006 by petition of the owners/developer of property within the proposed TDD. Shortly after the TDD was established, the property owners/developer sold the property to the current developer. The Board of Directors and officers include various employees of the current property owner/developer and relatives of the former property owner/developer.

The qualified voters of the TDD, in this case the property owners, have not yet approved the imposition of a sales tax on all transactions which are taxable within the boundaries of the district. The imposition of a sales tax will be determined when retail businesses are established in the TDD.

The TDD is located in the City of Columbia, in Boone County, near the intersection of Discovery Parkway (Gans Road) and U.S. Highway 63. The Discovery development does not currently have any retail establishments. The TDD has a fiscal year of December 31. The TDD has elected not to have separate financial audits of the TDD conducted beyond the periodic audits performed by the SAO pursuant to Section 238.272, RSMo.

The TDD was formed for the purpose of acquiring property (right-of-way and/or easements) and constructing transportation projects with a total estimated cost of approximately $29 million. MoDOT and the City of Columbia were the public entities with jurisdiction over the state and local projects, respectively, and accepted dedication of the completed projects.

The developer advanced the cost of the TDD share of the completed transportation projects. These costs included engineering services provided on the state project as well as the costs of the completed local project. The developer has not yet been reimbursed for any costs incurred, but the TDD signed promissory notes totaling approximately $4.1 million for repayment of project costs plus accrued interest. MoDOT and the City of Columbia were responsible for the remaining costs of the completed projects (total costs of the completed projects were approximately $10.7 million).

MoDOT and the City of Columbia were responsible for overseeing project construction. The Board of Directors was also responsible for reviewing and approving reimbursement requests from the developer for project costs incurred. The property owner reviews and approves all other expenses.

During our audit work related to this TDD, we noted the following:

- The TDD overspent its 2008 and 2007 budgets by approximately $59,000 and $4.2 million, respectively. The overspending was the result of the failure to budget for construction expenses. Formal budget amendments were not approved authorizing the additional expenditures. In addition, the TDD annual budget for 2009 did not include some necessary information, including actual revenues and expenditures for the 2 prior years. The TDD 2009 budget only included the actual revenues and expenditures for the preceding year (2008). Sections 67.010 to 67.040, RSMo, include provisions regarding the annual budgets.

Gans Road and U.S. Highway 63 TDD did not provide a formal response.

						$ 1,507,059,447		$ 1,861,356,537			

* The amount of project costs, anticipated revenues, and/or sales tax rate presented were amended by a district official or representative from the amounts initially reported on the TDD survey questionnaire.

** The district has registered voters who approved establishment of the district.

*** This district was in the process of being abolished at December 31, 2008.

**** Interest costs on TDD debt and administrative costs of the districts appear to account for the difference between total estimated project costs and total anticipated revenues for many of the TDDs. In addition, sales tax will be collected until the project financing has been paid. If revenues exceed expectations this will decrease the estimated duration of the TDD.

***** In addition to sales tax, several districts authorized the following additional revenue sources: property taxes (A); special assessments (B); private hanger rental, fueling, airline agreement, rental car agreement, and other collateral service fees (C); and parking fees (D).

TIF - Tax Increment Financing - 50 percent of the sales tax collected is used for TIF projects unless an agreement specifies otherwise.

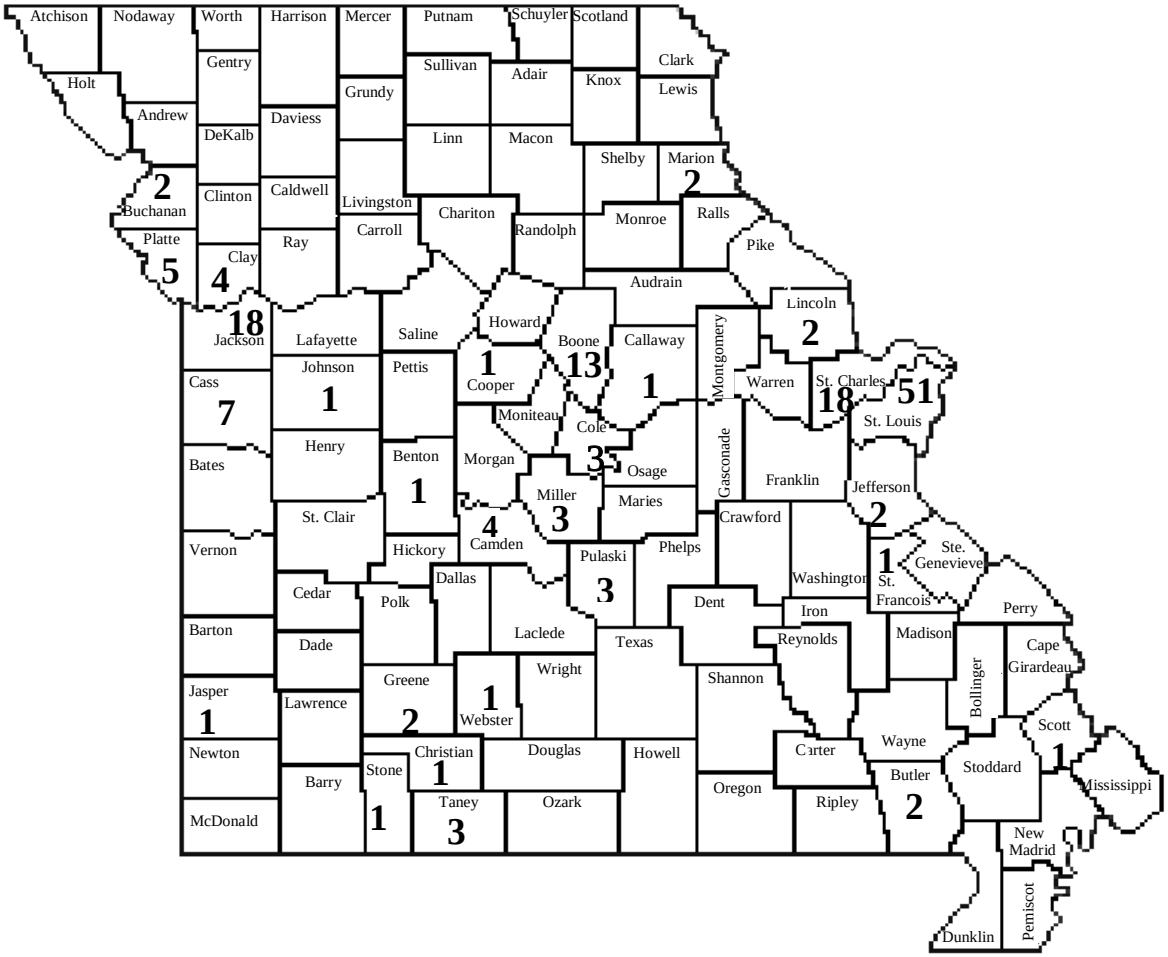
Footnote legend for Total Anticipated Revenues

1. TDD sales tax revenues are used to supplement project costs with the remaining project costs funded from other revenue sources.
2. The additional revenue will be used to supplement project costs related to an adjacent district.
3. The project(s) has more than one construction phase, with estimated project costs provided only for Phase 1.
4. Project costs/duration/anticipated revenues of Platte County Missouri South II are included in information presented for Platte County Missouri South I.
5. Anticipated revenues were not determined and sales tax will be collected until the project financing has been paid.
6. The estimated project costs reported by the district do not include an estimated annual expense of approximately $200,000 for a trolley service system.
7. The district sales tax was repealed August 2005, and the district was subsequently abolished in January 2009.
8. Projects were split into four phases and revenue was only estimated on two of the phases.
9. Anticipated project costs and revenues were not determined. It is expected infrastructure costs will be financed by a loan.
10. At the time of the creation of the Arnold Retail Corridor (ARC) TDD in March 2008 and the imposition of the ARC TDD sales tax, the district repealed its sales tax and revised the scope of its original projects to include ARC TDD additional projects.
11. Additional revenues needed to finance the projects have not yet been determined.
12. After this TDD was created, the developer found the proposed projects not to be feasible.
13. The City of Columbia and the developer will cover costs over and above that to be reimbursed by the TDD sales tax. For their contribution, the city and developer will be issued notes subordinate to any revenue bonds issued for the TDD projects.
14. The TDDs did not respond to our questionnaires soliciting applicable information.

Source: Judgment and Order issued by the Circuit Courts, TDD survey questionnaires, and communication with district officials/representatives.

APPENDIX B

TRANSPORTATION DEVELOPMENT DISTRICTS
LOCATION OF THE 154 TDDs BY COUNTY
(AS OF DECEMBER 31, 2008)



Note - The location (by county and municipality) of the various TDDs is presented on Appendix A. Of the 51 TDDs located in the area identified as St. Louis, 41 districts are located in St. Louis County and 10 are located in the City of St. Louis.

APPENDIX D

TRANSPORTATION DEVELOPMENT DISTRICTS
SUMMARY OF AUDIT FINDINGS REPORTED BY OTHER INDEPENDENT AUDITORS – SELECTED TDDS

Accounting Records and Procedures

- Complete documentation supporting construction draws for 2008 was maintained only by the bond trustee. No representative of the TDD maintained copies of supporting invoices or signed copies of written requests for disbursements (Branson Regional Airport TDD).

- A lack of segregation of duties was noted as the accountant obtained the bank statement, prepared the bank reconciliation, and maintained the general ledger with no management review of monthly bank reconciliations (University Place TDD).

- The TDD relied on its CPA firm to assist with the drafting of the financial statements and related disclosures and material adjustments as well as preparation of the Management Discussion and Analysis, instead of drafting this information itself (University Place TDD).

Budgetary Procedures

- An annual budget was not adopted for the fiscal year ended June 30, 2008 (Crackerneck Creek TDD).

- An annual budget was not formally approved and adopted by the Board of Directors for the fiscal year ended December 31, 2006. In addition, the actual expenditures exceeded the budget expenditures in an unapproved budget document provided to the CPA by management (University Place TDD).

Note - The above findings were included in the Management Letters and/or the Independent Auditor's Reports on Compliance and Internal Control issued with the independent audits of the selected TDDs.

March 2011

Report No. 2011-12

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Fortieth Judicial Circuit, City of Lanagan Municipal Division

Missing Funds

Municipal division receipts totaling at least $521 were received but not deposited. In addition, certain records could not be located, and it is possible additional funds are missing. The Court Clerk quit in February 2010, and, in September, just after audit staff's initial visit, the City Clerk abruptly quit. The lack of adequate controls and oversight allowed missing funds to go undetected. The City of Lanagan Municipal Division and city officials should work with law enforcement regarding the missing funds and records.

Accounting Controls and Procedures

Significant weaknesses were identified with accounting controls and procedures which increases the risk of theft or misuse of funds. The Court Clerk received and deposited monies with no supervision or review. The municipal division did not account for the numerical sequence of receipt slips, receipt slips issued by the city were not reconciled to court receipt records, and monies collected by the city were not transmitted timely to the municipal division. Receipts were deposited approximately once a month.

Some records related to the receipt and disbursement of funds could not be located. Moreover, certain records regarding the disposition of some court cases could not be found. The municipal division lacked adequate procedures for collecting monies due on tickets and did not maintain adequate records of such monies due. It is possible the municipal division is owed thousands of dollars for unpaid tickets, and it should work to determine the amount owed and develop a collection plan. The Court Clerk did not prepare a monthly case list and file it with the city as required by statute, so the city could not effectively monitor the municipal division. The municipal division did not submit all fines and costs collected to the city as required by law; instead, the municipal division paid salaries and other expenses out of its bank account before remitting the balance to the city. In addition, some checks issued against the municipal division bank account had only one signature, but two signatures are required.

The municipal division should maintain backup copies of computer programs and data and store them at an offsite location to prevent the loss of accounting and other records. The Court Clerk and City Clerk were not bonded. Adequate bonding for employees who handle money is important, because the municipal division could be made whole by the bonding company if funds are mishandled.

Municipal Division Procedures

The municipal division needs to improve its procedures relating to case dispositions, license suspensions, and tickets. The municipal division failed to adequately document the disposition of, and maintain a docket or backer sheet for, each case as required by Missouri Supreme Court rule.

The prosecuting attorney did not sign all tickets processed by the municipal division, which is also required by rule The police department and the municipal division do not adequately account for the numerical sequence of traffic tickets issued. As such, it is not possible to determine if all tickets issued are properly submitted for processing.

In the areas audited, the overall performance of this entity was **Poor**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Fortieth Judicial Circuit, City of Lanagan Municipal Division did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 11

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge
Fortieth Judicial Circuit
and
Municipal Judge
Lanagan, Missouri

We have audited certain operations of the City of Lanagan Municipal Division of the Fortieth Judicial Circuit in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the 2 years ended December 31, 2010. The objectives of our audit were to:

1. Evaluate the municipal division's internal controls over significant financial functions.

2. Evaluate the municipal division's compliance with certain legal provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the municipal division, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the municipal division's management and was not subjected to the procedures applied in our audit of the division.

For the areas audited, we identified (1) deficiencies in internal controls, and (2) noncompliance with legal provisions. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Lanagan Municipal Division of the Fortieth Judicial Circuit.

A petition audit of the City of Lanagan, fulfilling our obligations under Section 29.230, RSMo, is still in process, and any additional findings and recommendations will be included in the subsequent report.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Donna Christian, CPA, CGFM
In-Charge Auditor:	Candi Copley

1. Missing Funds

Between July 1, 2009, and December 31, 2009, municipal division receipts totaling at least $521 were received but not deposited. In addition, some essential records documenting amounts received and case dispositions could not be located by the municipal division (see finding number 2.4), and additional funds could be missing.

Five receipt slips were written by the former City Clerk for fines and costs totaling $429, but there is no documentation these monies were turned over to the municipal division and the monies were not deposited.

Receipt Date	Receipt Number	Amount
September 15, 2009	4380	$ 133
November 2, 2009	4404	30
November 3, 2009	4405	51
November 16, 2009	4408	123
December 14, 2009	4411	92
Total		$ 429

Additionally, a $92 money order dated July 17, 2009, received by the municipal division was not recorded as received, but was substituted into a deposit dated November 12, 2009, and recorded cash receipts totaling the same amount were not deposited.

The former City Clerk, Peggy Gilliam, abruptly terminated employment on Wednesday, September 22, 2010, after our initial visit to the city. The former Court Clerk, Christina Moon, terminated employment in February 2010.

The lack of adequate controls and the absence of proper oversight allowed missing funds to go undetected. Additionally, controls over the recording of fines and costs received by the city and subsequent transmittal to the municipal division are poor and contributed to the loss of court monies as further discussed throughout this report.

Recommendation

The City of Lanagan Municipal Division, along with city officials, work with law enforcement officials regarding any possible criminal prosecution related to the missing cash receipts, including restitution of the missing funds. In addition, an attempt should be made to locate or recover the missing court records and documents to determine whether additional funds are missing.

Auditee's Response

The City of Lanagan Municipal Judge provided the following response:

We will immediately begin to work with city and law enforcement officials to recover any missing court money. The court has also implemented increased accountability and review of court records.

The Mayor of the City of Lanagan provided the following response:

City officials will immediately assist court officials and law enforcement personnel to recover any missing court monies.

2. Accounting Controls and Procedures

Significant weaknesses were identified with accounting controls and procedures of the municipal division. As a result, there is no assurance all municipal division receipts are accounted for properly.

According to municipal division records, fines and costs collected during the years ended December 31, 2010 and 2009, were approximately $92,000 and $42,000, respectively. Fines and costs are usually collected, recorded, and deposited into a municipal division bank account by the Court Clerk. When the Court Clerk is not available fines and costs are collected by the City Clerk, who writes a manual receipt slip and then transmits the money to the Court Clerk. Fines and costs transmitted by the city to the Court Clerk are also recorded in municipal division receipt records and deposited in the municipal division bank account. The Court Clerk makes disbursements for court liabilities and the remaining fines and costs are disbursed to the city.

2.1 Segregation of duties

The duties of receiving and depositing monies are not adequately segregated from recording transactions. The Court Clerk performs all the duties related to collection of funds, deposit preparation, and posting fines and court costs received. Neither the Municipal Judge nor other city officials independent of the cash custody and record keeping functions provide any supervision or review of the work performed by the Court Clerk.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls could be improved by segregating duties to the extent possible. If proper segregation of duties is not possible, a documented independent review of the work performed by the Court Clerk is necessary.

2.2 Receipt controls

Accountability over municipal division receipts is inadequate.

- The municipal division does not account for the numerical sequence of receipt slips. During 2009 and part of 2010, the municipal division recorded amounts received on a one-write receipt ledger; however, receipt slips were not always issued in numerical sequence. In February 2010, the Judge and the Court Clerk developed a computerized database in an effort to improve the processing of receipts; however, the data base assigned a numerical sequence to all transactions and did not provide an adequate accountability for receipt transactions. In September 2010, the municipal division again began recording receipts on a one-write receipt ledger. To ensure all receipts are recorded and

deposited, the numerical sequence of receipt slips should be accounted for properly.

- Receipt slips issued by the city are not reconciled to court receipt records. Some receipt slips issued by the former City Clerk are not readable and all copies of some receipt slips were torn from the receipt books and not retained. Without proper accountability over receipt records, the court cannot ensure all monies received by the city are transmitted to the municipal division.

- Fines and costs collected by the city are not transmitted to the municipal division timely. For example, city receipt records indicate court fines totaling $165 were received by the City Clerk in cash on September 4, 2009, but were not posted as received by the municipal division until October 12, 2009. Numerous other receipts were also not transmitted by the city to the municipal division in a timely manner. To ensure all monies are transmitted and accounted for properly, the city should transmit monies timely to the municipal division.

2.3 Deposits

Receipts are not deposited timely or intact. The municipal division deposits receipts approximately monthly, and deposit amounts range from $5,000 to $7,000 each month. The municipal division holds deposits to ensure adequate cash is on hand to use as change during court. To protect against the risk of theft or misuse of funds, deposits should be made timely, and a change fund should be established and set at a constant amount.

2.4 Missing records

Some records documenting the receipt of fines and costs during the months of January and May through August 2009 could not be located by the municipal division. Additionally, these records support the disbursement of court fees collected for Crime Victims Compensation, Law Enforcement Training, and Police Officers Standards and Training. Deposits during this time period totaled $11,354. Further, records documenting the disposition of some cases could not be located by the municipal division.

Missouri Supreme Court Operating Rule 8 requires municipal divisions to retain all case file records including copies of tickets issued. Retention of municipal records is essential to establish accountability of municipal division activity and in demonstrating compliance with state law.

2.5 Unpaid fines and costs

Procedures for processing and collecting monies due on tickets where the defendant fails to appear in court are not adequate. The municipal division issues license suspensions for unpaid moving violations, but does not continue these cases on the docket or maintain a list of unpaid fines and costs to properly monitor amounts due. At our request, the Court Clerk prepared a list of open court cases as of November 31, 2010, totaling approximately $55,000; however, the list was not accurate. Our review of

the list identified some cases on the list that had been paid and several cases that were included twice on the list.

Adequate procedures and records are necessary to ensure proper and timely follow-up action is taken on amounts due the municipal division. This helps maximize municipal division collections and provides equitable treatment for those citizens who are paying fines and court costs when due.

2.6 Case list

A monthly list of all cases heard is not prepared and filed with the city. Without such a report, the city cannot effectively monitor municipal division activity and ensure monies are properly remitted. Section 479.080.3, RSMo, requires the Court Clerk to prepare a monthly list of all cases heard in the municipal division, including the names of the defendants and fines and court costs imposed, to be verified by the Court Clerk or the Municipal Judge and filed with the city.

2.7 Disbursements

Fines and costs collected by the municipal division are not properly disbursed to the city as required by law. The Court Clerk directly pays court related expenses (compensation of court clerk and municipal judge and office supplies) out of the municipal division bank account and then remits remaining monies to the city throughout the month in varying amounts depending on the balance of the account. The Court Clerk indicated the city was in poor financial condition so payments are made to the city as funds are needed. In addition, although two signatures are required, some checks written out of the municipal division bank account to pay expenses only included one signature.

Because disbursements are made from the municipal division bank account, they are not approved by the Board of Aldermen and are not reflected in the city budget document. Section 67.010, RSMo, requires the city budget present a complete financial plan for the ensuing budget year. In addition, to ensure all disbursements are proper, they should be reviewed and approved by the Board of Aldermen, and include two signatures as required. Finally Section 479.080, RSMo, indicates all fines and costs shall be paid into the municipal treasury.

2.8 Computer back ups

Backup copies of computer programs and data are not maintained or stored at an offsite location. The Court Clerk indicated the computerized accounting records from February 2010 through September 2010 were destroyed during bad weather, and she had to recreate the records from the manual receipt and banking records. Backup copies of computer information are necessary to provide a means for recreating destroyed data. These copies should be maintained and stored off-site to provide increased assurance municipal division data can be recreated.

2.9 Bonding

The Court Clerk and the City Clerk who collect monies for the municipal division are not bonded. Adequate bonding is necessary to reduce the risk of loss if funds are mishandled.

Recommendations

The City of Lanagan Municipal Division:

2.1 Segregate accounting duties to the extent possible and implement appropriate reviews and monitoring procedures.

2.2 Properly account for the numerical sequence of receipt slips, and work with city officials to ensure receipt slips issued by the city are readable and properly maintained. Additionally, the Municipal Division should work with the city to ensure receipt slips issued by the city are reconciled to court receipt records and the receipts are transmitted timely.

2.3 Ensure receipts are deposited timely and intact, and a change fund should be established if needed.

2.4 Ensure necessary records are complete and maintained.

2.5 Develop adequate procedures to account for and follow up on delinquent amounts.

2.6 Ensure a monthly list of cases heard in the municipal division is prepared and filed with the city in accordance with state law.

2.7 Ensure all fines and court costs are disbursed at least monthly and court related expenses are paid by the city. Additionally, the Municipal Division should ensure checks are signed by two board members, as required.

2.8 Ensure backup copies of computer programs and data are maintained and stored at a secure, off-site location.

2.9 Work with the city to ensure the City Clerk and Court Clerk are properly bonded.

Auditee's Response

The City of Lanagan Municipal Judge provided the following responses:

2.1 Additional review procedures have now been implemented.

2.2 Additional accounting procedures have now been implemented to ensure receipt slips are readable and accounted for properly. Court officials are now accounting for the numerical sequence of receipts.

Transmittal procedures have now been implemented to track monies received by the city and transmitted to the court.

2.3 Deposits are now being made in a timely manner and a court change fund has been established.

2.4 Complete court records are now being maintained by the court.

2.5 The court is currently tracking fines and costs owed to the court. Court officials are now following up on balances due the court in a timely manner.

2.6 Procedures have now been implemented to maintain a complete court docket system, including filing reports with the city.

2.7 Court procedures now include disbursing CVC, LET and POST monies collected weekly. All other monies collected are now transmitted to the city, court related expenses are paid by the city, and checks are appropriately signed.

2.8 Computers are now backed up at least weekly with information stored off-site.

2.9 It was our understanding that court personnel were adequately bonded by the city's bond insurer; however, the court is currently in the process of obtaining bonding coverage.

3. Municipal Division Procedures

Municipal division procedures over case dispositions, license suspensions, and tickets need improvement.

3.1 Case dispositions

Case files were not maintained in compliance with court rules. The final disposition of each case is not consistently documented, and court dockets are not always prepared. The disposition of some cases was documented on a copy of the ticket by noting only the amount of fines and costs paid. The disposition of several other cases was not documented on any court record. As a result, the status of each ticket cannot be adequately tracked and accounted for properly.

Missouri Supreme Court Operating Rule 4 requires municipal divisions to maintain a docket or backer sheet for each case. All information regarding the case should be documented to include, but not limited to, a copy of the ticket, case number, defendant's name, amount due the municipal division, bond information, warrants, and disposition of the case.

3.2 Prosecutor signature

The Prosecuting Attorney does not sign all tickets processed by the municipal division. Missouri Supreme Court Rule 37.35 states citations shall be in writing and signed by the prosecutor and filed with the court. Without the signature of the Prosecuting Attorney it is unclear whether or not the tickets processed by the municipal division are valid.

3.3 Ticket accountability

The police department and municipal division do not adequately account for the numerical sequence of traffic tickets issued. While the police department has established a log of traffic tickets issued, the log is not always complete and logs for some months could not be located. We noted numerous instances of missing sequential ticket numbers on the log.

Without a proper accounting for the numerical sequence and ultimate disposition of tickets issued, the municipal division and the Police Department cannot be assured all tickets issued are properly submitted for processing. A record should be maintained accounting for the ultimate disposition of each ticket issued to ensure all tickets have been accounted for properly and to decrease the risk of loss, misuse, or theft of funds.

Recommendations

The City of Lanagan Municipal Division:

3.1 Maintain case files in compliance with court operating rules.

3.2 Work with the Prosecuting Attorney to ensure all tickets are signed before they are submitted to the municipal division.

3.3 Work with the Police Department to ensure the numerical sequence and ultimate disposition of all tickets issued are accounted for properly.

Auditee's Response

The City of Lanagan Municipal Judge provided the following responses:

3.1 Procedures have now been implemented to ensure all case files are maintained and accounted for properly.

3.2 Court procedures have now improved to ensure all tickets are signed.

3.3 Court officials will immediately begin working with the police department to account for the disposition of all citations issued by the municipal division.

Fortieth Judicial Circuit
City of Lanagan Municipal Division
Organization and Statistical Information

The City of Lanagan Municipal Division is in the Fortieth Judicial Circuit, which consists of Newton and McDonald Counties. The Honorable Timothy W. Perigo serves as Presiding Judge.

The municipal division is governed by Chapter 479, RSMo, and by Supreme Court Rule No. 37. Supreme Court Rule No. 37.49 provides that each municipal division may establish a violation bureau in which fines and costs are collected at times other than during court and transmitted to the city treasury.

Personnel

At December 31, 2010, the City of Lanagan contracted with municipal division personnel as follows:

Title	Name
Municipal Judge	Patricia Attlesey
Court Clerk	Tammy Moore

Financial and Caseload Information

	Years Ended December 31,	
	2010	2009
Receipts	$91,935	41,552
Number of tickets issued	1,163	541

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

The Fortieth Judicial Circuit, City of Lanagan Municipal Division, did not receive any federal stimulus monies during the 2 years ended December 31, 2010.

State of Missouri

Single Audit

Year Ended June 30, 2010

March 2011

Report No. 2011-11

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the Fiscal Year 2010 Statewide Single Audit

Single Audit Background

The United States Congress passed the Single Audit Act of 1996 to establish uniform requirements for audits of federal awards administered by states, local governments, and non-profit organizations. The Act requires an audit of the state's financial statements and its use of federal awards.

The Single Audit reports the federal awards spent by all state agencies, except component units of the state, which are audited by other auditors. Single Audit guidelines require audit work be conducted on "major" programs and utilize a risk-based approach to determine which specific programs are major. Using this methodology, for the fiscal year ended June 30, 2010 (FY2010), our Single Audit involved audit work on 30 major programs at 10 departments, encompassing $13.46 billion (91 percent) of the total federal awards spent. The 30 major programs audited also account for approximately 98.5 percent ($2.57 billion) of all American Recovery and Reinvestment Act of 2009 (ARRA) funds spent during FY2010.

2010 Federal Awards

Nineteen different state departments or offices spent federal awards, but 4 state departments spent 91 percent of the federal awards, and 96 percent of the federal awards received came from just 5 federal agencies.

The state spent approximately $14.79 billion in federal awards through 341 different federal programs during FY2010. Included in this figure is approximately $2.61 billion in federal awards through ARRA, expended through 61 programs at 12 state departments. Total state expenditures of federal awards have increased $6.1 billion over the last 4 years.

Monitoring of Recovery Act Funds
DESE

As of December 31, 2010, the Department of Elementary and Secondary Eductation (DESE) had not done any monitoring of the ARRA portion of its existing programs. As such, DESE did not know whether the schools understand their requirements and had not identified and addressed any problems that might have existed. DESE disagrees with this finding.

Eligibility Reassessments
DHSS

Of the 66 cases reviewed, the Department of Health and Senior Services (DHSS) did not perform mandatory annual reassessment of eligibility for 74 percent of the Medicaid recipients receiving State Plan Personal Care or the Aged and Disabled Waiver program services. As a result, DHSS could not demonstrate payments were only made on behalf of eligible persons.

State Fiscal Stabilization Fund
DHE

The Department of Higher Education (DHE) disbursed approximately $134 million of ARRA funds to 23 colleges and universities through the State Fiscal Stabilization Fund to restore state support. DHE had no monitoring policies and procedures in place to ensure compliance with federal regulations and initially was not aware it had monitoring responsibilities.

Child Care Eligibility and Payments
DSS-Children's Division

The Department of Social Services (DSS)-Children's Division lacked adequate controls to ensure that payments from the Child Care and Development Fund (CCDF) were proper and benefiting only eligible clients.

Of the 60 cases reviewed, 22 percent lacked eligibility documentation, including 6 case files that were missing entirely, and of the 60 payments reviewed, 50 percent lacked adequate documentation and/or were not in compliance with DSS policies. Previous state audits noted similar concerns in the DSS Child Care program, and a recent internal review by DSS of the Child Care program revealed a 43 percent error rate. DSS needs to increase oversight to address the high error rate and poor case record management.

Unallowable Costs and Maintenance of Effort DSS-Family Support Division

The DSS-Family Support Division lacks a formal and comprehensive system for evaluating whether costs charged to or counted toward the Temporary Assistance for Needy Families (TANF) program are allowable. The DSS criteria have changed at least twice in the last 4 years. DSS charged certain state-funded costs as prior approved program costs and used costs related to educational and scholarship programs to meet the maintenance of effort (MOE) requirements, but it appears these costs may not meet the TANF criteria. Once audit staff questioned DSS about these costs, DSS moved the scholarship program costs for fiscal year 2011 from MOE to direct costs, but it still did not determine if the TANF criteria were met.

Additional Comments

The audit also found that several agencies (DESE, DHE, the Department of Natural Resources and DSS) lacked the controls and procedures necessary to ensure that required quarterly ARRA reports (Section 1512 reports) are complete and accurate. In addition, DESE did not ensure prevailing wages were paid by subrecipients and did not ensure School Improvement Grant payments were made in accordance with approved budgets or expended appropriately. DHSS did not adequately control voided checks in the Women, Infants and Children (WIC) program, and over 2,000 voided checks were later redeemed. DHE failed to monitor teacher loan forgiveness claim payments for timeliness. The Department of Labor and Industrial Relations (DLIR) is still working to resolve over 2,000 cases of potential restored balances due to overpayments, an issue identified in the 2009 Statewide Single Audit. DLIR was also unable to adequately track ARRA funds and its financial records and reports were inaccurate and untimely; audit staff reviewed payments made to 25 claimants and found that 56 percent contained one or more errors. During FY2010, the DSS-Missouri HealthNet Division and the Department of Mental Health received $26.8 million as the federal share of billed costs for comprehensive waiver services before obtaining formal federal approval, which has now been denied. The federal authority has not yet indicated how it expects to resolve this issue. The Department of Public Safety-Adjutant General did not adequately account for or protect its capital assets. Recommendations were also made to DSS in the areas of cost and payment allocations, documentation and verification of eligibility and participation, management of reimbursements and salary certifications. No findings were made with respect to the Missouri Department of Transportation or the Department of Economic Development.

Because of the compound nature of this audit report, no overall rating is provided.

INTRODUCTION AND SUMMARY

INTRODUCTION AND SUMMARY

The United States Congress passed the Single Audit Act of 1996 to establish uniform requirements for audits of federal awards administered by states, local governments, and non-profit organizations. The Office of Management and Budget (OMB) issued Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations* to set forth standards for obtaining consistency and uniformity among federal agencies for the audit of non-federal entities expending federal awards. A single audit requires an audit of the state's financial statements and expenditures of federal awards. The audit is required to determine whether:

- The state's basic financial statements are presented fairly in all material respects in conformity with generally accepted accounting principles.

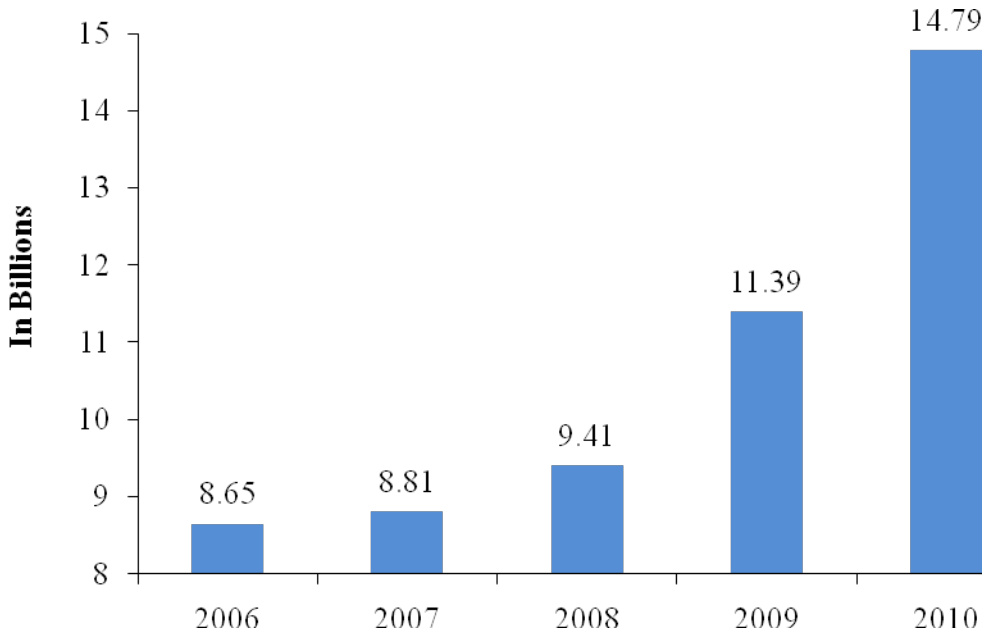
- The schedule of expenditures of federal awards is presented fairly in all material respects in relation to the financial statements taken as a whole.

- The state has adequate internal controls to ensure compliance with federal award requirements.

- The state has complied with the provisions of laws, regulations, and contracts or grants that could have a direct and material effect on federal awards.

The Single Audit report includes the federal awards expended by all state agencies that are part of the primary government. The report does not include the component units of the state, which are the public universities and various financing authorities. These component units have their own separate OMB Circular A-133 audits conducted by other auditors. The state expended $14.79 billion in federal awards during the year ended June 30, 2010. Expenditures of federal awards have increased over the past 5 years.

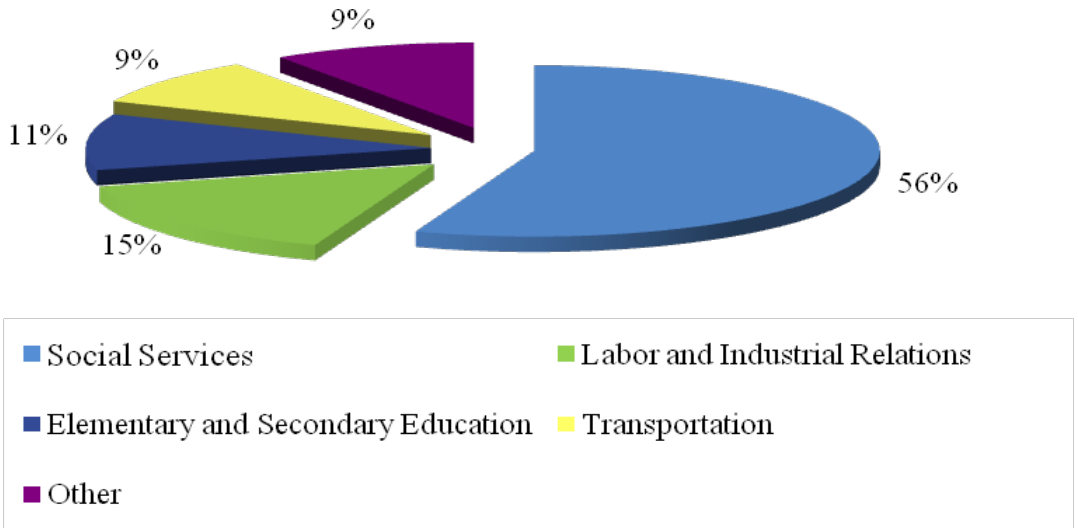
Total Expenditures of Federal Awards
Five Year Comparison



A contributing factor to the increase in total expenditures of federal awards during the year ended June 30, 2010, was the additional federal funds made available through the American Recovery and Reinvestment Act of 2009 (ARRA).

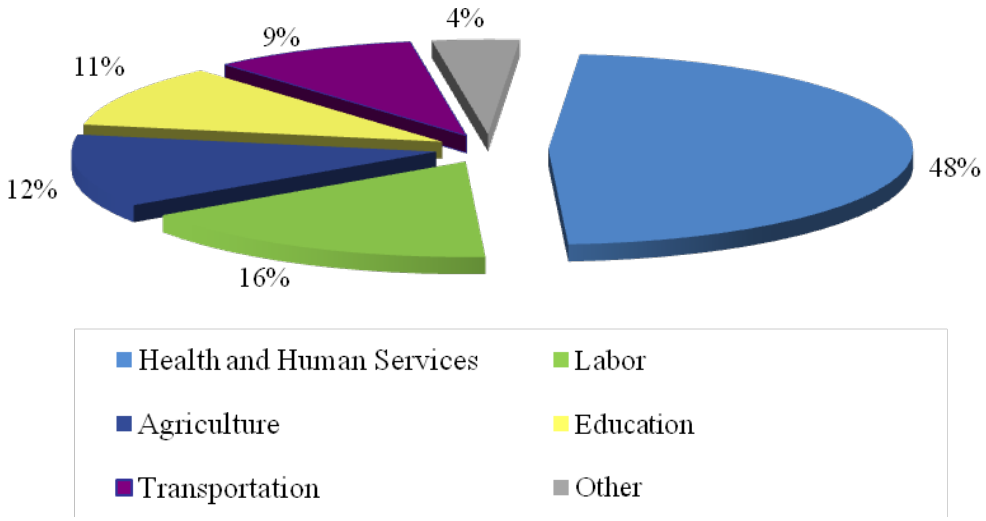
Although 19 state departments and other state offices expended federal awards, 4 state departments expended the bulk of the federal awards (91 percent).

Expenditures of Federal Awards by State Department



The state received federal awards from 22 different federal agencies. Most of the federal awards (96 percent) came from 5 federal agencies.

Expenditures of Federal Awards by Federal Department

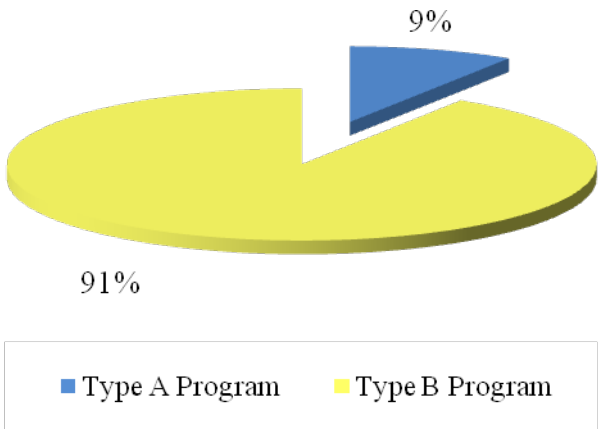


Overall, the state expended federal awards in 341 different programs. Under the audit requirements of OMB Circular A-133, federal programs are divided into Type A and Type B programs based on a dollar threshold. For the state of Missouri, OMB Circular A-133 defines the dollar threshold of a Type A program as the larger of $30 million or fifteen-hundredths of one percent (0.0015) of federal awards expended.

Determination of Type A Programs		
Larger of:		$30,000,000
		or
Total expenditures of federal awards	14,794,700,194	
Fifteen-hundredths of one percent	.0015	
		22,192,050
Dollar Threshold		$30,000,000

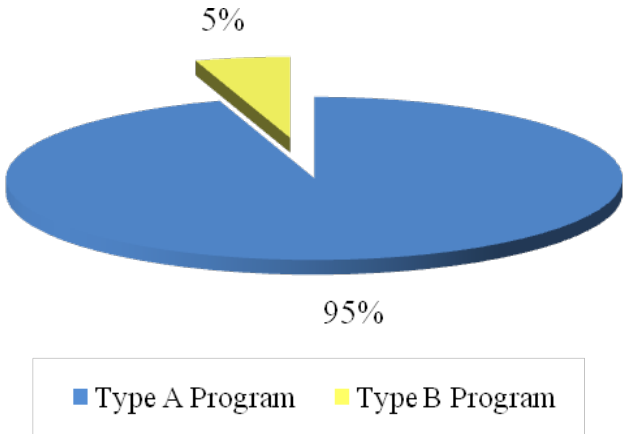
Programs with federal expenditures over $30 million are Type A programs and the programs under $30 million are Type B programs. Of the 341 different federal award programs, 31 were Type A programs and 310 were Type B programs.

Type A and Type B Programs
Number of Programs



The 31 Type A programs had expenditures of federal awards totaling $14 billion, which was 95 percent of the total expenditures for all programs. The 310 Type B programs had expenditures of federal awards totaling $737 million, which was only 5 percent of the total expenditures for all programs.

Type A and Type B Programs
Expenditures of Federal Awards



OMB Circular A-133 requires the auditor to perform risk assessments on Type A programs and to audit as major each Type A program assessed as high risk based on various risk factors. To ensure a high level of accountability over ARRA funds, Appendix VII of the 2010 Compliance Supplement included additional criteria to consider when determining risk for the Type A programs containing ARRA funds due to the inherently higher risk of these funds. We performed a risk assessment on each Type A program and determined 8 of the 31 Type A programs were low risk and did not need to be audited as major. In accordance with OMB Circular A-133, we audited the 23 Type A programs assessed as high risk as major.

OMB Circular A-133 also requires the auditor to perform risk assessments on the larger Type B programs to determine which ones to audit as major in place of the Type A programs which were not audited as major. The dollar threshold to determine the larger Type B programs is three-hundredths of one percent (.0003) of total awards expended ($14.79 billion times .0003 = $4,438,410). We performed risk assessments on the 45 larger Type B programs and determined 13 of them were high risk. In accordance with OMB Circular A-133, we audited 7 (one-half) of these 13 high risk Type B programs as major.

Major and Non-major Programs

Audit Coverage by Type of Program	Number of Programs		Expenditures	Percentage of Expenditures
Type A major programs	23	$	13,326,416,301	
Type B major programs	7		137,037,687	
Total major programs	30	$	13,463,453,988	91%
Type A non-major programs	8	$	731,276,335	
Type B non-major programs	303		599,969,871	
Total all programs	311	$	1,331,246,206	9%
	341	$	14,794,700,194	100%

American Recovery and Reinvestment Act of 2009

As noted above, the state of Missouri expended a total of approximately $14.79 billion in federal awards during the year ended June 30, 2010. Of that total, approximately $2.61 billion (17.6 percent) was expended in ARRA awards. The ARRA awards relate to 61 existing or new federal programs with expenditures at 12 different state agencies. We audited 25 of these programs as major, covering about $2.57 billion, or 98.5 percent of total expenditures of ARRA awards.

STATE AUDITOR'S REPORTS

THOMAS A. SCHWEICH
Missouri State Auditor

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly

We have audited the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the state of Missouri, as of and for the year ended June 30, 2010, which collectively comprise the state's basic financial statements, and have issued our report thereon dated January 25, 2011. Our report includes a reference to other auditors. Our report also expressed a qualified opinion on the basic financial statements because we were not allowed access to tax returns and related source documents for income taxes. Except as discussed in the preceding sentence, we conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

As described in our report on the state of Missouri's financial statements, other auditors audited the financial statements of:

1. The Missouri Department of Transportation and blended transportation corporations, the Conservation Employees' Insurance Plan, the Transportation Self-Insurance Plan, the Missouri State Employees' Insurance Plan, the Missouri Consolidated Health Care Plan, and the Missouri Department of Transportation and Missouri State Highway Patrol Medical and Life Insurance Plan, which represent 78 percent and 13 percent of the assets and revenues, respectively, of the governmental activities.

2. The State Lottery and the Petroleum Storage Tank Insurance Fund, which represent 35 percent of both the assets and revenues of the business-type activities.

3. The component units.

P.O. Box 869 • Jefferson City, MO 65102 • (573) 751-4213 • FAX (573) 751-7984

4. The pension (and other employee benefit) trust funds and the Missouri Department of Transportation Local Fund, which represent 94 percent and 97 percent of the assets and additions, respectively, of the fiduciary funds.

This report does not include the results of the other auditors' testing of internal control over financial reporting or compliance and other matters that are reported on separately by those auditors.

The financial statements of the Missouri Highway 63 Transportation Corporation and the Wentzville Parkway Transportation Corporation, blended component units; the Conservation Employees' Insurance Plan, the Missouri State Employees' Insurance Plan, and the Missouri Consolidated Health Care Plan, internal service funds; the Missouri Development Finance Board and Northwest Missouri State University, discretely presented component units; and the pension (and other employee benefit) trust funds were not audited in accordance with *Government Auditing Standards*.

As described in Note 2 to the financial statements presented in the *Missouri Comprehensive Annual Financial Report*, the state of Missouri implemented Governmental Accounting Standards Board Statement No. 51, *Accounting and Financial Reporting for Intangible Assets*; Statement No. 53, *Accounting and Financial Reporting for Derivative Instruments*; Statement No. 57, *OPEB Measurements by Agent Employers and Agent Multiple-Employer Plans*; and Statement No. 58, *Accounting and Financial Reporting for Chapter 9 Bankruptcies*.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the state of Missouri's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the state's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the state's internal control over financial reporting.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the state's financial statements will not be prevented, or detected and corrected, on a timely basis.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be deficiencies, significant deficiencies, or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the state of Missouri's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

The State Auditor's office regularly issues management reports on the various programs, agencies, divisions, and departments of the state of Missouri. The conditions mentioned in those management reports were considered in determining the nature, timing, and extent of the auditing procedures to be applied in our audit of the basic financial statements. Our reports of these conditions do not modify our report dated January 25, 2011, on the basic financial statements.

This report is intended for the information and use of the management of the state of Missouri, federal awarding agencies and pass-through entities, and other applicable government officials. However, pursuant to Section 29.270, RSMo, this report is a matter of public record and its distribution is not limited.

Thomas A. Schweich
State Auditor

January 25, 2011

THOMAS A. SCHWEICH
Missouri State Auditor

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE
WITH REQUIREMENTS APPLICABLE TO EACH MAJOR PROGRAM
AND ON INTERNAL CONTROL OVER COMPLIANCE IN ACCORDANCE
WITH OMB CIRCULAR A-133

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly

Compliance

We have audited the compliance of the state of Missouri with the types of compliance requirements described in the U.S. Office of Management and Budget (OMB) *Circular A-133 Compliance Supplement* that could have a direct and material effect on each of its major federal programs for the year ended June 30, 2010. The state's major federal programs are identified in the summary of auditor's results section of the accompanying Schedule of Findings and Questioned Costs. Compliance with the requirements of laws, regulations, contracts, and grants applicable to each of its major federal programs is the responsibility of the state's management. Our responsibility is to express an opinion on the state's compliance based on our audit.

Our compliance audit, described below, did not include the operations of the component units and related organizations that expended federal financial assistance during the year ended June 30, 2010, because they engaged other auditors to perform audits in accordance with OMB Circular A-133.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Nonprofit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the state's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination of the state's compliance with those requirements.

P.O. Box 869 • Jefferson City, MO 65102 • (573) 751-4213 • FAX (573) 751-7984

As described in finding numbers 2010-2, 2010-6, 2010-8, 2010-10, 2010-16, and 2010-21 in the accompanying Schedule of Findings and Questioned Costs, the state of Missouri did not comply with requirements regarding allowable activities or allowable costs and cost principles applicable to the School Improvement Grants Cluster, eligibility requirements applicable to the Medical Assistance Program, subrecipient monitoring requirements applicable to the State Fiscal Stabilization Fund Cluster, reporting requirements applicable to the Unemployment Insurance Program, allowable activities or allowable costs and cost principles and eligibility requirements applicable to the Child Care and Development Fund Cluster, and allowable activities or allowable costs and cost principles and level of effort requirements applicable to the Temporary Assistance for Needy Families Program. Compliance with such requirements is necessary, in our opinion, for the state of Missouri to comply with the requirements applicable to these programs.

In our opinion, except for the noncompliance described in the preceding paragraph, the state of Missouri complied, in all material respects, with the requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended June 30, 2010. The results of our auditing procedures also disclosed other instances of noncompliance with those requirements, which are required to be reported in accordance with OMB Circular A-133 and which are described in the accompanying Schedule of Findings and Questioned Costs as finding numbers 2010-4, 2010-5, 2010-7, 2010-9, 2010-12, 2010-15, 2010-17 through 2010-20, 2010-22, 2010-23, and 2010-25.

Internal Control Over Compliance

The management of the state of Missouri is responsible for establishing and maintaining effective internal control over compliance with the requirements of laws, regulations, contracts, and grants applicable to federal programs. In planning and performing our audit, we considered the state's internal control over compliance with the requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of the internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the state's internal control over compliance.

Our consideration of internal control over compliance was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in internal control that might be deficiencies, significant deficiencies or material weaknesses as defined below. However, as discussed below, we identified certain deficiencies in internal control over compliance that we consider to be significant deficiencies and material weaknesses.

A deficiency in the state's internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect and correct noncompliance with a type of compliance requirement of a federal program on a timely basis. A significant deficiency in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance. We

consider the deficiencies in internal control over compliance described in the accompanying Schedule of Findings and Questioned Costs as finding numbers 2010-1, 2010-3, 2010-4, 2010-6, 2010-8 through 2010-11, 2010-13, 2010-16, 2010-21, 2010-22, 2010-24, and 2010-25 to be significant deficiencies.

A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance such that there is a reasonable possibility that material noncompliance with a compliance requirement will not be prevented or detected and corrected on a timely basis. Of the deficiencies in internal control over compliance described in the accompanying Schedule of Findings and Questioned Costs, we consider finding numbers 2010-6, 2010-8, 2010-10, 2010-16, and 2010-21 to be material weaknesses.

The responses of the state of Missouri to the findings identified in our audit are described in the accompanying Schedule of Findings and Questioned Costs. We did not audit the state's responses and, accordingly, we express no opinion on them.

This report is intended for the information and use of the management of the state of Missouri; federal awarding agencies and pass-through entities; and other applicable government officials. However, pursuant to Section 29.270, RSMo, this report is a matter of public record and its distribution is not limited.

Missouri State Auditor

INDEPENDENT AUDITOR'S REPORT ON THE
SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS
IN ACCORDANCE WITH OMB CIRCULAR A-133

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly

We have audited the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the state of Missouri, as of and for the year ended June 30, 2010, which collectively comprise the state's basic financial statements, and have issued our report thereon dated January 25, 2011. Our report includes a reference to other auditors. Our report also expressed a qualified opinion on the basic financial statements because we were not allowed access to tax returns and related source documents for income taxes. Except as discussed in the preceding sentence, we conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

As described in our report on the state of Missouri's financial statements, other auditors audited the financial statements of:

1. The Missouri Department of Transportation and blended transportation corporations, the Conservation Employees' Insurance Plan, the Transportation Self-Insurance Plan, the Missouri State Employees' Insurance Plan, the Missouri Consolidated Health Care Plan, and the Missouri Department of Transportation and Missouri State Highway Patrol Medical and Life Insurance Plan, which represent 78 percent and 13 percent of the assets and revenues, respectively, of the governmental activities.

2. The State Lottery and the Petroleum Storage Tank Insurance Fund, which represent 35 percent of both the assets and revenues of the business-type activities.

3. The component units.

P.O. Box 869 • Jefferson City, MO 65102 • (573) 751-4213 • FAX (573) 751-7984

4. The pension (and other employee benefit) trust funds and the Missouri Department of Transportation Local Fund, which represent 94 percent and 97 percent of the assets and additions, respectively, of the fiduciary funds.

The financial statements of the Missouri Highway 63 Transportation Corporation and the Wentzville Parkway Transportation Corporation, blended component units; the Conservation Employees' Insurance Plan, the Missouri State Employees' Insurance Plan, and the Missouri Consolidated Health Care Plan, internal service funds; the Missouri Development Finance Board and Northwest Missouri State University, discretely presented component units; and the pension (and other employee benefit) trust funds were not audited in accordance with *Government Auditing Standards*.

As described in Note 2 to the financial statements presented in the *Missouri Comprehensive Annual Financial Report*, the state of Missouri implemented Governmental Accounting Standards Board Statement No. 51, *Accounting and Financial Reporting for Intangible Assets*; Statement No. 53, *Accounting and Financial Reporting for Derivative Instruments*; Statement No. 57, *OPEB Measurements by Agent Employers and Agent Multiple-Employer Plans*; and Statement No. 58, *Accounting and Financial Reporting for Chapter 9 Bankruptcies*.

Our audit was conducted for the purpose of forming our opinions on the financial statements that collectively comprise the state of Missouri's basic financial statements. The accompanying Schedule of Expenditures of Federal Awards is presented for purposes of additional analysis as required by OMB Circular A-133 and is not a required part of the basic financial statements. The state of Missouri has excluded federal award expenditures of public universities and other component units from the accompanying Schedule of Expenditures of Federal Awards. The information in the Schedule of Expenditures of Federal Awards has been subjected to the auditing procedures applied by us and the other auditors in the audit of the basic financial statements and, in our opinion, except for the effects of the exclusion of federal award expenditures of public universities and other component units, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

Thomas A. Schweich
State Auditor

The accompanying Notes to the Schedule of Expenditures of Federal Awards are an integral part of this schedule.

STATE OF MISSOURI
NOTES TO THE SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS

1. Significant Accounting Policies

A. Purpose of Schedule and Reporting Entity

The accompanying Schedule of Expenditures of Federal Awards of the state of Missouri has been prepared to comply with U.S. Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations* and the 2010 OMB Circular A-133 Compliance Supplement. The circular requires a schedule that shows total federal awards expended for each federal program and the Catalog of Federal Domestic Assistance (CFDA) number or other identifying number when the CFDA information is not available. Appendix VII of the supplement requires identifying expenditures of federal awards made under the American Recovery and Reinvestment Act of 2009 (ARRA) separately on the schedule with the inclusion of the prefix "ARRA-" in the name of the federal program.

The accompanying schedule includes all federal financial assistance administered by the state of Missouri, except for those programs administered by public universities and other component units and related organizations which are legally separate from the state of Missouri. Federal financial assistance provided to public universities and other component units and related organizations has been excluded from this audit. They were audited by other auditors under OMB Circular A-133.

B. Basis of Presentation

The accompanying Schedule of Expenditures of Federal Awards is presented in accordance with OMB Circular A-133, which defines federal financial assistance as assistance that non-federal entities receive or administer in the form of grants, loans, loan guarantees, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations and other assistance, but does not include amounts received as reimbursement for services rendered to individuals.

The schedule presents both Type A and B federal assistance programs administered by the state of Missouri. OMB Circular A-133 establishes the formula for determining the level of expenditures or disbursements to be used in defining Type A and B federal financial assistance programs. For the state of Missouri during the year ended June 30, 2010, Type A programs are those which exceed $30 million in disbursements, expenditures, or distributions. The determination of major and non-major programs is based on the risk-based approach outlined in OMB Circular A-133.

C. Basis of Accounting

The expenditures for each of the federal financial assistance programs are presented on the accounting basis as required by the federal agency which awarded the assistance. Most programs are presented on a cash basis, which recognizes expenditures of federal awards when disbursed in cash. However, some are presented on a modified accrual basis, which recognizes expenditures of federal awards when the related liability is incurred.

2. Supplemental Nutrition Assistance Program Expenditures

The reported expenditures for benefits under the Supplemental Nutrition Assistance Program (SNAP) (CFDA No. 10.551) are supported by both regularly appropriated funds and incremental funding made available under section 101 of ARRA. The mechanism used by the United States Department of Agriculture (USDA) to make these funds available to States does not enable a State to validly disaggregate the regular and ARRA components of this figure. At the national aggregate level, however, ARRA funds account for approximately 16 percent of USDA's total expenditures for SNAP benefits in the federal fiscal year ended September 30, 2010.

3. Special Supplemental Nutrition Program for Women, Infants and Children Program Rebates

The state received cash rebates from an infant formula manufacturer, totaling $35,593,507, on sales of formula to participants in the Special Supplemental Nutrition Program for Women, Infants, and Children Program (CFDA No. 10.557). This amount was excluded from total program expenditures. Rebate contracts with infant formula manufacturers are authorized by 7 CFR 246.16(a) as a cost containment measure. Rebates represent a reduction of expenditures previously incurred for WIC food benefit costs. The state was able to extend program benefits to more persons than could have been served this fiscal year in the absence of the rebate contract.

4. Unemployment Insurance Expenditures

Expenditures of federal awards reported for the Unemployment Insurance program (CFDA No. 17.225) include unemployment benefit payments from the State Unemployment Compensation Fund totaling $2,202,671,399. Reimbursements to other states from the State Unemployment Compensation Fund for benefits paid by those other states, totaling $61,242,314, have also been included in the Unemployment Insurance program expenditures. Reimbursements to the State Unemployment Compensation Fund from other states for benefits paid by the State of Missouri, totaling $16,259,599, have been excluded from total expenditures.

5. Federal Loan Guarantees

The Department of Higher Education (DHE) guarantees student loans made by lenders under the Federal Family Education Loans program (CFDA 84.032). The original principal balance outstanding of all loans guaranteed by the DHE was $4,081,092,221 as

of June 30, 2010. Additionally, the outstanding balance of defaulted loans (including principal and accrued interest) for which the federal government imposes continuing compliance requirements on the DHE was $299,813,377 as of June 30, 2010.

6. Nonmonetary Assistance

The Department of Elementary and Secondary Education distributes food commodities to school districts under the National School Lunch program (CFDA No. 10.555). Distributions are valued at the cost of the food paid by the federal government and totaled $21,192,360.

The Department of Public Safety distributes excess Department of Defense equipment to state and local law enforcement agencies under the Department of Defense Surplus Property program (CFDA No. 12.AAG). Property distributions totaled $256,375 valued at the historical cost as assigned by the federal government, which is substantially in excess of the property's fair market value. The amount of expenditures presented on the Schedule of Expenditures of Federal Awards is 23.3 percent of the historical cost ($59,735), which approximates the fair market value of the property at the time of distribution.

The State Agency for Surplus Property distributes federal surplus property to eligible donees under the Donation of Federal Surplus Personal Property program (CFDA No. 39.003). Property distributions totaled $7,043,218 valued at the historical cost as assigned by the federal government, which is substantially in excess of the property's fair market value. The amount of expenditures presented on the Schedule of Expenditures of Federal Awards is 23.3 percent of the historical cost ($1,641,070), which approximates the fair market value of the property at the time of distribution as determined by the General Services Administration.

The Department of Health and Senior Services distributes vaccines to local health agencies and other health care professionals under Public Health Emergency Preparedness program (CFDA No. 93.069) and the Immunization Grants Cluster (CFDA No. 93.268 and 93.712). Distributions are valued at the cost of the vaccines paid by the federal government and totaled $13,610,500 and $53,223,965, respectively.

93.069	Public Health Emergency Preparedness
	Immunization Cluster:
93.268	Immunization Grants
93.712	ARRA - Immunization
	TANF Cluster:
93.558	Temporary Assistance for Needy Families
93.714	ARRA - Emergency Contingency Fund for Temporary Assistance for Needy Families (TANF) State Program
93.563	Child Support Enforcement
93.563	ARRA - Child Support Enforcement
	CSBG Cluster:
93.569	Community Services Block Grant
93.710	ARRA - Community Services Block Grant
	CCDF Cluster:
93.575	Child Care and Development Block Grant
93.596	Child Care Mandatory and Matching Funds of the Child Care and Development Fund
93.713	ARRA - Child Care and Development Block Grant
93.658	Foster Care - Title IV-E
93.658	ARRA - Foster Care - IV-E
93.767	Children's Health Insurance Program

Medicaid Cluster:

93.775	State Medicaid Fraud Control Units
93.777	State Survey and Certification of Health Care Providers and Suppliers (Title XVIII) Medicare
93.778	Medical Assistance Program
93.778	ARRA - Medical Assistance Program

Dollar threshold used to distinguish between Type A and Type B programs: $30,000,000

Auditee qualified as a low-risk auditee? _____ yes __x__ no

Section II - Financial Statement Findings

This section includes no audit findings that *Government Auditing Standards* require to be reported for an audit of financial statements.

Section III - Federal Award Findings and Questioned Costs

2010-1.	**Davis-Bacon Act**

Federal Agency: Department of Education
Federal Program: 84.377 School Improvement Grants
2009 - S377A080027 and 2010 - S377A090026
84.388 ARRA - School Improvement Grants, Recovery Act
2010 - S388A090026
84.010 Title I Grants to Local Educational Agencies
2009 - S010A080025 and 2010 - S010A090025
84.389 ARRA - Title I Grants to Local Educational Agencies, Recovery Act
2010 - S389A090025
State Agency: Department of Elementary and Secondary Education (DESE)

The DESE does not ensure prevailing wages are paid by subrecipients when necessary. School Improvement Grant (SIG) and Title I Grant funds are allowed to be used by subrecipients (school districts) for minor remodeling projects, defined as minor alterations in previously completed buildings. Minor remodeling is not building construction, structural alterations to a building, building maintenance, or repairs.

At the beginning of each school fiscal year, school districts submit a budget and plan for each of these grant funds. The remodeling projects, which may require prevailing wages to be paid in accordance with the Davis-Bacon Act, and equipment purchases greater than $1,000, are recorded by school districts as capital outlays on their budgets and plans. The school districts are required by the DESE to indicate the purpose of the capital outlays in the school district plan; however, the DESE does not review the reported purpose for

capital outlays to ensure remodeling projects are clearly identified. In addition, the DESE does not ensure prevailing wages are paid during monitoring reviews conducted.

During fiscal year 2010, 551 school districts received approximately $257.1 million through the Title I Grant programs. Of that amount, 200 districts recorded approximately $11.2 million in capital outlays on their budgets. Through the SIG programs, 21 school districts received approximately $4.5 million, with approximately $869,000 in capital outlays recorded on the budgets of 6 districts.

We reviewed the budgets and plans of 14 school districts with the largest recorded capital outlays in these programs. This included the six school districts responsible for all of the recorded SIG capital outlays and eight school districts responsible for 36 percent of the Title I Grant capital outlays. All school districts reviewed either failed to adequately report the purpose of capital outlays or did not document the purpose. The DESE was unable to clearly determine from the budgets or school plans whether capital outlays were for minor remodeling versus equipment and the DESE did not follow-up with the school districts for more information on the use of those capital outlay funds. As a result, the DESE could not ensure prevailing wages were paid on applicable projects in compliance with federal requirements.

The Davis-Bacon Act requires all laborers and mechanics employed by contractors or subcontractors to work on construction contracts in excess of $2,000 financed by federal assistance funds must be paid wages not less than those established for the locality of the project (prevailing wage rates) by the U.S. Department of Labor (40 USC 3141-3144, 3146, and 3147).

WE RECOMMEND the DESE establish procedures to clearly identify funds expended by subrecipients which may require prevailing wages to be paid, and monitor those subrecipients to ensure compliance with the Davis-Bacon Act.

AUDITEE'S RESPONSE

We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

2010-2. School Improvement Grants

Federal Agency:	Department of Education
Federal Program:	84.377 School Improvement Grants 2009 - S377A080027 and 2010 - S377A090026 84.388 ARRA - School Improvement Grants, Recovery Act 2010 - S388A090026
State Agency:	Department of Elementary and Secondary Education (DESE)
Questioned Cost:	$225,680

The DESE did not always ensure payments were made to subrecipients in accordance with approved budgets and DESE written policies, and budget amendments were not adequately documented. In addition, the DESE did not question a school district's ability to spend grant monies timely, as required. During state fiscal year 2010, expenditures for the School Improvement Grants (SIG) program totaled approximately $6.2 million with approximately $4.5 million disbursed to 21 school districts.

The objective of the SIG program is to improve student achievement in Title I school districts identified for improvement, corrective action, or restructuring to enable those school districts to make adequate yearly progress and exit school improvement status. At the beginning of each fiscal year, the DESE substantially approves each school district's budget for SIG funds. DESE written policies allow school districts to begin to obligate these grant funds as of the substantial approval date. The school districts typically submit reimbursement requests to the DESE as the funds are expended. DESE written policies allow for variances of expenditures in approved budget categories without documented approval up to 10 percent of the total grant amount budgeted. The DESE also requires school districts receiving federal funds to indicate the funds have already been spent or will be spent within 3 days of receipt, to help ensure compliance with federal Cash Management Improvement Act requirements to minimize the time elapsing between receipt and disbursement of federal funds.

We reviewed payments made to 10 school districts totaling $1,936,638 or 31 percent of total grant funds expended. We noted concerns with a payment made to one school district.

A. The DESE approved a $695,200 payment to a school district which was not adequately documented or supported by a budget. The DESE substantially approved a SIG budget for this school district in May 2009, for $615,200, with $400,000 budgeted in the purchased services expenditure category. In June 2009, the DESE approved an increase in expenditures of $80,000 for a total amended budget of $695,200; however, there was no documentation of the expenditure category the amendment affected. The school district requested payment of $695,200, entirely from the purchased services expenditure category of the budget. The request was approved and paid by the DESE in September 2009, although only a portion of the original budget had been authorized in this category. Based on the original approved budget and the DESE budget amendment policy, it appears the maximum allowable expenditures in the purchased services budget category was $469,520 ($400,000 original purchased services budget line plus 10 percent of the total amended budget). We question the federal share of the payment made in excess of the documented approved budget category, or $225,680 (100 percent).

   The SIG requirements within 34 CFR Subtitle B, Chapter II, provides school districts shall implement a budget of sufficient size and scope to ensure the school district can implement the required improvement plans. Also, OMB Circular A-87, Section A.3.e.(3) indicates a State must adopt its own written fiscal and

administrative requirements for expending and accounting for all funds, which are consistent with the provisions of OMB Circular A-87, and extend such policies to all subrecipients. These fiscal and administrative requirements must be sufficiently specific to ensure funds are used in compliance with all applicable federal statutory and regulatory provisions, costs are reasonable and necessary for operating these programs, and funds are not used for general expenses required to carry out other responsibilities of a state or its subrecipients.

B. The DESE did not question the ability of the school district to spend the requested monies within 3 days of receipt as required. The school district requested payment from the DESE on September 3, 2009, and received the funds on September 21, 2009, for the entire grant amount of $695,200. The request for payment document indicated the school district had not previously expended any of these funds. It appeared unlikely that the school district could spend this entire grant in such a limited time frame. At our request, the DESE obtained documentation from the school district to support this payment. We noted the following concerns with the supporting documentation provided by the school district:

- The school district did not expend $93,060 within 3 days of receipt of grant funds from the DESE. The school district expended these funds between September 29, 2009 and January 20, 2010.

- The school district issued a $293,195 check on September 15, 2009, to a vendor for services yet to be performed from October 2009 through February 2010. Approximately $201,000 of the disbursement was reimbursed to the school through the payment request. By paying for these services in advance, the school district's options to compel satisfactory completion of the contract were reduced.

In addition to requiring recipients to establish procedures to minimize the time elapsing between receipt and disbursement of federal funds, OMB Circular A-133, Compliance Supplement Part 3, requires recipients (the DESE) to establish similar procedures for its subrecipients when funds are drawn in advance, rather than as a reimbursement. It also requires the DESE to monitor cash drawdowns by their subrecipients to ensure that subrecipients conform substantially to the same standards of timing and amount as apply to the pass-through entity.

WE RECOMMEND the DESE:

A. Ensure all payments are made in accordance with the approved budget, federal guidelines, and written policies, and budget amendments are adequately documented. In addition, the DESE should resolve the questioned costs with the grantor agency.

B. Establish procedures to ensure school districts appropriately expend funds received within the required time-frame.

AUDITEE'S RESPONSE

We agree with the auditor's findings. Our Corrective Action Plan includes our planned actions to address the findings.

2010-3.	**Monitoring of Recovery Act Funds**

Federal Agency: Department of Education
Federal Program: 84.386 ARRA - Education Technology State Grants, Recovery Act 2010 - S386A090025
84.389 ARRA - Title I Grants to Local Educational Agencies, Recovery Act 2010 - S389A090025
84.391 ARRA - Special Education Grants to States, Recovery Act 2010 - H391A090040
84.394 ARRA - State Fiscal Stabilization Fund - Education State Grants, Recovery Act 2010 - S394A090026
84.397 ARRA - State Fiscal Stabilization Fund - Government Services, Recovery Act 2010 - S397A090026
State Agency: Department of Elementary and Secondary Education (DESE)

The DESE did not monitor ARRA funds provided to school districts on a timely basis. ARRA funds for the programs noted above totaling approximately $664 million were provided to school districts through new and existing programs during state fiscal year 2010.

A. The DESE could have more timely monitored school district use of ARRA funds received under previously established programs. ARRA funds totaling approximately $182 million were provided to school districts through the Education Technology, Title I, and Special Education programs during fiscal year 2010. ARRA funds were allocated to eligible districts based on various program requirements and not all districts received funding under each program.

The DESE has an ongoing system of annual program reviews (including onsite and desk reviews) for monitoring school districts based on a 5-year rotational basis. Onsite reviews, as well as desk reviews, are used to assess whether expenditures are allowable and reasonable in nature. Supporting documentation of district expenditures is reviewed during onsite reviews, while only summary information provided by each school district is reviewed during desk reviews. Onsite reviews are performed of school districts the DESE has assessed as high

risk. Districts may also be included in an onsite review, based on the risk assessment performed by the DESE, regardless of the 5-year rotation. The reviews performed by the DESE in fiscal year 2010 covered only fiscal year 2009 expenditures, which had no ARRA program expenditures. School districts began incurring fiscal year 2010 expenditures under the Education Technology, Title I, and Special Education programs in July 2009. As of December 2010, the DESE had still not performed monitoring activities for these expenditures. The ARRA funds for these programs must be spent by September 30, 2011.

In addition, the DESE utilizes checklists for both onsite and desk reviews for each program to monitor school district use of federal funds. While the DESE has added a step to the checklist to require ARRA expenditures be reviewed during the fiscal year 2011 reviews, the DESE has not established the number or percentage of expenditures to be reviewed to ensure adequate coverage of ARRA expenditures. DESE officials indicated they did not change or expedite the monitoring for these ARRA funds because the purpose of these funds were the same as other grants schools had received in the past, school plans and budgets for the funds had been approved by DESE, and no guidance was received from the U.S. Department of Education (USDE) regarding additional monitoring of these ARRA funds.

B. The DESE did not monitor the State Fiscal Stabilization Fund (SFSF) monies provided to school districts on a timely basis to ensure compliance with federal guidelines. In March 2010, the DESE adopted a plan to monitor these new program monies; however, monitoring activities were not started until after significant expenditures were incurred and fiscal year 2010 had ended. The SFSF programs were new in state fiscal year 2010, and SFSF monies totaling approximately $482 million were provided to 551 school districts during the fiscal year.

Each school district was allocated SFSF monies at the beginning of the fiscal year based on the basic school funding formula, and the funds were disbursed to each school district monthly. These funds were allocated for general school district operations with few restrictions on use. However, these funds cannot be used for maintenance costs, stadiums or other facilities primarily used for athletic events, purchases or upgrades of vehicles, improvement of stand-alone administrative offices, and certain school modernization. Quarterly reports are prepared by the DESE identifying the total expenditures by budget category based on information provided by school districts. If applicable, jobs and vendor information is also provided by the school districts for the quarterly reports; however, supporting documentation is not required to be submitted.

The annual monitoring plan adopted by the DESE for the 551 school districts receiving SFSF monies called for onsite reviews of 11 higher risk school districts (2 percent); desk reviews of 111 school districts (20 percent), and reviews of the independent audit reports for all school districts. Supporting documentation of

district expenditures is reviewed during onsite reviews, while only summary information provided by each school district is reviewed during desk reviews. A detailed risk assessment was performed of each school district to determine which districts will receive onsite or desk reviews. The risk assessment included factors such as the amount of SFSF monies received by the school district, the school district's financial stability, and whether federal program findings were identified in the school district's independent audit reports.

Although the DESE began expending the SFSF in July 2009, the DESE did not perform a risk analysis of these funds until September 2010, or begin monitoring until November 2010. The majority of the monitoring planned for these programs had still not been completed almost 6 months after the end of the fiscal year. As of December 15, 2010, all 11 onsite reviews had been performed, but the desk reviews had not started. In addition, as of January 12, 2011, 539 of the 551 school districts had submitted independent audit reports, but only 119 of the audit reports had been reviewed by the DESE.

OMB Circular A-133, section .400(d)(3), requires the DESE to monitor subrecipients through reporting, site visits, regular contact, or other means "…to ensure federal awards are used for authorized purposes in compliance with laws, regulations, and the provisions of contracts and grant agreements and performance goals are achieved." In addition, the USDE issued specific guidance over the SFSF program in April 2009, indicating the DESE has oversight responsibilities and must monitor activities to ensure compliance with all applicable federal requirements. Given the magnitude of ARRA funds received, the additional federal requirements related to these funds, and heightened federal expectations of transparency and accountability, more comprehensive and timely monitoring procedures appear needed. While current review procedures performed only after the conclusion of the fiscal year may be acceptable for existing ongoing programs, they may not be adequate for the additional temporary ARRA funds. Without adequate and timely monitoring of ARRA funds, noncompliance with federal guidelines is unlikely to be detected in a timely manner and would not allow corrective action by the DESE before the end of the program.

WE RECOMMEND the DESE develop additional monitoring procedures to ensure ARRA expenditures are in compliance with federal guidelines. In addition, these procedures should be performed on a timely basis.

AUDITEE'S RESPONSE

We disagree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement.

2010-4.	Section 1512 Reporting

Federal Agency: Department of Education
Federal Program: 84.386 ARRA - Education Technology State Grants, Recovery Act 2010 - S386A090025

84.388 ARRA - School Improvement Grants, Recovery Act 2010 - S388S090026
84.389 ARRA - Title I Grants to Local Education Agencies, Recovery Act 2010 - S389A090025
84.391 ARRA - Special Education Grants to States, Recovery Act 2010 - H391A090040
84.392 ARRA - Special Education - Preschool Grants, Recovery Act 2010 - H392A090103
84.394 ARRA - State Fiscal Stabilization Fund - Education State Grants, Recovery Act 2010 - S394A090026
84.397 ARRA - State Fiscal Stabilization Fund - Government Services, Recovery Act 2010 - S397A090026
State Agency: Department of Elementary and Secondary Education (DESE)

The DESE does not have adequate controls and procedures in place to ensure Section 1512 reports are complete and accurate and payments made through the School Improvements Grants (SIG) program were not properly classified. In addition, the DESE does not have a formal written plan in place for the Section 1512 reporting process.

Section 1512 of the ARRA requires comprehensive reporting for certain ARRA awards to promote transparency and accountability over the use of such funds. This section requires various data elements to be reported on a quarterly basis by prime recipients detailing the use of ARRA funds including the total grant award, the amount received and expended, and certain elements for vendor payments and subawards. Additionally, prime recipients are required to report on planned projects and activities, including the status of project completion and an estimate of direct jobs created or retained. Prime recipients may solicit information for some data elements from subrecipients and vendors to help meet Section 1512 reporting requirements. Additionally, in some cases prime recipients may delegate certain reporting duties to their subrecipients, although the state of Missouri, as the prime recipient of these funds, has not delegated such responsibilities.

A. The DESE does not have adequate controls and procedures in place to provide assurance Section 1512 report information submitted by school districts and universities (subrecipients) is complete and accurate. During state fiscal year

2010, the DESE disbursed approximately $665 million in ARRA funds to subrecipients.

On a quarterly basis, school districts submit data specific for Section 1512 reporting through an online reporting system administered by the DESE. Once all information is received, DESE personnel compile data for each program, upload the information into the state's Section 1512 reporting system (STIM 360), and perform a review to ensure information entered into STIM 360 agrees to the online reporting system. Some elements submitted by the school districts, such as subaward identifying numbers, award amounts, and project descriptions, are consistent each quarter and are prepopulated in STIM 360 from prior quarters, requiring little oversight by the DESE on a quarterly basis. For other elements, DESE personnel review information submitted for reasonableness, and compare expenditure data to SAM II and revenue data to drawdown reports; however, the DESE relies on the accuracy and completeness of much of the other information submitted by the school districts, such as jobs created or retained and vendor payments, for each quarterly report. In addition, during state fiscal year 2010, the SIG program obtained jobs data from the program's one subrecipient, a state university; all other data elements were available at the DESE. However, the DESE relied on the jobs data received from the university for Section 1512 reporting purposes.

For the Education Technology, SIG, Title I, and Special Education programs, the DESE has an ongoing system of annual program reviews, including onsite monitoring and desk reviews, for monitoring school districts based on a 5-year rotation. For the State Fiscal Stabilization Fund (SFSF) program, a new program in state fiscal year 2010, the DESE has established a monitoring plan for reviewing a percentage of school districts each year, through both onsite monitoring and desk reviews. However, for each program, monitoring procedures performed did not include a review of documentation supporting the data submitted by subrecipients and relied on for Section 1512 reporting. According to DESE personnel, steps were added to the SFSF monitoring checklist during state fiscal year 2011 and they are working on adding steps to their monitoring checklists for the remaining programs to include a review of certain Section 1512 data elements.

OMB Memorandum M09-21 states the DESE, as prime recipient, is ultimately responsible for the reporting of all data required by Section 1512 of the ARRA. Additionally, the prime recipients, as owners of the data submitted, have the principal responsibility for the quality of the information submitted. Without adequate monitoring procedures in place over the subrecipient data, the DESE has less assurance the information included in the Section 1512 reports for the various programs is complete and accurate.

B. Payments made through the SIG program were not properly classified on the Section 1512 report. During the year ended June 30, 2010, the DESE expended

$400,000 in ARRA funds through the SIG program, all of which was disbursed to one university to provide technical and grant application assistance to school districts. Our review of the March 31, 2010, Section 1512 report for the SIG program noted payments made to the university were classified as vendor payments although the DESE indicated ARRA funds had been passed through to subrecipients on its Schedule of Expenditures of Federal Awards. According to DESE personnel, the payments were misclassified and will be correctly identified as subrecipient payments on future Section 1512 reports.

OMB Memorandum M09-21, Supplement 2, outlines the various reporting elements required to be reported, including vendor and subrecipient data. Data elements required to be reported differ if the payments are made to vendors versus subrecipients. Required data elements for subrecipients are more extensive and include items such as subaward number and amount and total amount of subawards disbursed, whereas vendor payments are only required to include a description of the product/service provided and the payment amount. Without properly classifying payments in Section 1512 reports, the DESE cannot ensure all data elements are reported as required.

C. The DESE does not have a formal written plan in place to address the Section 1512 reporting process. A formal written plan would help ensure Section 1512 reports are complete and accurate. The plan should, at a minimum, document the flow of information, define the responsibilities of subrecipients and various program personnel, and include procedures for ensuring the accuracy and completeness of all Section 1512 reporting elements. Without a formal written plan in place, the DESE has less assurance the various reporting responsibilities, such as data collection and verification, have been relayed to and understood by all parties of the reporting process.

WE RECOMMEND the DESE:

A. Establish procedures to ensure the accuracy and completeness of data submitted by subrecipients for Section 1512 reporting purposes.

B. Properly classify subawards on Section 1512 reports for the SIG program.

C. Establish a formal written plan for all programs that require Section 1512 reporting.

AUDITEE'S RESPONSE

A&B. We agree with the auditor's findings. Our Corrective Action Plan includes our planned actions to address the findings.

C. We disagree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement.

2010-5.	Food Instruments

Federal Agency: Department of Agriculture
Federal Program: 10.557 Special Supplemental Nutrition Program for Women, Infants, and Children
2007 - 07WICSPNDRFD and 3MO700754-07
2008 - 3MO700754-08
2009 - 09WIC, 09WICSPNDFWD, and 09BRSTFEDWIC
2010 - 10WIC, 10WICSPNDFWD, and 10BRSTFEDWIC
State Agency: Department of Health and Senior Services (DHSS)
Questioned Costs: $43,140

For the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC), the DHSS does not have adequate controls in place to ensure the disposition of voided food instruments (WIC checks) are properly accounted for as required by program regulations.

The DHSS awarded subgrants to 118 local WIC providers (LWP) to certify applicant eligibility for benefits and to deliver benefits to eligible persons (participants). Periodically, participants receive checks which list the food to be purchased from authorized dealers by quantity, size, and brand. For example, a check issued in April 2010 provided that the maximum of $12.52 could be spent to purchase 24 ounces of infant cereal, approved brands and 16, 4-ounce jars of infant fruits/veggies, approved brands. All LWPs utilize the Missouri WIC Information Network System (MOWINS) to maintain information regarding participants and WIC checks.

During the year ended June 30, 2010, these LWPs issued over 7.5 million checks to participants, totaling approximately $156.5 million. Of the checks issued, 191,380 checks, totaling $4,904,961, were identified as void in the MOWINS. Checks are voided when returned as unused by a participant or when not issued to the participant because a wrong amount or item was printed. However, the DHSS does not have established procedures to identify if voided checks in MOWINS are later redeemed. Additionally, DHSS policies/procedures provide that voided checks are to be defaced as void and destroyed as soon as possible. This was not always done by the LWPs since checks voided in MOWINS were later redeemed by participants. As a result, we determined that 2,191 (1 percent) of the voided checks in MOWINS were redeemed by participants. We question the federal share of the voided checks that were issued and redeemed, or $43,140.

According to 7 CFR Section 246.12(q), the DHSS must account for the disposition of all WIC checks as either issued or voided, and as either redeemed or unredeemed. The disposition process must be performed within 120 days of the first valid date for participant use of the check and must be conducted in accordance with the financial management requirements of 7 CFR Section 246.13.

WE RECOMMEND the DHSS develop controls and procedures to prevent voided checks from being redeemed. In addition, the DHSS should resolve the questioned costs with the grantor agency.

AUDITEE'S RESPONSE

We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

2010-6.	**Eligibility Reassessments**

Federal Agency:	Department of Health and Human Services
Federal Program:	93.778 Medical Assistance Program 2009 - 0905MO5028 and 0905MO5048 2010 - 1005MO5MAP/XIX-MAP10 and 1005MO5ADM/XIX-ADM10 93.778 ARRA - Medical Assistance Program 2009 - 0905MOARRA and 2010 - 1005MOARRA
State Agency:	Department of Health and Senior Services (DHSS)
Questioned Costs:	$598,286

The DHSS does not have effective controls in place to ensure annual reassessments to determine the eligibility of recipients receiving State Plan Personal Care (PC) or Aged and Disabled Waiver (ADW) services are conducted, as required.

The Medical Assistance Program, also known as Medicaid, is administered by the Department of Social Services (DSS), MO HealthNet Division, while the DHSS is charged with providing comprehensive assessments/reassessments and case management services for Medicaid recipients who are eligible for the PC or the ADW program services, and to authorize the services to be provided based on a plan of care. These services provide assistance to help qualifying recipients remain in or return to their home or community, and include services such as bathing, grooming, and dressing; general toileting activities; cleaning, dusting, and laundry; meal preparation and/or assistance with eating and washing dishes; and transportation for shopping/errands and medical appointments. Other services include advanced personal care, authorized nurse visits, and respite care. During the year ended June 30, 2010, over 72,500 recipients received PC and ADW services, with payments for these services totaling approximately $466 million.

We tested 66 cases randomly selected from the Medicaid cases receiving PC or ADW services for all or part of the year ended June 30, 2010. Payments for the services related to these cases for the year ended June 30, 2010 totaled approximately $990,000. We noted the DHSS did not perform annual reassessments of eligibility for 49 of 66 (74 percent) cases reviewed. The most recent reassessment for the majority of these cases was completed 2 to 4 years ago; however, the most recent reassessment for 2 cases was

last completed over 10 years ago. As a result, the DHSS could not demonstrate payments related to these 49 cases were made on behalf of eligible individuals. The payments made on behalf of the recipients without annual reassessments during the year ended June 30, 2010, totaled $806,967. We question the federal share of these payments or $598,286 (74.14 percent).

Federal regulation 42 CFR Section 441.302(c) requires a reassessment of eligibility at least annually to ensure ADW recipients continue to be eligible for benefits, and the Cooperative Agreement between the DSS and the DHSS provides for periodic reassessments of the PC and ADW services to ensure the continued necessity, appropriateness, and adequacy of the services. The DHSS policy manual, section 1606.20, provides that the reassessment be completed at least annually to establish continued eligibility for services, ensure adequacy of the care plan and determine the level of client satisfaction of the provider and service delivery. The failure to perform annual reassessments as required can result in service payments being made on behalf of ineligible individuals.

WE RECOMMEND the DHSS establish effective controls to ensure the annual reassessments are conducted as required. In addition, the DHSS should resolve the questioned costs with the grantor agency.

AUDITEE'S RESPONSE

We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

2010-7.	**Teacher Loan Forgiveness Payments**

Federal Agency: Department of Education
Federal Program: 84.032 Federal Family Education Loans
State Agency: Department of Higher Education (DHE)
Questioned Costs: $1,408,723

The DHE did not make payments to lenders within 45 days as required by program regulations for teacher loan forgiveness (TLF) claims. During the year ended June 30, 2010, payments totaling approximately $3.83 million were made for 558 TLF claims.

The DHE is Missouri's guarantor agency for student loans generated under the Federal Family Education Loan program. The DHE contracts with a loan servicer to act on the state's behalf in processing TLF claims received from lenders for teachers requesting forgiveness of their student loans. The contractor's responsibilities include determining whether certain eligibility requirements are met, approving or denying TLF claims, and processing and paying approved claims in accordance with federal regulations.

DHE compliance personnel periodically review TLF claims processed by the loan servicer for compliance with federal regulations, which includes ensuring approved TLF claims are paid within 45 days after receiving lender requests. As noted in our prior report, the DHE review of TLF claims paid in fiscal year 2010 noted errors with the timeliness of some payments made. During our current audit, we tested 16 TLF claim payments and identified 7 that were not paid timely according to federal regulations. Although these payments appeared to be for eligible recipients, payments were made between 51 and 58 days after receiving the lenders' requests.

Of the TLF claims paid during the year ended June 30, 2010, the DHE identified 184 claims (33 percent) that were paid untimely, which includes the 7 errors noted during our review. All fiscal year 2010 TLF claim payments identified as being paid untimely occurred between July and October 2009. We question the federal share of the 184 claim payments, or $1,408,723. Both the loan servicer and the DHE indicated procedures were updated in October 2009 to use the correct date parameters and to ensure the timely payment of TLF claims. Since this change, the DHE review has not identified any errors and our review of five TLF claims paid between November 2009 and June 2010 also did not identify any errors.

Federal regulation 34 CFR 682.215(f)(3) requires the guaranty agency, within 45 days of receiving the lender's request, determine if the borrower is eligible for loan forgiveness, notify the lender of the determination, and if approved, pay the lender the amount of the claim, up to $17,500.

WE RECOMMEND the DHE continue monitoring to ensure TLF payments are made in a timely manner in accordance with federal regulations. In addition, the DHE should resolve the questioned costs with the grantor agency.

AUDITEE'S RESPONSE

We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reason for our disagreement and any planned actions to address the finding.

2010-8. State Fiscal Stabilization Fund

Federal Agency:	Department of Education
Federal Program:	84.394 ARRA - State Fiscal Stabilization Fund - Education State Grants, Recovery Act 2010 - S394A090026 84.397 ARRA - State Fiscal Stabilization Fund - Government Services, Recovery Act 2010 - S397A090026
State Agency:	Department of Higher Education (DHE)

The DHE does not have policies and procedures in place to monitor the State Fiscal Stabilization Fund (SFSF) monies provided to subrecipients to ensure compliance with federal guidelines. The DHE did not properly identify the source of federal funds disbursed to subrecipients or relay audit responsibilities under OMB Circular A-133 as required. In addition, the DHE does not have adequate controls and procedures in place to ensure Section 1512 reports are complete and accurate for the SFSF program.

During state fiscal year 2010, the DHE disbursed approximately $134 million of SFSF monies, awarded under the ARRA, to 23 state Institutions of Higher Education (institutions) to restore state support. Each institution was allocated SFSF monies at the beginning of the fiscal year based on amounts appropriated by the state legislature. The DHE disbursed the funds to the various institutions in 12 equal monthly payments during the fiscal year. The SFSF program monies are required to be obligated or expended by September 30, 2011, and the DHE anticipates disbursing the remainder of program funds, an estimated $41 million, to the institutions by the end of June 2011.

A. The DHE has not established a monitoring plan to review funds provided to and expended by the institutions and has not performed any monitoring of the SFSF monies, such as on-site monitoring visits, desk reviews, or obtaining OMB Circular A-133 audit reports from the various institutions. According to DHE officials, they were unaware of their monitoring responsibilities over SFSF monies and do not have or intend to establish an audit function within the DHE to fulfill such responsibilities. However, DHE personnel indicated they have recently contracted out monitoring activities over the institutions, which are set to begin during March 2011.

   OMB Circular A-133 requires the DHE to monitor subrecipients to ensure federal awards are used for authorized purposes in compliance with laws, regulations, and provisions of contracts and grant agreements and that performance goals are achieved. In addition, the U.S. Department of Education issued specific guidance over this program in April 2009, indicating the DHE has oversight responsibilities and must monitor activities to ensure compliance with all federal requirements of the SFSF program. Given the magnitude of ARRA funds received, the additional federal requirements relating to these funds, and the heightened federal expectations of transparency and accountability, timely monitoring of the use of funds by the institutions is needed. Without adequate and timely subrecipient monitoring procedures, there is less assurance funds disbursed to the institutions are used for the intended purpose, and noncompliance with federal guidelines is unlikely to be detected in a timely manner and would not allow for corrective action before the program ends.

B. The DHE did not identify the federal award information to each institution at the time of subaward as required by federal regulations. While a spreadsheet was provided to each institution outlining the funding sources and monthly amounts to be received from the state, including funding from the state's Federal Budget Stabilization Fund, the spreadsheet did not identify specific federal award

information such as the CFDA title and number, award year, or the federal agency. Additionally, each institution signed a Statement of Assurances outlining the specific ARRA compliance requirements and their responsibilities for meeting those requirements; however, the DHE did not communicate the responsibilities of the institutions to comply with additional SFSF program requirements or the general requirements applicable to all federal programs. Furthermore, the DHE did not communicate the responsibilities of the institutions to separately identify ARRA funds on their schedule of expenditures of federal awards (SEFA), or meet OMB Circular A-133 Single Audit requirements.

OMB Circular A-133, Section .400(d), requires the DHE, as a pass-through entity, to identify federal awards made by informing each subrecipient of the CFDA title and number, award name and number, award year, and the name of the federal agency. In addition, the pass-through entity is required to ensure that subrecipients expending $500,000 or more in federal awards during the subrecipient's fiscal year have met A-133 Single Audit requirements. OMB Circular A-133 Compliance Supplement Part VII, also requires pass-through entities to require their subrecipients to separately identify the expenditures of federal awards under the ARRA on their SEFA. Without properly identifying federal award information to institutions or communicating responsibilities, the DHE has less assurance the institutions understand their responsibilities in meeting the federal requirements.

C. The DHE does not have adequate procedures in place to provide assurance Section 1512 report information submitted by the institutions is complete and accurate. The DHE has limited procedures to ensure expenditure and subaward data is complete and accurate; however, the DHE does not perform any monitoring of institution-submitted data, through either on-site monitoring or desk reviews of supporting documentation, to ensure elements relied on for reporting purposes are adequately supported.

Section 1512 of the ARRA requires comprehensive reporting for certain ARRA awards to promote transparency and accountability over the use of such funds. This section requires various data elements to be reported on a quarterly basis by prime recipients detailing the use of ARRA funds including the total grant award, the amount received and expended, and certain elements for vendor payments and subawards made. Additionally, prime recipients are required to report on planned projects and activities, including the status of project completion and an estimate of direct jobs created or retained. Prime recipients may solicit information for some data elements from subrecipients and vendors to help meet Section 1512 reporting requirements. Additionally, in some cases, prime recipients may delegate certain direct reporting duties to their subrecipients, although the state of Missouri, as the prime recipient of these funds, has not delegated such responsibilities.

On a quarterly basis, the DHE sends out a Section 1512 report template to be completed and returned by each institution. Once all information is received, DHE personnel enter the data into the state's Section 1512 reporting system (STIM 360) and perform a review to ensure information entered agrees to the information received from the institutions. Some elements submitted by the institutions, such as subaward identifying numbers, award amounts, and project descriptions, are consistent each quarter and are prepopulated in STIM 360 from prior quarters, requiring little oversight from the DHE on a quarterly basis. For the other elements, DHE personnel review information submitted for reasonableness and compare expenditure data to SAM II; however, the DHE relies on the accuracy and completeness of much of the other information submitted by the institutions, such as jobs created or retained and vendor payments, for each quarterly report. As of December 2010, institutions had not submitted any vendor payment information and the DHE could not determine whether any vendor information should have been included, although program descriptions submitted by some institutions contained plans that could involve vendor purchases.

OMB Memorandum M09-21 states the DHE, as prime recipient, is ultimately responsibility for reporting of all data required by Section 1512 of the ARRA. Additionally, the prime recipients, as owners of the data submitted, have the principal responsibility for the quality of the information submitted. Without adequate monitoring procedures in place over the data submitted by the institutions, the DHE has less assurance the information included in the Section 1512 reports for the SFSF program is complete and accurate.

WE RECOMMEND the DHE:

A. Develop policies and procedures for the timely monitoring over the use of SFSF program monies by the institutions to ensure compliance with federal requirements.

B. Establish procedures to identify federal award information to the institutions at the time of the subaward and communicate subrecipient responsibilities under OMB Circular A-133.

C. Develop policies and procedures for the SFSF program to ensure the accuracy and completeness of data submitted by the institutions for Section 1512 reporting purposes.

AUDITEE'S RESPONSE

We agree with the auditor's findings. Our Corrective Action Plan includes our planned actions to address the findings.

2010-9.	Benefit Payments

Federal Agency: Department of Labor
Federal Program: 17.225 Unemployment Insurance
2009 - UI-18030-09-55-A-29
2010 - UI-19592-10-55-A-29
17.225 ARRA - Unemployment Insurance
2009 - UI-18030-09-55-A-29
2010 - UI-19592-10-55-A-29
State Agency: Department of Labor and Industrial Relations (DLIR)

Controls and procedures used to manage unemployment benefits were not adequate, resulting in errors in benefits paid or owed to claimants and in establishing overpayments. During the year ended June 30, 2010, total federal unemployment insurance benefits paid totaled over $2.2 billion.

According to 20 CFR Part 601.1, the structure of the Unemployment Insurance (UI) program is based on federal statute; however, it is implemented through state law. The UI program is funded through a combination of employer payroll taxes, employer reimbursements and federal monies, depending on the types of benefits paid. The ARRA provided additional federal funding for additional weeks of Emergency Unemployment Compensation (EUC) and Extended Benefits (EB), as well as Federal Additional Compensation (FAC) consisting of $25 weekly to supplement the unemployment benefits of eligible claimants. Further extension of these programs, which extended the program end dates, were funded with federal general revenues.

A claimant has several levels/types of benefits that can be received depending on eligibility and the timing of the benefits. Regular UI benefits are the first level against which eligible claimants can draw. After regular benefits have been exhausted, a claimant can receive EUC benefits which involves four tiers. When the First Tier benefits are exhausted, the claimant can receive benefits from the Second Tier, and so forth, if certain criteria are met. Each tier represents additional weeks of benefits that can be claimed. When triggered during times of high unemployment, a claimant can also receive benefits from the EB level after the EUC benefits are exhausted.

The DLIR has various procedures to detect unreported wages earned by claimants receiving unemployment benefits. When this occurs, a claimant may have been overpaid unemployment benefits, depending on the amount of wages unreported. If overpaid, the DLIR will establish an overpayment of benefits and take measures to recover the overpayment. Also, an overpayment can result in restoring a balance to the specific types or tiers of benefits. Thus, one level of benefits may not have been exhausted before payments were made from the next level.

Due to concerns noted in the prior report, computer programming was implemented by the DLIR to identify claimants with potential restored balances due to overpayments;

however, the DLIR indicated 2,187 such cases remained unresolved as of January 3, 2011. DLIR personnel indicated these cases have to be reviewed manually, and while four employees have been trained to resolve these issues, staff members are often pulled from this area to work on other benefit disbursement issues relating to further program extensions, which take priority. We reviewed 61 benefit payments, covering the various payments types, made to 25 claimants listed on the DLIR report of potential restored balances as of January 21, 2011. During our review, we noted 17 errors in the accounts of 14 of these claimants.

A. For eight accounts reviewed, we noted benefits from a previous level were initially exhausted; however, due to the DLIR identifying the failure of the claimants to report wages earned, overpayments of benefits totaling $3,592 were established. Since these overpayments were made from a level that had previously been exhausted, when repaid or recouped, the benefits of that previous level will no longer be exhausted. As a result, the potential exists that these benefits would not subsequently be paid to the claimants when owed. The DLIR needs to expedite efforts to resolve all overpayment cases with potential restored balances, to ensure claimants subsequently receive all applicable benefits owed.

   Generally, all monies should be paid from one level before payments are made from the next level. The overpayments above were established in a prior level but benefits continued to be paid out from subsequent levels, instead of reverting back to the level where the overpayment was repaid or recouped until that level was again exhausted. As a result, the previous levels still have some benefits available to these claimants that had not been utilized. Unemployment Insurance Program Letter (UIPL) 23-08 indicates EUC is payable to individuals who have exhausted all rights to regular compensation and UIPL 23-08, Change 3, indicates an individual will qualify for Second Tier benefits when First Tier is exhausted. Also, UIPL 23-08 Change 5, indicates an individual may qualify for the next higher Tier when the Second Tier or Third Tier is exhausted.

B. For one account reviewed, an overpayment of $4,760 (which includes $500 overpayment of FAC) was not properly established on an EUC Tier 1 claim due to an oversight by DLIR personnel entering the identified overpayments. Benefit payments totaling $11,536 (which includes $1,225 of FAC) were issued for regular UI, EUC Tier I, and EUC Tier II benefit programs to a claimant initially found eligible by the Appeals Tribunal. When the DLIR Commission later reversed the decision of the Appeals Tribunal, the claimant was declared ineligible to have received these benefits and a notice was sent to the Benefit Payment Control Unit to establish the overpayments. Overpayments were properly established for the regular UI overpayment of $5,824 and the EUC Tier II overpayment of $952; however, an overpayment was not established for the EUC Tier I amount of $4,760.

   Section 288.380.9(3), RSMo, provides future unemployment benefits may be offset for overpayments and Section 288.380.14, RSMo, provides recovering

overpaid benefits may be pursued through billing, setoffs against state and federal tax refunds, intercepts of lottery winnings, and other collection efforts. Procedures should be reviewed to ensure all overpayments are properly established so collection can be pursued.

C. For eight accounts reviewed, we noted FAC overpayments totaling $425 were not offset from other weekly benefits disbursed to claimants. DLIR personnel indicated that computer programming was implemented at the beginning of the FAC program to ensure FAC monies were only used to offset FAC overpayments. FAC overpayments were recovered from subsequent FAC benefits until the FAC program ended on December 11, 2010, at which time recovery of FAC overpayments ceased. DLIR personnel indicated they detected the FAC offset issue prior to our review and the Information Technology Services Division is currently updating computer programming to recover FAC overpayments from other allowable benefits.

   UIPL 11-09 provides that FAC may only be used to offset FAC overpayments; however, it also provides a state may use other Federal Unemployment Compensation to offset FAC overpayments in that state.

Personnel indicated the U.S. Department of Labor had issued numerous implementation instructions because of the continuous program extensions and the DLIR was under very restricted time constraints to implement changes immediately.

WE RECOMMEND the DLIR:

A. Expedite efforts to resolve cases with restored balances and ensure any payments due to the claimants are paid.

B. Develop procedures to ensure all overpayments are properly established so collection can be pursued.

C. Implement computer programming to offset FAC overpayments from other allowable benefits.

AUDITEE'S RESPONSE

We agree with the auditor's findings. Our Corrective Action Plan includes our planned actions to address the findings.

2010-10.	Reporting

Federal Agency: Department of Labor
Federal Program: 17.225 Unemployment Insurance
2009 - UI-18030-09-55-A-29
2010 - UI-19592-10-55-A-29
17.225 ARRA - Unemployment Insurance
2009 - UI-18030-09-55-A-29
2010 - UI-19592-10-55-A-29
State Agency: Department of Labor and Industrial Relations (DLIR)

Controls and procedures over reporting are in need of improvement. Due to inadequate procedures and a lack of oversight, reports necessary to comply with federal reporting requirements were not submitted timely and some reports submitted were not accurate.

The U.S. Department of Labor (USDOL) Employment and Training Administration (ETA) requires state agencies participating in the Unemployment Insurance (UI) program to submit various reports to document program and administrative expenditures and activity. Reports may be submitted monthly, quarterly, or annually, depending on the specific report.

The DLIR has an individual that is responsible for monitoring most reports and ensuring reports are filed timely; however, no one is responsible for monitoring the timeliness of the ETA 9130 reports. The ETA 9130 Financial Report provides detailed expenditure information on the grant award activities, and numerous reports should be filed quarterly for the various activities associated with each type of grant. Of the 52 ETA 9130 reports filed for the year ended June 30, 2010, 15 (29 percent) were filed 9 to 20 days after the due date. Most of the reports required for the quarter ended March 31, 2010, and some reports for the quarter ended December 31, 2009, were not filed timely. Although the DLIR utilizes a USDOL system in place that produces a report called "reports prompt" (timely) and a report called "reports not prompt", the ETA 9130 reports are not tracked through this system.

In addition, all monthly ETA 2112 reports filed with the USDOL during fiscal year ended June 30, 2010, were inaccurate, and 1 of 12 (8 percent) of the reports was submitted 25 days late. According to the UI Reports Handbook No. 401, the ETA 2112 UI Financial Transaction Summary report is a required monthly summary of transactions in the state unemployment fund. The ETA 2112 reports included incorrect totals for ARRA and non-ARRA benefits paid. For example, we noted one error which resulted in underreporting $9.5 million of restricted ARRA monies in the Unemployment Trust Fund Account. While DLIR procedures for the review of the ETA 2112 reports required the preparer to submit the report and supporting documentation to supervisory staff for review, these procedures were not adequate to detect the errors. Also, the DLIR had known since January 2010 that ARRA and non-ARRA benefit payment amounts were not accurately segregated in the accounting records, which resulted in inaccurate ETA 2112 reports.

After receiving additional guidance from the USDOL, the computer system was reprogrammed and the DLIR began revising reports for resubmission. Once all reports are revised for the year ended June 30, 2010, the reports will be resubmitted to the USDOL. As of February 2011, corrections are still pending and reports have not been resubmitted to the USDOL.

With the lack of oversight, not utilizing the system in place to monitor timeliness of reports, and not properly recording the ARRA versus non-ARRA benefits paid, reports were not submitted timely or accurately.

WE RECOMMEND the DLIR improve procedures to ensure applicable reports are filed with the USDOL within the required timeframe. The DLIR should ensure adequate oversight of the reporting process to ensure reports are accurate and utilize the tracking reports to monitor the timeliness of reports.

AUDITEE'S RESPONSE

We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

2010-11. Schedule of Expenditures of Federal Awards

Federal Agency: Department of Labor
Federal Program: 17.225 Unemployment Insurance
2009 - UI-18030-09-55-A-29
2010 - UI-19592-10-55-A-29
17.225 ARRA - Unemployment Insurance
2009 - UI-18030-09-55-A-29
2010 - UI-19592-10-55-A-29
State Agency: Department of Labor and Industrial Relations (DLIR)

DLIR controls and procedures are not sufficient to prevent or detect errors in accounting records and financial reports and to ensure the timely preparation of an accurate schedule of expenditures of federal awards (SEFA).

Financial accounting records consisting of cash journals, general ledgers, and trial balances, which are used in the preparation of the SEFA, were not accurate. Due to personnel changes related to an employee retirement, duties were reassigned and a different employee started preparing the records during the audit period. The employee who previously prepared the records became responsible for reviewing the records. However, the preparation and review of these records was not adequate. During our review, various errors were noted. In addition, during a significant portion of the audit period, the DLIR was unable to separately identify regular Unemployment Insurance (UI) and ARRA UI expenditure amounts relating to benefit payments, as required, on financial accounting records and reports. The DLIR indicated this was because directives issued by

the U.S. Department of Labor (USDOL) in Unemployment Insurance Program Letters were unclear as to funding sources (ARRA or federal general revenue) for various program extensions, and requests to the USDOL for clarification were not answered timely. Although the DLIR reconciliation procedures detected these potential reporting discrepancies for ARRA amounts as early as January 2010, a corrective course of action was not determined until July 2010 when further guidance was obtained. After making programming changes, regenerating various financial reports, reviewing the financial reports, and making corrections to the financial reports, the DLIR was finally able to produce an accurate SEFA and supporting financial reports on December 20, 2010.

Also, because the financial accounting records and reports were not finalized in a timely manner, the DLIR was delayed in providing to the Office of Administration financial statements and related adjusting entries necessary for presentation in the state of Missouri Comprehensive Annual Financial Report. Additionally, periodic reports filed to comply with other federal UI program reporting requirements were originally based on inaccurate data, requiring the reports to be re-submitted to the USDOL.

Recipients are required to maintain records that identify adequately the source and application of ARRA awards and provide separate identification of ARRA awards in their SEFA, pursuant to 2 CFR 176.210(b). The financial management system must accurately generate the required reports and allow tracing of funds to establish ARRA and non-ARRA funds were used for authorized purposes and allowable costs. In addition, the controls over the accounting records should provide accurate data for other required federal reports.

WE RECOMMEND the DLIR implement procedures to prepare a complete and accurate SEFA in a timely manner. In addition, the DLIR should ensure financial accounting records and reports are prepared properly and adequately reviewed to detect and correct errors in a timely manner.

AUDITEE'S RESPONSE

We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

2010-12. Comprehensive Home and Community-Based Services Waiver

Federal Agency: Department of Health and Human Services
Federal Program: 93.778 Medical Assistance Program
2009 - 0905MO5028 and 0905MO05048
2010 - 1005MO5ADM and 1005MO5MAP
93.778 ARRA - Medical Assistance Program
2009 - 0905MOARRA
2010 - 1005MOARRA

State Agency: Department of Social Services - Missouri HealthNet Division (DSS-MHD), and the Department of Mental Health - Division of Developmental Disabilities (DMH-DD)

During the fall of 2009, the DMH-DD converted services provided to MO HealthNet-eligible clients at two state-operated facilities from the Intermediate Care Facilities for the Mentally Retarded (ICF/MR) Program to a Medicaid Waiver program without ensuring the related services constituted allowable home and community-based services. The federal grantor agency, U.S. Department of Health and Human Services (DHHS) Centers for Medicare and Medicaid Services (CMS), subsequently disapproved a waiver amendment request related to this action.

Pursuant to 42 CFR, Part 441(G), the DSS-MHD has obtained a waiver of statutory requirements to provide an array of home and community-based services (which may permit an individual to avoid institutionalization), including the Mental Retardation/Developmental Disabilities Comprehensive Home and Community-Based Services Waiver (MRDD comprehensive waiver). The DSS-MHD has entered into an interagency agreement with the DMH-DD to operate this waiver program. While the DSS-MHD serves as the oversight agency for the MRDD comprehensive waiver, actual operation of the waiver program is overseen by the DMH-DD since it is the statutorily-authorized agency with administrative charge and control of the provision of services to persons with mental retardation and developmental disabilities.

As a way of addressing budget cuts in state fiscal year 2010, the DMH-DD initiated the conversion of ICF/MR services provided to 315 individuals residing at the Marshall Habilitation Center (MHC) and the St. Louis Developmental Disabilities Treatment Center (SLDDTC) to MRDD comprehensive waiver services. Much of the expected savings to the state was related to the reduction or elimination of staff in the dietary and housekeeping departments at those institutions since the dietary and housekeeping needs of the clients would be provided by direct care staff and/or the clients themselves.

According to DMH-DD officials, they met and communicated with certain regional CMS officials both prior to and during this conversion, and they indicated no serious reservations were expressed by the federal officials about DMH proposed actions. The clients affected by this conversion resided in group home-style cottages at the respective facilities. The actual conversion of services at the MHC and SLDDTC occurred at various intervals between September 15, 2009, and November 15, 2009, and the billing for services began effective on the date of conversion at the respective facilities.

In February 2010, after receiving supporting information from the DMH-DD, the DSS-MHD submitted an amendment of the MRDD comprehensive waiver to the CMS to obtain formal approval for this expansion of the waiver program for the converted clients. However, in early August 2010, the Administrator of the CMS denied this waiver amendment request. In a letter disapproving the amendment request, the federal official indicated that because the proposed services were to be provided to individuals on the grounds of a large state-operated institution the state amendment did not meet the

requirements of: 1) 42 CFR, Section 441.301(b)(1)(ii), which requires the state waiver request must provide that waiver services will be furnished only to recipients who are not inpatients of a hospital, nursing facility, or ICF/MR, or 2) 42 CFR, Section 441.300, which permits states to offer waiver services that individuals need in order to avoid institutionalization.

According to information provided by the DMH, approximately $36 million was billed for MRDD comprehensive waiver services provided to the applicable clients at the MHC and SLDDTC during the year ended June 30, 2010. The state received approximately $26.8 million, the federal share of billed costs, with the DMH receiving approximately $23.2 million of this amount. An additional $5.7 million was billed for waiver-related services provided at these two facilities during the first 2 months of the next fiscal year. The state received approximately $4.2 million, the federal share of billed costs, with the DMH receiving approximately $3.7 million of this amount.

As of early February 2011, DSS and DMH officials indicated the CMS has not formally communicated regarding the claims related to these services. In addition, DMH officials indicated actions have been taken to recertify the applicable beds at the MHC and SLDDTC for ICF/MR participation effective August 15, 2010.

WE RECOMMEND the DMH-DD work with the DSS-MHD and the DHHS-CMS to resolve this matter. In addition, the DMH-DD should ensure the services related to any future planned expansion of this program constitute home and community-based services.

AUDITEE'S RESPONSE

We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

2010-13.	**Section 1512 Reporting**

Federal Agency:	Department of Energy Environmental Protection Agency
Federal Program:	66.458 ARRA - Capitalization Grants for Clean Water State Revolving Funds 2009 - 2W977080-01 66.468 ARRA - Capitalization Grants for Drinking Water State Revolving Funds 2009 - 2F977082-01 81.042 ARRA - Weatherization Assistance for Low-Income Persons 2009 - DE-EE0000151
State Agency:	Department of Natural Resources (DNR)

The DNR needs to strengthen controls and procedures in place to ensure Section 1512 reports are complete and accurate for the Weatherization Assistance for Low-Income Persons (WAP) program. In addition, the DNR does not have a formal written plan in place for the Section 1512 reporting process.

Section 1512 of the ARRA requires comprehensive reporting for certain ARRA awards to promote transparency and accountability over the use of such funds. This section requires various data elements to be reported on a quarterly basis by prime recipients detailing the use of ARRA funds including the total grant award, the amount received and expended, and certain elements for vendor payments and subawards. Additionally, prime recipients are required to report on planned projects and activities, including the status of project completion and an estimate of direct jobs created or retained. Prime recipients may solicit information for some data elements from subrecipients and vendors to help meet Section 1512 reporting requirements. Additionally, in some cases, prime recipients may delegate certain direct reporting duties to their subrecipients, although the state of Missouri, as the prime recipient of these funds, has not delegated such responsibilities.

A. The DNR needs to strengthen controls and procedures in place to provide assurance Section 1512 report information submitted by subrecipients of the WAP program is complete and accurate. The DNR, Division of Energy is responsible for administering the WAP program for the state of Missouri. The majority of WAP funds are passed through to subrecipients, consisting of 17 Community Action Agencies and 7 other local agencies throughout the state. During the state fiscal year 2010, the DNR disbursed approximately $21 million in WAP program ARRA funds to subrecipients.

   On a quarterly basis, subrecipients submit various forms to the DNR to provide required program information for Section 1512 reporting purposes, such as vendor activity, jobs created and retained, and expenditure data. Once information is received, the DNR tracks and compiles expenditure and subrecipient data and enters the data into the state's Section 1512 reporting system (STIM 360). Some elements submitted by subrecipients, such as subaward identifying numbers, award amounts, and project descriptions, are consistent each quarter and are prepopulated in STIM 360 from prior quarters, requiring little oversight from the DNR on a quarterly basis. For other elements, DNR personnel review information submitted for reasonableness and compare expenditure data to SAM II; however, the DNR relies on the accuracy and completeness of much of the other information submitted by subrecipients, such as jobs created and retained and vendor payments, for each quarterly report. The DNR performs three technical and two procedural monitoring visits each year for all subrecipients to review program supporting documentation and to ensure work was completed as indicated. However, the field visits do not include a review of documentation supporting the data submitted by subrecipients and relied on for Section 1512 reporting purposes.

OMB Memorandum M09-21 states the DNR, as prime recipient, is ultimately responsible for the reporting of all data required by Section 1512 of the ARRA. Additionally, the prime recipients, as owners of the data submitted, have the principal responsibility for the quality of the information submitted. Strengthening monitoring procedures in place over the subrecipient data would provide the DNR more assurance the information included in the Section 1512 report for the WAP program is complete and accurate.

B. While some procedures are in place, the DNR does not have a formal written plan in place to address the Section 1512 reporting process for the WAP, Clean Water State Revolving Fund, or Drinking Water State Revolving Fund programs. The DNR currently has a spreadsheet listing all programs requiring Section 1512 reporting which documents the various data elements required, the method and source of information, and the report preparer and reviewer; however, the spreadsheet does not document a formal work plan for ensuring the accuracy and completeness of Section 1512 reports.

   A formal written plan for each applicable program would help ensure Section 1512 reports are complete and accurate. The plan should, at a minimum, document the flow of information, define the responsibilities of subrecipients and various program personnel, and include procedures for ensuring the accuracy and completeness of all Section 1512 reporting elements. A formal written plan would provide the DNR more assurance the various reporting responsibilities, such as data collection and verification, have been relayed to and understood by all parties of the reporting process.

WE RECOMMEND the DNR:

A. Strengthen procedures for the WAP program to ensure the accuracy and completeness of data submitted by the subrecipients for Section 1512 reporting purposes.

B. Establish a formal written plan for all programs that require Section 1512 reporting.

AUDITEE'S RESPONSE

We disagree with the auditor's findings. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement.

2010-14.	Capital Assets

Federal Agency: Department of Defense
Federal Program: 12.401 National Guard Military Operations and Maintenance Projects
2009-DAHA23-09-2-1000 and 2010-DAHA23-10-2-1000
State Agency: Department of Public Safety - Adjutant General (AG)

The AG did not maintain proper records of capital assets acquired through the above referenced program, or adequately perform periodic inventories to ensure these assets are accounted for properly. Additionally, some capital asset expenditures were not properly classified. During fiscal year ended June 30, 2010, approximately $1 million of program funds were expended on capital assets (excluding construction in process and land) for the various facilities statewide.

A. Some assets purchased during state fiscal year 2010 have not been properly accounted for in the AG internal capital asset tracking system or SAM II, Fixed Asset Subsystem, and some assets have not received a property tag and asset number. Although the AG responded in two prior audit reports that improvements had been made in tracking capital assets, more improvement is needed. AG personnel again indicated the staff position assigned responsibility for tracking capital assets was not able to keep up with the high workload, resulting in a backlog of assets not tagged or entered into the internal or SAM II capital asset tracking systems.

Our review of 42 capital asset purchases (costing $1,000 or more) made during state fiscal year 2010, totaling approximately $486,300, noted 10 assets totaling about $65,000 lacked property tag numbers. Additionally, 31 of the capital asset purchases reviewed, valued at approximately $365,700, had not been entered in the internal capital asset tracking system and 32 of the capital asset purchases reviewed, valued at approximately $324,800, had not been entered in the SAM II capital asset tracking system. Also, the AG had only performed physical inventories during fiscal year 2010 for 2 of the 56 different property books used to track assets purchased with these funds. Assets listed in these property books are at various locations throughout the state.

After we again brought these concerns to the attention of AG personnel, in an effort to alleviate the backlog of assets not tagged or entered into either capital asset tracking system, an additional staff person was assigned duties related to tracking capital assets in October 2010. Approximately $44,100 of the capital asset purchases we reviewed were subsequently added to the SAM II capital asset tracking system.

To ensure capital assets are accounted for properly, the AG should follow its current capital asset procedures, ensuring all newly purchased assets are assigned

property tags and entered into both the internal and SAM II capital asset tracking systems in a timely manner, and physical inventories are performed annually. In addition, to ensure the capital asset records are complete and accurate, the AG should continue to investigate the backlog of untagged capital assets.

B. AG personnel have not completed a reconciliation between expenditure records and capital asset records in the SAM II or internal capital asset tracking systems.

- A reconciliation between expenditure records and the SAM II capital asset tracking system is in progress; however, as of October 2010, approximately $600,000 of the $4.5 million in capital asset expenditures from fiscal year 2002 through 2010 has not been reconciled.

- A reconciliation between expenditure records and the AG internal capital asset tracking system is not performed. The AG policy is to tag all capital assets with an acquisition cost or fair market value greater than $250 at the time of acquisition. This policy differs from the state policy of tagging capital assets of $1,000 or more, and the AG maintains an internal capital asset tracking system to account for all capital assets that are tagged by the AG.

A reconciliation between expenditure records and both the SAM II and internal capital asset tracking systems would ensure all acquisitions of capital assets have been identified and properly recorded in appropriate property books for annual inventory.

C. Equipment expenditures were not always properly classified to specific capital asset object codes in the SAM II accounting system. As a result, some equipment was not identified in the system for proper tracking and was subsequently omitted from all capital asset records. The following expenditures were not charged to the capital asset object codes as required.

- Computer equipment with a unit price of $4,422 and total price of $17,688 was charged to "under threshold - computer equipment".

- Uninterruptible power supplies with a unit price of $1,012 and a total price of $6,072 were charged to "under threshold - other equipment".

- Electronic security equipment costing $5,925 was charged as "electrical supplies".

The failure to record appropriate expenditures as capital assets reduces the control and accountability over capital assets and increases the potential for loss, theft, or misuse of assets.

The cooperative agreement between the AG and the U.S. Department of Defense, National Guard Bureau requires the state to account for and manage equipment acquired

under this program. In addition, OMB Circular A-133, Compliance Supplement Part 3, indicates that a state shall use, manage, and dispose of equipment acquired under a federal grant in accordance with state laws and procedures. State regulation, 15 CSR 40-2.031, requires each department to establish and maintain a system of control and control records for capital assets, identify capital assets with a numbered tag, and perform an annual physical inventory for assets with a value of $1,000 or more. In addition, Missouri National Guard Regulation 735-1 requires all capital assets with a value greater than $250 at the time of acquisition will be tagged and accounted for properly. To ensure compliance with state and federal regulations and internal policy and to safeguard assets against loss and misuse, the AG should have adequate procedures in place to account for and track capital assets.

WE RECOMMEND the AG:

A. Ensure all equipment is properly assigned a property tag number and entered into both the internal and SAM II capital asset tracking systems. In addition, the AG should ensure annual physical inventories are performed, and continue to investigate the backlog of untagged capital assets.

B. Ensure capital asset reconciliations between expenditure records and capital asset records in both the SAM II and internal capital asset tracking systems are completed.

C. Ensure capital asset expenditures are charged to appropriate object codes.

AUDITEE'S RESPONSE

We agree with the auditor's findings. Our Corrective Action Plan includes our planned actions to address the findings.

2010-15. Cost Allocation Procedures

Federal Agency: Department of Health and Human Services
Federal program: 93.558 Temporary Assistance for Needy Families
2009 - G0901MOTANF and 2010 - G1002MOTANF
93.658 Foster Care - Title IV-E
2009 - G0901MO1401 and 2010 - G1001MO1401
93.658 ARRA - Foster Care - Title IV-E
2009 - G0901MO1402 and 2010 - G1001MO1402
93.659 Adoption Assistance
2009 - G0901MO1407 and 2010 - G1001MO1407
93.674 Chafee Foster Care Independence Program
2009 - G0901MO1420 and 2010 - G1001MO1420
93.778 Medical Assistance Program
2009 - 0905MO5048 and 2010 - 1005MO5ADM

State Agency: Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS)
Questioned Costs: $2,168,919

DFAS controls and procedures over the quarterly allocation of costs to federal programs are not sufficient and as a result, numerous cost allocation errors were not prevented and/or detected.

The DFAS has developed procedures to identify, measure, and allocate all costs to the programs administered by the department. These procedures provide for the quarterly allocation of direct costs and cost pools to the various programs in accordance with the DSS cost allocation plan. The Fiscal and Administrative Manager enters costs from various sources into comprehensive cost allocation spreadsheets which contain formulas to allocate costs to the various programs. DFAS personnel indicated a supervisory review of the cost allocation spreadsheets is performed; however, this review is not documented and does not include a review of spreadsheet formulas or a comparison/reconciliation to supporting records.

Our review of selected sections of state fiscal year 2010 Children's Division and Family Support Division cost allocation spreadsheets and supporting documentation identified overstatements totaling approximately $3.3 million ($2.2 million federal share) for 5 federal programs and understatements totaling approximately $3.2 million ($2.2 million federal share) for 11 federal programs due to spreadsheet formula and data entry errors. Examples of errors identified include:

- Data entry and spreadsheet formula errors resulted in the allocation of only some fiscal year 2009 Single Audit costs to five federal programs, including an incorrect program. This resulted in understatements totaling approximately $95,000 and overstatements totaling approximately $15,400. We question the federal share of the overstatements, or $15,388.

- Fraud investigation costs totaling approximately $618,000 for 3 months were not allocated to the six applicable federal programs due to spreadsheet formula errors, resulting in understatements of program costs.

- In response to Report No. 2010-30, *State of Missouri, Single Audit, Year Ended June 30, 2009,* issued in March 2010, finding 2009-12, DFAS management indicated they would discontinue the allocation of certain costs (primarily payments to Caring Communities partnerships) initially charged to the Promoting Safe and Stable Families program to various other federal programs through the Social Services Cost Pool. However, during the fourth quarter of state fiscal year 2010, the Fiscal and Administrative Manager incorrectly included these costs in the cost pool, and costs totaling approximately $2.5 million were allocated to four federal programs. We question the federal share of these overstatements, or $1,612,695.

- State fiscal year 2010 third quarter Social Services Cost Pool expenditures were allocated based on second quarter random moment time study results because the third quarter cost allocation spreadsheets were not updated with the third quarter time study results. This error resulted in understatements totaling approximately $411,000 for two federal programs and overstatements totaling approximately $411,000 for three federal programs. We question the federal share of the overstatements, or $284,182.

- Seven months of payments to performance-based contractors for Foster Care assistance payments were incorrectly entered or not entered into the cost allocation spreadsheets, resulting in understatements totaling approximately $2 million and overstatements totaling approximately $365,000. We question the federal share of the overstatements, or $256,654.

As noted above, the cost allocation errors resulted in both understatements and overstatements for various federal programs. We question the federal share of costs related to the overstatements because those costs were not allowable costs of the applicable federal programs. The understatements relate to allowable costs the DSS can allocate to applicable federal programs through future adjustments on cost allocation spreadsheets. Listed below is the federal share of questioned costs related to overstatements applicable to each federal program:

CFDA #	Program	Questioned Costs
93.558	Temporary Assistance for Needy Families	$ 832,764
93.658	Foster Care Title IV-E/ ARRA- Foster Care Title IV-E	1,096,236
93.659	Adoption Assistance	186,394
93.674	Chafee Foster Care Independence Program	15,388
93.778	Medical Assistance Program	38,137
Total		$ 2,168,919

Good internal controls require adequate procedures to ensure formulas and amounts entered into cost allocation spreadsheets are accurate and reliable. Inadequate supervisory reviews of the spreadsheets could hinder the ability to manage federal funds effectively and to comply with federal regulations.

WE RECOMMEND the DSS, through the DFAS, resolve the questioned costs with the grantor agency, and strengthen controls and procedures to ensure the accurate allocation of costs to federal programs. These procedures should include a detailed and documented supervisory review of cost allocation spreadsheets.

AUDITEE'S RESPONSE

We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

2010-16.	**Child Care Eligibility and Payments**

Federal Agency:	Department of Health and Human Services
Federal Program:	93.575 Child Care and Development Block Grant 2009 - G0901MOCCDF and 2010 - G1001MOCCDF 93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund 2009 - G0901MOCCDF and 2010 - G1001MOCCDF 93.713 ARRA – Child Care and Development Block Grant 2009 - 20091MOCCD7
State Agency:	Department of Social Services (DSS) - Children's Division (CD) and Family Support Division (FSD)
Questioned Costs:	$76,047

Controls over eligibility and provider payments are not sufficient to prevent and/or detect payments on behalf of ineligible clients or improper payments to child care providers. As a result, eligibility and payment documentation could not be located for many child care cases reviewed, overpayments were made to some providers, and payments were made on behalf of some ineligible clients for one ARRA Child Care initiative. During the year ended June 30, 2010, the DSS paid over 9,000 child care providers approximately $151 million for services provided to about 81,000 children.

The DSS provides funds to child care providers who serve eligible clients. Federal regulation 45 CFR, Section 98.20 provides that to be eligible for services the child must 1) be under 13 years old, or at the option of the DSS under age 19 and physically or mentally incapable of caring for himself/herself or under court supervision, 2) live with a family who meets certain income guidelines, and 3) have parents who are working or attending a job training or educational program. In addition, 45 CFR, Section 98.41 requires states to establish provider licensing requirements to protect the health and safety of children provided assistance, and Sections 210.025, 210.027, and 210.211, RSMo, require that providers be either licensed or registered based on the number of children under their care.

Parents/caregivers apply to FSD or CD case workers for participation in the program. Once approved, the parent/caregiver selects a child care provider and the DSS enters into an agreement with the provider for child care services. To comply with federal requirements, the DSS Income Maintenance manual requires that case workers set maximum authorized service units for the amount and type of care that best meets the family's need; maintain case file documentation, including the child care application or a

signed system-generated interview summary and copies of income verifications (including work hours) to support eligibility determinations; and limits the number of absences and holidays eligible for reimbursement. In addition, the manual and provider agreements require that providers submit a monthly invoice either through the DSS on-line invoicing system or by a manual invoice, and maintain detailed attendance records documenting daily arrival and departure times and containing parent/caregiver signature verifying the child received the services. Although all providers are required to retain attendance records for 5 years, the DSS only requires registered (license exempt) providers who submit manual invoices to submit attendance records for payment.

In May 2010, with additional funding from the ARRA, the DSS expanded child care assistance to additional children and families. Two new initiatives were established to provide child care assistance to eligible clients participating in the Workforce Investment Act Adult or Dislocated Worker programs and to eligible clients not receiving Temporary Assistance for Needy Families (TANF) benefits who are searching for employment. These initiatives will provide child care assistance through September 30, 2011, or when ARRA funding is spent, whichever is earliest. The DSS estimates it will spend a total of $17 million in ARRA funds for the two new Child Care initiatives. Through June 30, 2010, child care assistance payments totaling approximately $146,000 were made on behalf of 573 children of 329 clients for the two new Child Care initiatives.

A. Controls over eligibility and provider payments are not sufficient to prevent and/or detect payments made on behalf of ineligible clients or improper payments to child care providers. The DSS has not established procedures to review eligibility determinations and has discontinued on-site contract compliance reviews to monitor payments to providers. As a result, audits and reviews continue to identify significant child care payments made without sufficient supporting documentation.

   To test compliance with program requirements, we sampled eligibility documentation for 60 children, and reviewed provider agreements and payment documentation supporting one payment for each of these children. Payments totaling approximately $186,000 were made to child care providers on behalf of these children during state fiscal year 2010. We noted the following:

   - Eligibility documentation such as a signed child care application or system-generated interview summary and/or income record(s) for 13 of 60 (22 percent) cases reviewed could not be located by the DSS. For six of these cases, the DSS could not locate the eligibility file. Child care payments made on behalf of these children during the year ended June 30, 2010, totaled $41,736. In addition, child care payments for siblings of these children totaled $41,707 during the same period. We question the federal share, or $70,092 (84 percent).

   - For child care payments, 30 of 60 (50 percent) payments reviewed were not supported by adequate documentation and/or were not in compliance

with DSS policies. Attendance records were not provided by some child care providers upon our request, some attendance records were not signed by the parent/caregiver and/or did not include daily arrival/departure times, and some provider invoices did not agree to the corresponding attendance records. In addition, documentation supporting some authorizations for payments at enhanced evening/weekend rates could not be located, some payments were not in compliance with DSS policies for absences and holidays, and some provider license/registration documentation could not be located. Of these 30 payments, 11 were for cases which also lacked eligibility documentation and were included in the above questioned costs. Payments for the remaining 19 cases totaled an additional $3,837. We question the federal share, or $3,223 (84 percent).

Similar errors were identified in the DSS recent Child Care program improper payment review. This internal review, which was required by federal regulations and sampled 276 cases with payments during federal fiscal year 2009, identified 43 percent of cases tested had improper authorizations for payment totaling approximately $35,000. The DSS report summarizing the results of the review indicated most of these improper authorizations were due to missing or insufficient documentation and estimates annual improper authorizations at $64 million.

The various errors noted above occurred because the DSS lacks sufficient controls to ensure eligibility determinations are accurate and payments are proper and adequately supported. There appear to be at least three significant factors contributing to the weak control system:

- There is no supervisory review of child care eligibility determinations. These determinations are made by numerous caseworkers in county offices around the state. Although the DSS has a system for monthly supervisory reviews of eligibility determinations for various other DSS assistance programs, this review system does not include the Child Care program.

- The DSS discontinued performing on-site contract compliance reviews of child care providers. These reviews, which monitored supporting documentation for payments to providers, were conducted by Division of Finance and Administrative Services contract compliance unit staff from February 2006 to October 2009, and the results of the reviews were referred to the CD for follow-up. Although the reviews often identified problems with provider invoices and attendance sheets, overpayments to providers, and other noncompliance with DSS policies, the DSS discontinued the reviews due to state budget limitations. The contract compliance unit reviewed 498 providers in the first 4 months of fiscal year 2010. Currently, DSS payment review procedures are limited to CD desk

reviews of manual invoices and attendance sheets submitted by registered providers, and follow-up to provider complaints received.

- Overall, management of the case records is poor. As noted above, the DSS could not locate 6 of 60 (10 percent) case files requested, and several other case files were missing documentation to support eligibility.

The lack of controls over eligibility determinations and payments to providers can result in provider overpayments and federal reimbursements for ineligible clients and/or unallowable costs. In addition, without complete and accurate case records, adequate documentation is not available to verify the eligibility of clients, support the appropriateness of child care payments, and provide an adequate audit trail. The DSS needs to review and strengthen policies and procedures to ensure child care payments are made on behalf of eligible clients, invoices agree to the corresponding attendance records, attendance records are complete and signed by the parent/caregiver, payments are in accordance with department policy, appropriate child care services are authorized, and providers are licensed or registered. These procedures should include sufficient monitoring of eligibility determinations and provider payments, and follow-up on errors identified.

Payments associated with known questioned costs represented approximately 25 percent of payments reviewed. If similar errors were made on the remaining population of child care payments, questioned costs could be significant.

B. Controls over eligibility for the newly established non-TANF client ARRA Child Care initiative are not sufficient to prevent and/or detect payments made on behalf of ineligible clients. As a result, 10 percent of payments during the first month of operation were for ineligible clients.

Previously, child care assistance for job search activities was only allowed for TANF clients. Through this new ARRA initiative, non-TANF clients engaged in job search activities may qualify for child care assistance for a maximum of 8 consecutive weeks, as outlined in the DSS Child Care State Plan approved by the U.S Department of Health and Human Services, Administration of Children and Families. Clients may not participate in this initiative if they are currently receiving or applying for TANF benefits.

To test compliance with the non-TANF eligibility requirement for this initiative, we reviewed the Family Assistance Management Information System (FAMIS) for all 82 clients receiving child care assistance under this initiative. This assistance totaled approximately $35,400 on behalf of 155 children during June 2010, the first month of payments. We noted 8 (10 percent) of these clients were receiving TANF benefits, although the initiative provides that clients receiving TANF benefits are not eligible. We question the federal share of the payments made on behalf of these clients, or $2,732 (100 percent).

The payments to child care providers for ineligible clients resulted from incorrect coding of client child care need in the FAMIS. The DSS established a new child care need code (NTA) to authorize child care assistance under this new initiative and provided written guidance to case workers regarding the new initiative and child care need code. However, controls were not established to ensure case workers entered the NTA code only for non-TANF clients.

Due to the significance of planned initiative expenditures and the error rate noted of payments made for ineligible clients, future questioned costs could be significant if internal control weaknesses are not corrected. The DSS needs to promptly improve controls to ensure payments under the non-TANF client ARRA Child Care initiative are made only for eligible clients in accordance with the Child Care State Plan. In addition, the DSS should review fiscal year 2011 payments already made under this initiative, and recoup any additional payments improperly made from ARRA funds.

WE RECOMMEND the DSS, through the CD and FSD, resolve the questioned costs with the grantor agency and:

A. Review and strengthen policies and procedures regarding child care eligibility determinations, provider payments, and case record documentation and retention. These procedures should include sufficient monitoring of eligibility determinations and provider payments, and follow-up on errors identified.

B. Improve controls to ensure payments under the non-TANF client ARRA Child Care initiative are made for eligible clients in accordance with the Child Care State Plan. In addition, the DSS should review fiscal year 2011 payments under this initiative, and recoup any additional payments improperly made from ARRA funds.

AUDITEE'S RESPONSE

We partially agree with the auditor's findings. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the findings.

2010-17. Performance Based Case Management Contracts

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2009 - G0901MOTANF and 2010 - G1002MOTANF
93.658 Foster Care - Title IV-E
2009 - G0901MO1401 and 2010 - G1001MO1401
93.659 Adoption Assistance
2009 - G0901MO1407 and 2010 - G1001MO1407

93.778 Medical Assistance Program
2009 - 0905MO5048 and 2010 - 1005MO5ADM
State Agency: Department of Social Services (DSS) - Children's Division (CD)

The DSS has not established procedures to ensure all payments to performance based case management contractors are properly allocated to federal programs. As a result, some contractor payments are allocated to federal programs based on unrealistic budgeted expenditure categories rather than actual expenditures.

The DSS contracts with ten performance based case management contractors, each a consortium of multiple local agencies, to provide case management and room and board for children in state custody. The performance based case management contracts were originally awarded in 2008 and have been renewed each year. Some contracts were amended in October 2009 due to decreased caseloads. Contractors are paid a monthly fixed price for 1) case management/administration, 2) room and board, and 3) residential treatment for a pre-established caseload. The DSS paid these contractors approximately $58 million during the year ended June 30, 2010, of which approximately $15 million was paid from federal funds.

While contractor costs associated with room and board and residential treatment are allocated to applicable federal programs based on actual costs incurred by the contractors, the costs associated with case management/administration are allocated based on the original budgets submitted by the contractors in their 2008 requests for proposal. Each contractor budget separates case management/administration costs into six categories and the CD allocates these costs to several federal programs. Case management services and resource development costs are allocated to the Foster Care administration and training programs, respectively. Treatment services, crisis fund expenses, and special expenses are allocated to the Social Services Block Grant (SSBG) program. Finally, general administration costs are allocated to the Social Services cost pool for distribution to several federal programs (Temporary Assistance for Needy Families, Foster Care, Adoption Assistance, Medical Assistance, and SSBG). Of $58 million paid to the contractors during the year ended June 30, 2010, approximately $27 million ($13 million federal funds) was for case management/ administration services.

Although contractors submit monthly reports of actual costs, the DSS does not use this information to allocate case management/administration costs to the specific federal programs as noted above. The DSS did not re-evaluate their cost allocation methodology during subsequent contract renewal periods and has not performed procedures to determine if budget-based allocations are representative of actual costs incurred. Our review of all state fiscal year 2010 monthly expenditure reports for three contractors noted the budgeted cost allocations did not appear representative of actual costs. Each contractor spent more than budgeted for some cost categories and less than budgeted for other cost categories. For example, our review of one contractor noted $333,904 was allocated to the Foster Care (training) program during state fiscal year 2010 for resource development costs, while the contractor reported actual expenditures for that activity totaling only $165,336. As a result, in state fiscal year 2010, $168,568 ($76,702 federal

share) more was allocated to the Foster Care program than actually spent by this contractor for that category. The DSS did not review or adjust the allocations for this contractor to ensure future allocations are more representative of actual costs.

A cost is allocable to a particular cost objective if the goods or services involved are chargeable or assignable to such cost objective in accordance with relative benefits received, pursuant to OMB Circular A-87, Attachment A, Section C. Costs charged to a federal program in excess of that program's allocable share would be questionable; however, such costs may be allocable to another federal program(s). As a result, questioned costs resulting from these allocation procedures are likely but were not determined. Without periodically analyzing actual cost data and allocating costs based on such data, the DSS cannot ensure the costs are allowable and allocable to the various federal programs.

WE RECOMMEND the DSS, through the CD, establish procedures to ensure all payments to performance based case management contractors are allocated to federal programs in accordance with federal regulations.

AUDITEE'S RESPONSE

We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

2010-18. Foster Care Eligibility and Assistance Payments

Federal Agency:	Department of Health and Human Services
Federal Program:	93.658 Foster Care - Title IV-E
	2009 - G0901MO1401 and 2010 - G1001MO1401
	93.658 ARRA-Foster Care - Title IV-E
	2009 - G0901MO1402 and 2010 - G1001MO1402
State Agency:	Department of Social Services (DSS) - Children's Division (CD)
Questioned Costs:	$8,192

Controls over eligibility and maintenance payments are not sufficient; and as a result, payments were made on behalf of ineligible children, and some payments were not allowable or not supported by adequate documentation. During the year ended June 30, 2010, the DSS made Foster Care maintenance payments totaling over $23 million for children in state custody. These payments were made on behalf of an average of 2,970 children each month.

The Foster Care program provides 24-hour substitute care for children under the jurisdiction of the state who need temporary placement and care outside their homes. To be eligible for benefits under the program, requirements outlined at 42 USC 672 must be met. Pursuant to 42 USC 675(4)(A), funds may be expended for Foster Care maintenance

payments to licensed foster parents and residential facilities on behalf of eligible children. These maintenance payments cover costs including food, clothing, shelter, daily supervision including child care, school supplies, personal incidentals, liability insurance, and certain transportation. The U.S. Department of Health and Human Services, Administration of Children and Families (ACF), Child Welfare Policy Manual provides that the costs of medical care are not allowable Foster Care expenses. In addition, payments must comply with OMB Circular A-87, Attachment A, which requires costs to be adequately documented.

To test compliance with these requirements, we sampled eligibility, expenditure, and foster parent/residential facility license documentation for 60 Foster Care children. We reviewed all state fiscal year 2010 payments made on behalf of these children, except for child care payments for which we reviewed one payment for each applicable child. Maintenance payments totaling approximately $348,600 were made on behalf of these children during fiscal year 2010. We noted the following:

A. For 2 of 60 (3 percent) cases reviewed, payments were made on behalf of children ineligible for Foster Care benefits due to inaccurate eligibility determinations made by the DSS Family and Children Electronic System (FACES). For these cases, DSS eligibility specialists entered various eligibility data in the FACES and determined the children were ineligible for benefits. However, based on this data, the FACES incorrectly concluded the children were eligible for Foster Care benefits and overrode the previous determination of the eligibility specialist. As a result, payments associated with these cases were incorrectly charged to the Foster Care program.

   In one case, the eligibility specialist determined the child was ineligible upon entering state custody in April 2009; however, the FACES incorrectly determined the child was eligible and began charging all related payments to the Foster Care program. In March 2010, when the eligibility specialist performed an eligibility re-determination for the case, the specialist discovered the error on the system and the unallowable costs charged to the Foster Care program, and corrected the eligibility status on FACES. In June 2010, the eligibility specialist initiated recoupment of federal funds; however, the costs associated with child care had not been recouped as of January 2011. Similarly, for another case in which the child entered state custody in September 2007, the FACES incorrectly determined the child was eligible. Eligibility specialist re-determinations in March 2008 and August 2009 concluded the child was not eligible; however, the eligibility specialist did not discover the error on the system or the unallowable costs. When we requested the case file, the eligibility supervisor discovered the error and unallowable costs, corrected the eligibility status on FACES, and initiated recoupment of federal funds.

   The FACES, which was fully implemented as of August 2010, is designed to validate eligibility decisions made by the eligibility specialists based on information entered by the eligibility specialists and case workers. Although

eligibility specialists perform initial eligibility decisions and enter those decisions on the system, the system can override those decisions and makes the final eligibility determination. The system reviews eligibility each time certain new information is entered or certain existing information is revised. DSS officials acknowledged system design issues have caused some inaccurate eligibility decisions and that staff have had to correct these decisions on the system. DSS officials also indicated they are currently investigating the situation to identify and correct the design problems. In the meantime, the DSS relies on several procedures to identify and correct similar inaccurate eligibility determinations: 1) eligibility specialists' review and follow up on FACES daily batch reports which identify system eligibility determinations, 2) supervisory review of eligibility specialist and system eligibility decisions on a test basis, and 3) eligibility re-determinations performed by eligibility specialists.

Fiscal year 2010 payments totaled $3,242 for these two ineligible children. We question the federal share, or $2,282 (70.38 percent). Subsequent to our review, the DSS recouped some of these payments (by reducing subsequent federal reimbursement requests) totaling $435 on the second case.

B. For 15 of 60 (25 percent) cases reviewed, 33 transportation reimbursements to foster parents were incorrectly recorded as maintenance payments, and reimbursed at the higher federal financial participation percentage (70.38 percent) for maintenance instead of the administrative percentage (50 percent). These reimbursements were for transportation to court hearings, case meetings, or routine medical appointments which are allowed only at the administrative reimbursement percentage. The DSS records all transportation payments claimed to the Foster Care program as maintenance payments. DSS officials indicated they were not aware certain transportation costs were reimbursable only at the administrative rate.

Foster Care program administrative, training, and maintenance costs are reimbursed at different federal financial participation percentages. The percentage for maintenance costs is the Federal Medical Assistance Percentage, which averaged 70.38 percent for Missouri in state fiscal year 2010. The percentage for administrative costs is 50 percent. Reasonable travel for transporting children for parental or sibling visitation or to attend the same school attended before placement in Foster Care are allowable maintenance costs per 42 USC 675(4). Sections 8.3B.1 and 8.1B of the ACF Policy Manual provide that foster parent travel to attend judicial reviews or case conferences/meetings, or to transport a child to a medical appointment are not allowable maintenance payments, but are allowable administrative costs.

For these 15 cases, transportation payments totaling $1,540 were incorrectly reimbursed at the higher maintenance percentage. We question $314 (20.38 percent), the federal share of the difference between the amount paid at the maintenance percentage and the administrative percentage.

C. For 17 of 60 (28 percent) cases reviewed, including 5 cases noted in Part B above, Foster Care maintenance payments were not allowable and/or not supported by adequate documentation. We noted the following:

- Sufficient documentation, such as invoices or other supporting documentation, could not be located for some payments for six cases. Invoices or other supporting documentation are required for certain payments, such as child care, clothing, and transportation.

- Payments were made to unlicensed foster parents for three cases.

  Payments were made to two foster parents for the same time period for one case.

- For two cases, payments were made to a residential treatment facility and a child care facility for time periods when the child was not in Foster Care.

- A payment for medical care was made for one case, although this expense is not allowed per federal regulation.

- Payments to child care providers for seven cases were not supported by adequate documentation and/or were not in compliance with DSS policies. Some provider invoices did not agree to attendance records, some attendance records did not include arrival/departure times, some payments were not in compliance with DSS policies for absences and holidays, and some payments were made at incorrect daily rates.

For these 17 cases, payments totaling $7,951 were unallowable and/or unsupported by adequate documentation. We question the federal share, or $5,596 (70.38 percent). Subsequent to our review, the DSS recouped some of these payments (by reducing subsequent federal reimbursement requests) totaling $979.

Failure to ensure Foster Care payments are made on behalf of eligible children, allowable, reimbursed at the appropriate federal percentage, and adequately supported can result in federal reimbursements for unallowable costs. Payments associated with known questioned costs represented over 3 percent of payments reviewed. If similar errors were made on the remaining population of Foster Care maintenance payments, questioned costs could be significant.

Conditions similar to A and C were noted in our prior audits of the Foster Care program.

WE RECOMMEND the DSS through the CD, resolve the questioned costs with the grantor agency, and:

A. Continue working to identify and correct FACES programming issues and strengthen controls over eligibility determinations to ensure payments are made on behalf of eligible children.

B. Implement controls to ensure transportation payments are reimbursed at the proper federal financial participation percentage.

C. Ensure all Foster Care payments are allowable and supported by adequate documentation.

AUDITEE'S RESPONSE

We agree with the auditor's findings. Our Corrective Action Plan includes our planned actions to address the findings.

2010-19. Residential Facility Training Reimbursements

Federal Agency:	Department of Health and Human Services
Federal Program:	93.658 Foster Care - Title IV-E 2009 - G0901MO1401 and 2010 - G1001MO1401
State Agency:	Department of Social Services (DSS) - Children's Division (CD)
Questioned Costs:	$19,467

The CD has not established sufficient procedures to review residential facility training reimbursements. As a result, reimbursements to these facilities were not always supported by sufficient documentation that training costs were allowable, and some reimbursed training costs appeared unallowable.

Residential facilities provide specialized care for children who need more structure and intervention than a foster home can provide. The DSS has contracts with 29 of the 125 residential facilities to reimburse part of the costs of training facility staff. Contracts with these facilities outline specific allowable and unallowable training activities as provided by federal regulations and guidelines. Facilities are required to submit a training report for each training activity claimed for reimbursement. The DSS reimbursed the residential facilities a percentage of their training costs claimed, based on an allocation methodology outlined in the contracts. During state fiscal year 2010, this percentage was approximately 67 percent in the first three quarters and 60 percent in the fourth quarter. Payments to the facilities for training totaled approximately $383,000 during fiscal year 2010.

In response to Report No. 2009-25, *State of Missouri, Single Audit, Year Ended June 30, 2008*, issued in March 2009, finding 2008-7, and a recent U.S. Department of Health and

Human Services review of training costs for residential facilities, the DSS revised the facility contracts to better clarify the types of allowable and unallowable activities and revised the training report form to require facilities to identify and link training costs to those activities allowed in the contract. However, the CD review procedures were not sufficient to prevent and/or detect some unsupported and/or unallowable reimbursements.

We reviewed selected training reports and supporting documentation for reimbursements made to seven residential facilities during fiscal year 2010. Of the $30,656 in reimbursements reviewed, payments totaling $25,957 (85 percent) were unsupported and/or unallowable, of which we question $19,467 claimed as the federal share.

Numerous training reports and supporting documentation were not sufficient to show the training and related costs were for allowable Foster Care training activities. Examples of these costs include salaries and benefits, travel expenses, conference registration fees, a laptop computer, books, and supplies. As noted in the prior audit, the DSS does not require facilities to submit invoices or other documentation supporting the training costs claimed. While some facilities typically attached supporting documentation such as invoices, receipts, programs or agendas, and attendance logs to the training reports, most facilities did not. Additionally, some facilities submitted an old version of the training report that did not require indication that the training activity complied with the contract. To be allowable under federal awards, costs must be adequately documented, pursuant to 2 CFR, Part 225, Appendix A, Section C.

In addition, some training activities reimbursed appeared unallowable. For example, one facility was reimbursed costs for training sessions on leadership and volunteer management and books on office politics and amateur radio, and another facility was reimbursed costs of a new employee orientation. Many of these costs are prohibited under the residential facility contract. Section 8.1h of the ACF Child Welfare Manual also indicates training activities must be closely related to one of the examples cited in 45 CFR, Section 1356.60; however, these training activities do not appear reimbursable under this guidance.

The payments reviewed contained no indication CD staff had requested additional information or documentation supporting the training costs claimed. Without sufficient review procedures and adequate supporting documentation, the CD cannot ensure residential facility training costs claimed are for allowable Foster Care activities. The CD should ensure training activities are in compliance with federal regulations, and supported by sufficient documentation.

WE RECOMMEND the DSS through the CD, strengthen residential facility training reimbursement review procedures to ensure training activities reimbursed are for allowable activities outlined in federal regulations and are adequately supported. In addition, the DSS should resolve the questioned costs with the grantor agency.

AUDITEE'S RESPONSE

We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

2010-20.	**Vocational Rehabilitation Program**

Federal Agency:	Department of Education
Federal Program:	84.126 Rehabilitation Services - Vocational Rehabilitation Grants to States 2009 - H126A090037 and 2010 - H126A100037
State Agency:	Department of Social Services (DSS) - Family Support Division (FSD) - Rehabilitation Services for the Blind (RSB) and Division of Finance and Administrative Services (DFAS)
Questioned Costs:	$46,035

The FSD improperly charged the Vocational Rehabilitation (VR) program for personnel costs totaling $58,494, of which we question the federal share of $46,035 (78.7 percent). For the fiscal year ended June 30, 2010, the DSS claimed $3,844,231 as the federal share of personnel costs, or 40 percent of the total federal share of VR program expenditures. Additional improvement in the policies and procedures for the allocation of personnel costs are needed.

Personnel costs for employees who work on multiple federal awards or cost objectives are to be allocated to the various programs according to the personnel activity reports prepared by those employees. Personnel costs consist of salaries, fringe benefits and indirect costs. The RSB is responsible for allocating the personnel costs to the various programs. The DFAS, based upon the allocations reported by the RSB, records the costs to the various programs in the financial accounting system.

- For the period January 1, 2010, to June 30, 2010, the RSB reported and the DFAS recorded personnel costs to the VR program for 13 employees whose personnel activity reports were correctly prepared but for whom the RSB used an incorrect allocation formula. The incorrect allocation formula appeared to be caused by inadvertent and undetected overwriting of some underlying formulas in the monthly spreadsheets used by RSB personnel to report the allocations. As a result, those personnel costs were not properly allocated and the VR grant was incorrectly charged $12,944 for work related to other programs. We question the federal share, or $10,187 (78.7 percent).

- For the period April 1, 2010, to June 30, 2010, the RSB reported and the DFAS recorded personnel costs, totaling $45,550, to the VR program for four employees who worked on multiple programs. Personnel activity reports were prepared by these employees; however, costs were not allocated according to the activity

reports. One employee who worked exclusively on another program was hired during this period but the RSB failed to include the related costs in the allocation process and all costs were improperly charged to the VR program. The other three employees were children's specialists. The federal oversight agency, U.S. Department of Education, Office of Special Education and Rehabilitative Services, Rehabilitation Services Administration (RSA), in a report issued in February 2010, had determined that children's specialists provide little, if any, services that are within the scope of the VR program and the related expenditures for services outside the scope of the VR program were unallowable under Section 111(a)(1) of the Rehabilitation Act of 1973, 34 CFR, Section 361.3, and OMB Circular A-87. After the RSA report was issued, the RSB revised the personnel activity reports for these employees to accurately record their time as working on other programs and RSB reported the related costs to DFAS as costs chargeable to the other programs. However, there appeared to be a breakdown in communication and when the DFAS raised concerns about which program should be charged for those costs, the RSB official who had prepared the allocation report incorrectly indicated they should be charged to the VR program. We question the federal share, or $35,848 (78.7 percent) for these personnel costs improperly charged to the VR program for this period.

- The FSD and RSB have established written policies and procedures for the allocation of personnel costs; however, the policies lacked sufficient detail, and as a result, the procedures did not ensure personnel costs are properly allocated to all programs.

The OMB Circular A-87, Attachment B, Section 8 requires the allocation of personnel costs for employees who work on multiple activities or cost objectives to be supported by personnel activity reports. Further, those reports must reflect an after-the-fact distribution of the actual activity of each employee, account for the total activity for which each employee is compensated, be prepared at least monthly, coincide with one or more pay periods, and be signed by the employee.

In response to similar findings in our prior two audit reports, the FSD has previously taken corrective action to implement procedures that have resulted in improved documentation of personnel costs for the VR program within the RSB. While substantial improvement has been made, further improvements are needed.

WE RECOMMEND the DSS through the FSD and DFAS resolve the questioned costs with the grantor agency. In addition, the FSD and RSB should develop comprehensive written policies and procedures to ensure personnel costs for employees who work on multiple federal awards or cost objectives are allocated in accordance with federal laws and OMB Circular A-87.

AUDITEE'S RESPONSE

We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

2010-21. Unallowable Costs and Maintenance of Effort

Federal Agency:	Department of Health and Human Services
Federal Program:	93.558 Temporary Assistance for Needy Families 2009 - G0901MOTANF and 2010 - G1002MOTANF
State Agency:	Department of Social Services (DSS) - Family Support Division (FSD)
Questioned Costs:	$29,638,870

The DSS does not have adequate controls in place to ensure costs charged to the Temporary Assistance for Needy Families (TANF) program meet federal requirements. The DSS charged unallowable foster care, adoption assistance, and subsidized guardianship costs totaling over $29.6 million to the TANF program. The DSS included unallowable educational program costs as qualifying under the maintenance of effort (MOE) requirement for the TANF program and, as a result, DSS failed to meet the MOE funding requirements by at least $30.9 million. In addition, for the quarter ended September 30, 2010, the DSS charged unallowable scholarship programs costs totaling nearly $18.5 million directly to the TANF program.

The four purposes of the TANF program as stated in 45 CFR, Section 260.20 include: (1) provide assistance to needy families so that children may be cared for in their own homes or in the homes of relatives; (2) end the dependence of needy parents on government benefits by promoting job preparation, work, and marriage; (3) prevent and reduce the incidence of out-of-wedlock pregnancies and establish annual numerical goals for preventing and reducing the incidence of these pregnancies; and (4) encourage the formation and maintenance of two-parent families.

A. The DSS charged unallowable state foster care, adoption assistance, and subsidized guardianship costs to the TANF program. Federal regulation, 45 CFR, Section 263.11, includes a grandfather clause allowing states to continue to charge expenditures previously authorized under certain federal programs which are now obsolete. Such expenditures are referred to as prior approved program costs. The DSS identified the foster care, adoption assistance and subsidized guardianship costs as authorized under the IV-A Emergency Assistance (EA) Plan in effect on September 30, 1995. However, EA that may be charged as a prior approved program cost is limited by the 1995 IV-A EA plan, to a maximum duration of 365 days or less as necessary to alleviate the emergency condition, and must be authorized within a single 30-day period no less than 12 months after the beginning of the family's last EA authorization period.

The DSS started charging certain child welfare expenditures in state fiscal year 2006 including some foster care, adoption assistance, and subsidized guardianship under the TANF program. Expenditures charged do not appear to meet the criteria for emergency assistance. The foster care, adoption assistance, and guardianship expenditures can and often do extend beyond 12 months and do not necessarily correspond to an emergency or an emergency assistance authorization. While it is clear that some expenditures for some families within those categories would meet the requirements as a prior approved program cost, the DSS does not have a methodology to track which specific foster care, adoption assistance and guardianship expenditures meet the emergency assistance criteria and were authorized as required.

The foster care, adoption assistance, and subsidized guardianship costs charged included non-emergency assistance, and the costs charged for emergency assistance are not separately identified; therefore all costs are unallowable. We question all state fiscal year 2010 costs charged for foster care, adoption assistance, and subsidized guardianship and charged to the TANF program, totaling $29,638,870 (100 percent federal share).

B. The DSS included unallowable educational expenditures totaling approximately $50.7 million in the amounts reported for the annual MOE requirement. MOE is the minimum amount of funding the state must expend from other funding sources as a condition of receiving TANF funding each year. Qualifying activities provided to TANF eligible families may be included in MOE. In addition, qualifying activities provided to families who are not eligible for participation in the TANF program may be included in MOE only if those activities are closely related to the promotion of healthy marriages and responsible fatherhood. The MOE must be at least as much as the applicable percentage of the 1994 base year expenditures. The applicable threshold percentage of the base, which is the amount of non-federal funds the state spent in fiscal year 1994 on AFDC ($160.1 million), for each fiscal year is 80 percent ($128.1 million), or 75 percent ($120.1 million) if the state meets the work participation rate requirements for the fiscal year. This is termed “basic MOE” and the requirement is based on the federal fiscal year.

MOE expenditures must be made on behalf of eligible TANF families pursuant to 42 USC 609(a)(7)(B)(i)(IV). Eligible families are defined in 45 CFR, Section 263.2, as families who meet the income and resource standards and other eligibility criteria defined in the state TANF plan. For federal fiscal years 2006 through 2008 only, an exception was made whereby states could claim MOE for certain expenditures directed toward any family regardless of financial need or eligibility, if the expenditure was reasonably expected to accomplish TANF purposes 3 or 4, which relate to preventing and reducing out-of-wedlock pregnancies and encouraging the formation and maintenance of two-parent families. For federal fiscal year 2009 and forward, this policy has been revised and states are only allowed to claim specific activities for families who are not

TANF eligible if the expenditure is closely related to the promotion of healthy marriages and responsible fatherhood as defined in Administration for Children and Families (ACF) directive TANF-ACF-PI-2008-10 issued October 23, 2008.

We reviewed all sources of MOE claimed for federal fiscal year 2009 and noted three educational and three scholarship programs claimed do not appear to be allowable sources of MOE. These programs are operated by the Missouri Department of Elementary and Secondary Education and Missouri Department of Higher Education. The DSS began including these educational and scholarship programs in MOE in 2007.

- Three educational programs, Character Education, Parents as Teachers, and the Missouri Pre-School Program, appear to fall under the category of early childhood education programs which have been deemed by the ACF as meeting TANF purposes 3 and 4. However, in order for these educational program activities to be includable in MOE, the activities must be provided to TANF eligible families or, for families who are not eligible to participate in the TANF program, those programs must be closely related to the promotion of healthy marriages and responsible fatherhood. The DSS does not have a methodology to track which expenditures within these three programs benefit only TANF eligible families. The DSS has also not determined and documented how these three programs are closely related to the promotion of healthy marriages and responsible fatherhood for families not eligible for TANF participation. Therefore, the DSS is unable to substantiate which, if any, expenditures for these three educational programs are allowable sources of MOE. For these three programs, the DSS claimed unallowable costs totaling approximately $30.8 million in federal fiscal year 2009.

- The three scholarship programs claimed as MOE are A + Schools, Bright Flight Scholarships, and Ross-Barnett Scholarships. Scholarship programs have not been deemed as meeting TANF purposes 3 or 4 by the ACF. In addition, the DSS has not determined and documented how these programs meet TANF purposes 3 and 4 or the more restrictive criteria, promotion of healthy marriages and responsible fatherhood. Therefore, the DSS is unable to substantiate which, if any, expenditures for these three scholarship programs are allowable MOE costs. For these three programs, the DSS claimed unallowable costs totaling approximately $19.9 million in federal fiscal year 2009.

For federal fiscal year 2009, DSS reported MOE expenditures of $89.2 million, excluding the unallowable educational program costs of $50.7 million. The DSS has not yet received confirmation from the ACF regarding whether state TANF participants as a whole met the required work participation rate for federal fiscal year 2009 necessary to establish the lower 75 percent MOE threshold. Depending on which threshold is determined applicable, it appears allowable reported TANF

MOE expenditures are short of the MOE requirement by either $30.9 million or $38.9 million. For federal fiscal year 2008, the work participation rate requirement was not met, resulting in an 80 percent MOE threshold. Under 45 CFR, Section 263.8, the failure to meet the MOE requirement may result in a penalty, which is a dollar for dollar reduction in the TANF grant award for the subsequent year.

It appears there are other state costs that could have been included in the TANF MOE in lieu of the unallowable educational program costs. After we brought our concerns about failure to meet the TANF MOE requirement to the attention of DSS officials, several other programs were reported for the quarter ended September 30, 2010, that the DSS indicated qualify as MOE. In addition, the DSS shifted some educational program costs to direct costs of the TANF program. As reported in the following section, those educational program costs do not appear to be allowable direct costs of the program.

C. For the quarter ended September 30, 2010, DSS charged costs to the TANF program, totaling $18,493,665, related to the three scholarship programs: A+ Schools, Bright Flight Scholarships, and Ross-Barnett Scholarships. According to the TANF Funding Guide, the ACF indicates TANF expenditures may include expenditures for TANF eligible families that serve to meet any of the four purposes of the TANF program. For families that are not TANF eligible, the funded activities must serve to meet TANF purposes 3 or 4, which relate to preventing and reducing out-of-wedlock pregnancies and encouraging the formation and maintenance of two-parent families. The DSS reported the scholarship programs meet TANF purposes 3 and 4; however, the DSS has not determined and documented there is any correlation between those programs and any of the four TANF purposes.

DSS officials stated a federal ACF official suggested moving the scholarship program costs from MOE to the TANF program as direct costs, but no documentation was available to support the discussion or decision. The costs of the three scholarship programs are now directly reimbursed by the TANF program whereas before they were counted only towards the MOE requirement. These scholarship program costs charged to the TANF program, totaling $18,493,665 (100 percent federal share) in state fiscal year 2011 do not appear allowable.

D. The DSS control system has not been effective in ensuring the types of costs charged to the TANF program or recorded as TANF MOE meet all federal regulatory and grant requirements, resulting in unallowable costs and unqualified sources of MOE claimed against the federal TANF grant. Such a control system should include formal evaluations, periodic re-evaluations, and management review of the related federal regulations and expenditure categories to ensure expenditures charged to the TANF program or recorded as TANF MOE meet all federal regulatory and grant requirements.

WE RECOMMEND the DSS:

A. Ensure prior approved program costs charged to the TANF program comply with federal regulations. In addition, the DSS should resolve the questioned costs with the grantor agency.

B. Ensure expenditures claimed as MOE are allowable and resolve the potential penalty with the grantor agency.

C. Ensure program costs charged to the TANF program for state fiscal year 2011 comply with federal regulations.

D. Establish a formal control system to ensure the types of costs charged to the TANF program or recorded as TANF MOE meet all federal regulatory and grant requirements.

AUDITEE'S RESPONSE

We disagree with the auditor's findings. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement.

2010-22. Work Verification Activities

Federal Agency: Department of Health and Human Services
Federal Program: 93.558 Temporary Assistance for Needy Families
2009 - G0901MOTANF and 2010 - G1002MOTANF
State Agency: Department of Social Services - Family Support Division (FSD)

The FSD did not have adequate controls in place to ensure compliance with the Temporary Assistance for Needy Families (TANF) Work Verification Plan in effect for state fiscal year 2010 and, as a result, the FSD has less assurance the data used to calculate the work participation rate is accurate.

The FSD contracted with the Missouri Department of Economic Development - Division of Workforce Development (DWD) to perform many of the required TANF work activities functions. These duties included case management, enrollment and assistance to TANF recipients who are required to participate in eligible work activities, and reporting participant noncompliance and hours of participation to the FSD. The DWD contracted with regional workforce investment boards (WIBs) to provide those functions at the local level. The FSD provided approximately $18 million in federal TANF funding to the DWD, which in turn passed through approximately $17 million to the WIBs as subrecipients.

Under 45 CFR, Section 265.3, states are required to submit quarterly TANF Data Reports which provide information regarding TANF recipients and work activities. The U.S.

Department of Health and Human Services, Administration for Children and Families, uses the TANF Data Reports to calculate the state work participation rate each fiscal year. In addition, under 45 CFR Section 261.62, the FSD is required to have a Work Verification Plan which includes requirements to maintain adequate documentation, verification, and internal control procedures to ensure the accuracy of the data used in calculating work participation rates. In doing so, the FSD must have in place procedures to identify TANF recipients who are work-eligible, identify work activities that may count for work participation rate purposes, determine how to count and verify reported hours of work, and control internal data transmission and accuracy.

The FSD was not in compliance with certain work activity reporting requirements contained in the Work Verification Plan in effect for state fiscal year 2010. We obtained the April 2010 work verification report "Required to Serve" which included data on the status of each individual's compliance with the work participation requirements and number of hours of participation in the various work related activities. Of the 19,772 TANF recipients included in the report, 6,957 individuals had at least an hour of work activity reported. We judgmentally selected 25 individuals with reported work activity for testing. We noted 4 (16 percent) of the individuals tested for which the work participation hours reported were not in accordance with the Work Verification Plan. For one individual, the hours of participation were not supported by required documentation and some hours were based upon a projection the individual would perform certain activities; however, the individual had notified the WIB they had ceased participation in that activity. For another individual, the activities were reported as countable although the activity did not meet the criteria outlined in the Work Verification Plan. These two individuals were reported as compliant with the work activity requirements when they failed to meet those requirements. Another individual was correctly reported as non-compliant with the work requirements; however, 8 of the 9 hours reported were not supported by required documentation. For another individual, the hours of work activity were under reported, resulting in this individual being reported as non-compliant when the individual had actually met the work requirements. The net effect of the 4 errors was an overstatement of the work participation compliance rate by 4 percent for this group of 25 individuals.

The work participation data was recorded at the local level by subcontractors of the WIBs. The DWD indicated they had taken several actions to increase the accuracy of the work participation data at the local level, including revising policies and forms, generating and reviewing monthly reports, conducting desk reviews of files, providing training opportunities at the local level, and updating the computer applications and systems used to record the work verification hours. The DWD conducted periodic on-site monitoring visits of the WIBs which included case reviews to determine the WIBs and their subcontractors were adequately performing verification activities. We obtained a summary report from the DWD of the most recent round of monitoring visits conducted at the 14 regional WIBs. The DWD report identified several of the WIBs were not complying with the work verification requirements. The report also indicated many of the errors noted by the DWD were corrected on a case by case basis. However, based upon our test results, it appears DWD on-site monitoring procedures were not effective in

reducing non-compliance with work verification requirements at the local level. Neither the FSD nor the DWD had adequate controls in place to identify and ensure correction of the underlying problems at the local level. FSD officials indicated the FSD did not receive or review DWD monitoring reports, but relied upon the DWD to ensure the local agencies were complying with the work verification requirements. As of July 1, 2010, the FSD resumed administration of the TANF work activities that had been performed by the DWD and contracted directly with community organizations to perform the related activities at the local level. The FSD will be responsible for monitoring compliance with the Work Verification Plan.

The failure to maintain adequate internal controls to ensure accurate data is reported for measurement of work participation could result in a penalty, under 45 CFR, Section 261.65, of not less than 1 percent and not more than 5 percent of the annual grant amount.

WE RECOMMEND the FSD strengthen controls to ensure work participation activities are adequately documented, verified, and reported in accordance with the FSD Work Verification Plan.

AUDITEE'S RESPONSE

We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

2010-23.	**Salary Certifications**

Federal Agency:	Department of Health and Human Services
Federal Program:	93.563 Child Support Enforcement 2009 - G0904MO4004 and 2010 - G1004MO4004
State Agency:	Department of Social Services (DSS) - Family Support Division (FSD) - Child Support Enforcement (CSE) and Division of Finance and Administrative Services (DFAS)
Questioned Costs:	$83,289

The FSD did not always prepare required salary certifications for employees working solely on the CSE program. For the year ended June 30, 2010, the DSS claimed $26,027,059 as the federal share of personnel costs, or 56 percent of the total federal share of CSE program expenditures.

Salary certifications were not prepared for 15 of about 870 FSD employees whose personnel costs were charged 100 percent to the CSE program for the period of July 2009 to September 2009. The federal share of personnel costs charged to the CSE program for that quarter was $6,698,192, or 66 percent of total costs. The FSD used a report of employees whose personnel costs were charged to the program for the last payroll period in the first certification period, April 2009 through September 2009, to identify

employees for whom certifications were required. That report did not include 14 employees that either terminated or transferred from a child support position prior to the last payroll of the reporting period. In addition, one employee's position code was not included as a child support enforcement position for the report. Salary costs for these 15 employees were charged on the quarterly cost allocation plan; however, due to the incompleteness of the personnel report used to generate the list of employees for whom certifications were required, the employees were not certified. Personnel costs charged to the CSE grant for these 15 employees totaled $126,196, of which we question the federal share of costs totaling $83,289 (66 percent).

In response to a similar finding in our prior audit report, improvements were made to the certification procedures and for the second certification period, October 2009 through March 2010, all employees charged to the CSE program were properly certified. The FSD has developed written policies and procedures and implemented those procedures for the certification period of April 2010 to September 2010. The new procedures should ensure salary certifications are prepared as required in future periods.

The OMB Circular A-87 requires that charges for salaries and related salary costs of employees who work solely on a single federal award or cost objective be supported by periodic certifications that the employees worked solely on that program. These certifications are required to be prepared at least semi-annually and signed by either the employee or a supervisor having specific knowledge of the work performed by the employee. According to FSD officials, CSE employees work solely on the CSE program. Without accurate and complete certifications, the FSD has not fully substantiated the salary costs charged to the various federal programs.

WE RECOMMEND the DSS through the FSD and DFAS resolve the questioned costs with the grantor agency.

AUDITEE'S RESPONSE

We disagree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement.

2010-24.	**Section 1512 Reporting**

Federal Agency:	Department of Health and Human Services
Federal Program:	93.710 ARRA - Community Services Block Grant 2009 - 0901MOCOS2
State Agency:	Department of Social Services (DSS) - Family Support Division (FSD) and the Division of Finance and Administrative Services (DFAS)

The DSS does not have adequate controls and procedures in place to ensure Section 1512 reports are complete and accurate for the Community Services Block Grant (CSBG)

program. In addition, the DSS does not have a formal written plan in place for the Section 1512 reporting process. ARRA CSBG funds are passed through to subrecipients, consisting of 20 Community Action Agencies throughout the state. During state fiscal year 2010, the DSS disbursed approximately $21 million in ARRA funds to subrecipients.

Section 1512 of the ARRA requires comprehensive reporting for certain ARRA awards to promote transparency and accountability over the use of such funds. This section requires various data elements to be reported on a quarterly basis by prime recipients detailing the use of ARRA funds including the total grant award, the amount received and expended, and certain elements for vendor payments and subawards. Additionally, prime recipients are required to report on planned projects and activities, including the status of project completion and an estimate of direct jobs created or retained. Prime recipients may solicit information for some data elements from subrecipients and vendors to help meet Section 1512 reporting requirements. Additionally, in some cases, prime recipients may delegate certain direct reporting duties to their subrecipients, although the state of Missouri, as the prime recipient of these funds, has not delegated such responsibilities.

A. The DSS does not have adequate controls and procedures in place to ensure program information is accurately entered into the overall Section 1512 report or to provide assurance Section 1512 report information submitted by subrecipients of the CSBG program is complete and accurate.

On a quarterly basis, each subrecipient submits a completed reporting template to the CSBG program unit within FSD to provide program information required for Section 1512 reporting purposes, such as vendor activity, jobs created and retained, and expenditure data. Once information is received, the CSBG program unit compares expenditure information to SAM II and reviews the data for reasonableness. The reporting templates are then placed on a shared drive and DFAS personnel enter the data into the state's Section 1512 reporting system (STIM 360). DFAS personnel perform a review to ensure information entered agrees to information received from subrecipients; however, procedures performed were not sufficient. Our review of information submitted by four subrecipients during the quarter ended March 31, 2010, noted the following:

- Four vendors were reported by subrecipients as receiving payments exceeding $25,000; however, these vendors were not included by the DFAS in the overall Section 1512 report for the quarter. Payments to these vendors totaled approximately $222,000 during the quarter ended March 31, 2010.

- Two vendors were reported by subrecipients as receiving payments exceeding $25,000 during the quarter; however, the payments were not added to the cumulative amounts previously reported by the DFAS for these vendors. This resulted in an understatement totaling approximately $80,400 for subrecipient vendor payments to date.

DFAS personnel indicated these errors were the result of human error. Additionally, personnel indicated that enhanced procedures have been established since this reporting period to help prevent and detect future errors.

Some elements submitted by subrecipients, such as subaward identifying numbers, award amounts, and project descriptions, are consistent each quarter and are prepopulated in STIM 360 from prior quarters, requiring little oversight from DSS on a quarterly basis. For other elements, FSD and DFAS personnel review information submitted for reasonableness and compare expenditure data to SAM II; however, the FSD relies on the accuracy and completeness of much of the other information submitted by the subrecipients, such as jobs created or retained and vendor payments, for each quarterly report. The FSD conducts a site-visit for each subrecipient once every 3 years; however, state fiscal year 2010 reviews did not include a review of documentation supporting the data submitted by subrecipients and relied on for Section 1512 reporting. According to FSD personnel, they are currently working on a plan to include Section 1512 data elements as part of future on-site monitoring visits.

OMB Memorandum M09-21 states the DSS, as prime recipient, is ultimately responsible for the reporting of all data required by Section 1512 of the ARRA. Additionally, the prime recipients, as owners of the data submitted, have the principal responsibility for the quality of the information submitted. Without adequate and timely monitoring procedures in place over the data submitted by subrecipients, the DSS has less assurance the information included in the Section 1512 reports for the CSBG program is complete and accurate.

B. The DSS does not have a formal written plan in place to address the agency's Section 1512 reporting process for the CSBG program. The DSS does have some written reporting procedures outlining minimal steps to take up to the first 5 days of the reporting period and the DSS has a checklist documenting some overall guidelines and procedures to follow in preparing quarterly Section 1512 reports. However, the written procedures and the checklist do not document specific steps or an overall work plan to ensure the accuracy and completeness of Section 1512 reports, such as monitoring subrecipient submitted data through on-site visits or desk reviews, or by comparing expenditure information to SAM II. Additionally, although the written procedures and checklist provide some guidelines and procedures over the reporting process, there is no indication the checklist is actually being used.

A formal written plan would help ensure Section 1512 reports are complete and accurate. The plan should, at a minimum, document the flow of information, define the responsibilities of subrecipients and various program personnel, and include procedures for ensuring the accuracy and completeness of all Section 1512 reporting elements. Without a formal written plan in place, the DSS has less assurance the various reporting responsibilities, such as data collection and

verification, have been relayed to and understood by all parties of the reporting process.

WE RECOMMEND the DSS through the FSD and the DFAS:

A. Establish procedures over the CSBG program to ensure the accuracy and completeness of Section 1512 reports and ensure timely reviews of data submitted by the subrecipients for Section 1512 reporting.

B. Establish a formal written plan for Section 1512 reporting.

AUDITEE'S RESPONSE

A. We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

B. We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

2010-25. Provider Eligibility and Improper Payments

Federal Agency:	Department of Health and Human Services
Federal Program:	93.778 Medical Assistance Program 2009 - 0905MO5028 and 0905MO5048 2010 - 1005MO5MAP/XIX-MAP10 and 1005MO5ADM/XIX-ADM10 93.778 ARRA - Medical Assistance Program 2009 - 0905MOARRA 2010 - 1005MOARRA
State Agency:	Department of Social Services (DSS) - MO HealthNet Division (MHD)
Questioned Costs:	$122

Lack of adequate internal controls over Medicaid provider eligibility resulted in noncompliance with federal laws and regulations and improper payments to a provider totaling $164 related to the above reference program. The Medical Assistance Program, also known as Medicaid, is administered by the MHD.

The MHD has not established controls to detect expired Medicaid provider licenses or to prevent, detect, and correct payments to providers who were deceased prior to the date the reimbursement claim indicated medical services were provided. As a result, the MHD improperly paid $164 during the year ended June 30, 2010, for three claims submitted for one Medicaid provider who was deceased prior to the reported date of service. During our review of 25 claims paid to Medicaid providers during the year June 30, 2010, we

were unable to verify on the Missouri Division of Professional Registration (PR) website whether this provider was licensed as of the date the claim was paid. In addition, we noted the provider's license on file with the MHD expired in 2004, and there was no evidence the MHD had ensured this provider was licensed after the date of expiration. At our request, MHD personnel contacted PR personnel who indicated this provider was deceased, thus his license had been removed from the PR website following his death in December 2009, and his license would have expired on January 31, 2011. The MHD provided us documentation of all claims submitted for this provider after the date of his death. Five claims were submitted, with three claims paid and two claims denied (although denials were not due to the death of the provider). Therefore, we question the federal share of the three claims paid for which the reported dates of services were after the provider's date of death, or $122 (74.43 percent).

In addition, the MHD has not established controls to ensure providers continually meet federal requirements for disclosure of convictions of criminal offenses against Medicare, Medicaid, or the Title XX services program. According to MHD personnel, unless a provider submits revised disclosure information or the MHD is notified of exclusions by the U.S. Department of Health and Human Services, Office of Inspector General, the MHD is unaware of changes which may need to be disclosed.

In order to receive Medicaid payments, providers of medical services must be licensed in accordance with federal, state, and local laws and regulations as outlined in 42 CFR Sections 431.107 and 447.10 and Section 1902(a)(9) of the Social Security Act. In addition, providers must make disclosures to the state of convictions of criminal offenses against Medicare, Medicaid, or the title XX services program, as required by 42 CFR Part 455, Subpart B, Sections 455.100 through 455.106.

Without controls and procedures in place to identify deceased providers, detect expired licenses, and ensure disclosures required by federal requirements are current, the MHD cannot ensure all enrolled Medicaid providers remain eligible for participation in the Medicaid program and that improper payments will be detected and corrected in a timely manner. The improper medical payments associated with known questioned costs identified above represent payments made to 1 of 25 providers, or approximately 4 percent of Medicaid providers reviewed. It is unclear if similar improper payments have been made to the remaining population of Medicaid providers; however, additional questioned costs are possible.

WE RECOMMEND the MHD develop procedures to ensure providers meet required criteria to be eligible Medicaid providers, including periodically verifying provider licenses, obtaining updated provider disclosures, and ensuring timely detection of deceased providers, to aid in the prevention and correction of improper claims paid. In addition, the MHD should resolve the questioned costs with the grantor agency.

AUDITEE'S RESPONSE

We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

Additional State Auditor's Reports:

The Missouri State Auditor's Office regularly issues management reports on various programs, agencies, divisions, and departments of the state of Missouri. Some of these management reports include issues relating to the administration of federal programs. The following reports relate to federal programs and were analyzed to determine if any issues noted in these reports were required to be reported in this Schedule of Findings and Questioned Costs in accordance with Section .510(a) of OMB Circular A-133.

Report Number	Report Name
2010-88	Higher Education/Higher Education Governance Structure and Coordination
2010-99	Insurance, Financial Institutions, and Professional Registration/Insurance
2010-122	Labor and Industrial Relations/Misclassified Worker Investigation Procedures
2010-161	Public Safety/Office of Adjutant General

All reports are available on the Missouri State Auditor's Office website: http://auditor.mo.gov.

SUMMARY SCHEDULE OF PRIOR AUDIT FINDINGS
IN ACCORDANCE WITH OMB CIRCULAR A-133

STATE OF MISSOURI
SUMMARY SCHEDULE OF PRIOR AUDIT FINDINGS
IN ACCORDANCE WITH OMB CIRCULAR A-133

Circular A-133 requires the auditee to prepare a Summary Schedule of Prior Audit Findings to report the status of all audit findings in the prior audit for the year ended June 30, 2009, and the findings from the prior audits for the years ended June 30, 2008 and 2007, except those that were listed as corrected, no longer valid, or not warranting further action. This section includes the Summary Schedule of Prior Audit Findings, which is prepared by the state's management.

Circular A-133 requires the auditor to follow-up on these prior audit findings; perform procedures to assess the reasonableness of the Summary Schedule of Prior Audit Findings; and report as a current year finding, when the auditor concludes the Summary Schedule of Prior Audit Findings materially misrepresents the status of any prior audit findings.

The disposition of the findings from the year ended June 30, 2008, is as follows:

Findings numbered 1, 3, 4, 7B, and 8C were corrected.

Findings numbered 2A, 2B, 5, 6, 7A, 8A, 8B, 9A, 9B, and 10 are included in the Summary Schedule of Prior Audit Findings.

For the year ended June 30, 2007, all findings were corrected, no longer valid, or did not warrant further action, except for finding number 12, which is included in the Summary Schedule of Prior Audit Findings.

SUMMARY SCHEDULE OF PRIOR AUDIT FINDINGS

2007-12. Subrecipients

Federal Agency: Department of Agriculture
Department of Health and Human Services

Federal Program: 10.561 State Administrative Matching Grants for Food Stamp Program
2005, 2006, and 2007 - IS251443
2006 and 2007 - IE251843 and IS252043
93.556 Promoting Safe and Stable Families
2006 - G0601MO00FP and 2007 - G0701MO00FP
93.558 Temporary Assistance for Needy Families
2006 - G0601MOTANF and 2007 - G0701MOTANF
93.566 Refugee and Entrant Assistance - State Administered Programs
2006 - G06AAMO7100, 2007 - G07AAMO7100,
2006 - G06AAMO7110, and 2007 - G07AAMO7110
93.568 Low-Income Home Energy Assistance
2006 - G06B1MOLIEA and 2007 - G07B1MOLIEA
93.575 Child Care and Development Block Grant
2006 - G0601MOCCDF and 2007 - G0701MOCCDF
93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund
2006 - G0601MOCCDF and 2007 - G0701MOCCDF
93.658 Foster Care - Title IV-E

93.778 Medical Assistance Program
2006 - 06-05MO5028 and 2007 - 07-05MO5028
2006 - 06-05MO5048 and 2007 - 07-05MO5048

State Agency: Department of Social Services (DSS) - Division of Budget and Finance (DBF)

The DSS did not consider certain entities, such as local community partnerships, to be subrecipients. Our review of expenditures noted payments to several entities which appeared to be subrecipients. However, the Schedule of Expenditures of Federal Awards (SEFA) prepared by the DBF reported payments to these entities for these programs as vendors, rather than "amounts provided to subrecipients", and these entities were not furnished applicable federal regulations and required to obtain an audit in accordance with OMB Circular A-133, when needed.

Recommendation:
The DSS-DBF classify appropriate entities as subrecipients and report funds provided to subrecipients correctly on the SEFA. The subrecipients should be appropriately notified of grant funding sources and regulations and should be required to obtain A-133 audits, where applicable.

Status of Finding:
The DSS developed a tool that we are using to determine whether contractors are vendors or subrecipients. The community partnerships were notified that they are now considered subrecipients and as such are expected to have an A-133 audit conducted for their fiscal year ending on or after June 30, 2011.

Contact Person: Roger Backes
Phone Number: (573) 751-2170

2008-2A. Capital Assets

Federal Agency: Department of Defense
Federal Program: 12.401 National Guard Military Operations and Maintenance Projects
2007 - DAHA23-07-2-1000 and 2008 - DAHA23-08-2-1000
State Agency: Department of Public Safety - Adjutant General (AG)

Some assets purchased during fiscal year 2008 were not properly accounted for in the AG's capital asset tracking system and were not assigned a property tag or capital asset number. In addition, the AG did not perform adequate periodic inventories to ensure capital assets were retained and used appropriately.

Recommendation:
The AG ensure all equipment is properly entered into the capital asset tracking system and assigned a property tag number. In addition, develop and implement a process to ensure capital assets are appropriately accounted for on the annual physical inventories. The inventories should be completed by someone without physical custody of the assets, or at a minimum, reviewed by someone independent.

Status of Finding:
The AG's fixed asset accountability process was revised in 2009. Additional AG staff has been and will continue to be assigned to assist with the reconciliation of fixed assets.

The state property manager, during the months of January - March, will provide a copy of the inventory record to each Hand Receipt Holder at the various off-site locations. The Hand Receipt Holder will sign the inventory record confirming that a physical inventory has been conducted and that all discrepancies have been annotated and return a copy of the inventory record to the State Property Manager. The State Property Manager will sign the inventory record acknowledging receipt and verify that the Hand Receipt Holder signed the document. All inventory records will be presented to the State Logistics

Manager who will also sign the inventory record confirming an inventory record has been received from Hand Receipt Holder and the State Property Manager has signed. A schedule has been established to verify a physical inventory at a minimum of 10 percent of the AG National Guard armories and federal/state agreement facilities to ensure assets are accounted for appropriately. The AG State Property Manager will conduct these inventories and the State Resource Logistics Manager will initial documents upon review and provide oversight.

2008-2B. Capital Assets

Federal Agency: Department of Defense
Federal Program: 12.401 National Guard Military Operations and Maintenance Projects
2007 - DAHA23-07-2-1000 and 2008 - DAHA23-08-2-1000
State Agency: Department of Public Safety - Adjutant General (AG)

AG personnel did not complete reconciliation between the expenditure and capital asset records in the SAM II system.

Recommendation:
The AG ensure the capital asset reconciliation is completed to identify all capital assets and ensure the capital asset records are accurate.

Status of Finding:
Prior year fixed asset records continue to be researched and corrected. As of October 27, 2010, approximately 50 percent of outstanding fixed assets records for the federal fund have been reconciled. The previously stated revisions to existing policies have proven beneficial in the accountability of fixed assets and additional staff will continue to be assigned this duty until fixed asset accounts are reconciled.

Phone Number: (573) 751-2170

2008-6. Foster Care - Court Contracts

Federal Agency: Department of Health and Human Services
Federal Program: 93.658 Foster Care - Title IV-E
2007 - G0701MO1401 and 2008 - G0801MO1401
State Agency: Department of Social Services (DSS) - Children's Division (CD)
Questioned Costs: $216,178

The DSS received federal reimbursement for administrative costs associated with services provided by juvenile officers and guardians ad litem, although such costs did not appear allowable in the Foster Care program. During the fiscal year 2008, the DSS claimed reimbursement of such costs totaling $432,356. We questioned the federal share of $216,178.

Recommendation:
The DSS through the CD, ensure Foster Care costs claimed for federal reimbursement are allowable Foster Care expenses. In addition, the DSS should resolve the questioned costs with the grantor agency.

Status of Finding:
The DSS-CD has ceased claiming Title IV-E on costs incurred under contracts with juvenile courts for guardian ad-litem services and for deputy juvenile officer services.

Status of Questioned Costs:
Questioned costs have not yet been resolved with the grantor agency.

Contact Person: Patrick Luebbering
Phone Number: (573) 751-4206

2008-7A. Foster Care - Residential Facilities

Federal Agency: Department of Health and Human Services
Federal Program: 93.658 Foster Care - Title IV-E
2007 - G0701MO1401 and 2008 - G0801MO1401
State Agency: Department of Social Services (DSS) - Children's Division (CD)
Questioned Costs: $9,511

Reimbursements to residential facilities for training expenses were not always supported by sufficient documentation that the expenditures were allowable, and some training costs reimbursed appeared unallowable. Of the $34,100 in reimbursements reviewed, payments totaling $12,875 were unallowable and/or unsupported, of which we questioned $9,511 claimed as the federal share.

Recommendation:
The DSS through the CD, continue to ensure training activities reimbursed are for allowable activities outlined in federal regulations. In addition, the DSS should resolve the questioned costs with the grantor agency.

Status of Finding:
Beginning July 1, 2008, a new contract was issued for training reimbursement. The division has considerably changed the review process for these invoices, requiring documentation from the agencies of how their requests for training reimbursement meet the federal definition. The CD believes, subsequently, those costs being reimbursed are appropriate.

Status of Questioned Costs:
Questioned costs have not yet been resolved with the grantor agency.

Contact Person: Patrick Luebbering
Phone Number: (573) 751-4206

2008-8A. Foster Care - Eligibility and Assistance Payments

Federal Agency: Department of Health and Human Services
Federal Program: 93.658 Foster Care - Title IV-E
2007 - G0701MO1401 and 2008 - G0801MO1401
State Agency: Department of Social Services (DSS) - Children's Division (CD)
Questioned Costs: $2,790

The DSS did not maintain sufficient documentation to support eligibility or did not comply with federal requirements for some cases. For one case reviewed, the DSS could not locate a court order indicating the removal of the child from the home was in the child's best interest. Payments relating to this case, totaling $4,484, were charged to the Foster Care program. We questioned the federal share of $2,790. In addition, for other cases reviewed, the DSS did not comply with federal requirements and file or join a petition to file for termination of parental rights (TPR) or document compelling reasons for not pursuing termination; or TPR was not initiated within the required timeframe.

Recommendation:
The DSS through the CD resolve the questioned costs with the grantor agency, and ensure Foster Care judicial determinations contain specific language required by federal regulations, and that petitions to terminate parental rights are filed for parents whose

children are in custody for 15 of the most recent 22 months or compelling reasons for not filing the petition are documented.

Status of Finding:
A Practice Alert was issued to all CD staff on July 15, 2009, informing staff that they must obtain a copy of the initial court order indicating that removal from the home was in the child's best interest and file the order in the case record. The Practice Alert also states that when TPR is required, CD staff must file or join a petition for TPR, or document compelling reasons for not pursing termination within required timeframes.

Status of Questioned Costs:
Questioned costs have not yet been resolved with the grantor agency.

Contact Person: Melody Yancey
Phone Number: (573) 522-5062

2008-8B. Foster Care - Eligibility and Assistance Payments

Federal Agency: Department of Health and Human Services
Federal Program: 93.658 Foster Care - Title IV-E
2007 - G0701MO1401 and 2008 - G0801MO1401
State Agency: Department of Social Services (DSS) - Children's Division (CD)
Questioned Costs: $1,747

Sufficient documentation, such as invoices or other supporting documentation, could not be located for some payments for some cases where payment documentation was required. In addition, for some cases, the benefit payments exceeded the annual clothing allowance, and for another case, the maintenance payments were incorrectly calculated. For these cases, payments totaling $2,807 were unallowable and/or unsupported by adequate documentation. We questioned the federal share of $1,747.

Recommendation:
The DSS through the CD resolve the questioned costs with the grantor agency, and ensure Foster Care payments are allowable and supported by adequate documentation.

Status of Finding:
Memo CD09-92 was issued to all staff on September 24, 2009, reminding staff that sufficient documentation must be attached to all payment requests. The Payment Handbook was also updated to include information on appropriate documentation.

Status of Questioned Costs:
Questioned costs have not yet been resolved with the grantor agency.

Contact Person: Melody Yancey
Phone Number: (573) 522-5062

2008-9A. Vocational Rehabilitation Program

Federal Agency: Department of Education
Federal Program: 84.126 Rehabilitation Services - Vocational Rehabilitation Grants to States 2007 - H126A0700372 and 2008 - H126A080037B
State Agency: Department of Social Services - Family Support Division (FSD) - Rehabilitation Services for the Blind (RSB)
Questioned Costs: $3,444,779

The FSD did not establish procedures to ensure adequate supporting documentation was prepared for personnel costs charged to the Vocational Rehabilitation (VR) grant. Personnel costs charged to the VR grant during state fiscal year 2008 for which the supporting documentation was inadequate or not prepared totaled $4,377,102 of which we questioned the federal share of costs totaling $3,444,779.

Recommendation:

The FSD resolve the questioned costs with the grantor agency. In addition, the FSD should develop written policies and procedures to ensure salary certifications are prepared for all employees who work solely on a single program and personnel activity reports are prepared for employees who work on multiple federal awards or cost objectives in accordance with OMB Circular A-87.

Status of Finding:

The FSD has modified the certification process for personnel who worked solely in a single grant program and implemented personnel activity reporting (time studies) for those who work in multiple grants. FSD now ensures that all staff claimed 100 percent to the VR grant are verified through the certification process, effective in March 2009. FSD also ensures that any staff employed in a position that is claimed 100 percent to a grant (VR OIB) at any time during the review period is included in the certification process. Written procedures have been provided to affected staff to ensure they are clear on the certification process. FSD ensures that staff allocation claims for those employees not claimed 100 percent working to a specific grant in the FSD-RSB program are based on the employee activity reports effective July 1, 2009.

Status of Questioned Costs:

This finding is the subject of continued discussion with the grantor agency, but no final resolution has been achieved as of the date of this report.

Contact Person: Mark Laird
Phone Number: (573) 751-4249

2008-9B. Vocational Rehabilitation Program

Federal Agency: Department of Education
Federal Program: 84.126 Rehabilitation Services - Vocational Rehabilitation Grants to States
2007 - H126A0700372 and 2008 - H126A080037B
State Agency: Department of Social Services - Family Support Division (FSD) - Rehabilitation Services for the Blind (RSB)

The FSD-RSB did not adequately document annual reviews of Individualized Plans for Employment (IPE) relating to the Vocational Rehabilitation (VR) grant.

Recommendation:
The FSD document annual reviews of IPE for VR recipients on the IPE forms as required by RSB policy.

Status of Finding:
RSB has emphasized to vocational rehabilitation counseling staff, their supervisors and the rehabilitation assistants who work on case file documents and through on-site training the need for clear documentation verifying the requirement of the review of each eligible individual's IPE as often as necessary, but at least once every twelve months to assess the individual's progress in achieving the identified employment outcome, with an emphasis on using the IPE document to verify the requirement has been met. RSB central office management staff has focused attention on meeting the requirement and the documentation that the requirement has been met during discussions with field offices regarding any authorized service requiring higher level approval prior to approval.

RSB is in the process of implementing an automated case management system, expected to be operational by mid FY 2011. The system will capture the IPE completion date and generate an alert to counseling staff in advance of the annual anniversary date.

Contact Person: Mark Laird
Phone Number: (573) 751-4249

2008-10. Medical Assistance Program

Federal Agency: Department of Health and Human Services
Federal Program: 93.778 Medical Assistance Program
2007 - 0705MO5028 and 0705MO5048
2008 - 0805MO5028 and 0805MO5048
State Agency: Department of Social Services (DSS) - Family Support Division (FSD) and MO HealthNet Division (MHD)
Questioned Costs: $2,048

Various documentation detailing eligibility of recipients, payments to providers, and payment overrides could not be located related to the above referenced program.

A. Eligibility documentation could not be located by FSD for one Medicaid case file reviewed. Medical payments made on behalf of the client during the year ended June 30, 2008, totaled $3,297. We questioned the federal share of the total payments or $2,048.

B. Medicaid Eligibility Quality Control System documentation could not be located and/or was not adequate for some cases reviewed.

C. Medicaid payment override documentation could not be located for one case file reviewed.

D. Medicaid payment documentation could not be located by the MHD for one Program Integrity Unit's post payment case file reviewed.

Recommendation:

The DSS through the FSD and MHD ensure complete case files are maintained and/or documentation is adequate to ensure compliance with applicable federal requirements related to the Medicaid program. In addition, the FSD should resolve questioned costs with the grantor agency.

Status of Finding:

A&B. The FSD still does not agree that missing documentation, per se, would make costs questionable, and contends that, given eligibility determination information is maintained electronically in the Family Assistance Management Information System, the lack of a "hard case record" does not affect the eligibility. The agency is in the process of devising a memorandum to remind staff that it is good practice to maintain the hard case record for review purposes.

C. MHD's Participant Services Unit implemented new procedures for tracking, monitoring and retaining claim payment override documentation in December 2008.

D. MHD's Program Integrity Unit modified the procedures for the State Audit Sample and updated the tracking system in March 2009.

Status of Questioned Costs:

Questioned costs will be adjusted on the September 30, 2010, quarterly report.

Contact Person: Sandra Nelson and Lynn Hebenheimer

2009-1. Untimely Teacher Loan Forgiveness Payments

Federal Agency: Department of Education
Federal Program: 84.032 Federal Family Education Loans - Guaranty Agencies
State Agency: Department of Higher Education (DHE)
Questioned Costs: $502,851

The DHE did not have adequate controls in place to ensure payments were made to lenders within the 45 days required by program regulations for teacher loan forgiveness (TLF) claims. During the year ended June 30, 2009, payments totaling approximately $2.25 million were made for 311 TLF claims. We questioned the federal share of 75 untimely payments, or $502,851.

Recommendation:
The DHE work with the loan servicer to establish adequate controls and monitoring procedures to ensure TLF payments are made in a timely manner in accordance with federal regulations. In addition, the DHE should resolve the questioned costs with the grantor agency.

Status of Finding:
The DHE's loan servicer implemented procedures to ensure that eligible TLF claims are paid within 45 days of receipt. In addition, the DHE updated its internal procedures and now reviews all approved TLF claims weekly to verify the lender was paid within 45 days.

Status of Questioned Costs:
The DHE disagreed with the questioned costs. To date, the U.S. Department of Education has not followed up with the DHE on this audit finding or required any action relating to the questioned costs.

Contact Person: Carla Hancock
Phone Number: (573) 522-1363

2009-2A. Benefit Payments

Federal Agency: Department of Labor
Federal Program: 17.225 Unemployment Insurance
17.225 ARRA - Unemployment Insurance
2008 - UI-16756-08-55-A-29
2009 - UI-18030-09-55-A-29
State Agency: Department of Labor and Industrial Relations (DLIR)
Questioned Costs: $300

Controls and procedures related to the computer system used to manage unemployment benefits were not adequate. Due to a programming error, the computer system did not

accurately calculate the maximum benefit amount for Third Tier benefits, and documentation was not maintained to demonstrate what was done to correct the errors. We questioned the federal share of $300 (100 percent) for the error noted during our review.

Recommendation:

The DLIR resolve questioned costs with the grantor agency, and work with Office of Administration Information Technology Services Division (ITSD) to reanalyze all the changes made recently to the programming to determine if there are other issues affecting payments to claimants. In addition, the DLIR should work with the ITSD to ensure programming changes are properly tested and accurate. Also, the DLIR should work with the ITSD to ensure documentation is maintained of corrections and changes made to computer programming, the claimants affected by the changes, and the dollar amount associated with the changes.

Status of Finding:

The Department has resolved the questioned costs with the U.S. Department of Labor (USDOL). The USDOL's Final Determination regarding this finding was issued September 23, 2010. In this determination, the USDOL found that the corrective action plan submitted should be sufficient to address the issues noted by the auditor. The actions planned included a reemphasis on testing and verification of programming changes prior to implementation and the development of a records retention methodology and process which includes documenting and maintaining an audit trail for changes made.

Status of Questioned Costs:

The questioned costs of $300 were allowed by the USDOL.

Phone Number: (573) 751-3366

2009-2B. Benefit Payments

Federal Agency: Department of Labor
Federal Program: 17.225 Unemployment Insurance
17.225 ARRA - Unemployment Insurance
2008 - UI-16756-08-55-A-29
2009 - UI-18030-09-55-A-29
State Agency: Department of Labor and Industrial Relations (DLIR)

Controls and procedures related to the computer system used to manage unemployment benefits were not adequate. For two accounts reviewed, we noted benefits from a previous level were initially exhausted, but due to identifying the claimants' failure to report wages earned, overpayments of benefits totaling $944 were detected. Since these overpayments were made from a level that was previously exhausted, when repaid or recouped, that previous level's benefits would no longer actually be exhausted. As a result

the potential existed that these benefits would not subsequently be paid to the claimants when owed.

Recommendation:
The DLIR ensure overpayments caused by the claimant's failure to report wages are properly reviewed and handled, and any benefits due to the claimant are paid.

Status of Finding:
In its Final Determination issued September 23, 2010, the U.S. Department of Labor indicated that it is unclear whether planned actions to address this finding will be sufficient to prevent the issues from recurring. However, since that time, the Office of Administration Information Technology Services Division developed a program to identify all claims that had a balance restored to a previous level of benefits. The necessary adjustments to these claims will be made as soon as workload allows.

2009 - UI-18030-09-55-A-29
State Agency: Department of Labor and Industrial Relations (DLIR)
Questioned Costs: $1,980

A monthly report of overpayments, generated by the computer system, did not include some overpayments of Extended Benefits (EB). Our review noted an EB overpayment of $1,980 (which includes $150 overpayment of Federal Additional Compensation) made to one claimant was not identified and not included in the report. We questioned the federal share of $1,980 (100 percent).

Recommendation:
The DLIR resolve questioned costs with the grantor agency, and develop procedures to ensure all overpayments are included in the overpayment report so that overpayments can be investigated and collection can be pursued.

Status of Finding:
The DLIR has resolved the questioned costs with the U.S. Department of Labor (USDOL). The USDOL's Final Determination regarding this finding was issued September 23, 2010. In this determination, the USDOL found that the corrective action plan submitted should be sufficient to address the issues noted by the auditor. The DLIR has corrected the monthly report of overpayments on state EB caused by non-monetary

determinations. The DLIR worked with the Office of Administration Information Technology Services Division and identified all claims that were originally omitted from the report and has taken appropriate steps to investigate for possible overpayments and recovery. The DLIR considers this finding corrected and believes no further corrective action is needed.

Status of Questioned Costs:
The questioned costs of $1,980 were allowed by the USDOL.

2009-3. Reporting

Federal Agency: Department of Labor
Federal Program: 17.225 Unemployment Insurance
17.225 ARRA - Unemployment Insurance
2008 - UI-16756-08-55-A-29
2009 - UI-18030-09-55-A-29
State Agency: Department of Labor and Industrial Relations (DLIR)

Due to inadequate procedures and a lack of oversight, reports necessary to comply with federal reporting requirements were not submitted timely. Available tracking reports were apparently not used to ensure compliance in filing reports timely.

Recommendation:
The DLIR improve procedures to ensure applicable reports are filed with the U.S. Department of Labor (USDOL) within the required timeframe. The DLIR should ensure adequate oversight over the reporting process and utilize the tracking reports to monitor the timeliness of reports.

Status of Finding:
In its Final Determination issued September 23, 2010, the USDOL indicated that this finding remains uncorrected. The DLIR reassigned staff and provided instruction on the timely filing of reports. In order to fully demonstrate that the issue has been addressed, the DLIR must submit a subsequent audit report that does not contain findings related to this issue.

2009-4A. Subrecipient Monitoring

Federal Agency: Department of Energy
Federal Program: 81.042 Weatherization Assistance for Low-Income Persons
2008 - DE-FG-450R530683
81.042 ARRA - Weatherization Assistance for Low- Income Persons
2009 - DE-EE0000151
State Agency: Department of Natural Resources (DNR)

Improvements were needed in the monitoring of subrecipient activities to ensure expenditures by subrecipients were allowable. The DNR did not receive itemized listings or supporting documentation prior to reimbursing subrecipients for program expenditures. A computerized reporting system (MOWAP) was not yet operational. In addition, monitoring policies and procedures did not ensure a sufficient number and amount of expenditures were reviewed during monitoring visits and the documentation of the actual expenditures reviewed was inadequate.

Recommendation:
The DNR continue to work on the implementation of the MOWAP system and establish procedures for timely review of supporting documentation for expenditures reimbursed to subrecipients. In addition, the DNR should strengthen internal controls by establishing more comprehensive procedures for on-site monitoring of subrecipient expenditures including a consistent methodology for selecting representative samples of all significant types of subrecipient expenditures, and ensuring specific expenditures reviewed are adequately documented.

Status of Finding:
Corrective action taken and fully implemented. U.S. Department of Energy did not follow up on this finding.

2009-4B. Subrecipient Monitoring

Federal Agency: Department of Energy
Federal Program: 81.042 Weatherization Assistance for Low-Income Persons
2008 - DE-FG-450R530683
81.042 ARRA - Weatherization Assistance for Low-Income Persons
2009 - DE-EE0000151
State Agency: Department of Natural Resources (DNR)

The DNR did not adequately document its review of subrecipient compliance with state purchasing laws or ensure identified noncompliance was corrected in a timely manner. In

addition, monitoring files contained no documentation regarding a review of subrecipient compliance with federal suspension and debarment requirements.

Recommendation:
The DNR ensure subrecipient monitoring includes a more thorough review of compliance with bidding procedures, and perform more timely follow-up procedures for known noncompliance. In addition, the DNR should ensure monitoring for subrecipient compliance with federal suspension and debarment regulations is performed and documented.

Status of Finding:
Corrective action taken and fully implemented. U.S. Department of Energy did not follow up on this finding.

2009-5. Reporting

Federal Agency: Department of Defense
Federal Program: 12.401 National Guard Military Operations and Maintenance Projects
2008 - DAHA23-08-2-1000 and 2009 - DAHA23-09-2-1000
State Agency: Department of Public Safety - Adjutant General (AG)

While the AG had a system in place to track fiscal year closeout reports and related due dates, AG personnel did not use this data to help ensure closeout reports were actually submitted to the federal government by the dates due or that requests for extensions were filed if necessary. As a result, several closeout reports and requests for extensions were not submitted timely.

Recommendation:
The AG establish procedures to ensure closeout reports are submitted by the date due or when necessary, and deadline extensions are obtained and met.

Status of Finding:
Extensions and closeout reports are now being accomplished in a timely manner.

2009-6A. Capital Assets

Federal Agency: Department of Defense
Federal Program: 12.401 National Guard Military Operations and Maintenance Projects
2008 - DAHA23-08-2-1000 and 2009 - DAHA23-09-2-1000
State Agency: Department of Public Safety - Adjutant General (AG)

Some assets purchased during fiscal year 2009 were not properly accounted for in the AG's internal capital asset tracking system or the SAM II capital asset tracking system, and some assets did not receive a property tag and asset number. In addition, the AG did not perform physical inventories during fiscal year 2009 at any of the offsite locations housing the assets.

Recommendation:
The AG ensure all equipment is properly assigned a property tag number and entered into both the internal and SAM II capital asset tracking systems. In addition, the AG should ensure annual physical inventories are performed and continue to investigate the backlog of untagged capital assets.

Status of Finding:
The AG fixed asset accountability process was revised in 2009. Additional AG staff has been and will continue to be assigned to assist with the reconciliation of fixed assets.

The state property manager during the months of January - March, will provide a copy of the inventory record to each Hand Receipt Holder at the various off-site locations. The Hand Receipt Holder will sign the inventory record confirming that a physical inventory has been conducted and that all discrepancies have been annotated and return a copy of the inventory record to the State Property Manager. The State Property Manager will sign the inventory record acknowledging receipt and verify that the Hand Receipt Holder signed the document. All inventory records will be presented to the State Logistics Manager who will also sign the inventory record confirming an inventory record has been received from Hand Receipt Holder and the State Property Manager has signed. A schedule has been established to verify a physical inventory at a minimum of 10 percent of the AG National Guard armories and federal/state agreement facilities to ensure assets are accounted for appropriately. The AG State Property Manager will conduct these inventories and the State Resource Logistics Manager will initial documents upon review and provide oversight.

2009-6B. Capital Assets

Federal Agency: Department of Defense
Federal Program: 12.401 National Guard Military Operations and Maintenance Projects
2008 - DAHA23-08-2-1000 and 2009 - DAHA23-09-2-1000
State Agency: Department of Public Safety - Adjutant General (AG)

AG personnel did not complete a reconciliation between the expenditure and capital asset records in the SAM II system. While a reconciliation was in progress, as of January 2010, approximately $1.2 million of the $3.8 million in capital asset expenditures from fiscal year 2002 through fiscal year 2009 was not reconciled.

Recommendation:
The AG ensure the capital asset reconciliation is completed to identify all capital assets and ensure the capital asset records are accurate.

Status of Finding:
Prior year fixed asset records continue to be researched and corrected. As of October 27, 2010 approximately 50 percent of outstanding fixed assets records for the federal fund have been reconciled. The previously stated revisions to existing policies have proven beneficial in the accountability of fixed assets and additional staff will continue to be assigned this duty until fixed asset accounts are reconciled.

2009-7. Schedule of Expenditures of Federal Awards

Federal Agency: Department of Defense
Federal Program: 12.401 National Guard Military Operations and Maintenance Projects
2008 - DAHA23-08-2-1000 and 2009 - DAHA23-09-2-1000
State Agency: Department of Public Safety - Adjutant General (AG)

The AG did not have adequate procedures in place to prepare the Schedule of Expenditures of Federal Awards (SEFA) or to prevent and detect errors.

Recommendation:
The AG develop formal procedures to prepare a complete and accurate SEFA, including providing for appropriate supervisory reviews.

Status of Finding:
The AG has established internal procedures for the preparation of the SEFA schedule.

2009-8. Veterans State Nursing Home Care Program

Federal Agency: Department of Veterans Affairs
Federal Program: 64.015 Veterans State Nursing Home Care
State Agency: Department of Public Safety - Missouri Veterans Commission (MVC)

Formal application and eligibility review policies and procedures of potential Veterans Nursing Homes (Homes) residents were in need of improvement. Prior to September 2008, eligibility reviews performed of potential residents were not documented, and therefore, the MVC could not demonstrate that its personnel verified resident eligibility prior to that time. Our review of the forms used to document eligibility reviews after September 2008 found Homes personnel were not always following the new policy. In addition, the MVC did not have written policies and procedures identifying acceptable documentation to verify the 180-day state residency requirement; therefore, the MVC could not effectively demonstrate compliance with the residency requirement.

Recommendation:
The MVC revise the Homes policies and procedures manual to reflect the use of the Pre-Admission Screening Form to document all eligibility reviews, including personnel required to perform the reviews, and formally establish acceptable proof of residency documentation. In addition, the Pre-Admission Screening Form should be updated to require all necessary reviewers' signatures, and acceptable proof of residency should be obtained for each applicant.

Status of Finding:

On May 1, 2010, the MVC implemented a policy and procedure to ensure all new applicants show that he/she lived in Missouri for 180 days and are eligible for placement in a Missouri Veterans Home. The policy includes specific documents which may be required to show proof of residency. The proof of residency is attached to the Waiting List Screening Tool. In addition, the policy and the Waiting List Screening Tool list the reviewers required to sign the screening tool to document their approval of the applicant's eligibility.

2009-9. Subrecipients

Federal Agency: Department of Agriculture
Department of Health and Human Services

Federal Program:
10.561 State Administrative Matching Grants for the Supplemental Nutrition Assistance Program
2008 and 2009 - IS251443, IE251843 and IS252043
93.556 Promoting Safe and Stable Families
2008 - G0801MO00FP and 2009 - G0901MO00FP
93.558 Temporary Assistance for Needy Families
2007 - G0701MOTANF, 2008 - G0801MOTANF, and
2009 - G0901MOTANF
93.575 Child Care and Development Block Grant
2008 - G0801MOCCDF and 2009 - G0901MOCCDF
93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund
2008 - G0801MOCCDF and 2009 - G0901MOCCDF
93.658 Foster Care - Title IV-E
2008 - G0801MO1401 and 2009 - G0901MO1401
93.659 Adoption Assistance
2008 - G0801MO1407 and 2009 - G0901MO1407
93.667 Social Services Block Grant
2008 - G0801MOSOSR and 2009 - G0901MOSOSR
93.674 Chafee Foster Care Independence Program
2008 - G0801MO1420 and 2009 - G0901MO1420
93.778 Medical Assistance Program
2008 - 0805MO5028 and 0805MO5048
2009 - 0905MO5028 and 0905MO5048

State Agency: Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS)

As noted in previous reports, the DSS did not consider certain entities to be subrecipients. Our review of expenditures noted payments to several entities which appeared to be

subrecipients. However, the Schedule of Expenditures of Federal Awards (SEFA) prepared by the DFAS reported payments to these entities for these programs as vendors, rather than "amounts provided to subrecipients;" and these entities were not furnished applicable federal regulations and required to obtain an audit in accordance with OMB Circular A-133, when needed.

Recommendation:

The DSS through the DFAS, classify appropriate entities as subrecipients and report funds provided to subrecipients correctly on the SEFA. The subrecipients should be appropriately notified of grant funding sources and regulations and should be required to obtain OMB Circular A-133 audits, where applicable.

Status of Finding:

The DSS developed a tool that we are using to determine whether contractors are vendors or subrecipients. The community partnerships were notified that they are now considered subrecipients and as such are expected to have an A-133 audit conducted for their fiscal year ending on or after June 30, 2011.

State Agency: Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS)

Controls over drawdowns were in need of improvement. The procedures did not prevent and/or detect accounting errors and supervisory reviews of drawdowns were not performed. As a result several drawdowns were incorrectly recorded in SAM II.

Recommendation:

The DSS through the DFAS, ensure drawdown records are properly reconciled, reconciliations are documented, and differences are investigated. In addition, the DFAS should implement documented supervisory reviews of drawdown procedures.

Status of Finding:

An audit file of the drawdown reconciliation is being maintained and supervisory review of drawdowns to the letter of credit disbursements are conducted quarterly.

2008 - 0805MO5028 and 0805MO5048
2009 - 0905MO5028 and 0905MO5048

State Agency: Department of Social Services (DSS) - Division of Finance and Administration (DFAS)

Questioned Costs: $666,189

The DSS did not establish procedures to ensure all payments to Caring Communities partnerships were allowable and allocable to the various federal programs. Some of the costs associated with the partnerships were allocated through a cost pool based on the percentage of time worked by Children's Division employees on certain federal programs rather than based on actual services provided by the partnerships. As a result, we questioned $666,189, which was the federal portion of the costs allocated to these programs through the Social Services cost pool during the year ended June 30, 2009.

Recommendation:

The DSS, through the DFAS, resolve the questioned costs with the grantor agency, and establish procedures to ensure all payments to the Caring Communities partnerships are allowable and allocable to the various federal programs in accordance with OMB Circular A-87.

Status of Finding:

Reports for the four federal programs will be amended to remove the costs allocated from the Caring Communities contract. The decision to treat Caring Communities as subrecipients for future years will eliminate this issue for future periods.

Status of the Questioned Costs:

Questioned costs have not yet been resolved with the grantor agency.

Contact Person: Roger Backes
Phone Number: (573) 751-2170

2009-13. Procurement and Suspension and Debarment

Federal Agency: Department of Health and Human Services
Federal Program: 93.563 Child Support Enforcement
2008 - G0804MO4004 and 2009 - G0904MO4004
93.667 Social Services Block Grant
2008 - G0801MOSOSR and 2009 - G0901MOSOSR
State Agency: Department of Social Services (DSS)

The DSS did not ensure all entities paid more than $25,000 were not suspended or debarred, or otherwise excluded from receiving federal funds. For statewide contracts negotiated by the Office of Administration, the DSS did not ensure the vendor was not suspended or debarred before procuring goods and services with federal funds.

Recommendation:

The DSS implement procedures to ensure applicable purchases from statewide contracts are in compliance with federal suspension and debarment regulations.

Status of Finding:

The DSS has policies and procedures in place to ensure all contracts awarded under the procurement authority of DSS include suspension and debarment language and that appropriate certifications are in place before expenditures are made.

DSS performed a review of all contracts used by DSS, regardless of issuing authority, to ensure that vendors are not suspended or debarred from doing business with the federal government. This review was completed by October 1, 2010.

Additionally, as part of its annual contract renewal process, DSS will check the Excluded Parties List System or the file for certification documentation to ensure the vendor is in good standing before the contract is renewed.

Contact Person: Gina Jacobs
Phone Number: (573) 751-3870

2009-14A&B. Adoption Assistance - Eligibility and Assistance Payments

Federal Agency: Department of Health and Human Services
Federal Program: 93.659 Adoption Assistance
2008 - G0801MO1407 and 2009 - G0901MO1407
93.659 ARRA - Adoption Assistance
2009 - G0901MO1403
State Agency: Department of Social Services (DSS) - Children's Division (CD)
Questioned Costs: $41,357

Payments were made on behalf of ineligible children in two cases and many subsidy agreements appeared to have been backdated.

A. For 2 of 60 cases tested, payments were made on behalf of children ineligible for Adoption Assistance benefits because adoption subsidy agreements were not signed and in effect before or at the date of adoption. We questioned the federal share of $4,583.

B. For many additional cases, it appeared the subsidy agreements were not signed and in effect prior to or at the time of the adoption because the CD Director's

signature date was apparently backdated. We questioned the federal share of $36,774 related to ten cases tested.

Recommendation:

The DSS through the CD, resolve the questioned costs with the grantor agency and ensure all adoption subsidy agreements are signed prior to the adoption. In addition, the CD should pursue recoupment of the remaining overpayments.

Status of Finding:

A. The CD partially agrees with this finding. The CD maintains the children in question were eligible for state Adoption Assistance benefits. Because the agreements were not in place prior to the adoption, they could not be paid from Federal IV-E funds. When the CD was notified of this finding, the adoption assistance agreements were switched to state-only funded adoption assistance agreements, thereby preventing future payments from being made from federal funds. Past payments were recouped and assigned to state-only funding. As a corrective action, the CD has in place a IV-E eligibility unit charged with reviewing federal IV-E adoption subsidy eligibility as well as the date of the adoption finalization. When the start date of the adoption assistance agreement is later than the adoption finalization date, the agreements are to be charged to state-only funds.

B. The CD partially agrees. In May 2008, the matter of the possibility of backdating adoption assistance agreements consistent with the date of signature of the adoptive parents was addressed. Since May 2008, the CD has required staff to negotiate agreements 30 to 45 days prior to the required effective date to allow all parties to review and approve the agreement prior to finalization.

Status of the Questioned Costs:

A. Questioned costs of $6,776 ($4,583 federal share) were recouped during February 2010 and reflected on the March 31, 2010 quarterly report.

B. Questioned costs of $54,375 ($36,774 federal share) were adjusted on the September 30, 2010 quarterly report.

Phone Number: (573) 526-8040

2009-14C. Adoption Assistance - Eligibility and Assistance Payments

Federal Agency: Department of Health and Human Services
Federal Program: 93.659 Adoption Assistance
2008 - G0801MO1407 and 2009 - G0901MO1407
93.659 ARRA - Adoption Assistance
2009 - G0901MO1403

State Agency: Department of Social Services (DSS) - Children's Division (CD)
Questioned Costs: $348

For 6 of 60 cases tested, adoption assistance payments were not allowable and/or not supported by adequate documentation. For two of the cases, a nonrecurring legal expense and a clothing expense were paid, although the expenses were not authorized in the subsidy agreements. In the remaining cases, child care attendance records could not be located or did not agree to provider invoices. We questioned the federal share of $348.

Recommendation:
The DSS through the CD, resolve the questioned costs with the grantor agency and ensure all payments are authorized in the subsidy agreements and supported by adequate documentation.

Status of Finding:
The CD partially agrees with this portion of the finding. The CD holds that the nonrecurring legal expenses were an eligible expense for the adoption assistance client, even though paid outside of the timeframe of the adoption assistance contract. Insofar as the identified clothing expense, the CD agrees the expense was erroneously paid out of adoption expenses, but maintains it was still an eligible foster care expense. The child care attendance record-keeping matters, if actually determined to be payment deficiencies, are a result of manual maintenance and possibly subject to human oversight.

Family and Children Electronic System (FACES) has been fully implemented as of July 31, 2010. The FACES resources and financial management system electronically identifies prior to payment that a billed/invoice service appears on the appropriate contract before allowing payment. For example, CLTH-clothing is not an allowable service on a subsidy agreement, therefore, if an invoice or payment request were submitted for clothing expenses for an adopted child, the system would disallow that payment. If an attempt was made to pay for that expense manually, the system requires a review of the contract and would disallow the payment. The checks and balances are in place to prevent a service that is not allowed from being paid in error.

Status of the Questioned Costs:
Questioned costs of $514 ($348 federal share) were adjusted on the September 30, 2010 quarterly report.

State Agency: Department of Social Services (DSS) - Family Support Division (FSD) - Rehabilitation Services for the Blind (RSB) and Division of Finance and Administrative Services (DFAS)
Questioned Costs: $1,623,730

Adequate supporting documentation was not always prepared for personnel costs, which consisted of salaries and related fringe benefits and indirect costs, charged to the Vocational Rehabilitation (VR) program grant for approximately 160 employees. Personnel costs were charged solely to the VR grant for some employees who performed duties related to other programs. Personnel costs charged to the VR grant during state fiscal year 2009 for which the supporting documentation was inadequate or not prepared totaled $2,063,188, of which we questioned the federal share of costs totaling $1,623,730 (78.7 percent).

Recommendation:

The DSS through the FSD and DFAS resolve the questioned costs with the grantor agency. In addition, the FSD should develop written policies and procedures to ensure salary certifications are prepared for all employees who work solely on a single program and personnel activity reports are prepared for employees who work on multiple federal awards or cost objectives in accordance with OMB Circular A-87.

Status of Finding:

The FSD has modified the certification process for personnel who worked solely in a single grant program and implemented personnel activity reporting (time studies) for those who work in multiple grants. FSD now ensures that all staff claimed 100 percent to the VR grant are verified through the certification process, effective in March 2009. FSD also ensures that any staff employed in a position that is claimed 100 percent to a grant (VR OIB) at any time during the review period is included in the certification process. Written procedures have been provided to affected staff to ensure they are clear on the certification process. FSD ensures that staff allocation claims for those employees not claimed 100 percent working to a specific grant in the FSD-RSB program are based on the employee activity reports effective July 1, 2009.

Status of the Questioned Costs:

This finding is the subject of continued discussion with the grantor agency, but no final resolution has been achieved as of the date of this report.

2009-15B. Vocational Rehabilitation Program

Federal Agency: Department of Education
Federal Program: 84.126 Rehabilitation Services - Vocational Rehabilitation Grants to States
2007, 2008 and 2009 - H126A0080037
State Agency: Department of Social Services (DSS) - Family Support Division (FSD) - Rehabilitation Services for the Blind (RSB) and Division of Finance and Administrative Services

The FSD-RSB did not adequately document annual reviews of Individualized Plans for Employment (IPEs) for Vocational Rehabilitation (VR) recipients as required by federal regulations.

Recommendation:
The DSS through the FSD document annual reviews of IPE for VR recipients on the IPE forms as required by RSB policy.

Status of Finding:
RSB has emphasized to vocational rehabilitation counseling staff, their supervisors and the rehabilitation assistants who work on case file documents and through on-site training the need for clear documentation verifying the requirement of the review of each eligible individual's IPE as often as necessary, but at least once every 12 months to assess the individual's progress in achieving the identified employment outcome, with an emphasis on using the IPE document to verify the requirement has been met. RSB central office management staff has focused attention on meeting the requirement and the documentation that the requirement has been met during discussions with field offices regarding any authorized service requiring higher level approval prior to approval.

RSB is in the process of implementing an automated case management system, expected to be operational by mid part of FY 2011. The system will capture the IPE completion date and generate an alert to counseling staff in advance of the annual anniversary date.

2009-16. Child Support Enforcement - Reporting

Federal Agency: Department of Health and Human Services
Federal Program: 93.563 Child Support Enforcement
2008 - G0804MO4004 and 2009 - G0904MO4004
93.563 ARRA - Child Support Enforcement
2009 - G090404002

State Agency: Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS) and Family Support Division - Child Support Enforcement (CSE)

The DFAS did not have adequate controls in place to ensure compliance with federal reporting requirements for the CSE program. As a result, total expenditures and the resulting share of expenditures were not correctly reported on the OCSE-396A federal reports for two of the four quarterly reports submitted for the activity for the year ended June 30, 2009. The DFAS did not have written procedures in place to ensure the correct preparation of the federal reports and did not maintain sufficient documentation to support their calculations for key numbers on the reports. Supervisory reviews were inadequate.

Recommendation:

The DSS, through DFAS, develop written procedures for preparation of federal reports, retain documentation to support amounts reported, and ensure adequate supervisory reviews are performed prior to submission of those reports. In addition, the DFAS should submit necessary adjustments on the next federal report to fully correct for the identified errors.

Status of Finding:

Procedures for completion of the Child Support reports have been condensed and institutionalized as part of a desk manual. Discussions are held each quarter between staff and the supervisor regarding accuracy of the reporting prior to each submission. Adjustments were made on the December 31, 2009, and March 31, 2010, quarterly reports for the identified errors.

Phone Number: (573) 751-2170

2009-17. Child Support Enforcement - Salary Certifications

Federal Agency: Department of Health and Human Services
Federal Program: 93.563 Child Support Enforcement
2008 - G0804MO4004 and 2009 - G0904MO4004
93.563 ARRA - Child Support Enforcement
2009 - G090404002
State Agency: Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS) and Family Support Division (FSD) - Child Support Enforcement (CSE)
Questioned Costs: $47,164

The FSD did not always prepare required salary certifications for employees working solely on the CSE program. For the year ended June 30, 2009, the DSS claimed $24,919,722 as the federal share of personnel costs, or 48 percent of the total federal

share of CSE program expenditures. We questioned the federal share of the salaries, fringe benefits, and indirect costs, totaling $47,164, for those employees excluded from the certification listing.

Recommendation:

The DSS through FSD, resolve the questioned costs with the grantor agency. In addition, the FSD should develop written policies and procedures to ensure salary certifications are prepared for all employees who work solely on a single program in accordance with OMB Circular A-87.

Status of Finding:

DSS disagrees with this finding. DSS conducts a salary certification every six months for individuals who work 100 percent on IV-D activities. This certification is on positions set up in the system and the staff in those positions at that time. As staff leave, the position is filled with different staff but the duties do not normally change. If there is a known change in duties, the FSD does look at whether the position is coded correctly. Therefore, the FSD believes that the current method used to certify based on the staff in those positions at that point in time serves to accurately reflect the job duties of that position over that period of time. The FSD and the DFAS have reviewed the certification process to ensure a periodic certification of all individual who work 100 percent on IV-D activities is conducted at least every six months.

DSS reviewed the entire process from beginning to end. Through this review of the process, DSS did make changes to include all employees under these positions over the six month period. This is done twice each year. Therefore, any employee who worked under a specific federal grant will be certified.

The basic process is as follows:

- A list of positions that are coded to a specific grant are provided to the DSS Human Resources (HR).
- HR provides a comprehensive list of any individuals (names) employed under the position codes.
- This list is sent to FSD.
- FSD then breaks the list out by program and location/supervisors.
- A list is then sent electronically to each supervisor/administrator to verify the individuals worked solely on the identified program.
- The supervisor/administrator then sends back an electronic message verifying that the individuals did work solely on the specified program.
- The information is then reviewed and approved by the Assistant Deputy Director in FSD.
- The information is then forwarded on to DFAS.

This is similar to the procedures set up after the 2006 audit. The only change to the procedure was to add every employee who worked under each position code at any time during the six months being reviewed. By adding to the list any employee who worked on the program at any time during the period, this provides a comprehensive list of any

individual claimed to the program. Therefore DSS is certifying both the position and all employees. While DSS made the change in response to the audit, as explained below, this change was not necessary to ensure a proper certification.

DSS/FSD still maintains that the certification process must be based on positions/position codes and not individual employees. Individual employees can and do change jobs/positions. However, each position is set up in the personnel system with job duties and codes tying them to the financial system. The job duties and codes remain the same until changed by central office. By using position codes to track personnel and performing a certification on these positions every six months to ensure that the duties are the same, DSS ensures that any employee who worked in that position was only working on a specific federal grant. Without position codes to track the positions that are coded to each federal grant, it would be impossible for DSS to track which individuals and positions are working on each program.

FSD does have written instructions/guidance for performing the salary certifications. The revised process was implemented for certifications for the period April - September 2010.

Status of the Questioned Costs:
The questioned costs have not yet been resolved with the grantor agency.

Contact Person: Patrick Luebbering
Phone Number: (573) 751-4206

2009-18. Medical Assistance Program

Federal Agency: Department of Health and Human Services
Federal Program: 93.778 Medical Assistance Program
2008 - 0805MO5028 and 0805MO5048
2009 - 0905MO5028 and 0905MO5048
93.778 ARRA - Medical Assistance Program
2009 - 0905MOARRA
State Agency: Department of Social Services (DSS) - Family Support Division (FSD) and MO HealthNet Division
Questioned Costs: $1,428

A redetermination was not conducted timely to determine the eligibility of a recipient related to the Medical Assistance program. The medical payments made on behalf of this client before the case was closed totaled $1,924 during the year ended June 30, 2009. We question the federal share of these payments or $1,428 (74.23 percent).

Recommendation:
The DSS through the FSD perform eligibility redeterminations when required to ensure compliance with applicable federal Medicaid program requirements. In addition, the FSD should resolve questioned costs with the grantor agency.

Status of Finding:
The FSD still considers timely eligibility reinvestigations a matter of priority and continues to strive for a 100 percent reinvestigation currency. As of May 2010, FSD was 99.4 percent current on reinvestigations.

Status of the Questioned Costs:
Questioned costs will be adjusted on the September 30, 2010, quarterly report.

Independent Auditors' Report

To the County Commission of
Caldwell County, Missouri
Kingston, Missouri

I have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of Caldwell County, Missouri, as of and for the years ended December 31, 2009 and 2008, which collectively comprise the County's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the County's management. My responsibility is to express an opinion on these financial statements based on my audit.

Except as discussed in the 4th paragraph below, I conducted my audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that I plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. I believe that my audit provides a reasonable basis for my opinion.

As discussed more fully in Note 1, the County prepares its financial statements on the cash basis of accounting, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

The records of receipts and disbursements maintained by the County Treasurer and County Clerk contained some inaccuracies. Financial records maintained by the County Treasurer and the County Clerk, as well as the county's budget documents, did not agree. As a result, I was unable to satisfy myself with respect to the proper fund balance of the various County funds.

In my opinion, except for the effects of numerous inaccuracies between the county treasurer, county clerk and the county's budget documents as described in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the respective financial position-cash basis of the governmental activities, each major fund, and the aggregate remaining fund information of the County as of December 31, 2009 and 2008, and the respective changes in financial position-cash basis, thereof for the years then ended in conformity with the basis of accounting described in Note 1.

Independent Auditors' Report
(Concluded)

In accordance with *Government Auditing Standards,* I have also issued my report dated January 17, 2011, on my consideration of the County's internal control over financial reporting and on my tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of my testing of internal control over financial reporting and compliance and the results of that testing and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with the *Government Auditing Standards* and should be considered in assessing the results of my audit.

The Management's Discussion and Analysis, Schedule of Funding Progress for Missouri Local Government Employees Retirement System and budgetary comparison information as listed in the table of contents, are not a required part of the basic financial statements but are supplementary information required to accompany those financial statements. I have applied certain limited procedures, which consist principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, I did not audit the information and express no opinion on them.

My audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the County's basic financial statements. The accompanying Schedule of Expenditures of Federal Awards is presented for purposes of additional analysis as required by U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments and Non-Profit Organizations*, and is not a required part of the basic financial statements of Caldwell County, Missouri. The Schedule of Expenditures of Federal Awards has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in my opinion, is fairly stated, in all material respects in relation to the basic financial statements taken as a whole.

Original signed by auditor

Kevin G. Hudson, C.P.A.
Trenton, Missouri
January 17, 2011

The discussion and analysis of Caldwell County's financial performance provides an overall review of the County's financial activities for the years ended December 31, 2009 and 2008. The intent of this discussion and analysis is to look at the County's financial performance as a whole; readers should also review the basic financial statements, including the notes to the financial statements, to enhance their understanding of the County's financial performance.

Financial Highlights

Key financial highlights for 2009 and 2008 are as follows:

- The county's total governmental expenditures exceeded total revenues by $472,962 for the year ended December 31, 2009 and the total revenues exceeded governmental expenditures by $632,417 for the year ended December 31, 2008.

- The county's governmental funds ended the year ended December 31, 2009 with a combined cash balance of $1,193,314 and the year ended December 31, 2008 with a combined cash balance of $1,666,276.

- County revenues for the year ended December 31, 2009 of $4,618,437 decreased by $2,153,804 over the county revenues for the year ended December 31, 2008 of $6,772,241.

- County expenditures for the year ended December 31, 2009 of $6,057,258 decreased by $2,060,811 over the county expenditures for the year ended December 31, 2008 of $8,118,069.

Overview of the Financial Statements

The contents of this report comply with the presentation requirements of Statement No.34 of the Governmental Accounting Standards Board, *Basic Financial Statements - and Management's Discussion and Analysis - for State and Local Governments,* as applicable to the cash basis of accounting. The county's basic financial statements consist of government-wide financial statements, fund financial statements, and notes to the financial statements. The notes are an integral part of the government-wide and fund financial statements and provide more detail about the information presented in the statements. This report also contains other financial information in addition to the basic financial statements.

The county has elected to present its financial statements on the cash basis of accounting, a basis of accounting other than accounting principles generally accepted in the United States of America. "Basis of accounting" refers to when financial events are recorded. Under the cash basis of accounting, revenues are recorded when received rather than when earned, and expenditures are recorded when paid rather than when the related liabilities are incurred. Therefore, when reviewing the financial information and discussion in this report, the reader should recall the limitations resulting from use of the cash basis of accounting.

Government-Wide Financial Statements

The Government-Wide Statement of Net Assets and the Government-Wide Statement of Activities report information about the county as a whole. These statements present the county's net assets and show how they have changed. Over time, increases or decreases in the county's net assets are one indicator of whether its financial health or position is improving or deteriorating. However, to assess the county's overall financial health, the reader needs to consider additional nonfinancial factors. The government-wide financial statements report only governmental activities - activities such as general government operations, public safety, and health and welfare that are usually financed through taxes and intergovernmental receipts. The county has no business-like activities-activities financed wholly or partially by fees charged to external parties for goods or services.

Fund Financial Statements

The fund financial statements provide detailed information about the most significant funds - not the county as a whole. Some funds are required to be established by state law or by bond covenants. However, the County Commission establishes other funds to help it control and manage money for particular purposes or to show that it is meeting legal responsibilities for using certain taxes, grants, or other sources of receipts. The fund financial statements include only governmental funds, which focus on the flow of money into and out of those funds and the balances left at year end that are available for spending. The governmental fund statements provide a detailed view of the county's general government operations and the basic services it provides. Governmental fund information helps the reader determine whether more or fewer financial resources can be spent in the near future to finance the county's programs.

Notes to the Financial Statements

The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages17-25 of this report.

Other Information

This report also includes as required supplementary information this Management's Discussion and Analysis and the Budgetary Comparison Schedules for all governmental and special revenue funds - cash basis. Such information is intended to supplement the government-wide financial statements, fund financial statements, and notes to the financial statements but is not a part of those statements.

In addition, the report includes the following components that are not a required part of the financial statements: the Schedule of Expenditures of Federal Awards, required for audits of federal program expenditures conducted in accordance with Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations.*

Government-wide Financial Analysis

Below is a chart showing assets, receipts and disbursements for the years ended December 31, 2009 and 2008.

	Year Ended December 31, 2009	2008
Net Assets	$1,193,314	$ 1,666,276
Program Receipts	2,825,632	3,939,356
General Receipts	2,758,664	4,811,130
Disbursements	6,057,258	8,118,069
Change in Net Assets	(472,962)	632,417

For the two years disclosed in the audit, the change in Net Assets is primarily due to the changes in the County Revenue Fund. General Receipts decreased in 2009 due to a decrease in property taxes. Program receipts decreased in 2009 due to a decrease in Law Enforcement's Sales Tax Fund monies. Disbursements decreased in 2009 due to a decrease in Road and Bridge expenditures related to the bridge projects and Law Enforcement Sales Tax Fund expenditures.

Financial Analysis of the County's Funds

The focus of the County's governmental funds is to provide information on near-term inflows, outflows and balances of spendable resources. Such information is useful in assessing the County's financing requirements. In particular, unreserved fund balance may serve as a useful measure of a government's net resources available for spending at the end of the year.

As of December 31, 2009, the county's governmental funds reported combined ending fund balances of $1,193,314, a decrease of $472,962 over the prior years fund balance of $1,666,276. The unreserved portion of fund balance was $183,921 for 2009 and $818,698 for the year ended 2008.

The County Revenue Fund is the chief operating fund of the County. At the end of the fiscal year 2009, unreserved fund balance of the County Revenue Fund was $183,921 and the unreserved fund balance of the County Revenue Fund for fiscal year 2008 was $818,698. As a measure of the County Revenue Fund's liquidity, it may be useful to compare both unreserved fund balance and total fund balance to total fund expenditures.

The unreserved fund balance of the County Revenue Fund decreased by $634,777 for fiscal year 2009 as compared to an increase of $780,194 for fiscal year 2008.

County Revenue Fund Budgeting Highlights

The County's budget is prepared according to Missouri law and is based on accounting for certain transactions on a basis of cash receipts, disbursements, and encumbrances. The most significant budgeted fund is the County Revenue Fund.

The original and final budgeted revenues for the county revenue fund were $1,108,050 for 2009 and $1,147,550 for 2008. The original and final budgeted expenditures were $2,681,752 for 2009 and $2,473,002 for 2008.

Economic Factors and Next Year's Budgets

The state of the local economy is a concern for the operations of the county. Sales taxes decreased slightly between the two years ended December 31, 2009, however, uncertainties related to the economy could cause both Sales Tax and Property Taxes to decrease more.

The Counties County Revenue Fund has increased $145,417 over the two year period that was audited. This is an encouraging sign based on the County Revenues balances as of December 31, 2007. The increased costs for fuel, materials, equipment, utilities, and operating expenditures continues to be a source of concern, however, with careful budgeting the county can handle these increased costs.

Capital Assets

The County operates under the cash basis of accounting, therefore, capital asset purchases are recorded as expenditures and depreciation is not recognized. Capital assets are not reflected in the financial statements.

Long Term Debt

For the two years ended December 31, 2009, the County had four different loans with a total loan balance of $2,357,082. The primary debt is $1,824,492 which is related to the construction of the new jail. The county incurred $200,000 of debt during 2009. The county made loan payments of $171,790 during the year ended December 31, 2009.

Requests for Information

This financial report is designed to provide our citizens, taxpayers, creditors, and investors with a general overview of the County's finances and to demonstrate the County's accountability for the money it receives. If you have any questions about this report or need additional financial information, contact Beverly Bryant, County Clerk, 49 E. Main Street, Kingston, Missouri 64650 at (816) 586-3600.

Note 1: Summary of Significant Accounting Policies

The financial statements of Caldwell County, Missouri (the County) have been prepared on the cash basis of accounting, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America. The Governmental Accounting Standards Board is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The more significant of the County's accounting policies are described below.

A. Reporting Entity

In evaluating the County as a reporting entity, management has addressed all potential component units (traditionally separate reporting entities) for which the County may be financially accountable and, as such, should be included within the County's financial statements. The County (the primary government) is financially accountable if it appoints a voting majority of the organization's government board and (1) it is able to impose its will on the organization or (2) there is a potential for the organization to provide specific financial benefit or to impose specific financial burden on the County. Additionally, the primary government is required to consider other organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete.

Based on the application of the above criteria, the county has no component units.

B. Basis of Presentation

Government-wide Statements

The Statement of Net Assets and the Statement of Activities present financial information about the County's governmental activities. These statements include the financial activities of the primary government in its entirety. Eliminations have been made to minimize the double-counting of internal transactions. These statements distinguish between the governmental and business-type activities of the County. Governmental activities generally are financed through taxes, intergovernmental revenues, and other nonexchange transactions. Business-like activities are financed wholly or partially by fees charged to external parties for goods or services. For the years ended December 31, 2009 and 2008, the county had only governmental activities.

Note 1: Summary of Significant Accounting Policies (Continued)

The Government-Wide Statement of Net Assets presents the financial condition of the county's governmental activities at year-end. The Government-Wide Statement of Activities presents a comparison between direct expenses and program revenues for each function of the County's governmental activities. Direct expenses are those that are specifically associated with and are clearly identifiable to a particular function. Program revenues include (a) charges paid by the recipients of goods or services offered by the programs and (b) intergovernmental receipts that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues, including all taxes, are presented as general revenue. The comparison of direct disbursements with program receipts identifies the extent to which each governmental function is self-financing or draws from the general receipts of the county.

Fund Financial Statements

A fund is defined as a fiscal and accounting entity with a self-balancing set of accounts. The county uses funds to segregate transactions related to certain functions or activities in order to aid financial management and to demonstrate legal compliance. Fund financial statements are designed to present financial information of the county primary government at this detailed level. The fund financial statements focus on major funds. Each major fund is presented in a separate column, and nonmajor funds are aggregated and presented in a single column. Major funds include (a) the county's primary operating fund, (b) any fund for which total cash, receipts or disbursements of an individual fund are at least 10% of the corresponding element total for all funds of that type, and © any other fund that county officials believe is particularly important to financial statement users.

The accompanying financial statements are structured into two categories of funds - governmental, and fiduciary. Governmental funds are those through which most governmental functions are typically financed. Reporting for such funds focuses on the sources, uses, and balances of current resources. The county's major governmental funds are as follows:

County Revenue Fund - The County Revenue Fund is used to account for all revenues and expenditures applicable to the general operations of county government that are not properly accounted for in another fund. All general operating revenues that are not restricted or designated as to their use by outside sources are recorded in the County Revenue Fund. Revenues are derived primarily from taxes and intergovernmental revenues.

Special Revenue Funds: The Special Revenue Funds are used to account for the proceeds of specific revenue that are legally restricted to expenditures for specified purposes. The Special Road and Bridge Fund, Law Enforcement Sales Tax Fund, Little Otter Creek Fund and the Road and Bridge Sales Tax Fund are all considered major Special Revenue Funds.

The county's nonmajor governmental funds are also special revenue funds.

Note 1: Summary of Significant Accounting Policies (Continued)

Fiduciary funds account for assets held by the county as a trustee or an agent for individuals, private organizations, other governments, or other funds. Fiduciary fund reporting focuses on net assets and changes in net assets; fiduciary assets are reported in a separate Statement of Fiduciary Net Assets because the county cannot use those assets to finance its operations. The county's fiduciary funds consist of agency funds, which report assets held in a purely custodial capacity and do not involve measurement of results of operations.

The agency funds include the County Collector's Fund, Unclaimed Fees Fund, School Fines Fund, CERF Fund, Tax Sale Surplus Fund, Law Restitution Fund, Deputy Sheriff Salary Supplement Fund, Charitable Fund and Time Payment Fund. These funds are all included in the accompanying Statement of Fiduciary Net Assets.

C. Basis of Accounting

Basis of accounting refers to when transactions are recorded in the financial records and reported in the financial statements. The government-wide and fund financial statements are prepared on the cash basis of accounting; accordingly, amounts are recognized when received or disbursed in cash. Consequently, certain assets and their related revenues (such as accounts receivable and revenues billed but not yet collected for goods and services provided) and certain liabilities and their related expenditures (such as accounts payable and expenditures for goods and services received but not yet paid for) are not recorded in these financial statements. Generally accepted accounting principles for state and local governments require revenues to be recognized when they are earned or when they become available and measurable and expenditures or expenses to be recognized when the related liabilities are incurred.

Equity classifications: On the Government-Wide Statement of Net Assets, equity is classified as net assets and displayed in two components: restricted and unrestricted. Net assets are reported as restricted when limitations are imposed on their use through either the enabling legislation adopted by the County Commission or external restrictions imposed by creditors, grantors, or the laws and regulations of other governments. All other net assets are reported as unrestricted. The county applies restricted resources first when a disbursement is made for which both restricted and unrestricted net assets are available.

In the fund financial statements, equity is classified as fund balance and also may be displayed in two components: reserved and unreserved. Fund balance is reported as reserved to indicate that a portion of the fund balance is not available for appropriation or is legally segregated for a specific future use. When such restrictions do not exist, fund balance is reported as unreserved.

D. Vacation, Personal and Sick Leave

Vacation time, personal time and sick leave are considered as expenditures in the year paid. Vacation time is awarded based on years of service and must be used in its entirety prior to the employee's next anniversary date. The county does have 6 personal days per each employee, but comp time can be earned by working overtime.

Note 1: Summary of Significant Accounting Policies (Continued)

E. Budgets and Budgetary Accounting

The County follows the following procedures in establishing the budgetary data reflected in the financial statements:

1) In accordance with Chapter 50, (Sections 50.525 through 50.745, RSMo 2000), the County adopts a budget for various County funds.

2) Prior to December 31, each department, office, institution, commission, or court of the County submits to the budget officer its requirements for expenditures and its estimated revenues for the next budget year. These figures are presented with corresponding figures for the last completed year and an estimate of the current year.

3) The budget officer holds public hearings prior to presentation of the budget document to the County Commission no later than January 15th of each year.

4) A public hearing is held not earlier than 10 days after the budget document is made available to the public and with at least 5 days notice of the hearing.

5) Amendments to the budget are made by the County Commission as required to allow for appropriation of increased revenues and adjustments between line items within the budget. There were no amendments made for 2009 and no amendments made for 2008. Please see budgetary comparison schedules in required supplementary information for further details.

The County's policy is to prepare the annual operating budget on a cash basis.

F. Inventories and Capital Assets

Inventories include office equipment, road and vehicle maintenance supplies, and fuel. Capital assets consist of land, buildings, furniture, equipment, vehicles, and infrastructure such as roads and bridges. Both inventories and capital assets are recorded as disbursements when they are purchased or constructed.

G. Long-Term Debt

Consistent with the cash basis of accounting, long-term debt is not reported in the government-wide or fund financial statements. Proceeds from debt issuances are reported when received, and payments of principle and interest are reported when disbursements are made.

Note 1: Summary of Significant Accounting Policies (Continued)

H. Estimates

The preparation of financial statements in conformity with generally accepted accounting principles required management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

I. Risk of Loss

The County protects itself from risk of loss by purchasing commercial insurance for property damage and liability risks. The County does not self insure its risks.

J. Reserved Fund Balance

Reserved fund balance represents the portion of fund balance that is not available for appropriation or is legally restricted for a specific purpose.

K. Prior Period Adjustments

In the prior year, the county was required to include the Law Library and Circuit Clerk Interest Fund in the County's financial statements. For the two years ended December 31, 2009 the County was no longer required to include these funds in the financial statements. The omission of these funds caused the beginning fund balance to be adjusted by $2,477.

Note 2: Stewardship, Compliance and Accountability

Compliance with Finance Related Legal and Contractual Provisions

For the two years ended December 31, 2009, the County had the following funds that budgeted deficit fund balances.

	Budgeted Deficit Fund Balance	
	2009	2008
Law Enforcement Sales Tax	$ -	$ 41,311
Little Otter Creek Fund	$ -	$ 105,077
Election Fund	$ -	$ 7,075

Note 2: Stewardship, Compliance and Accountability (Concluded)

Excess of Expenditures Over Appropriations in Individual Funds

For the two years ended December 31, 2009, the County had the following material excess of expenditures over appropriations in the following funds.

	Amount Over Budget	
	2009	2008
County Revenue Fund	$ -	$ 154,137
Road and Bridge Fund	$ -	$ 121,482
Road and Bridge Sales Tax Fund	$ -	$ 38,929
Tax Maintenance Fund	$ -	$ 3,189
Election Fund	$ -	$ 19,889
Peace Officers Training Fund	$ 4,915	$ 1,933
Domestic Violence Fund	$ -	$ 628
Sheriff Civil Fees Fund	$ 2,234	$ 12,949
Record Storage Fund	$ 724	$ 2,234
Prosecuting Attorney Bad Check Fund	$ 26,328	$ 28,124
LEPC Fund	$ 2,141	$ -

Net Assets/Fund Balance Deficit

At December 31, 2009 the County had no funds with a deficit balance.

Note 3: Cash and Investments

Deposits - At December 31, 2009 and 2008, the carrying amount of the County's deposits was $863,314 and $1,436,276 respectively. The bank balance for the year ended December 31, 2009 and 2008 was $1,199,812 and $1,116,367 respectively. Custodial credit risk is the risk that in the event of a bank failure, a government's deposits may not be returned to it. The County's deposit policy for custodial credit risk requires compliance with the provisions of state law. County policy further requires that all securities that serve as collateral against the deposits of a depository institution must be held in safekeeping at a non-affiliated custodial facility. Of the bank balance, $250,000 was covered by federal depository insurance and $949,812 was covered by collateral held by the County's safekeeping agent in the County's name at December 31, 2009 and $866,367 for the year ended December 31, 2008.

State law requires collateralization of all deposits with federal depository insurance; bonds and other obligations of the U.S. Treasury, U.S. agencies or instrumentalities of the State of Missouri; bonds of any city having a population of not less than two thousand, county, school district, or special road district of the State of Missouri; bonds of any state, tax anticipation notes issued by any first class county, or a surety bond having an aggregate value at least equal to the amount of the deposits.

Note 3: Cash and Investments (Concluded)

Investments - The county may purchase any investments allowed by the State Treasurer. These include (1) obligations of the United States government or any agency or instrumentality thereof maturing and becoming payable not more than three years from the date of purchase, or (2) repurchase agreements maturing and becoming payable within ninety days secured by U.S. Treasury obligations of U.S. government agencies or instrumentalities of any maturity, as provided by law. At December 31, 2009 and 2008 the County had $330,000 and $230,000 invested in Certificates of Deposit.

Interest Rate Risk - Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates. The County has no formal investment policy regarding interest rate risk.

Investment Credit Risk - The County has an investment policy that limits its investment choices other than the limitation of state law as follows:

a. Direct obligations of the U.S. Government, its agencies and instrumentalities to which the full faith and credit of the U.S. Government is pledged, or obligations to the payment of which the full faith and credit of the State is pledged.

b. Certificates of deposit or savings accounts that are either insured or secured with acceptable collateral with in state financial institutions, and fully insured certificates of deposit or savings accounts in out-of-state financial institutions.

Concentration of Credit Risk - The County places no limit on the amount it may invest in any one issuer. For the two years ended December 31, 2009, the County had no concentration of credit risk.

Note 4: Taxes

Property taxes attach as an enforceable lien on property as of January 1 each year. Taxes are levied on November 1st and payable by December 31st of each year. Taxes paid after December 31 are subject to penalties. The county bills and collects its own property taxes and also taxes for most other local governments (except some cities). The assessed valuation of the tangible taxable property for the calendar years 2009 and 2008 for purposes of County taxation was as follows:

	2009	2008
Real Estate	$ 60,811,597	$ 59,983,260
Personal Property	22,911,230	23,977,920
Railroad and Utilities	28,982,950	27,784,041
Total	$112,705,777	$111,475,221

Note 4: Taxes (Concluded)

The County also receives sales tax collected by the State and remitted based on the County's sales tax rate to the total sales tax collected in the County.

The tax levy per $100 of the assessed valuation of tangible taxable property for the calendar years 2009 and 2008 for purposes of County taxation was:

	2009	2008
County Revenue Fund	$ 0.2300	$ 0.2300
Total	$ 0.2300	$ 0.2300

Note 5: Commitments and Contingencies

The County has several federal and state grants for specific purposes that are subject to review and audit by grantor agencies. Such audits could result in reimbursements to the grantor agency for expenditures disallowed under the terms of the grant. County management is not aware of any potential losses from such disallowance and believes that reimbursements, if any, would not be material.

During 2008 it was found that an employee of the County Clerks office allegedly had misappropriated funds of the county. An investigation is ongoing and the amount of the possible loss has not yet been determined.

The county is a party to various legal proceedings. At the date of these financial statements, the County cannot estimate its liability, if any, from losses that may result from certain proceedings. In the opinion of management and the County attorneys, the potential adverse impact of these proceedings would not be material to the combined financial statements of the County.

Note 6: Retirement Plan

A. Plan Description

Caldwell County participates in the Missouri Local Government Employees Retirement System (LAGERS), an agent multiple-employer public employee retirement system that acts as a common investment and administrative agent for local government entities in Missouri.

LAGERS is a defined benefit pension plan which provides retirement, disability, and death benefits to plan members and beneficiaries.

LAGERS was created and is governed by statute, section RSMo. 70.600 - 70.755. As such, it is the system's responsibility to administer the law in accordance with the expressed intent of the General Assembly. The plan is qualified under the Internal Revenue Code Section 401a and it is tax exempt.

Note 6: Retirement Fund (Concluded)

The Missouri Local Government Employees Retirement System issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained by writing to LAGERS, P.O. Box 1665, Jefferson City, Missouri 65102 or by calling 1-800-447-4334.

B. Funding Status

Caldwell County's full-time employees contribute 4% of their gross pay to the pension plan. The political subdivision is required to contribute at an actuarially determined rate; the current rate is 3.7% (general), 4.7% (police) of annual covered payroll. The contribution requirements of plan members are determined by the governing body of the political subdivision. The contribution provisions of the political subdivision are established by state statute.

C. Annual Pension Cost

For 2009 and 2008 the political subdivision's annual pension cost of $141,453 and $136,554 respectively, was equal to the required and actual contributions. The required contributions was determined respectively as part of the February 28, 2007 and/or February 28, 2008 annual actuarial valuation using the entry age actuarial cost method. The actuarial assumptions as of February 28, 2009 included (a) a rate of return on the investment of present and future assets of 7.5% per year, compounded annually, (b) projected salary increases of 4.0% per year, compounded annually, attributable to inflation, © additional projected salary increases ranging from 0.0% to 6.0% per year, depending on age and division, attributable to seniority/merit, (d) pre-retirement mortality based on the RP-2000 Combined Healthy Table set back 0 years for men and 0 years for women and (e) post-retirement mortality based on the 1971 Group Annuity Mortality table projected to 2000 set back 1 year for men and 7 years for women. The actuarial value of assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a five-year period. The unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on a closed basis. The amortization period at February 28, 2009 was 15 years.

Three Year Trend Information

Fiscal Year Ending	Annual Pension Cost (APC)	Percentage of APC Contributed	Net Pension Obligation
6/30/2007	$ 134,616	100%	$ 0
6/30/2008	$ 136,554	100%	$ 0
6/30/2009	$ 141,453	100%	$ 0

For the two years ended December 31, 2009, the County had the following funds that budgeted deficit fund balances.

	Budgeted Deficit Fund Balance	
	2009	2008
Law Enforcement Sales Tax	$ -	$ 41,311
Little Otter Creek Fund	$ -	$ 105,077
Election Fund	$ -	$ 7,075

FEDERAL COMPLIANCE SECTION

Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

To the County Commission of
Caldwell County, Missouri
Kingston, Missouri

I have audited the financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of Caldwell County, Missouri as of and for the years then ended December 31, 2009 and December 31, 2008 which collectively comprise of the County's basic financial statements and have issued my report thereon dated January 17, 2011. In my report, the county prepares its financial statements on a prescribed basis of accounting that demonstrates compliance with the cash basis and budget laws of the State of Missouri, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America. I conducted my audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing my audit, I considered the County's internal control over financial reporting as a basis for designing my auditing procedures for the purpose of expressing an opinion on the financial statements but not for the purpose of expressing an opinion on the effectiveness of the County's internal control over financial reporting. Accordingly, I do not express an opinion on the effectiveness of the County's internal control over financial reporting.

My consideration of internal control over financial reporting was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control over financial reporting that might be significant deficiencies or material weaknesses and therefore, there can be no assurance that all deficiencies, significant deficiencies or material weaknesses have been identified. However, as described in the accompanying Schedule of Findings and Questioned Costs, I identified a certain deficiency in internal control over financial reporting that I consider to be a material weakness and other deficiencies that I consider to be significant deficiencies.

Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Basic Financial Statements Performed in Accordance with *Government Auditing Standards* (Concluded)

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the County's financial statements will not be prevented, or detected and corrected on a timely basis. I consider the deficiency described in the accompanying Schedule of Findings and Questioned Costs as item 2009-1 to be a material weakness.

A *significant deficiency* is a deficiency or a combination of deficiencies in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. I consider the deficiencies described in the accompanying Schedule of Findings and Questioned Costs as items 2009-2 to 2009-4 to be significant deficiencies.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the County's financial statements are free of material misstatement, I performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of my audit, and, accordingly, I do not express such an opinion. The results of my tests disclosed no instances of noncompliance or other matters that are required to be reported under Government Auditing Standards.

The County's response to the findings identified in my audit are described in the accompanying Schedule of Findings and Questioned Costs. I did not audit the County's response and, accordingly, I express no opinion on it.

This report is intended solely for the information of the Board of Commissioners , management, others within the entity, federal awarding agencies, and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

Independent Auditors' Report on Compliance with Requirements Applicable to Each Major Program and on Internal Control over Compliance in Accordance with OMB Circular A-133

To the County Commissioners
Caldwell County, Missouri
Kingston, Missouri

Compliance

I have audited the compliance of Caldwell County, Missouri with the types of compliance requirements described in the OMB Circular A-133 *Compliance Supplement* that are applicable to each of its major federal programs for the years ended December 31, 2009 and December 31, 2008. Caldwell County, Missouri's major federal programs are identified in the summary of auditors' results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts and grants applicable to each of its major federal programs is the responsibility of the County's management. My responsibility is to express an opinion on the County's compliance based on my audit.

I conducted my audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that I plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the County's compliance with those requirements and performing such other procedures as I considered necessary in the circumstances. I believe that my audit provides a reasonable basis for my opinion. My audit does not provide a legal determination of the County's compliance with those requirements.

In my opinion, the County complied, in all material respects, with the requirements referred to above that are applicable to each of its major federal programs for the years ended December 31, 2009 and December 31, 2008.

Independent Auditors' Report on Compliance with Requirements Applicable to Each Major Program and on Internal Control over Compliance in Accordance with OMB Circular A-133 (Continued)

Internal Control Over Compliance

Management of the County is responsible for establishing and maintaining effective internal control over compliance with requirements of laws, regulations, contracts and grants applicable to federal programs. In planning and performing my audit, I considered the County's internal control over compliance with the requirements that could have a direct and material effect on a major federal program in order to determine my auditing procedures for the purpose of expressing my opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, I do not express an opinion on the effectiveness of the County's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance*, is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis.

My consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be deficiencies, significant deficiencies or material weaknesses. I did not identify any deficiencies in internal control over compliance that I consider to be material weaknesses, as defined above.

This report is intended solely for the information and use of the Board of Commissioners, management, others within the entity, federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

The accompanying Notes to the Supplementary Schedule are an integral part of this schedule

Caldwell County, Missouri
Notes to the Supplementary Schedule
For the Years Ended December 31, 2009 and 2008

Note 1: Summary of Significant Accounting Policies

A. Purpose of Schedule and Reporting Entity

The accompanying Schedule of Expenditures of Federal Awards has been prepared to comply with the requirements of OMB Circular A-133. This circular requires a schedule that provides total federal awards expended for each federal program and the Catalog of Federal Domestic Assistance (CFDA) number or other identifying number when the CFDA number is not available.

This schedule includes all federal awards administered by Caldwell County, Missouri.

B. Basis of Presentation

OMB Circular A-133 includes these definitions, which govern the contents of the schedule:

Federal financial assistance means assistance that non-Federal entities receive or administer in the form of grants, loans, loan guarantees, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations, and other assistance, but does not include amounts received as reimbursement for services rendered to individuals.

Federal award means Federal financial assistance and Federal cost-reimbursement contracts that non-Federal entities receive directly from Federal awarding agencies or indirectly from pass-through entities. It does not include procurement contracts, under grants or contracts, used to buy goods or services from vendors.

Accordingly, the schedule includes expenditures of both cash and noncash awards.

C. Basis of Accounting

Except as noted below, the schedule is presented on the cash basis of accounting, which recognizes amounts only when disbursed in cash.

Note 2: Subrecipients

The county provided no federal awards to subrecipients during the years ended December 31, 2009 and 2008.

Caldwell County, Missouri
Schedule of Findings and Questioned Costs
Years Ended December 31, 2009 and 2008

Section I - Summary of Auditors' Results

Financial Statements

Type of auditor's report issued	Qualified
Internal control over financial reporting:	
Material weakness(es) identified	X Yes __No
Significant deficiencies identified not considered to be material weaknesses?	X Yes __ None Reported
Noncompliance material to financial statements noted	__Yes X No

Federal Awards

Internal control over major programs:	
Material weakness(es) identified?	__Yes X No
Significant deficiencies identified not considered to be material weaknesses?	X Yes __ None Reported
Type of auditor's report issued on compliance for major programs	Unqualified
Any audit findings disclosed that are required to be reported in accordance with Circular A-133, Section .510(a)	X Yes __No

Identification of major programs:

CFDA Number	Name of Federal Program or Cluster
20.205	Highway Planning and Construction

Dollar threshold used to distinguish between Type A and Type B programs:	$ 300,000
Auditee qualified as low-risk auditee	__Yes X No

Caldwell County, Missouri
Schedule of Findings and Questioned Costs
Years Ended December 31, 2009 and 2008

Section II - Financial Statement Findings

2009-1 County Financial Records

The accounting records prepared by the County Clerk and County Treasurer for the two years ended December 31, 2009 do not reconcile to the general ledger. Cash balances did not reconcile as a result of differences between receipts and disbursements recorded by each official. The County Clerks office is preparing a reconciliation to reconcile with the County Treasurer, however, it does not appear that there was an accurate listing of outstanding checks and deposits in transit prepared with the bank reconciliation at the end of each month by either the County Treasurer or the County Clerk. As a result, errors on reports prepared by the County Treasurer and errors on actual amounts reported on the budgets prepared by the County Clerk went undetected. Both officials records were inaccurate at times and varied from actual revenues, expenditures and cash balances per audit. Due to the materiality of the differences, no audit adjustments were made to correct these errors. The differences between the cash balances per audit and the cash balances per the books are listed below.

	2009	2008
Cash Balance Per Auditor Calculations - All Funds	$ 1,186,714	$ 1,362,507
Cash Balance Per Books - All Funds	1,093,129	1,475,294
Difference	$ 93,585	$ (112,787)

The County Treasurer made numerous transfers between county funds during the years ending December 31, 2009. All transfers made to and from the Law Enforcement Fund did have documented approval in the minutes from the County Commission, however, there were transfers made to other funds that did not have written authorization from the Commissioners. Written approval should be obtained from the County Commission before transfers are made between county funds and adequate supporting documentation for the transfer should be maintained for all transfers made.

Recommendations:

A. The accounting records of the County Clerk and County Treasurer should be reconciled on a monthly basis and all outstanding checks and deposits in transit need to be checked for accuracy, Any differences between the reconciliation and the county's general ledger need to be fully investigated..

B. The County Treasurer reconciles all financial reports to the bank balances and documents detailed monthly bank reconciliations including listings of outstanding checks and adjusting items. In addition the County Commission should review and approve all reconciliations and financial reports.

Section II - Financial Statement Findings (Continued)

2009-1 County Financial Records (Concluded)

C. The County Commission approve all interfund transfers that are made.

Auditees Response

The County Commission, the County Treasurer and the County Clerk provided the following responses:

A. The Treasurer and the Clerk will start reconciling accounts and determining that all outstanding checks and deposits in transit are accurate.

B. The Treasurer will start reconciling bank records and determining that the reconciliation agrees with the financial reports and the County Clerk's records and any differences will be investigated.

C. All transfers will be approved by the County Commissioners.

2009-2 County Budgetary Practices

In addition to being required by state law, complete and accurate budgets are essential for the County Commission and County Clerk to evaluate county operations and to project the anticipated needs of the county for the upcoming year. Complete and accurate budgets are also necessary to properly inform the county's citizens about the county's finances.

The County Commission approved disbursements in excess of budgeted amounts for various funds during the years ending December 31, 2009. Further there was no evidence that the County Commission nor the County Clerk monitored disbursements adequately to ensure actual disbursements did not exceed budgeted amounts. Actual expenditures exceeded budgeted amounts in the following funds:

Section II - Financial Statement Findings (Continued)

2009-2 County Budgetary Practices (Continued)

Amount Over Budget

	2009	2008
County Revenue Fund	$ -	$ 154,137
Road and Bridge Fund	$ -	$ 121,482
Road and Bridge Sales Tax Fund	$ -	$ 38,929
Tax Maintenance Fund	$ -	$ 3,189
Election Fund	$ -	$ 19,889
Peace Officers Training Fund	$ 4,915	$ 1,933
Domestic Violence Fund	$ -	$ 628
Sheriff Civil Fees Fund	$ 2,234	$ 12,949
Record Storage Fund	$ 724	$ 2,234
Prosecuting Attorney Bad Check Fund	$ 26,328	$ 28,124
LEPC Fund	$ 2,141	$ -

If there are valid reasons which necessitate excess disbursements, budget amendments should be made following the same process by which the annual budget is approved, including holding public hearings and filing the amended budget with the State Auditor's office. In addition, Section 50.622, RSMo 2000, provides that counties may amend the annual budget during any year in which the county receives additional funds which could not be estimated when the budget was adopted and that the county shall follow the same procedures required for adoption of the annual budget to amend the budget.

To allow the budgets to be used as a planning tool and to ensure compliance with state law, budget amendments should be made prior to incurring the actual expenditures, valid reasons which necessitate excess disbursements should be provided to support amendments, and public hearings should be held prior to the adoption of all budget amendments.

Recommendations:

A. Ensure that the expenditures are kept within the amounts budgeted. If additional funds are received or expended which could not be estimated when the budget was adopted, the County Commission should amend the budget by following the procedures established by state law.

Auditees Response

The County Commission provided the following responses:

A. The County Commission will begin monitoring the budget on a monthly basis and amendments will be made on an as needed basis.

Section II - Financial Statement Findings (Continued)

2009-3 Expenditure Procedures

It was noted during the test of expenditures that the mileage reimbursements from county employees did not include documentation showing proof of mileage along with a breakdown of each trip made by the employee. Receipts for meals were also not attached to the request for reimbursements for some of the reimbursements tested.

It is also recommended that all invoices be stamped as paid along with the date the invoice was paid, along with the initials of an individual approving the expenditure. This allows the county to keep from paying invoices twice.

Recommendations:

A. The County Clerk and County Commission adopt policies for travel reimbursements that include adequate documentation for mileage and requiring receipts in order to obtain meal reimbursements.

B. The County Clerk stamp all invoices as paid including the date of initials of an official approving the invoice.

Auditee Response:

The County Commission and County Clerk provided the following responses:

A. The County Commission and County Clerk will implement new procedures for the handling of travel and meal reimbursements.

B. The County Clerk will begin procedures to mark invoices as paid and receive the initials of an approving official.

Section III - Federal Award Findings

2009-4 Federal Financial Reporting

Section .310(b) of Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations,* requires the county to prepare a SEFA for the period covered by the county's financial statements. The county is required to submit the SEFA to the State Auditor's Office as a part of the annual budget.

Expenditures related to some of the grants were reported incorrectly or not included on the schedule. The audited SEFA was adjusted to correct these errors. Compilation of the SEFA requires consulting county financial records and requesting information from other departments and/or officials. The County Commission should take steps to ensure all departments and/or officials properly track federal awards to ensure all federal awards are properly accounted for on the SEFA.

Without an accurate SEFA, federal financial activity may not be audited and reported in accordance with federal audit requirements which could result in future reductions of federal awards.

Recommendations:

A. The County Commission and County Clerk work to ensure the SEFA is complete and accurate.

Auditee Response:

The County Commission and County Clerk provided this response:

A. The County Commission and County Clerk will work hard to ensure that the SEFA is accurate and complete.

Caldwell County, Missouri
Follow-Up on Prior Audit Findings for an Audit of Financial
Statements Performed in Accordance with *Government Auditing Standards*

2007-01 County Financial Records

Criteria: The County Clerk and County Treasurer need to perform a monthly reconciliation and all reconciling items need to be documented and fully investigated. This reconciliation needs to be traced to the counties general ledger and any differences investigated. The County Commission needs to approve these reconciliations. The County Commission needs to approve all transfers being made between funds and document this approval in the minutes. The County also needs to classify all revenues within the proper account and the proper fund.

Condition: During my audit, I determined that there was no monthly reconciliation prepared between the County Treasurer and County Clerk. It was also noted that the County Commissioners were also not approving all transfers made between funds. Revenues were not being classified in the proper accounts and funds.

Effect: Without an accurate monthly bank reconciliation the county is unable to determine the amount of money that they have on hand. Without proper authorization, transfers can be made that are not allowed by law. Improper revenue classifying can cause the financial statements to be misleading.

Cause: Management has not prepared the proper bank reconciliations, approved transfers and improperly classified revenues by account and fund.

Recommendation: The accounting records of the County Clerk and County Treasurer should be reconciled on a monthly basis and all reconciling items documented and fully investigated. The County Treasurer should reconcile all financial reports to the bank balances and document detailed monthly bank reconciliations including listings of outstanding checks and adjusting items. In addition the County Commission should review and approve all reconciliations and financial reports. The County Commission should approve all interfund transfers that are made. The County should properly classify all revenues received both within the proper account and proper fund. Procedures need to be implemented to ensure that all revenues and disbursements are properly classified within the proper account and fund.

Status: Partially Implemented. The County Clerk and County Treasurer have begun to prepare monthly bank reconciliations, however, they are still not balancing back to the general ledger. The County Commissioners are approving the transfers between the County Revenue Fund and the Law Enforcement Sales Tax Fund and documenting this approval in the minutes, however, there are some other transfers occurring between funds that did not received documented approval from the County Commission. Revenues appear to be properly classified between accounts and funds. This finding was repeated as finding 2009-1 on Pages 55-56.

Caldwell County, Missouri
Follow-Up on Prior Audit Findings for an Audit of Financial
Statements Performed in Accordance with *Government Auditing Standards*

2007-2 County Budgetary Practices

Criteria: Procedures were not in place to ensure that the county's budget was properly prepared. Amounts listed on the budget did not compare to records completed by the County Clerk and County Treasurer. The budget needs to be monitored to ensure that there is not an excess of expenditures over budgeted amounts for the various county funds.

Condition: During my audit I determined that the counties budget did not compare to the amounts listed on the general ledger. It was also noted that several funds expenditures had exceeded the budgeted amounts.

Effect: Without an accurate budget, the county cannot make proper financial decisions concerning the counties finances.

Cause: County officials did not monitor the budget to determine that the budget was in compliance with state law.

Recommendation: The budget should contain complete and accurate information about the County's finances. The budget needs to be monitored to ensure that expenditures are kept within the amounts budgeted. If necessary, amendments can be made to be in compliance with state law.

Status: Partially Implemented. The budget numbers now compare to the general ledger numbers, however, there were several funds where expenditures did exceed budgeted amounts and no amendments were made. This finding was repeated as finding 2009-2 on Pages 56-57.

2007-3 Financial Condition

Criteria: The financial condition of the County Revenue Fund is weak.

Condition: During the audit, I determined that the balance of the County's Revenue Fund was $38,504 at the year ended December 31, 2007.

Effect: If excess spending in the County Revenue Fund continued, the fund would soon have a deficit balance.

Cause: Excess spending caused the fund's cash balance to be low.

Recommendation: The County needs to take the necessary steps to improve the financial condition of the County Revenue Fund.

Status: Implemented. At December 31, 2009 the County Revenue Fund balance is $183,921 for an increase of $145,417 over the two year period.

Caldwell County, Missouri
Summary Schedule of Prior Audit Findings In Accordance with OMB Circular A-133

Section .315 of OMB Circular A-133 requires the auditee to prepare a Summary Schedule of Prior Audit Findings to report the status of all findings that are relative to federal awards and included in the prior audit report's Schedule of Findings and Questioned Costs. The summary schedule also must include findings reported in the prior audit's Summary Schedule of Prior Audit Findings, except those listed as corrected, no longer valid, or not warranting further action.

Section .500(e) of OMB Circular A-133, requires the auditor to follow up on these prior audit findings; to perform procedures to assess the reasonableness of the Summary Schedule of Prior Audit Findings; and to report, as a current year finding, when the auditor concludes that the schedule materially misrepresents the status of any prior findings.

2007-4 Federal Financial Reporting

Criteria: The county did not have procedures in place to adequately track federal awards programs in order to complete an accurate schedule of expenditures of federal awards.

Condition: The County did not prepare an accurate schedule of expenditures of federal awards.

Effect: Without an accurate schedule of federal awards, federal financial activity may not be audited and reported in accordance with federal audit requirements.

Cause: Future reductions in federal awards could occur if an accurate schedule of federal awards is not prepared.

Recommendation: The County Commission and County Clerk prepare a complete and accurate schedule of federal awards.

Status: Not Implemented. The schedule of federal awards had errors regarding expenditures and federal programs not being reported. This finding was repeated as finding 2009-4 on Page 59.

Thomas A. Schweich

Missouri State Auditor

Village of Indian Point

March 2011

Report No. 2011-09

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Village of Indian Point

Sewer Project	The Board of Trustees is not adequately monitoring the Board of Public Works (BPW). The sewer project was poorly planned and system revenues are not sufficient to meet all operational costs. The village spent over $8,000 on wireless meters which it cannot utilize because it has not purchased the equipment necessary to do so; it has no valid estimate of how much it will cost for waste removal; and deficiencies identified by the Missouri Department of Natural Resources are expected to cost approximately $100,000 to remedy. Approximately $120,000 in change orders were approved by the BPW without the approval of the Board of Trustees. The 2010 budget for the BPW reflected an estimated negative cash balance of $99,000 at December 31, 2010, as system revenues are not sufficient to meet all operational costs. Sewer rates have not been reviewed since 2005. Adequate documentation of disbursements, warranties, performance bonds and contracts was not maintained.
Municipal Center	The Municipal Center project and corresponding debt issuance was not properly planned. The village paid $49,762 in principal and interest before breaking ground on the project. In addition, the village had funds available at the time that may have been utilized for the project. Because the debt cannot be prepaid until 2017, this financing arrangement will result in interest costs totaling approximately $185,000.
Village Disbursements	The village does not have a formal bidding policy, and some bid documentation was not retained. In addition, some products and services were not bid. The village used the same engineering firm for several years without documentation of any evaluation and consideration of other firms. Disbursement approval is not adequately documented.
Accounting Controls and Procedures	Accounting duties are not segregated, and insufficient oversight exists to ensure transactions are properly recorded and assets are safeguarded. Monies received are not recorded and deposited promptly, and receipt slips are not accounted for properly. Village financial records are not accurate, with some disbursements not listed or misclassified. Bank reconciliations are not performed timely, and some important records were not properly retained.
Board of Public Works Utility Controls and Procedures	Significant weaknesses were identified in controls and procedures related to the utility system, and as a result, there is less assurance all utility monies have been accounted for properly. Accounting duties are not segregated, monies received are not promptly recorded and deposited, and checks are not securely maintained. Bank reconciliations are not performed timely, and adjustments to accounts are not properly authorized or documented. Formal policies and procedures related to delayed sewer payments have not been established, and village ordinances requiring penalties and service shutoff have not been enforced with respect to delinquent customers, including the Village Board Chairman and the BPW Chairman.

Payroll Controls and Procedures	Timesheets are not always signed by employees and supervisors, and adequate records of vacation, sick and compensatory leave are not maintained. Christmas bonuses paid to the Chief of Police and a police officer, and $1,000 paid to the Chief of Police for duties as interim village administrator were not properly reported or subjected to payroll tax withholdings. No documentation was maintained of how the $1,000 payment was determined.
Audits, Budgets, and Financial Statements	The village did not obtain a required annual audit of the sewer system or publish semiannual financial statements as required by state law. Budgets did not include all information required by state law and contained errors. The BPW budgeted a deficit balance.
Meetings and Records	Meeting minutes lacked sufficient detail and were difficult to locate. Email was used for some votes, in violation of state law requiring that a quorum of Board members be physically present during a vote.
Elected Officials	A Board of Trustees member voted to appoint his wife to the BPW, and a candidate was listed on the ballot for the Board of Trustees even though his sewer account was in arrears at the time.
Capital Assets	The village does not maintain records for its capital assets. Property is not tagged for identification, and an annual physical inventory is not performed, making it difficult to determine proper insurance coverage and safeguard village assets from loss, theft, or misuse.

In the areas audited, the overall performance of this entity was **Poor**.*

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)	The Village of Indian Point did not receive any federal stimulus monies during the audited time period.

*The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

To the Board of Trustees
Village of Indian Point, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the Village of Indian Point. We have audited certain operations of the village in fulfillment of our duties. The village engaged Schultz Durham & Rapp, P.C., Certified Public Accountants (CPAs), to perform agreed upon procedures related to the village's sewer project for the 3 years ended December 31, 2009. To minimize duplication of effort, we reviewed the report and substantiating working papers of the CPA firm. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2009. The objectives of our audit were to:

1. Evaluate the village's internal controls over significant management and financial functions.

2. Evaluate the village's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the village, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the village's management and was not subjected to the procedures applied in our audit of the village.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the Village of Indian Point.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Donna Christian, CPA, CGFM
In-Charge Auditor:	Roberta Bledsoe
Audit Staff:	David Olson

1. Sewer Project

The sewer project was poorly planned and system revenues are not sufficient to meet all operational costs. In addition, supporting documentation was not maintained for some sewer project disbursements.

The construction of a waste-water system for the Village of Indian Point has been in process for many years. In 1995, voters approved a bond issue for approximately $5 million to fund the construction of a system. In 2004, village trustees established the Board of Public Works (BPW). According to village ordinances and state law, the BPW is responsible for operating and maintaining the village sewer system under the authority of the village trustees. Bonds totaling $795,000 to fund the construction of the waste-water system were issued in 2005, with the balance of the bond issue not utilized.

The BPW initially planned to construct a centralized waste-water system, but to reduce costs instead constructed a decentralized system. The decentralized system is designed to handle liquid waste and requires the BPW to pump solid waste out of tanks installed throughout the system. The BPW has contracted with an outside vendor to pump the tanks and take the solid waste to a neighboring city's sewer system.

Approximately $1.8 million was disbursed to construct the waste-water system financed by the bond issue through a state revolving fund (SRF) loan totaling $795,000, a state grant totaling $500,144, a donation from a local developer totaling $296,950, a lease purchase agreement totaling $177,000, and the remaining costs paid with village operating funds. Construction started in 2008, and the system became operational in 2009.

1.1 Planning and oversight

The sewer project was poorly planned and oversight by the village Board of Trustees was inadequate.

- The BPW does not have a clear estimate of the costs associated with pumping the tanks and hauling the solid waste to a neighboring city's sewer system. The BPW was unable to locate a written contract for this service specifying the costs and could only provide documentation indicating that recently one of the 54 tanks was pumped out costing $200. Because the system is relatively new, most tanks have not yet been required to be pumped; however, the BPW does not have an estimate on how often pumping will be required.

- The village does not have a long-term plan to address the costs of a holding tank installed on Map Lane. According to the Missouri Department of Natural Resources (DNR), two homes located on Map Lane were not included in the approved plans for the construction of the sewer system, and as a result, the homes could not be connected to the system. To remedy this problem, the BPW placed a holding tank in the area and approximately twice a month the tank is pumped by an outside

vendor. According to DNR personnel, the holding tank at Map Lane was approved as a temporary solution; however, the village does not have a long-term plan to address the current situation. The BPW has been paying approximately $190 monthly to pump this tank.

- Financing for the installation of the sewage holding tanks was not secured until after the project started. According to BPW records, the bid for the sewage holding tanks was awarded to the contractor on September 8, 2008, and the contract was signed on October 14, 2008, but financing totaling $177,000 was not secured until March 15, 2009.

- Wireless meters costing $8,172 were installed during construction of the waste-water system but are not utilized by the BPW. A change order was issued during construction to allow wireless reading of the meters; however, the village has not purchased the equipment which would allow them to wirelessly read the meters, and according to BPW personnel, there are no plans to purchase the equipment. Currently, customers are charged a set rate and are not charged based on use.

- Because of an error when the village purchased the land to construct the treatment facility, a corner of the flow equalization tank was placed on private property. Attempts have been made by the village to obtain a quit claim deed; however, the attempts have been unsuccessful.

- On June 30, 2010, the BPW received a letter from the DNR listing difficiencies noted during an inspection of the sewer system. For example, a single pump was installed to transport waste instead of a duplex pumping system as stipulated in the approved engineering plans. Additionally, the letter stated the BPW had to submit a plan for correcting the difficiencies by September 30, 2010; however, this deadline was not met. BPW officials are currently working with DNR officials and estimate the cost of the additional work will be approximately $100,000.

- Although change orders and invoices for costs associated with the construction and operation of the waste-water system were discussed and approved during BPW meetings, they were not approved by the village Board of Trustees. According to Ordinance 03-14 which created the BPW, all contracts and invoices must be submitted to the village Board of Trustees for approval before disbursement is made. The village expended approximately $120,000 as a result of 15 change orders.

Given the concerns noted in this report, it is apparent the village Board of Trustees is not adequately monitoring the BPW. Adequate planning for major capital disbursements and monitoring by the BPW and the village

Board of Trustees is necessary to ensure the project is financially feasible and to help prevent potential problems or misunderstandings during the project.

1.2 Financial condition

System revenues are not sufficient to meet all operational costs, and sewer rates have not been reviewed since 2005. The 2010 budget for the BPW reflected an estimated negative cash balance of $99,000 at December 31, 2010.

According to the June 8, 2010, village meeting minutes, the BPW Chairman reported the current user fees are failing to generate sufficient funds to pay for the operation of the sewer system and the debt incurred. The BPW Chairman requested the village make the bond and lease purchase payments totaling approximately $65,000 annually. The village Board of Trustees agreed to make these payments for the BPW.

The village and BPW have not performed a formal review of sewer rates since 2005. Rates were set based upon initial estimated costs of a centralized system, not actual costs of a decentralized system, and as a result, the rates charged are not covering all costs. For example, the costs of pumping solid waste from tanks (including Map Lane) are not included in the rate calculations. According to the rate calculations, annual operating costs were estimated at approximately $57,000; however, actual annual operating costs including bond and lease payments are approximately $220,000. Residential system users pay approximately $34 monthly.

Additionally, sewer rate calculations were based upon 149 system users (58 residential users and 91 resort users), but the village only has 54 system users. As a result, system revenues are significantly less than anticipated.

Further, the costs associated with the sewage tanks installed on each customer's property is not included in the rate calculation but billed separately to each customer, and some sewer customers are not paying for the sewage tanks. The BPW charged customers approximately $2,000 to $4,000 for residential sewage tanks. Some customers are refusing to pay the BPW, some are making payments, and some have paid in full. There is no ordinance in place requiring payment for the tanks, and the BPW does not have adequate records tracking the amounts owed by each customer for tank installation.

Finally, the BPW has not enforced the collection of various fees for sewer service, established formal written policies and procedures related to delayed payment plans, or shutoff sewer service when accounts are delinquent. (See MAR finding number 5).

It is essential the Board of Trustees and the BPW address the shortfall in system revenues both in the immediate- and long-term future. Sewer fees

are user charges which should cover the cost of providing the related services. To improve the financial condition of the BPW, the Board of Trustees and BPW should perform a detailed review of sewer rates, consult legal counsel regarding charges for sewage tanks, and adequately track amounts owed by each customer.

1.3 Supporting documentation

Adequate supporting documentation was not maintained for some sewer project disbursements. Further, sewer equipment warranties and contractor bonds were not maintained by the village.

- Supporting documentation could not be located for payments totaling approximately $779,000 (58 percent) of more than $1.35 million paid to the sewer contractor. In addition, in April 2009, a check for $105,554 was issued from the BPW account to another contractor for removing existing septic tanks and installing replacement tanks; however, there was no invoice to support the payment.

- Written warranties for sewer equipment could not be located. Repairs totaling approximately $3,400 were made to a sewer pump and paid for by the BPW. BPW officials indicated they believed the work would not be covered under warranty, but because warranty documentation could not be located this is unclear.

- The performance bond for the contractor performing work on Map Lane could not be located.

- Copies of some contracts did not contain all signatures. The SRF loan agreement was not signed by all parties involved, and the lease purchase agreement for the tanks was not signed by the leaseholder.

All disbursements should be supported by paid receipts, itemized vendor invoices, signed contracts, or other detailed documentation to ensure the obligation was actually incurred and the amount paid was proper. Performance bonds and written warranties are necessary to ensure all parties are aware of their duties, rights, and responsibilities, and to prevent misunderstandings.

Recommendations

The Village of Indian Point Board of Trustees:

1.1 Work with the BPW to ensure all capital improvement projects are properly planned and provide adequate oversight of the BPW. Additionally, the Board of Trustees and the BPW should work together to resolve all issues with the current sewer system.

1.2 Closely monitor the financial condition of the BPW by performing a review of sewer rates, consult legal counsel regarding sewage tank charges, and adequately track amounts owed by each customer.

1.3 Ensure all disbursements are supported by adequate documentation and signed contracts, and performance bonds and written warranties are maintained.

Auditee's Response

The Village of Indian Point Board of Trustees provided the following responses:

1.1 Most of the individuals on the Board of Trustees are relatively new and had these same concerns. The Board of Trustees and BPW are now working together to resolve the sewer system issues. We have contracted with a new engineer and are working to cut costs of operating the system.

1.2 The recently hired engineer is performing a new rate analysis. The BPW has hired a clerk to perform accounting duties and is now able to account for amounts paid on the tanks.

1.3 We plan to maintain all supporting documents in the future.

2. Municipal Center

The village did not adequately plan for the financing of the Municipal Center and as a result, the village incurred unnecessary debt and interest. In April 2007, the village issued Certificates of Participation (COPs) totaling $318,000 to finance the construction of a new municipal center; however, construction was not started until August 2009. The village made payments totaling $49,762 (interest of $29,762 and principal of $20,000) before breaking ground for the new facility. In addition, it is not clear why the village issued COPs when it had approximately $400,000 in certificates of deposit (CDs) and a money market account earning less than 1 percent interest available for potential use.

Based upon meeting minutes, the delay in this project was caused by the indecisiveness of the Board of Trustees. Meeting minutes for June 2009 indicate the Board of Trustees considered discontinuing the project because of uncertainty about the village having the funds to make the payments. Further, there are no documented plans for the use of the funds in the CDs and money market account, and no evidence the Board of Trustees considered utilizing some or all of these funds when constructing the Municipal Building. The COPs are for a 20-year term to be repaid in annual principal payments with semi-annual interest payments totaling approximately $25,000. Based on the terms of the COPs, the certificates cannot be prepaid until 2017. This financing arrangement will result in interest costs totaling approximately $185,000.

In the future, to ensure efficient use of village funds and avoid unnecessary interest costs, the Board of Trustees should plan financing to coincide with the timing of construction, and consider utilizing a portion of village reserves for construction costs.

Recommendation

The Village of Indian Point Board of Trustees ensure capital improvement projects and corresponding debt issuance are properly planned to prevent unnecessary interest costs.

Auditee's Response

The Village of Indian Point Board of Trustees provided the following response:

We recognize the center was not properly planned by the former Board of Trustees. We will ensure future capital improvements and corresponding debt is properly planned.

3. Village Disbursements

Controls and procedures over village disbursements need improvement.

3.1 Bidding policy and procedures

The village does not have a formal bidding policy. Village officials indicated they generally require bids for purchases over $500; however, while village personnel indicated some bids were solicited through telephone quotes or direct contact with vendors, documentation showing vendors contacted, prices quoted, and reasons for selecting the vendor were not retained. Additionally, the Board of Trustees did not ensure some products and services purchased by the BPW related to the waste-water system were bid. Bids were not solicited for road repairs ($20,736), the Municipal Center well ($9,480), and the utility billing system ($6,445). Adequate bid documentation was not maintained for storm sirens costing $17,447.

In addition, the village did not document the reasons for selecting other than the lowest bid for construction of the Municipal Center. The building task force committee received five bids for the construction of the building. On June 2, 2009, the Village Board of Trustees accepted the higher bid of $291,450, which was $74,937 more than the lowest bid. While Board meeting minutes generally indicated negotiations occurred with contractors, the village had no documentation to support selecting the higher bid.

Further, the BPW used the services of the same attorney for several years without any documentation of considering other attorneys. Payments to the attorney totaled approximately $51,000 for the year ended December 31, 2009. The BPW also did not maintain a written agreement with its attorney.

Formal bidding procedures for purchases provide a framework for economical management of village resources. Routine use of a competitive

procurement process for major purchases ensures the village has made every effort to receive the best and lowest price and all interested parties are given an equal opportunity to participate in village business. Documentation of the various proposals received, and the selection process and criteria should be retained to demonstrate compliance with applicable laws or regulations and support decisions made. Further, written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings.

3.2 Engineering services

The village and BPW used the services of the same engineering firm for all phases of the sewer project for several years without documentation of the evaluation and consideration of other firms. Payments to the engineer totaled approximately $52,000 for the year ended December 31, 2009. Additionally, the village hired a different engineering firm in 2010 for sewer project repairs and did not document its evaluation and selection of the engineering firm.

Sections 8.289 and 8.291, RSMo, provide guidance on the selection of engineering services.

3.3 Disbursement approval and documentation

The review and approval of disbursements by the Board of Trustees and BPW need improvement.

Although meeting minutes occasionally documented discussion of approving accounts payable, the approval of disbursements is generally not documented. As of June 2010, a list of disbursements is prepared by the Village Board Chairman for review, but the list is not signed or initialed by the Board to document approval, and not all disbursements are included on the list. Additionally, the BPW does not meet every month; however, some bills are paid monthly without evidence of approval.

To adequately document review and approval of all disbursements, a complete and detailed list of disbursements should be prepared, signed or initialed by the Board or BPW to denote approval, and retained.

3.4 Banking services

The village has not solicited proposals for banking services, and better oversight is needed over village bank accounts.

- The village has not solicited proposals from various banking institutions for the deposit of village monies and does not have a written agreement with its depository bank documenting the services the bank will perform. Periodically soliciting proposals for banking services will help ensure banking services received, as well as the costs of these services, are reasonable and competitive. Further, written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings. Section 432.070, RSMo, requires contracts of political subdivisions to be in writing.

- Many village checks were signed by the Village Vice Chairman and two trustees who did not have authority to sign checks. Although bank signature cards allow these individuals to sign checks, a village resolution indicates checks should be signed by the chairman, and/or village secretary/treasurer, and/or village clerk/administrator. Additionally, a former village clerk, who left in May 2010, is still authorized to sign checks on the village account as of September 2010. To comply with village resolutions and ensure adequate controls exist over bank accounts, the village should update the bank signature cards and ensure checks are signed only by authorized signatories. Further, steps should be taken to remove the former employee from the bank signature card.

3.5 Water study

The village contracted for a water study costing $10,000 in 2008; however, the study has not been completed. According to the engineering firm, it has not been completed due to the Board's indecisiveness regarding the study, conflict between the current village trustees, and unpaid invoices for the water study and other services totaling $8,853 due to the firm. Payments totaling $6,723 have been made to the engineering firm for the incomplete water study.

To ensure monies are spent efficiently, the village should determine if the water study is needed, and resolve issues regarding the unpaid invoices.

Recommendations

The Village of Indian Point Board of Trustees:

3.1 Establish formal bidding policies and procedures, including documentation requirements regarding the bids or quotes received and justification for the bid selected. In addition, the Board of Trustees should ensure the BPW maintains a written agreement with its attorney.

3.2 Comply with state law regarding the selection of engineering services.

3.3 Document the approval of village and BPW disbursements by including a complete list of all disbursements in the meeting minutes and signing or initialing the list to denote approval.

3.4 Solicit proposals for banking services on a periodic basis and enter into a depositary agreement with the bank. In addition, the Board of Trustees should comply with the village resolution regarding check signatures, and remove the former employee from the signature card at the bank.

3.5 Contact the engineering firm and resolve the issues regarding the water study and unpaid invoices.

Auditee's Response

The Village of Indian Point Board of Trustees provided the following responses:

3.1 We have recently adopted an ordinance outlining a bid policy. We are currently seeking qualifications for an attorney and have solicited bids for other items such as auditing services and propane.

3.2 We recently requested and obtained qualifications for engineering services before contracting with our new engineer; however, we are still working with our previous engineer on the trails project.

3.3 We have or will comply with this recommendation. The Board of Trustees started signing the list of paid bills last month, and the BPW has resumed having meetings twice a month.

3.4 We recently solicited bids for banking services. We have changed banks and have a written agreement. In addition, we plan to change the resolution to include all trustees as check signers and the former employee has been taken off the signature card.

3.5 We are working with the engineer to resolve this issue. We have requested a detailed invoice documenting all unpaid charges from the engineer.

4. Accounting Controls and Procedures

Accounting controls and procedures utilized by the village need improvement.

4.1 Segregation of duties

There is minimal oversight and inadequate segregation of accounting duties. The village clerk is responsible for receipting and disbursing monies, performing bank reconciliations, and preparing monthly financial reports. Additionally, the village clerk provides one of the two required signatures on checks, including payroll checks. The bank statements are not provided to the Board for review, and there is minimal evidence the Board provides adequate supervision or review of the work performed by the village clerk.

For several months during 2009 and 2010, the village did not have an employee in the position of village clerk, and as a result, the Village Board Chairman and Chief of Police performed the accounting duties. Adequate segregation and oversight was also not performed during these months.

Proper segregation of duties helps ensure all transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of

duties cannot be achieved, at a minimum, periodic supervisory or independent reviews of the records should be performed and documented.

4.2 Receipting and depositing

Receipting and depositing procedures need improvement.

- Monies received are not recorded and deposited in a timely manner. Monies received are placed in the safe; however, a receipt slip is not issued and the monies are not posted to the computer system until the deposit is prepared. During our cash count, we noted monies for two deposits totaling $727 and $332 were received on June 29, 2010, and July 12, 2010, respectively, yet were not deposited until July 26, 2010.

- Generic rediform receipt slips, instead of official receipt slips, are issued for monies paid in person at the Municipal Center, and the numerical sequence of receipt slips is not accounted for properly. Additionally, receipt slips are not issued for monies received through the mail. Of the receipt slips reviewed, the first eight pages of a receipt book were missing and several other receipt slips had both the original and carbon copy removed. Additionally, one receipt slip was used for the personal business of the Village Board Chairman.

- The method of payment is not documented on receipt records and, as a result, the composition of receipts cannot be reconciled to the composition of deposits.

- Checks are not restrictively endorsed immediately upon receipt.

To ensure monies are recorded and accounted for properly, receipts should be posted to the computer system and deposits made in a timely manner, official prenumbered receipt slips should be issued for all monies received with all receipt slip numbers accounted for properly, the method of payment should be documented, and the composition of receipts should be reconciled to the composition of deposits. Additionally, checks should be restrictively endorsed immediately upon receipt.

4.3 Financial records

Village financial records are not accurate.

- A check totaling $10,131 disbursed to the BPW and other transactions totaling $3,519 were not included as disbursements on the profit and loss statement for the year ended December 31, 2009, resulting in an overstatement of the cash balance.

- Some disbursements are inaccurately classified in the village accounting system. For example, profit and loss reports prepared in 2009 for the year ended December 31, 2008, indicated interest for the SRF loan totaled $127,735; however, only $40,893 of this amount was interest.

The remaining amount was for payments of engineering and legal services.

- The treasurer's report dated January 19, 2010 showing 2009 and 2008 financial activity presented to the Board of Trustees, did not include income totaling approximately $55,000 and $119,000, respectively.

The differences appear to be the result of posting errors in the accounting system. Accurate financial information is necessary to provide the Board with sufficient information to make informed decisions and to provide residents with reliable information about village finances.

4.4 Bank reconciliations

Bank reconciliations for the village account are not always performed in a timely manner. As of October 2010, there were no bank reconciliations documented for June through September 2010.

Timely preparation of monthly bank reconciliations is necessary to ensure the bank account is in agreement with accounting records and to detect and correct errors.

4.5 Record retention

We noted numerous village records were not maintained and had to be obtained from other sources or were not maintained in the Municipal Center.

- The village hired an engineering firm to prepare a master plan for the village, and invoices indicate the work was completed in February 2009. The engineering firm indicated the master plan was presented to the Board; however, the master plan was not retained by the village.

- Records for the construction of the Municipal Center are maintained at the home of a trustee instead of at the Municipal Center.

Record retention is necessary to ensure the validity of transactions and provide an audit trail.

Recommendations

The Village of Indian Point Board of Trustees:

4.1 Segregate accounting duties to the extent possible. If proper segregation of duties cannot be achieved, an independent review of the work performed is necessary.

4.2 Ensure monies are posted to the computer system and deposited in a timely manner, official prenumbered receipt slips are issued for all monies received, the numerical sequence of receipt slips is accounted for properly, the method of payment is documented, the

composition of receipts is reconciled to the composition of deposits, and checks are restrictively endorsed immediately upon receipt.

4.3 Ensure village financial records are accurately maintained.

4.4 Ensure bank reconciliations are performed timely.

4.5 Ensure village records are properly retained and stored at the Municipal Center.

Auditee's Response

The Village of Indian Point Board of Trustees provided the following responses:

4.1 We recently hired a village clerk and we are providing adequate oversight.

4.2 We have implemented this recommendation.

4.3 The village clerk is currently maintaining accurate financial records and has been working on correcting the financial records for past years.

4.4 Bank reconciliations have now been performed and are up to date.

4.5 We are now maintaining all village records in the Municipal Center.

5. Board of Public Works Utility Controls and Procedures

Significant weaknesses were identified in controls and procedures related to the utility system maintained by the BPW. As a result, there is less assurance all utility monies have been accounted for properly.

5.1 Segregation of duties

There is minimal oversight and inadequate segregation of accounting duties for the utility system. Accounting duties, such as receiving and disbursing monies and performing bank reconciliations, are performed by the BPW Clerk without adequate oversight. During several months in 2009 and 2010, the BPW did not have an employee to perform accounting duties, and as a result, the BPW members performed the duties. During this time, these duties were also not performed adequately or timely.

Proper segregation of duties helps ensure all transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of duties cannot be achieved, at a minimum, periodic supervisory or independent reviews of the records should be performed and documented.

5.2 Controls over monies received

Improvement is needed in controls over monies received.

- Sewer monies are not recorded immediately upon receipt. Monies are received through the mail or in the office and placed in a drawer. The monies are not posted to the computer system until the deposit is prepared.

- Monies received are not deposited in a timely manner. We performed a cash count on August 5, 2010, and noted 62 checks totaling $5,824 on hand. Most of these checks represented payments received during July. These checks were not posted to the computerized sewer system and deposited until August 16, 2010. The last deposit prior to our cash count was on July 7, 2010. Additionally, a check totaling $2,800 for sewer and tank fees was collected by the BPW Chairman on July 6, 2010, but the check was not turned into the office until September 7, 2010. The check was not deposited until October 18, 2010.

- Sewer receipts are not adequately secured. The 62 checks noted above were stored in an unlocked desk drawer. Throughout the audit, we continued to observe unsecured checks on the desk and in the desk drawer. Further, we noted one occasion where the door on the safe was not adequately secured.

- Checks and money orders are not restrictively endorsed immediately upon receipt.

To ensure receipts are recorded and accounted for properly, monies should be recorded immediately upon receipt, deposits should be made timely, receipts should be adequately secured, and checks and money orders should be restrictively endorsed immediately upon receipt.

5.3 Receipt records

The BPW needs better accountability over computerized receipt numbers and customer accounts.

- The numerical sequence of computerized receipt slips is not accounted for properly. Some receipt numbers were missing from receipt reports reviewed, and software support personnel indicated they could not locate these numbers but believe it is likely due to personnel viewing an individual's sewer account and exiting the account without posting a payment or recording an adjustment.

- Receipt amounts posted to customer accounts in the utility system are not reconciled to receipt amounts posted to the accounting system. As a result, errors in posting are not identified. For example, a payment totaling $52 was posted to the accounting system and deposited, but not posted to the customer account in the utility system.

To ensure sewer receipts are properly recorded, the numerical sequence of receipt slips should be accounted for properly, **a**nd receipt amounts posted to the utility system should be reconciled to receipt amounts recorded in the accounting system.

5.4 Bank reconciliations

Bank reconciliations are not always performed in a timely manner. As of October 2010, there were no bank reconciliations documented for December 2009 through September 2010.

Timely preparation of monthly bank reconciliations is necessary to ensure the bank account is in agreement with accounting records and to detect and correct errors.

5.5 Adjustments

Adjustments made to customer sewer accounts are not properly authorized or adequately documented. Reasons for adjustments to customer sewer accounts include payments posted to the wrong account, payments duplicated to an account, and the removal of interest charges. While reasons to adjust the billings may be valid, the utility clerk collects sewer payments and has the ability and authority to post adjustments to customer accounts without obtaining independent approval. Adjustments during the year ended December 31, 2009, totaled approximately $2,600.

Proper authorization and adequate documentation, which fully explains the reason for the adjustments to customer accounts, are necessary to ensure only proper accounts and amounts are adjusted and to reduce the risk of theft, loss, or misuse of funds.

5.6 Delinquent accounts

Some village ordinances are not enforced, and the village has not established formal written policies and procedures related to delayed sewer payments. As of August 16, 2010, 33 of 54 sewer customers had delinquent billings totaling over $10,000.

- Penalty charges have not been assessed as required by village ordinance and BPW rules and regulations. Village Ordinance 05-09 states payments not received within 30 days after billing shall be delinquent, and a late payment penalty of 10 percent will be added to each delinquent bill for each 30 days of delinquency. According to the current BPW Vice Chairwoman, customers are no longer assessed penalties and some penalties have been removed from accounts.

- Sewer service is not shutoff when accounts are delinquent. Village Ordinance 05-09 provides when any bill is 30 days in default, sewer service to such premises shall be discontinued until the bill is paid. Current Village Board Chairman Jim Daily, current BPW Chairman Kevin McCoy, and several residents had delinquent sewer accounts not paid within the required time period; however, the service was not disconnected. According to the current BPW Vice Chairwoman,

businesses are allowed to delay payments during the winter months and make those payments up in the summer months when tourism increases; however, this is not specified in a village ordinance.

Section 250.234, RSMo, provides that "any user charges, connection fees, or other charges levied by any city, town or village shall be due at such time or times as specified by the governing board of the city, town or village and shall, if not paid by the due date, become delinquent and shall bear interest from the date of delinquency until paid."

Allowing customers to receive sewer service without paying reduces the incentive to make payments and may result in a loss of revenue to the village. Additionally, the village's failure to disconnect service for elected and appointed officials in accordance with local ordinance creates the appearance these officials may have benefited improperly. The members of the village Board and the BPW serve the village in a fiduciary capacity. Failure to pay their own sewer accounts could harm public confidence and reduce their effectiveness.

To ensure all delinquent utility accounts are handled equitably and in a consistent manner and payment plans are properly approved, an ordinance should be established for delay of sewer payments for businesses during the off season and procedures should be implemented to comply with village ordinances.

Recommendations

The Village of Indian Point Board of Trustees:

5.1 Ensure the BPW segregates accounting duties to the extent possible. If proper segregation of duties cannot be achieved, an independent review of the work performed is necessary.

5.2 Ensure the BPW records and deposits monies timely, adequately secures monies prior to deposit, and restrictively endorses checks and money orders immediately upon receipt.

5.3 Ensure the BPW accounts for the numerical sequence of receipt slips, and reconciles receipt amounts posted to customer accounts to receipt amounts posted in the accounting system.

5.4 Ensure the BPW performs bank reconciliations timely.

5.5 Ensure the BPW requires someone independent of the sewer system review and approve all adjustments and ensure adequate documentation is maintained of such adjustments.

5.6 Ensure the BPW assesses penalties and properly follows shutoff procedures in accordance with village ordinance and BPW rules and

regulations. Additionally, if business customers are allowed to delay payments during winter months, this payment policy should be in writing and approved by the Board of Trustees.

Auditee's Response

The Village of Indian Point Board of Trustees provided the following responses:

5.1 A new clerk was recently hired for the BPW and the BPW is now providing adequate oversight.

5.2 The new BPW Clerk works two days per week and has taken steps to implement these recommendations. Monies are now being handled in a timely manner.

5.3 The BPW has converted all sewer accounts to the financial accounting system. All accounts have been reviewed for accuracy.

5.4 The BPW has now performed all bank reconciliations and with the employment of the BPW clerk, bank reconciliations are up to date.

5.5 Adjustments will be reviewed and approved by the BPW.

5.6 *We are currently working on various options regarding shutoff policies. We plan to address all these issues in our new user charge ordinance after the new rates are calculated by the engineer and approved by the BPW and the Board of Trustees.*

6. Payroll Controls and Procedures

Procedures over timesheets, leave records, personnel files, and additional compensation need improvement.

6.1 Timesheets

Timesheets for village employees are not always signed by the employee to certify accuracy or by the employee's supervisor to indicate review and approval.

To substantiate payroll disbursements, timesheets should be prepared and signed by all village employees and approved by a supervisor.

6.2 Leave records

Adequate records of vacation, sick, and compensatory leave are not maintained. The former Village Superintendent was paid $2,019 for unused vacation time and $252 for compensatory time; however, records were not available to substantiate the payment. Further, three different leave records were maintained for another former employee, and it is unclear which copy was correct.

Adequate leave records are necessary to ensure payments and balances are accurately calculated.

6.3 Personnel files

Village personnel files are incomplete. The personnel files do not contain documentation of the Board's authorization for the hiring of employees, the pay rates at which employees were hired, and any subsequent changes in pay rates. Currently, the village relies on prior meeting minutes to document these items. Complete personnel files should be maintained for all employees to provide documentation of personnel actions.

6.4 Additional pay

The Board of Trustees approved and paid Christmas bonuses of $500 to the Chief of Police and $300 to a police officer in December 2009. In addition, the Chief of Police was paid $1,000 for duties performed as the interim village administrator. The payments were not properly reported on form W-2 or subjected to payroll tax withholdings, and no documentation of how the $1,000 was determined was maintained.

The bonuses appear to represent additional compensation for services previously rendered and, as such, are in violation of Article III, Section 39, Missouri Constitution, and Attorney General's Opinion No. 72, 1955 to Pray, which states, ". . . a government agency deriving its power and authority from the constitution and laws of the state would be prohibited from granting extra compensation in the form of bonuses to public officers after the service has been rendered." Further, to ensure proper accountability over payroll transactions, supporting documentation should be maintained, and to comply with the Internal Revenue Code, all employee compensation should be properly reported and subjected to payroll tax withholdings.

Recommendations

The Village of Indian Point Board of Trustees:

6.1 Ensure timesheets are prepared and signed by both the employee and the employee's supervisor.

6.2 Ensure adequate leave records are maintained.

6.3 Ensure complete personnel files are maintained for all employees.

6.4 Discontinue paying bonuses to employees, maintain documentation to support all payroll transactions, and ensure all compensation is properly reported and subjected to payroll tax withholdings.

Auditee's Response

The Village of Indian Point Board of Trustees provided the following responses:

6.1 We have implemented this recommendation.

6.2 We have implemented this recommendation.

6.3 We will implement this recommendation.

6.4 We are no longer providing bonuses to employees and we are complying with IRS regulations.

7. Audits, Budgets, and Financial Statements

The village did not obtain an annual audit, properly prepare and amend budgets, or comply with state law regarding financial statement reporting.

7.1 Annual audits

The village has not taken steps to obtain an annual audit of the sewer system for 2009. Section 250.150, RSMo, requires the village to obtain annual audits of the sewer system. Further, Ordinance Number 05-17 authorizing the revenue bonds for the sewer system requires annual audits of the village to be completed within 180 days of the end of the village's fiscal year. In addition to being required by state law and village ordinance, annual audits of village funds help ensure financial transactions are properly recorded.

7.2 Budgets

Budgeting procedures for the village and BPW are inadequate. Budgets for the village and BPW for 2009 and 2010 did not include all information required by law. Budgets did not include a budget message, actual receipts and disbursements for the 2 preceding budget years, or estimates of ending available resources.

In addition, differences were noted between the 2009 actual expenses reported on the village's 2010 budget and the actual expenses reported on profit and loss reports. Expenses reported on the budget document were $49,340 more than the amount reported on the profit and loss report for the village. Further, the 2009 actual expenses reported on the BPW 2010 budget were not calculated correctly and were understated by $67,335. Also, the BPW budgeted a deficit balance of approximately $99,000 for 2010.

A complete and well planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific cost and funding expectations for each area of village operations and provide a means to effectively monitor actual receipts and disbursements. Section 67.010, RSMo, requires the preparation of an annual budget with specific information, and Section 67.080, RSMo, provides no expenditure of public monies shall be made unless it is authorized in the budget. Deficit budgeting is prohibited by Section 67.010, RSMo, and Article VI, Section 26(a) of the Missouri Constitution.

7.3 Financial statements

The village has not posted or published semiannual financial statements as required by state law. The publication of such financial statements is intended to provide complete and accurate information to citizens regarding the financial activity and condition of the village.

Section 80.210, RSMo, requires the Board prepare and publish semiannual financial statements in a local newspaper, or if there is no local newspaper, to post semiannual financial statements in at least six of the most public places in the village.

Recommendations

The Village of Indian Point Board of Trustees:

7.1 Obtain annual audits of the sewer system as required.

7.2 Prepare annual budgets that include all information required by state law and discontinue appropriating disbursements in excess of estimated available resources.

7.3 Publish or post semiannual financial statements as required by state law.

Auditee's Response

The Village of Indian Point Board of Trustees provided the following responses:

7.1 We recently solicited bids for auditing services, and have contracted with an auditor to perform the audits for 2009 and 2010.

7.2 We will ensure that future budgets comply with state law and approval is properly documented.

7.3 As a result of hiring a new village clerk, the village newsletter is now being printed. The village's December financial statement was in the newsletter mailed to all residents and posted in the Municipal Center, and copies were available to the public at our monthly board meeting.

8. Meetings and Records

Meeting minutes need improvement, and the village did not comply with state law when members of the Board voted by email.

8.1 Meeting minutes

Several concerns were identified regarding minutes maintained for the Board of Trustees and BPW meetings.

- Minutes for the village Board of Trustees and the BPW are not maintained in an orderly manner or in a centralized location. Some minutes were maintained in a notebook, other minutes were maintained electronically, and some minutes were found in email form. As a result, personnel had difficulty locating some minutes, and it is unclear whether some of these minutes were approved.

- Minutes for the village Board of Trustees and the BPW were not maintained for some open and closed meetings. No meeting minutes were available for a public hearing held by the village Board of Trustees on January 20, 2009, and meetings held in April and May 2009. Also, no meeting minutes were available for closed meetings held on January 13, July 14, and November 10, 2009, and April 15, 2010. Further, closed meeting minutes for the BPW for October 12, 2009, and April 27, 2010, were not maintained.

- Open meeting minutes for the village Board of Trustees do not always document the reasons for closing the meeting or the specific section of law that allows for the closed meeting. Further, minutes were not sufficient to demonstrate how some issues discussed in closed meetings were allowable under the Sunshine Law including discussions concerning property annexations, the authority of the building committee, and the behavior of the Board of Trustees.

- There was no evidence roll call votes were taken during open meetings to close meetings of the village Board of Trustees and the BPW. Several instances were also noted where open minutes would simply indicate a motion passed but not provide a record of the vote.

- Final copies of minutes were not available for BPW meetings for the months of October 2009 through January 2010. The draft minutes appeared to resemble the meeting agenda and did not provide adequate details, such as motions or votes.

- Minutes of the Municipal Center Task Force were not filed with the village. Board of Trustee meeting minutes indicate these minutes were maintained by a member of the task force, but the minutes are not on file with the village.

The Sunshine Law, Chapter 610, RSMo, requires governmental bodies to prepare and maintain minutes of open and closed meetings, and requires records of votes, including roll call votes before closing a meeting. Additionally, the Sunshine Law requires open minutes to document the reason for closing a meeting and limits discussions in closed meetings to only those specifically allowed by law. Further, to ensure all meeting minutes are properly maintained, minutes should be kept in an orderly manner and minutes of the Municipal Center Task Force should be filed with the Village Board of Trustees.

8.2 Email vote

The village did not comply with state law when members of the Board of Trustees voted by email for a tax board nomination without a quorum of Board members physically present during the vote. The Village Board Chairman indicated the Board occasionally conducts votes by email.

Section 610.015, RSMo, requires a quorum of Board members be physically present at the meeting location before any other members are allowed to participate by email.

Recommendations

The Village of Indian Point Board of Trustees:

8.1 Ensure Board of Trustee and BPW minutes are maintained for all meetings in an orderly manner, and the village meetings and minutes comply with state law.

8.2 Comply with state law regarding email votes.

Auditee's Response

The Village of Indian Point Board of Trustees provided the following responses:

8.1 We have made changes to how minutes are maintained. We will comply with state law and all recommendations. Task force minutes are now filed at the Municipal Center.

8.2 We will comply with state law.

9. Elected Officials

A village board member's actions resulted in nepotism, and a candidate for village trustee was not qualified to run for office.

9.1 Nepotism

According to meeting minutes of the Board of Trustees, in October 2009, Trustee Canaday voted to appoint his wife to the BPW and voted for her to hold the office of BPW Vice Chairwoman.

Article VII, Section 6, Missouri Constitution, provides that any public official who names or appoints to public office or employment any relative within the fourth degree shall forfeit his office. Because of the serious consequences which result by appointing a relative, the Board should ensure its members abstain from any decision to appoint a relative and ensure that action is fully documented in the meeting minutes. Discussions and decisions concerning situations where potential nepotism or conflicts of interest exist should be completely documented so the public has assurance no village official has benefited improperly.

9.2 Qualifications to hold village office

The village has not established adequate procedures to ensure all candidates for the position of trustee are qualified to run for office. During the April 2010 election, village Board Chairman Daily was listed on the ballot when his sewer fees for his business were in arrears. December 2009 and January 2010, sewer fees totaling $1,147 were owed.

According to the April 2, 2009, meeting minutes, the BPW Board Vice Chairman recommended the village attorney be contacted regarding whether an individual can serve on boards, committees, or commissions for the

village if their accounts are in arrears. We noted no follow up action taken on this issue.

Section 115.346, RSMo, provides that "no person shall be certified as a candidate for municipal office, nor shall such person's name appear on the ballot as a candidate for such office, who shall be in arrears for any unpaid city taxes or municipal user fees on the last day to file a declaration of candidacy for the office."

Recommendations

The Village of Indian Point Board of Trustees:

9.1 Ensure Board members abstain from voting when a relative's appointment is involved, and consult legal counsel regarding the nepotism issue.

9.2 Ensure candidates for village office possess the statutory qualifications for holding office. The Board of Trustees should also consider seeking legal advice from the village attorney regarding the situation.

Auditee's Response

The Village of Indian Point Board of Trustees provided the following response:

We will comply.

10. Capital Assets

The village does not maintain records for its capital assets including land, buildings, equipment, and other property. Also, property is not tagged for specific identification, and an annual physical inventory is not performed.

Along with providing a basis for determining proper insurance coverage, adequate capital asset records are necessary to secure better internal controls and safeguard village assets that are susceptible to loss, theft, or misuse. A detailed capital asset list should include all pertinent information for each asset, including description, cost, acquisition date, identification number, and location; date and method of disposition; and accumulated depreciation, if applicable.

Recommendation

The Village of Indian Point Board of Trustees ensure adequate capital asset records are maintained, assets are tagged as owned by the village, annual physical inventories are performed, and records are periodically compared to the village's insurance coverage.

Auditee's Response

The Village of Indian Point Board of Trustees provided the following response:

We will implement this recommendation.

Village of Indian Point
Organization and Statistical Information

The Village of Indian Point is located in Stone County. The village was incorporated in 1989. The village employed two full time employees at December 31, 2009.

The village provides law enforcement services and maintains village roads. In addition, in 2004, the Board of Trustees established a Board of Public Works (BPW) to operate a sewer system.

Board of Trustees

The village government consists of a chairman and four-member board. The members are elected for 2-year terms. The members of the Board of Trustees, at December 31, 2009, are identified below. Members of the Board of Trustees are not compensated.

Dave Rawson, Chairman
Tim Stout, Vice Chairman
Dave Canaday, Secretary/Treasurer
Larry Stenzel, Member
Greg Fier, Member

Board of Public Works

The BPW consists of a chairman and three-member board. The members are appointed by the Board of Trustees and serve 4-year terms. The members of the BPW at December 31, 2009, are identified below. Members of the BPW are not compensated.

Jim Daily, Chairman
Bill Turner, Vice Chairman
Sheila Canaday, Secretary/Treasurer

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

The Village of Indian Point did not receive any federal stimulus monies during the year ended December 31, 2009.

Financial Activity

A summary of the village's financial activity for the year ended December 31, 2009, follows:

Village of Indian Point
Year Ended December 31, 2009

RECEIPTS	General Fund	Road Fund*	Capital Project Fund	BPW Sewer Operating Fund	BPW Sewer Bond & Grant Funds	Total
Sales tax	$ 161,899	0	80,949	0	0	242,848

Missouri State Auditor

Compilation of 2010 Criminal Activity Forfeiture Act Seizures

February 2011

Report No. 2011-08

auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Compilation of 2010 Criminal Activity Forfeiture Act Seizures

Disposition of Seized Property

Missouri's Criminal Activity Forfeiture Act (CAFA) requires prosecuting attorneys and the Attorney General to submit an annual report to the State Auditor's office summarizing the disposition of all property, including cash, seized pursuant to state law. The CAFA also requires all law enforcement agencies participating in the federal forfeiture system to acquire an independent audit of the federal seizures and proceeds received and to provide a copy of such audit to the State Auditor's office.

These requirements are not being met. The State Auditor's office did not receive *any* of the specific independent audit reports from law enforcement agencies required by Section 513.653, RSMo, and prosecuting attorneys from the following counties failed to submit the report required by Section 513.607, RSMo: Benton, Carter, Gentry, Montgomery, Perry, Saline, Washington, Wayne, and Webster.

Without the required reports, it is impossible to accurately value the property seized within Missouri's borders and determine what percentage of that property is being turned over to federal agencies rather than going to the benefit of Missouri schools. It is estimated, however, that tens of millions of dollars were seized within the confines of Missouri's borders in 2010, but less than $26,000 went to Missouri public schools. Another $300,000 was returned to the owner and almost $1 million remained pending at this writing.

Current Law

The state of Missouri and the federal government have very different procedures for the seizure and forfeiture of property associated with criminal activity.

Under current Missouri law, property seized in connection with a crime is held until the criminal process is complete. If no criminal conviction is obtained, the property must be returned to the owner. If a criminal conviction is obtained, all proceeds from the forfeited property must go to the benefit of Missouri's public school building revolving fund.

Under the federal forfeiture system, no criminal conviction is required. Property seized in connection with a crime is subject to a civil forfeiture proceeding and can be forfeited upon a much lower showing than in a criminal proceeding. Missouri's public schools do not receive any proceeds from forfeited property in the federal system. Instead, these proceeds benefit the federal government, except that a Missouri law enforcement agency assisting with the arrest may receive a small percentage of the proceeds in a practice called "equitable sharing."

There are two ways in which property seized within Missouri's borders may be transferred to a federal agency. After an arrest is made by a Missouri law

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

enforcement agency, the prosecuting attorney may determine that the underlying crime is truly a federal crime, such as a crime occurring in multiple states, and transfer the seized property and prosecutorial responsibility to a federal agency. In 2010, of the $5.7 million seized under state law, over $4 million was transferred to a federal agency in this manner.

Alternatively, Missouri law enforcement agencies sometime contact a federal agency to make the seizure directly. Because law enforcement agencies did not submit the statutorily-required reports, the value of such federal seizures is unknown, but it is estimated to be in the tens of millions based upon the amount of equitable sharing received by Missouri law enforcement agencies.

Importance of Reports

The required reports are necessary to ensure transparency and accountability and to allow an informed dialogue regarding possible reform. The State Auditor's office has sent a letter to those prosecuting attorneys and law enforcement agencies who failed to comply, reminding them of their statutory obligations.

Because of the nature of this compilation, no overall rating is provided.

Executive Summary 3

Appendixes

Appendix

I. 2010 CAFA Seizures Disposition Reported.....6

II. 2010 CAFA Seizures Required Information Reported.....9

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly
Jefferson City, Missouri

As required by Section 513.607, RSMo, we have compiled the 2010 Criminal Activity Forfeiture Act (CAFA) seizure reports submitted to the State Auditor by prosecuting attorneys and the Attorney General. A compilation is limited to presenting information that is submitted. We have not audited the reports submitted and, accordingly, do not express an opinion or any other form of assurance on them. The primary objectives of this compilation were to:

1. Identify those officials who submitted 2010 CAFA seizure reports to the State Auditor.

2. Summarize the 2010 CAFA seizure information reported.

Section 513.607, RSMo, requires prosecuting attorneys and the Attorney General to report CAFA seizures for the previous calendar year by January 31, to both the Director of the Department of Public Safety and the State Auditor. We received 89.6 percent of the CAFA seizure reports by the required due date of January 31, 2011.

The State Auditor has not received any specific audit reports from law enforcement agencies as required by Section 513.653, RSMo. Law enforcement agencies involved in using the federal forfeiture system are required to acquire an independent audit of the federal seizures and proceeds received and provide such audit to the law enforcement agency's respective governing body and to the Director of Public Safety. A copy of such audit is also to be provided to the State Auditor's office.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
In-Charge Auditor:	Becky Webb, CPA
Audit Staff:	Dana Wansing

Compilation of 2010 Criminal Activity Forfeiture Act Seizures Executive Summary

The state Criminal Activity Forfeiture Act (CAFA) is defined in Sections 513.600 to 513.653, RSMo.

Compliance with Submitting CAFA Seizures Reports

The State Auditor received a total of 107 (92.2 percent) of the 116 CAFA seizure reports required by Section 513.607, RSMo, from prosecuting attorneys and the Attorney General for property seized in calendar year 2010. Of the 107 reports received, 104 of the reports were received by the January 31, 2011 deadline. The following table lists the total number of CAFA seizure reports submitted to the State Auditor for 2010, 2009, and 2008.

Reporting Status	2010		2009 [1]		2008	
By January 31	104	89.6 %	100	86.2 %	98	84.5 %
After January 31	3	2.6	6	5.2	15	12.9
Total Reported	107	92.2	106	91.4	113	97.4
Failed to Report	9	7.8	10	8.6	3	2.6
Total Reports Required	116	100.0 %	116	100.0 %	116	100.0 %

[1] Includes a CAFA seizure report submitted by a prosecuting attorney to the State Auditor after the 2009 report was issued. This report included only the disposition of a seizure prior to 2009.

Prosecutors that Failed to Report 2010 CAFA Seizures or Submitted Report Late

The following table lists the prosecuting attorneys that either submitted the 2010 CAFA seizure report after January 31, 2011, or failed to submit a 2010 CAFA seizure report. Section 513.607.10, RSMo, states intentional or knowing failure to comply with any reporting requirement shall be a class A misdemeanor punishable by a fine of up to $1,000.

Prosecuting Attorney	Failed to Report	Submitted Late
Benton	X	
Carter	X	
Dent		X
Gentry	X	
Montgomery	X	
Perry	X	
Saline	X	
Ste. Genevieve		X
Vernon		X
Washington	X	
Wayne	X	
Webster	X	
Total	9	3

In addition, the DPS was contacted to determine CAFA Seizure reports received by the DPS. We noted 7 counties (Callaway, Clark, DeKalb, Moniteau, Scott, Sullivan and Texas) submitted the required copy of the CAFA Seizure Report to the State Auditor but did not submit a copy to the DPS.

Disposition of the Seizures Reported

The following table lists the dollar value of the disposition of seizures reported.

Reported Disposition[2]	2010		2009		2008	
Pending	$ 971,398	17 %	$ 2,383,413	42 %	$ 1,377,108	20 %
Returned	291,638	5	237,730	4	179,582	3
Transferred to Federal Agency	4,255,770	75	2,761,010	49	5,183,935	75
Transferred to State	25,974	0	30,673	1	58,532	1
Disposition Not Reported	5,430	0	85,876	2	83,979	1
Other	152,129	3	120,833	2	0	0
Total	$ 5,702,339	100 %	$ 5,619,535	100 %	$ 6,883,136	100 %

[2] The disposition of the CAFA seizures reported was compiled from the reports submitted by the prosecuting attorneys and the Attorney General.

See Appendix I for a list of the 2010 CAFA seizures disposition reported by each prosecuting attorney and the Attorney General.

Compliance with Reporting the Required Information

Section 513.607.8, RSMo, requires prosecuting attorneys and the Attorney General to report the date, time, and place of the seizure; property seized; estimated value of the property seized; person(s) from whom the property was seized; criminal charges filed; and disposition of the seizure, forfeiture, and criminal actions. The following table lists the required information for the CAFA seizure reports received and the number of cases that reported each required item. Some reports did not include all of the required information; therefore, our compilation includes only the information reported.

Required Information	2010		2009		2008	
Date	460	99.6 %	442	99.8 %	1,136	99.6 %
Time	312	67.5	322	72.7	960	84.1
Place of Seizure	456	98.7	436	98.4	1,131	99.1
Property Seized	462	100.0	443	100.0	1,140	99.9
Estimated Value of Property Seized	435	94.2	431	97.3	1,119	98.1
Person(s) Property Seized From	462	100.0	443	100.0	140	12.3
Criminal Charges Filed	228	49.4	225	50.8	943	82.6
Disposition of Seizure	462	100.0	443	100.0	1,137	99.6
Disposition of Criminal Actions	367	79.4	380	85.8	1,000	87.6
Total Cases Reported	462	100.0 %	443	100.0 %	1,141	100.0 %

The decrease in the number of seizures from 2008 to 2009 appears primarily due to the fluctuation in the number of seizures reported by St. Louis City. In 2008, St. Louis City reported 702 seizures including 583 vehicles. In 2009, St. Louis City reported 66 seizures with no vehicle seizures reported.

See Appendix II for a list of the number of 2010 CAFA seizure cases that contained the required information reported for each prosecuting attorney and the Attorney General.

Compliance with Submitting Federal Forfeiture Audit Reports

The State Auditor has not received any specific independent audit reports from law enforcement agencies required by Section 513.653, RSMo. Law enforcement agencies involved in using the federal forfeiture system are required to acquire an independent audit of the federal seizures and proceeds received and provide such audit to the law enforcement agency's respective governing body and to the DPS. A copy of such audit is also to be provided to the State Auditor's office.

Section 513.653.2, RSMo, states intentional or knowing failure to comply with the audit requirement shall be a class A misdemeanor, punishable by a fine of up to $1,000.

Compilation of 2010 Criminal Activity Forfeiture Seizure Act Appendix I
2010 CAFA Seizures Disposition Reported

Reporting Entity	Estimated[1] Value of all Cases Reported	Status Reported as of December 31, 2010

[1] DNF - Did not file a 2010 CAFA seizure report with the State Auditor's Office.

This appendix compiles only the information reported to the State Auditor by prosecuting attorneys and the Attorney General, we did not verify this data. In analyzing this appendix, some disparity may result due to the different methods used by the various prosecuting attorneys and the Attorney General in presenting essentially the same information. In addition, not all seizure reports included an estimated value of the property seized and not all reports included the disposition of all seizures reported.

Thomas A. Schweich

Missouri State Auditor

JUDICIARY

Missouri Court of Appeals

Southern District

February 2011

Report No. 2011-07

auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Missouri Court of Appeals, Southern District

Payroll and Personnel Policies and Procedures	There is no supervisory review of payroll duties, most employees are not required to complete timesheets, and leave records are not adequately documented. This makes it difficult to identify errors and ensure all transactions are legitimate. We discovered one employee was overpaid by more than $2,000 in a 15-month period, and another employee's leave balance was short 8 days. The court chooses not to use the state's human resources system (SAM II-HR) for tracking time and leave.
Receipts and Deposits	During the 3 years ended June 30, 2010, the court collected approximately $17,500 in filing and copy fees, but these monies are not promptly recorded or reconciled to deposits, and manual receipt slips are not reconciled to the Justice Information System. This makes it difficult to document all monies collected are deposited.
Law Library	The court spent over $450,000 on law library publications and subscriptions during the 3 years ended June 30, 2010, but there is no evidence physical inventories are performed. The library is maintained for the benefit of court personnel and the community, and steps should be taken to preserve its assets.
Additional Comments	We evaluated the court's internal controls over significant management and financial functions, including receipt and disbursement procedures. We also evaluated the court's compliance with certain legal provisions, including rules governing filing fees and procurement of goods and services. For the areas audited, no significant deficiencies, other than those noted above, were identified.

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)	During the year ended June 30, 2010, the court spent $76,309 of ARRA monies, appropriated from the Federal Budget Stabilization - Medicaid Reimbursement Fund, to fund general operations.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Chief Judge and Court en banc
Missouri Court of Appeals, Southern District
Springfield, Missouri

We have audited certain operations of the Missouri Court of Appeals, Southern District, in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the years ended June 30, 2010, 2009, and 2008. The objectives of our audit were to:

1. Evaluate the court's internal controls over significant management and financial functions.

2. Evaluate the court's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the court, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the court's management and was not subjected to the procedures applied in our audit of the court.

For the areas audited, we identified (1) deficiencies in internal controls, (2) no significant noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures for the areas audited. The accompanying Management Advisory Report presents our findings arising from our audit of the Missouri Court of Appeals, Southern District.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Kim Spraggs, CPA
In-Charge Auditor:	Ted Fugitt, CPA

Missouri Court of Appeals
Southern District
Management Advisory Report - State Auditor's Findings

1. Payroll and Personnel Policies and Procedures

Several concerns related to the Missouri Court of Appeals, Southern District's (court) payroll and personnel policies and procedures were identified.

The court has two groups of employees. Court support staff, which includes the fiscal officer, librarian, computer information specialist, marshal, court clerks, staff counsel, and research attorney, work for the court overall and report to the Court Clerk. In addition, each judge has one law clerk and one judicial administrative assistant; and two additional law clerks rotate between the judges. All court employees (except the marshal) work full-time and are provided a salary and the same benefits as other state employees, with the exception of annual leave and sick leave for law clerks. Payroll expenditures total approximately $2 million each year, representing approximately 87 percent of the court's total expenditures.

1.1 Payroll controls

There is no supervisory review of the payroll duties performed by the fiscal officer. The fiscal officer enters payroll information, including salary and employee information, into the Statewide Advantage for Missouri - Human Resources/Payroll (SAM II-HR) System with no supervisory approval or review. Our review of salaries paid to six court employees noted an instance where an employee was overpaid a total of $2,324 from July 2009 to September 2010, when we brought the error to the court's attention. The overpayment occurred because the former fiscal officer entered incorrect salary information for the employee, who was granted a salary increase effective July 1, 2009, providing the employee a higher increase than authorized. The error was not detected because there is no supervisory review of the fiscal officer's SAM II-HR System entries or monthly payroll reports.

To ensure payroll transactions are proper and errors are detected and corrected timely, the court should require supervisory review of payroll records.

1.2 Timesheets

Timesheets are not prepared by court employees, except for some judicial administrative assistants. Our review of procedures and records maintained for two of the seven judicial administrative assistants noted one did not prepare timesheets, and the timesheets prepared by the other judicial assistant listed only holidays and leave taken and were not signed by the employee or the supervising judge.

To ensure payroll costs are adequately documented, records detailing hours worked or leave taken should be prepared by all employees, approved by their supervisor, and filed with the fiscal office.

1.3 Leave records and policies

Records of leave earned, used, and accumulated are not always accurate, in compliance with the court leave policy, or centrally maintained. In addition, the court has not established a leave policy for law clerks.

The court has no centralized record of leave earned and taken by employees. Although state employee annual leave and sick leave can be tracked in the SAM II-HR System, the court has opted to maintain manual leave records instead. Each judge is responsible for maintaining leave records for his or her employees and the Court Clerk is responsible for maintaining leave records for all other court employees. Our review of leave records for five employees during the 3 years ended June 30, 2010, noted inconsistencies, calculation errors, and noncompliance with the court leave policy.

Our review of leave records maintained by two judges for their judicial administrative assistants noted the leave records for one assistant contained calculation errors, and the annual leave balance consistently exceeded the 36-day maximum provided by the leave policy. The assistant's annual leave balance at September 30, 2010, was 67.5 days.

Our review of leave records maintained by the Court Clerk for three employees noted several instances where calculation errors were made and leave balances were incorrectly calculated. For example, the monthly annual leave accrual for one employee was not increased in May 2007 from 1.25 to 1.5 days, when the employee reached 10 years of state employment, as provided by the leave policy. In January 2010, the Court Clerk identified the error and revised the employee's monthly accrual rate, but did not adjust the employee's annual leave balance for the additional 8 days previously earned but not recorded.

Leave records for all court employees should be maintained centrally and monitored to provide assurance the balances are accurate and in compliance with the leave policy, and employees are treated equitably. Centralized leave records also provide support for the amount of accumulated leave to be paid to an employee upon termination. The court should consider using the SAM II-HR System time and leave tracking capabilities to help address many of the conditions noted above.

Law clerks' leave

The court has not established a leave policy for law clerks. Law clerks do not accrue annual leave or sick leave, but are given time off at the discretion of the judge for whom they work. Both judges interviewed regarding leave practices for their law clerks indicated they have not established standard amounts of time off they provide their law clerks, and they do not maintain records of leave provided. During our audit fieldwork, one law clerk was on paid maternity leave; however, there was no record of the amount of time off the clerk was allowed.

Court personnel could provide no explanation or justification of the current practices for handling time off for law clerks. The Court Clerk indicated this arrangement was established many years ago when law clerks were temporary employees and worked for the court for approximately a year. However, she indicated law clerks now work for the court for longer terms. A written leave policy for law clerks is necessary to provide assurance these employees are treated equitably and to prevent misunderstandings.

Recommendations

The Court Clerk:

1.1 Perform a supervisory review of the payroll duties performed by the fiscal officer and work with the Court en banc to develop a plan for obtaining repayment of the salary overpayment.

1.2 And the Court en banc require a record of hours worked or leave taken be prepared and signed by all employees, approved by their supervisor, and filed with the fiscal office.

1.3 And the Court en banc maintain complete, accurate, and centralized leave records for all employees, and periodically monitor those records for compliance with the court leave policy. In addition, the court should consider using the SAM II-HR System time and leave tracking capabilities, and establishing a leave policy for law clerks.

Auditee's Response

1.1 We already have started on the first part of this, and the Court en banc is considering how best to handle the second part.

1.2 &1.3 The report does not find any noncompliance with our legal obligations as to 1.2 or 1.3, which also is our belief. To our knowledge, our law clerk practices in these respects are consistent with Missouri's other appellate courts, including those of our Supreme Court when it was last audited.

2. Receipts and Deposits

The court should improve policies and procedures related to receipts. The court receives filing fees ($70 per case) and monies for copies of various court records and documents. Court receipts totaled approximately $17,500 during the 3 years ended June 30, 2010. Of this amount, approximately 84 percent was filing fees and 16 percent was copy fees.

Receipt slips are not issued for some monies received by the court. Deputy clerks receive filing and copy fees in the mail or in person, and issue manual receipt slips when requested by the payer. The librarian records copy monies received in the law library in a manual receipt log and issues manual receipt slips upon request. The following concerns were noted during our review of the court's receipting and depositing procedures:

- Filing fee receipts are not always entered in the Justice Information System (JIS) in a timely manner. A cash count performed on May 20, 2010, identified two receipts, received 8 and 12 business days earlier, had not been posted to JIS.
- Manual receipt slips issued for filing fees are not reconciled to the JIS. The corresponding JIS receipt number is not recorded on the manual receipt slips after the information has been entered in the JIS and there is no independent review to ensure all applicable manual receipt slips are properly posted to the JIS.
- Filing fee receipts posted to the JIS are not reconciled to deposits. Although the fiscal officer runs a cashier's report at the end of each month, there was no documentation that receipts were reconciled to deposits. In addition, procedures have not been established to reconcile manual copy receipts to deposits.
- Court receipts are not always deposited on a timely basis. Deposits are only made 2 to 3 times per month.
- Checks are not restrictively endorsed when received. Endorsements are applied when the deposit is prepared by the fiscal officer.

To adequately safeguard and account for all receipts, procedures should be established to ensure monies are recorded immediately upon receipt on either manual receipt slips or entries to the JIS, manual receipt slips are recorded timely, receipts are reconciled to deposits, deposits are made in a timely manner, and checks are restrictively endorsed immediately upon receipt.

Recommendation

The Court Clerk establish procedures to ensure monies are recorded immediately upon receipt on either manual receipt slips or entries to the JIS, manual receipt slips are recorded timely, receipts are reconciled to deposits, deposits are made in a timely manner, and checks are restrictively endorsed immediately upon receipt.

Auditee's Response

We already have begun doing so.

3. Law Library

Court personnel could provide no documentation to support physical inventories of law library materials were performed. The Law Library, which includes legal publications kept in the library, in each of the judges' offices, and the law clerks' reading room, is maintained for use by court personnel and the community. Expenditures for law library publications and subscriptions, which represent approximately 50 percent of all court expenditures excluding payroll, totaled approximately $456,000 during the 3 years ended June 30, 2010.

Although the court librarian, who was hired in January 2010, indicated she believes the previous librarian conducted semi-annual physical inventories, she could provide no documentation these inventories had been performed.

Physical inventories of law library materials, and reconciliation of those inventories to the inventory records, are necessary to ensure inventory records are accurate, identify unrecorded additions and dispositions, detect and deter theft of assets, and identify obsolete materials.

Recommendation

The Court Clerk ensure periodic physical inventories of law library materials are performed, reconciled to inventory records, and documented.

Auditee's Response

We are reviewing our inventory process.

Missouri Court of Appeals
Southern District
Organization and Statistical Information

The Missouri Court of Appeals, Southern District, was created under an act of the General Assembly in 1909, and is governed by Article V, Missouri Constitution, and Chapter 477, RSMo. The court has appellate jurisdiction over 44 counties in Southern Missouri, except for those cases within the exclusive jurisdiction of the Supreme Court. The court has its offices in Springfield, Missouri and also maintains a courtroom and chambers in the Butler County Courthouse in Poplar Bluff, Missouri. The court holds oral arguments in January, March, June, and September in Springfield; and in April and October in Poplar Bluff. The judges sit in two divisions, each with three or four judges, that rotate on an annual basis.

Judges and Court Personnel

The court is composed of seven judges whose salaries are set by statute. Judges are selected under the Missouri Plan, which includes selection by the Appellate Judicial Commission, appointment by the Governor, and retention by voters. Judges must be at least 30 years old, residents of their district, United States citizens for at least 15 years, and Missouri voters for 9 years before their selection. Judges serve 12-year terms. The judges elect a chief judge to serve a 2-year term. At June 30, 2010, the judges of the Missouri Court of Appeals, Southern District, were as follows:

Name and Title	Term Expires
Daniel E. Scott, Chief Judge	December 31, 2020
Robert S. Barney	December 31, 2022
Nancy Steffen Rahmeyer	December 31, 2014
Jeffrey Wayne Bates	December 31, 2018
Gary Lynch	December 31, 2020
Don Burrell, Jr.	December 31, 2022
William W. Francis, Jr.	December 31, 2012 (1)

(1) Voters will determine in the November 2012 general election whether to retain Judge Francis for a term expiring December 31, 2024.

Sandra L. Skinner has served as Court Clerk since May 1989. The clerk of the court supervises the internal administrative functions of the court and reports directly to the chief judge. In addition to the judges and the Court Clerk, the court employed 22 full-time employees and 1 part-time employee at June 30, 2010.

The court spent American Recovery and Reinvestment Act of 2009 monies of $76,309 during the year ended June 30, 2010. These monies were appropriated to the court from the Federal Budget Stabilization - Medicaid Reimbursement Fund (see Appendix B) and were used to fund general operations of the court.

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Seventh Judicial Circuit, City of Holt Municipal Division

Segregation of Duties	Accounting duties are not segregated, and a documented supervisory review of accounting records is not performed, making it difficult to ensure transactions are properly recorded and assets are safeguarded.
Additional Comments	We evaluated the municipal division's internal controls over significant financial functions, including receipt and disbursement procedures, and its compliance with certain legal provisions, including rules governing fines, costs, and bonds. For the areas audited, no significant deficiencies, other than those noted above, were identified.

In the areas audited, the overall performance of this entity was **Fair**.*

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)	The Seventh Judicial Circuit, City of Holt Municipal Division did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Management Advisory Report - State Auditor's Findings
1. Segregation of Duties 4

Organization and Statistical Information 5

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge
Seventh Judicial Circuit
and
Municipal Judge
Holt, Missouri

We have audited certain operations of the City of Holt Municipal Division of the Seventh Judicial Circuit in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended March 31, 2010. The objectives of our audit were to:

1. Evaluate the municipal division's internal controls over significant financial functions.

2. Evaluate the municipal division's compliance with certain legal provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the municipal division, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the municipal division's management and was not subjected to the procedures applied in our audit of the division.

For the areas audited, we identified (1) deficiencies in internal controls, and (2) no significant noncompliance with legal provisions. The accompanying Management Advisory Report presents our finding arising from our audit of the City of Holt Municipal Division of the Seventh Judicial Circuit.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Todd M. Schuler, CPA
In-Charge Auditor:	Richard Stuck

1. Segregation of Duties

Accounting duties are not segregated and a documented supervisory review of accounting records is not performed. Proper segregation of duties is not possible because the Court Clerk is the only employee of the municipal division. The Municipal Judge does not perform any review of the accounting records, such as a review of bank reconciliations or a comparison of receipts slips issued to amounts deposited. As a result, there is less assurance all transactions are accounted for properly and assets are adequately safeguarded.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of duties is not possible, an independent review of the work performed by the Court Clerk is necessary.

Recommendation

The City of Holt Municipal Division ensure a periodic independent review of the municipal division's records is performed and documented. Any unusual items or discrepancies should be investigated.

Auditee's Response

The Court Clerk provided the following response:

I will discuss this recommendation with the Municipal Judge and we will determine the best way to implement oversight procedures.

Seventh Judicial Circuit
City of Holt Municipal Division
Organization and Statistical Information

The City of Holt Municipal Division is in the Seventh Judicial Circuit, which consists of Clay County. The Honorable Anthony Rex Gabbert serves as Presiding Judge

The municipal division is governed by Chapter 479, RSMo, and by Supreme Court Rule No. 37. Supreme Court Rule No. 37.49 provides that each municipal division may establish a violation bureau in which fines and costs are collected at times other than during court and transmitted to the city treasury.

Personnel

At March 31, 2010, the municipal division employees were as follows:

Title	Name
Municipal Judge	William Shull
Court Clerk	Debbie Reeves

Financial and Caseload Information

	Year Ended March 31, 2010
Receipts	$40,784
Number of cases filed	474

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

The Seventh Judicial Circuit, City of Holt Municipal Division, did not receive any federal stimulus monies during the year ended March 31, 2010.

Fourth Judicial Circuit

City of Maryville
Municipal Division

February 2011

Report No. 2011-05

auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Fourth Judicial Circuit, City of Maryville Municipal Division

Accounting Procedures	The municipal division did not adequately reconcile the bond account to the bond liabilities list, making it difficult to ensure sufficient funds are available for payment of liabilities. The book balance of the bond account is overstated due to several non-sufficient funds checks. Adequate procedures need to be developed to investigate outstanding checks in the bond account to help ensure monies are appropriately disbursed. The bank reconciliation included checks totaling over $1,500 that have been outstanding for over 9 years (one for over 20 years).
Tickets	Neither the police department nor the municipal division maintains adequate records to account for traffic tickets or parking tickets. Because tickets are not adequately tracked by number and ultimate disposition, the municipal division cannot be sure all tickets assigned and issued are properly submitted or voided. The municipal division has not developed adequate procedures for collecting approximately 1,020 unpaid parking tickets and has not issued warrants for some of these unpaid tickets.
Additional Comments	We evaluated the municipal division's internal controls over significant financial functions, including receipt and disbursement procedures, and its compliance with certain legal provisions, including rules governing fines, costs, and bonds. For the areas audited, no significant deficiencies, other than those noted above, were identified.

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act (Federal Stimulus)	The Fourth Judicial Circuit, City of Maryville Municipal Division, did not receive any federal stimulus monies during the audited time period.

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. Organization and Statistical Information 8

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge
Fourth Judicial Circuit
and
Municipal Judge
Maryville, Missouri

We have audited certain operations of the City of Maryville Municipal Division of the Fourth Judicial Circuit in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended September 30, 2009. The objectives of our audit were to:

1. Evaluate the municipal division's internal controls over significant financial functions.

2. Evaluate the municipal division's compliance with certain legal provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the municipal division, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the municipal division's management and was not subjected to the procedures applied in our audit of the division.

For the areas audited, we identified (1) deficiencies in internal controls, and (2) noncompliance with legal provisions.

The accompanying Management Advisory Report presents our findings arising from our audit of the City of Maryville Municipal Division of the Fourth Judicial Circuit.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Todd M. Schuler, CPA
In-Charge Auditor:	Richard Stuck
Audit Staff:	Nathaniel Fast, M.Acct., CPA

1. Accounting Procedures

The municipal division did not adequately investigate a difference which existed between the reconciled balance of the bond account and the bond liabilities list, and numerous old bonds remain on hand related to inactive cases. The book balance of the bond account has not been adjusted for several non-sufficient funds (NSF) checks received by the municipal division in prior years, and some checks written on the account have been outstanding for many years.

1.1 Bond liabilities

The municipal division did not adequately investigate a $393 difference between the reconciled balance of the bond account and the bond liabilities list, and several old bonds remain on the list. At February 28, 2010, the reconciled balance of the bond account was $20,955, while the bond liabilities list totaled $21,348. This difference has existed for years, but no follow up action was taken. After we notified the municipal division of the difference in November 2010, a $325 error, which occurred in 2003, was discovered and corrected. After this correction, the unidentified difference is $68. In addition, nine bonds, totaling $1,511, have been on hand since the 1990s and another eight bonds, totaling $2,464, have been on hand more than 4 years.

Monthly lists of liabilities should be prepared and reconciled to cash balances to ensure accounting records are in balance and sufficient funds are available for the payment of liabilities. To properly monitor bonds and ensure monies are appropriately disbursed as provided by state law, procedures should be established to routinely investigate bonds remaining on the liabilities list over a specified period of time. Section 479.210, RSMo, authorizes bonds to be forfeited and paid over to the city treasury if the defendant failed to appear in court. If the bond is to be refunded but the payee cannot be located, Section 447.595, RSMo, requires bonds remaining unclaimed for a year after disposition of the case be turned over to the state Unclaimed Property Section.

1.2 Bank reconciliations

The book balance of the bond account is overstated and has to be adjusted each month to reconcile to the bank balance. This overstatement is caused by several NSF checks received and not adjusted when returned by the bank. On the February 28, 2010, bank reconciliation the book balance was reduced by $2,728, related to three NSF checks totaling $2,335 and a $393 difference that has existed for years (see section 1.1).

Failure to adjust the book balance for NSF checks results in inaccurate accounting records.

1.3 Outstanding checks

The municipal division has not developed adequate procedures to follow up on outstanding checks in the bond account. The February 28, 2010, bank reconciliation for the bond account, prepared by the Finance Director,

included eight checks, totaling $1,549, which have been outstanding for over 9 years, with one check over 20 years old.

To properly monitor disbursements and ensure monies are appropriately disbursed to the payee or as otherwise provided by state law, procedures should be established to routinely investigate outstanding checks.

Recommendations

The City of Maryville Municipal Division:

1.1 Work with the city to ensure the liabilities list for the bond account is accurate and reconciles to the reconciled account balance, and ensure outstanding bonds are investigated and disposed in accordance with state law.

1.2 Work with the city to identify items improperly included in the book balance of the bond account and make adjusting entries as necessary.

1.3 Work with the city to implement adequate procedures to follow up on outstanding checks.

Auditee's Response

The Municipal Judge, City Manager, and City Finance Director jointly provided the following written response:

1.1 While the City and the Court system do ensure the bond liability account is accurately reconciled each month, the Court will investigate old bonds routinely for proper disposition.

1.2 While the book balance and bank balance do agree each month, other than for routine reconciling items such as outstanding checks and non-sufficient funds checks, the City and Court will communicate with each other regarding the necessary follow up action on these outstanding items.

1.3 The Court will routinely follow up on outstanding checks to determine the appropriate action to be taken.

2. Tickets

Uniform citations and parking tickets are not accounted for adequately by either the police department or municipal division. The municipal division has not established procedures to follow up on unpaid parking tickets.

2.1 Ticket accountability

Neither the police department nor the municipal division maintains adequate records to account for traffic tickets or parking tickets assigned and issued, and their ultimate disposition. As a result, there is no assurance all citations are accounted for properly. A record is maintained of traffic ticket books assigned to officers. Traffic tickets issued are supposed to be posted to a

computer spreadsheet; however, not all tickets are posted and the numerical sequence of tickets is not accounted for adequately. A record is not maintained of parking ticket books assigned to officers and no tracking system has been developed for parking tickets.

Without a proper accounting for the numerical sequence and ultimate disposition of tickets, the police department and the municipal division cannot be assured all tickets assigned and issued are properly submitted to the division. A log listing ticket books assigned, each ticket number, the date each ticket is issued, and the violator's name, which is reviewed by an independent person, would help ensure all tickets issued are submitted to the municipal division for processing or properly voided. A record of the ultimate disposition of each ticket should also be maintained to ensure all tickets have been accounted for properly.

2.2 Unpaid parking tickets

The municipal division has not developed adequate procedures for collecting unpaid parking tickets. Parking tickets received from the Police Department are entered by the Court Administrator into a spreadsheet, sorted by license number, and deleted from the spreadsheet once paid. While the Court Administrator indicates a summons is issued for unpaid parking tickets and warrants are issued in some instances, warrants have not been issued for some unpaid parking tickets. As of August 1, 2010, there were approximately 1,020 unpaid parking tickets still listed in the spreadsheet, some dating back to January 2006. Many of the license numbers had multiple tickets, with one vehicle issued 10 parking tickets between March 2007 and April 2008.

To increase revenue and deter citizens from disregarding parking tickets in the future, the municipal division should institute procedures to collect amounts owed for parking tickets.

Recommendations

The City of Maryville Municipal Division:

2.1 Work with the Police Department to ensure the numerical sequence and ultimate disposition of all tickets issued are accounted for properly.

2.2 Establish adequate procedures to collect unpaid parking fines owed the municipal division and discuss with city personnel options available to pursue collection of unpaid parking tickets.

Auditee's Response

The Municipal Judge, City Manager, and City Finance Director jointly provided the following written response:

2.1 The City of Maryville keeps records of citation books issued and the sequence of numbers is determined in each book. Citations issued

are cataloged into the City's law enforcement database and all final dispositions are recorded in the database accordingly for accountability purposes. Regardless, we have implemented additional steps and segregated duties to ensure accountability and tracking of all citations.

2.2 The City agrees there are outstanding parking tickets that have yet to be collected. The City however, does make every effort to locate, contact, and collect outstanding parking tickets and will continue to do so.

Fourth Judicial Circuit
City of Maryville Municipal Division
Organization and Statistical Information

The city of Maryville Municipal Division is in the Fourth Judicial Circuit, which consists of Atchison, Gentry, Holt, Nodaway, and Worth Counties. The Honorable Roger Prokes serves as Presiding Judge.

The municipal division is governed by Chapter 479, RSMo, and by Supreme Court Rule No. 37. Supreme Court Rule No. 37.49 provides that each municipal division may establish a violation bureau in which fines and costs are collected at times other than during court and transmitted to the city treasury.

Personnel

At September 30, 2009, the municipal division employees were as follows:

Title	Name
Municipal Judge	John Baker, Jr.
Court Administrator	Pat Castillo

Financial and Caseload Information

	Year Ended September 30, 2009
Receipts	$444,604
Number of cases filed	2,050

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

The Fourth Judicial Circuit, City of Maryville Municipal Division, did not receive any federal stimulus monies during the year ended September 30, 2009.

To the County Commission
The County of Shannon, Missouri

We have audited the accompanying financial statements of the County of Shannon ("County"), Missouri, as of and for the years ended December 31, 2009 and 2008, which collectively comprise the County's financial statements as listed in the table of contents. These financial statements are the responsibility of the County's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and the significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described more fully in Note I, the financial statements were prepared using accounting practices prescribed or permitted by the Missouri State Auditor's office, which differ from accounting principles generally accepted in the United States of America. The effects on the financial statements of the variances between these regulatory accounting practices and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

In our opinion, because of the effects of the matter discussed in the preceding paragraph, the financial statements referred to in the first paragraph do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial position of the County of Shannon, Missouri, at December 31, 2009 and 2008, or the changes in financial position for the years then ended.

In our opinion, the financial statements referred to in the first paragraph present fairly, in all material respects, the cash and investment balances of the governmental and agency funds of the County of Shannon, Missouri, as of and for the years ended December 31, 2009 and 2008, and the receipts, disbursements and budgetary results of the governmental funds for the years then ended, on the basis of accounting described in Note I.

3510 JEFFCO BOULEVARD • SUITE 200 • ARNOLD, MISSOURI 63010-3999 • 636-464-1330 • FAX 636-464-3076

In accordance with *Government Auditing Standards*, we have also issued our report dated December 20, 2010, on our consideration of the County's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

Our audit was conducted for the purpose of forming an opinion on the financial statements, taken as a whole that are referred to in the first paragraph. The accompanying Schedule of Expenditures of Federal Awards is presented for purposes of additional analysis as required by the U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profits Organizations*, and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the financial statements and , in our opinion, is fairly stated in all material respects in relation to the financial statements taken as a whole, that were prepared on the basis of accounting described in Note I.

The accompanying notes to the financial statements are an integral part of this statement.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The County of Shannon, Missouri ("County"), which is governed by a three-member board of commissioners, was established in 1841 by an Act of the Missouri Territory. In addition to the three board members, there are nine elected Constitutional Officers: County Clerk, Collector, Treasurer, Circuit Clerk and ex officio Recorder of Deeds, Sheriff, Assessor, Coroner, Public Administrator and Prosecuting Attorney.

As discussed further in Note I, these financial statements are presented on the regulatory basis of accounting. This basis of accounting differs from accounting principles generally accepted in the United States of America (GAAP).

A. Reporting Entity

As required by generally accepted accounting principles, as applicable to the regulatory basis of accounting, these financial statements present financial accountability of the County.

The County's operations include tax assessments and collections, state/county courts, county recorder, police protection, transportation, economic development, social and human services, and cultural and recreation services.

The financial statements referred to above include only the primary government of Shannon County, Missouri, which consists of all funds, organizations, institutions, agencies, departments, and offices that comprise the County's legal entity.

B. Basis of Presentation

The financial statements are presented using accounting practices prescribed or permitted by the Missouri State Auditor's Office, which include a Statement of Receipts, Disbursements and Changes in Cash and Investment Balances– All Governmental Funds, a Comparative Statement of Receipts and Disbursements and Changes in Cash and Investment Balances– Budget and Actual – All Governmental Funds, and a Statement of Assets and Liabilities Arising from Cash Transactions – Agency Funds.

Governmental resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled. A fund is considered a separate accounting entity with self-balancing accounts. The following fund types are used by the County:

Governmental Fund Types

Governmental funds are those through which most governmental functions are financed. The County's expendable financial resources are accounted for through governmental funds. The measurement focus is upon determination of and changes in financial position rather than upon net income.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

B. Basis of Presentation (concluded)

Fiduciary Fund Types

Agency – Agency funds are used to account for assets held by the County in a trustee capacity as an agent of individuals, private organizations, other funds or other governmental units. Agency funds are accounted for and reported similar to the governmental funds. Agency funds are custodial in nature (assets equal liabilities) and do not involve the measurement of results of operations. These funds account for activities of collections for other taxing units by the Collector of Revenue and other agency operations.

C. Basis of Accounting

Basis of accounting determines when transactions are recorded in the financial records and reported on the financial statements.

The financial statements are prepared on the regulatory basis of accounting. This basis of accounting recognizes amounts when received or disbursed in cash and differs from accounting principles generally accepted in the United States of America.

As a result of the use of this regulatory basis of accounting, certain assets (such as accounts receivable and capital assets), certain revenues (such as revenue for billed or provided services not yet collected), certain liabilities (such as accounts payable, certificates of participation bonds and obligations under capital leases) and certain expenditures (such as expenditures for goods or services received but not yet paid) are not recorded in these financial statements.

If the primary government utilized the basis of accounting recognized as generally accepted, the fund financial statements for governmental funds would use the modified accrual basis of accounting, while the fund financial statements for proprietary fund types, if applicable, would use the accrual basis of accounting. All government-wide financials would be presented on the accrual basis of accounting.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

D. Budget and Budgetary Accounting

The County follows these procedures in establishing the budgetary data reflected in the financial statements:

1. In accordance with Chapter 50 RSMo, the County adopts a budget for each governmental fund.

2. On or before January 15th, each elected officer and department director will transmit to the County Clerk, who serves as budget officer, the budget request and revenue estimates for their office or department for the budget year.

3. The County Clerk submits to the County Commission a proposed budget for the fiscal year beginning the following January 1. The proposed budget included estimated revenues and proposed expenditures for all budgeted funds. Budgeted expenditures cannot exceed beginning available monies plus estimated revenues for the year. Budgeting of appropriations is based upon an estimated unencumbered fund balance at the beginning of the year as well as estimated revenues to be received. The budget to actual comparisons in these financial statements, however, do not present encumbered fund balances, but only compare budgeted and actual revenues and expenditures. During our audit we noted that the County was noncompliant with Missouri budgetary state statute Chapter 50 RSMo.

4. A public hearing is conducted to obtain public comment. Prior to its approval by the County Commission, the budget document is available for public inspection.

5. Prior to February 1, the budget is legally enacted by a vote of the County Commission.

6. Subsequent to its formal approval of the budget, the County Commission has the authority to make necessary adjustments to the budget by formal vote of the Commission. Adjustments made during the year are reflected in the budget information in the financial statements.

   Budgeted amounts are as originally adopted, or as amended by the County Commission throughout the year. Individual amendments were not material in relation to the original appropriations which were adopted.

7. Budgets are prepared and adopted on the cash basis of accounting.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

E. Property Taxes

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on October 1 and tax bills are mailed to taxpayers in November, at which time they are payable. All unpaid property taxes become delinquent as of January 1, of the following year.

The assessed valuation of the tangible taxable property, included within the County's boundaries for the calendar year 2009 and 2008, for purposes of taxation was:

	2009	2008
Real Estate	$ 41,363,290	$ 39,568,640
Personal Property	21,977,331	22,574,477
Railroad and Utilities	2,765,459	2,980,205
	$ 66,106,080	$ 65,123,322

During 2009 and 2008, the County Commission approved a $1.4750 and $1.4840 tax levy respectively per $100 of assessed valuation of tangible taxable property for the calendar year 2009 and 2008, for purpose of County taxation, as follows:

	2009	2008
General Revenue Fund	$ 0.1920	$ 0.1920
Road and Bridge	0.2424	0.2424
Health Center	0.0967	0.1000
Sheltered Workshop	0.0943	0.0975
Senior Citizens	0.0484	0.0500
Timber Fire District	0.3000	0.3000
Ambulance Dist. 1	0.1304	0.1343
Ambulance Dist. 2	0.1755	0.1730
Salem Hospital	0.1950	0.1950
	$ 1.4750	$ 1.4840

F. Cash Deposits and Investments

Deposits and investments are stated at cost, which approximates market. Cash balances for all the County Treasurer Funds are pooled and invested to the extent possible. Interest earned from such investments is allocated to each of the funds based on the funds' average daily cash balance. Cash equivalents include repurchase agreements and any other instruments with an original maturity of ninety days or less.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

F. Cash Deposits and Investments (concluded)

State law authorizes the deposit of funds in banks and trust companies or the investment of funds in bonds or treasury certificates of the United States, other interest bearing obligations guaranteed as to both principal and interest by the United States, bonds of the State of Missouri or other government bonds, or time certificates of deposit, provided, however, that no such investment shall be purchased at a price in excess of par. Funds in the form of cash on deposit or time certificates of deposit are required to be insured by the Federal Deposit Insurance Corporation (FDIC) or collateralized by authorized investments held in the County's name at third-party banking institutions. Details of these cash balances are presented in Note II.

G. Interfund Transactions

During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. These receivables and payables, if applicable, are eliminated due to reporting the financial statements on the regulatory basis of accounting.

Legally required transfers are reported as "transfers in" by the recipient fund and as "transfers out" by the disbursing fund.

H. Reserved Fund Balance

Reserved fund balance represents the portion of fund balance that is not available for appropriation or is legally restricted for a specific purpose. Fund balance is unrestricted at December 31, 2009 and 2008.

II. DEPOSITS AND INVESTMENTS

The County maintains a cash and temporary investment pool that is available for use by all funds. Deposits with maturities greater than three months are considered investments. Each fund type's portion of this pool is displayed as "Cash and Investments" under each fund's caption.

Deposits - Missouri statutes require that all deposits with financial institutions be collateralized in an amount at least equal to uninsured deposits. At December 31, 2009 and 2008, the carrying amount of the County's deposits was $997,310.34 and $1,026,269.32, and the bank balance was respectively $2,950,122.22 and $2,472,185.37. As of December 31, 2009, 100% of the County's investments were guaranteed by the U. S. Government.

II. DEPOSITS AND INVESTMENTS (continued)

SUMMARY OF CARRYING VALUES

The carrying values of deposits and investments shown above are included in the financial statements at December 31, 2009, as follows:

Included in the following fund financial statement captions:

Statement of Receipts, Disbursements and Changes in Cash and Investment Balances		
Deposits	$	989,021.41
Investments		8,288.93
Total Deposits and Investments as of December 31, 2009	$	997,310.34

The carrying values of deposits and investments at December 31, 2008, are as follows:

Included in the following fund financial statement captions:

Statement of Receipts, Disbursements and Changes in Cash and Investment Balances		
Deposits	$	1,018,168.18
Investments		8,101.14
Total Deposits and Investments as of December 31, 2008	$	1,026,269.32

Custodial Credit Risk – Deposits

For a deposit, custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be returned to it. The County's investment policy does not include custodial credit risk requirements. The County's deposits were not exposed to custodial credit risk for the years ended December 31, 2009 and 2008.

Custodial Credit Risk – Investments

Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government, and are held by the party who sold the security to the County or its agent but not in the government's name. The County does not have a policy for custodial credit risk relating to investments.

All investments, evidenced by individual securities, are registered in the name of the County or of a type that are not exposed to custodial credit risk.

Investment Interest Rate Risk

Investment interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The County does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

II. DEPOSITS AND INVESTMENTS (concluded)

Concentration of Investment Credit Risk

Concentration of credit risk is required to be disclosed by the County for any single investment that represents 5% or more of total investments (excluding investments issued by or explicitly guaranteed by the U.S. Government, investments in mutual funds, investments in external investment pools and investments in other pooled investments). The County has no policy in place to minimize the risk of loss resulting from over concentration of assets in specific maturity, specific issuer or specific class of securities. The County's deposits were not exposed to concentration of investment credit risk for the years ended December 31, 2009 and 2008.

III. LEASES – CAPITAL

On July 22, 2005, the County obtained a five-year lease as lessee to finance the purchase of a motor grader. The lease provides for interest at a 4.3% interest rate. The lease options are through July 22, 2010.

On February 6, 2007, the County obtained a five-year lease as lessee to finance the purchase of a motor grader. The lease provides for interest at a 5.5% interest rate. The lease options are through February 6, 2013.

On July 20, 2009, the County obtained a three-year lease as lessee to finance the purchase of a wheel loader. The lease provides for interest at a 7.25% interest rate. The lease options are through July 20, 2013.

On November 30, 2009, the County obtained a two-year lease as lessee to finance the purchase of a motor grader. The lease provides for interest at a 4.4% interest rate. The lease options are through November 30, 2011.

2009

	Balance at December 31, 2008	Amount Borrowed	Amount Repaid	Balance at December 31, 2009	Interest Paid During Year

TOTALS	$ 84,972.05	$ 11,972.97	$ 96,945.02

IV. INTERFUND TRANSFERS

Transfers between funds for the years ended December 31, 2009 and 2008 are as follows:

	2009		2008	
FUNDS	TRANSERS IN	TRANSFERS OUT	TRANSERS IN	TRANSFERS OUT
General	$ 15,796.07	$ 468.59	$ 31,150.00	$ 15,694.00
Road and Bridge	-	-	-	31,150.00
Assessment	-	-	15,694.00	-
LEPC	588.59	-	-	-
Sheriff Civil	-	-	-	19,057.66
LEF	-	2,085.20	-	-
CVA	-	-	15,000.00	-
Title III	-	6,213.56	-	-
LERF	-	5,447.18	-	-
Family Service	2,000.00	-	-	-
MoSmart	-	-	4,057.66	-
Special Election	-	4,638.72	-	-
County Clerk	468.59	-	-	-
	$ 18,853.25	$ 18,853.25	$ 65,901.66	$ 65,901.66

Transfers are used to (1) move receipts from the fund that statute or budget requires to collect them to the fund that statute or budget requires to disburse them, and (2) use unrestricted receipts in the General Fund to finance various programs accounted for in other funds in accordance with budgetary authorizations.

V. COUNTY EMPLOYEES' RETIREMENT FUND (CERF)

A. Plan Description

CERF was established by an act of the Missouri General Assembly effective August 28, 1994. Laws governing the retirement fund are found in Sections 50.1000-50.1300 of the Missouri Revised Statutes (RSMo). The Board of Directors consists of eleven members, nine of whom are county employee participants. Two members, who have no beneficiary interest in CERF, are appointed by the Governor of Missouri. The Board of Directors has the authority to adopt rules and regulations for administering the system.

V. COUNTY EMPLOYEES' RETIREMENT FUND (CERF) (concluded)

A. Plan Description (concluded)

CERF is a mandatory cost-sharing multiple employer retirement system for each county in the state of Missouri, except any city not within a county (which excludes the City of St. Louis) and counties of the first classification with a charter form of government. CERF covers county elective or appointive officers or employees whose position requires the actual performance of duties not less than 1,000 hours per year; including employees of circuit courts located in a first class, non-charter county which is not participating in the Local Government Employees Retirement System (LAGERS); and does not cover circuit clerks, deputy circuit clerks, county prosecuting attorneys, and county sheriffs. Until January 1, 2000, employees hired before January 1, 2000 could opt out of the system. CERF is a defined benefit plan providing retirement and death benefits to its members. All benefits vest after 8 years of creditable service. Employees who retire on or after age 62 are entitled to an allowance for life based on the form of payment selected. The normal form of payment is a single life annuity.

Optional joint and survivor annuity and 10-year certain and life annuity payments are also offered to members in order to provide benefits to a named survivor annuitant after their death. Employees who have a minimum of 8 years of creditable service may retire with an early retirement benefit and receive a reduced allowance after attaining age 55.

Annual cost-of-living adjustments, not to exceed 1%, are provided for eligible retirees and survivor annuitants, up to a lifetime maximum of 50% of the initial benefit which the member received upon retirement. Benefit provisions are fixed by state statute and may be amended only by action of the Missouri Legislature. Administrative expenses for the operation of CERF are paid out of the funds of the system.

The County Employees' Retirement Fund issues audited financial statements. Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, P.O. Box 2271, Jefferson City, MO 65102-2271, or by calling 1-573-632-9203.

B. Contributions

Prior to January 1, 2003, participating county employees, except for those who participated in LAGERS, were required to make contributions equal to 2% of gross compensation. Effective January 1, 2003, in addition to the prior contributions requirements, participating county employees hired on or after February 25, 2002 are required to make contributions of 4% if they are in a LAGERS county and contributions of 6% if they are in a non-LAGERS county. If an employee leaves covered employment before attaining 8 years of creditable service, accumulated employee contributions are refunded to the employee. The contribution rate is set by state statute and may be amended only by action of the Missouri Legislature. During 2009 and 2008, the County collected and remitted to CERF, employee contributions of approximately $53,864.50 and $53,811.01, respectively, for the years then ended.

VI. LOCAL GOVERNMENT EMPLOYEES RETIREMENT SYSTEM (LAGERS)

A. Plan Description

Shannon County participates in the Missouri Local Government Employees Retirement System (LAGERS), an agent multiple-employer public employee retirement system that acts as a common investment and administrative agent for local government entities in Missouri. LAGERS is a defined benefit pension plan which provides retirement, disability, and death benefits to plan members and beneficiaries. LAGERS was created and is governed by statute, section RSMO. 70.600 - 70.755. As such, it is the system's responsibility to administer the law in accordance with the expressed intent of the General Assembly. The plan is qualified under the Internal Revenue Code Section 401a and it is tax exempt.

The Missouri Local Government Employees Retirement System issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained by writing to LAGERS, P.O. Box 1665, Jefferson City, MO 65102 or by calling 1-800-447-4334.

B. Funding Status

Shannon County's full time employees contribute 4% of their gross pay to the pension plan. The political subdivision is required to contribute at an actuarially determined rate; the current rates for 2009 are 0.3% (general) and 0.3% police, and for 2008 they are 0.3% (general) and 0.3% (police) of annual covered payroll. The contribution requirements of plan members are determined by the governing body of the political subdivision. The contribution provisions of the political subdivision are established by state statute.

C. Annual Pension Cost

For 2009 and 2008 respectively, the political subdivision's annual pension cost of $35,051, and 32,824 which were equal to the required and actual contributions. The required contribution was determined as part of the February 28, 2007 and/or February 29, 2008 annual actuarial valuation using the entry age actuarial cost method. For 2008, the political subdivision's annual pension cost of $48,248 was equal to the required and actual contributions. The required contribution was determined as part of the February 28, 2006 and/or February 28, 2007 annual actuarial valuation using the entry age actuarial cost method. The actuarial assumptions as of February 28, 2009 included (a) a rate of return on the investment of present and future assets of 7.5% per year, compounded annually, (b) projected salary increases of 4.0% per year, compounded annually, attributable to inflation, (c) additional projected salary increases ranging from 0.0% to 6.0% per year, depending on age and division, attributable to seniority/merit, (d) pre-retirement mortality based on the RP-2000 Combined Healthy Table set back 0 years for men and 0 years for women and (e) post-retirement mortality based on the 1971 Group Annuity Mortality table for males projected to 2000 set back 1 year for men and 7 years for women. The actuarial value of assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a five year period. The unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on an open basis. The amortization period at February 28, 2009 and February 29, 2008 was 15 years.

VI. LOCAL GOVERNMENT EMPLOYEES RETIREMENT SYSTEM (LAGERS) (continued)

C. Annual Pension Cost (continued)

Note: The below assets and actuarial accrued liability do not include the assets and present value of benefits associated with the Benefit Reserve Fund and Casualty Reserve Fund. The actuarial assumptions were changed in conjunction with the February 28, 2006 annual actuarial valuations. For a complete description of the actuarial assumptions used in the annual valuations, please contact the LAGERS office in Jefferson City.

VII. PROSECUTING ATTORNEY RETIREMENT FUND

In accordance with state statute Chapter 56.807 RSMo, the County contributes monthly to the Missouri Office of Prosecution Services for deposit to the credit of the Missouri Prosecuting Attorneys and Circuit Attorney Retirement System Fund. Once remitted, the State of Missouri is responsible for administration of this plan. The County has contributed $4,301.00 and $4,488.00, respectively, for the years ended December 31, 2009 and 2008.

VIII. POST EMPLOYMENT BENEFITS

The County does not provide post-employment benefits except as mandated by the Consolidated Omnibus Budget Reconciliation Act (COBRA). The requirements established by COBRA are fully funded by employees who elect coverage under the Act, and no direct costs are incurred by the County.

IX. CLAIMS COMMITMENTS AND CONTINGENCIES

A. Litigation

The County is currently involved in pending litigation at December 31, 2009.

B. Compensated Absences

The County provides employees with up to three weeks of paid vacation per year based upon the number of years of continuous service. Upon termination from county employment, an employee is reimbursed for unused vacation leave. Vacation days not used by the end of the year they are earned are forfeited. Although employees accrue unused hours the County was unable to determine their outstanding liability.

C. Federal and State Assisted Programs

The County has received proceeds from several federal and state grants. Periodic audits of these grants are required and certain costs may be questioned as inappropriate expenditures under the grant agreements. Such audits could result in the refund of grant monies to the grantor agencies. Management believes that any required refunds, if determined necessary, will be immaterial. No provision has been made in the accompanying financial statements for the potential refund of grant monies.

X. RISK MANAGEMENT

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees; and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

The County is a member participant in a public entity risk pool which is a corporate and political body created pursuant to state statute (Chapter 537.700 RSMo. 1986). The purpose of the risk pool is to provide liability protection to participating public entities, their officials, and employees. Annual contributions are collected based on actuarial projections to produce sufficient funds to pay losses and expenses. Should contributions not produce sufficient funds to meet its obligations, the risk pool is empowered with the ability to make special assessments. Members are jointly and severally liable for all claims against the risk pool.

The County is also a member of the Missouri Association of Counties Self-Insured Workers' Compensation and Insurance Fund. The County purchases workers' compensation insurance through this Fund, a non-profit corporation established for the purpose of providing insurance coverage for Missouri counties. The Fund is self-insured up to $2,000,000 per occurrence and is reinsured up to the statutory limit through excess insurance.

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission
The County of Shannon, Missouri

We have audited the financial statements of the County of Shannon ("County"), Missouri as of and for the years ended December 31, 2009 and 2008, and have issued our report thereon dated December 20, 2010. The financial statements were prepared using accounting practices prescribed or permitted by the Missouri State Auditor's Office, which differ from accounting principles generally accepted in the United States of America. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the County's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the County's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the County's internal control over financial reporting.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be deficiencies, significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above. However, we identified certain deficiencies in internal control over financial reporting, described in the accompanying schedule of findings and questioned costs that we consider to be significant deficiencies in internal control over financial reporting; FS 08/09-01, FS 08/09-02, FS 08/09-03, FS 08/09-04, FS 08/09-05, FS 08/09-06, FS 08/09-07, SA 08/09-01 and SA 08/09-02. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the County's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

We noted certain matters that we reported to management of the County in a separate letter dated December 20, 2010.

The County's response to the findings identified in our audit is described in the accompany schedule of findings and questioned costs. We did not audit the County's response and, accordingly, we express no opinion on it.

This report is intended solely for the information and use of the County Commission, County Officeholders, Missouri State Auditor, Federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

REPORT ON COMPLIANCE WITH REQUIREMENTS APPLICABLE
TO EACH MAJOR PROGRAM AND ON INTERNAL CONTROL
OVER COMPLIANCE IN ACCORDANCE WITH
OMB CIRCULAR A-133

To The County Commission
The County of Shannon
Eminence, Missouri

Compliance

We have audited the compliance of the County of Shannon, (the County) with the types of compliance requirements described in the OMB *Circular A-133 Compliance Supplement* that are applicable to each of its major federal programs for the years ended December 31, 2009 and December 31, 2008. The County's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts, and grants applicable to each of its major federal programs is the responsibility of the County's management. Our responsibility is to express an opinion on the County's compliance based on our audit.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations.* Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the County's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination of the County's compliance with those requirements.

In our opinion, the County complied, in all material respects, with the requirements referred to above that are applicable to each of its major federal programs for the years ended December 31, 2009 and December 31, 2008.

Internal Control Over Compliance

Management of the County is responsible for establishing and maintaining effective internal control over compliance with the requirements of laws, regulations, contracts and grants applicable to federal programs. In planning and performing our audit, we considered the County's internal control over compliance with the requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the County's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be deficiencies, significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above. However, we identified certain deficiencies as described in the accompanying schedule of findings and questioned costs as items SA08/09-01 and SA08/09-02. A *significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe that a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

The County's responses to the findings identified in our audit are described in the accompanying schedule of findings and questioned costs. We did not audit the County's responses and accordingly, we express no opinion on the responses.

This report is intended solely for the information and use of the County Commission, County Officeholders, Missouri State Auditor, others within the entity, other auditing agencies, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

	TOTAL EXPENDITURES OF FEDERAL AWARDS		$ 360,798.47	$ 857,573.05

NOTE 1 – BASIS OF PRESENTATION

A. Purpose of Schedule and Reporting Entity

The accompanying Schedule of Expenditures of Federal Awards has been prepared to comply with the requirements of OMB Circular A-133. This circular requires a schedule that provides total federal awards expended for each major program and the Catalog of Federal Domestic Assistance (CFDA) number or other identifying number when the CFDA information is not available.

The schedule includes all federal awards administered by Shannon County, Missouri.

B. Basis of Presentation

OMB Circular A-133 includes these definitions, which govern the contents of the schedule:

*Federal financial assistanc*e means assistance that non-Federal entities receive or administer in the form of grants, loans, loan guarantees, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations, and other assistance, but does not include amounts received as reimbursement for services rendered to individuals.

Federal award means Federal financial assistance and Federal cost-reimbursement contracts that non-Federal entities receive directly from Federal awarding agencies or indirectly from pass-through entities. It does not include procurement contracts, under grants or contracts, used to buy goods or services from vendors.

Accordingly, the schedule includes expenditures of both cash and noncash awards.

C. Basis of Accounting

The schedule is presented on the regulatory basis of accounting, which recognizes amounts only when disbursed in cash.

NOTE 2 – SUBRECIPIENTS

The County provided no federal awards to subrecipients during the years ended December 31, 2009 and 2008.

THE COUNTY OF SHANNON
EMINENCE, MISSOURI
SCHEDULE OF FINDINGS AND QUESTIONED COSTS
DECEMBER 31, 2009 AND 2008

I. SUMMARY OF AUDITOR'S RESULTS

A. Financial Statements

1. Type of auditor's report issued: Unqualified Regulatory Basis

2. Internal control over financial reporting:

a. Any material weakness(es) identified? 2009 ___ Yes X No

2008 ___ Yes X No

b. Any significant deficiencies identified that are not considered to be material weaknesses? 2009 X Yes ___ None Reported

2008 X Yes ___ None Reported

3. Any noncompliance material to financial statements noted? 2009 ___ Yes X No

2008 ___ Yes X No

B. Federal Awards

1. Internal control over major programs:

Any material weakness(es) identified? 2009 ___ Yes X No

2008 ___ Yes X No

2. Any significant deficiencies identified that are not considered to be material weaknesses? 2009 X Yes ___ No

2008 X Yes ___ No

3. Type of auditor's report issued on compliance for major programs: 2009 - Unqualified

2008 - Unqualified

4. Any audit findings disclosed that are required to be reported in accordance with section 510 (a) of *Circular A-133*? 2009 X Yes ___ No

2008 X Yes ___ No

I. SUMMARY OF AUDITOR'S RESULTS (concluded)

B. Federal Awards (concluded)

5. Identification of major programs:

Year	CFDA Number(s)	Name of Federal Program or Cluster
2009/2008	97.036	Public Assistance Grant
2009/2008	15.226	Payment in Lieu of Taxes

6. Dollar threshold used to distinguish between type A and type B programs: $ 300,000

7. Auditee qualified as low-risk auditee? 2009 ___ Yes X No

2008 ___ Yes X No

II. FINANCIAL STATEMENT FINDINGS

FS 08/09-01 Criteria: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, under Statement on Auditing Standards (SAS) No. 112, Communicating Internal Control Related Matters in an Audit, which is effective for periods ending on or after December 15, 2006, conditions necessitating the entity's auditor to provide such assistance is at least indicative of a significant deficiency.

Condition: During the current year, auditors of the County assisted with the preparation of the financial statements and the notes to financial statements.

Context: During the audit planning phase of the audit the client informed us that we would be preparing the audited financials.

Effect: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, SAS 112 indicates that conditions necessitate the entity's auditor to provide such assistance is at least indicative of a significant deficiency in internal control over financial reporting.

Cause: Due to the short time frame for the implementation of the new SAS requirements, management did not prepare the financial statements or the notes to financial statements.

Recommendation: Due to the changing standards, the County may wish to consider alternatives available that would eliminate this situation.

Management's Response: Shannon County prepared financial statements as prescribed by the Missouri State Auditor's Office. A detail of all transactions are printed in local newspapers annually.

II. FINANCIAL STATEMENT FINDINGS (continued)

FS 08/09-02

Criteria: Statement on Auditing Standards (SAS) No. 112, *Communicating Internal Control Related Matters in an Audit*, which is effective for periods ending on or after December 15, 2006, considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Context: During walkthroughs the County informed us that internal control documentation had not been prepared.

Effect: The new SAS 112 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: Due to the short time frame for the implementation of the new SAS requirements, the County did not prepare the required documentation.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Management's Response: The County follows procedures set forth by the Missouri State Statutes. At this time no formal document is required.

FS 08/09-03

Criteria: Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During our audit, we noted there is no formal fraud risk assessment in place.

Context: During walkthroughs the County informed us that the necessary risk assessment documentation had not been prepared.

II. FINANCIAL STATEMENT FINDINGS (continued)

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identified risks and mitigating controls.

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

Management's Response: The County follows procedures as set forth by the Missouri State Statutes. Furthermore, the County carries applicable liability insurance as well as office holders being bonded to help protect the County against fraudulent acts.

FS 08/09-04 Criteria: Bank reconciliations should be prepared monthly on a timely basis by the Collector's and Prosecuting Attorney's office. Adequate cash journals should also be maintained to ensure reconciliations are being prepared correctly to reflect actual outstanding items.

Condition: During our audit, we discovered that bank reconciliations were not prepared to where they could be reconciled to a detail of the cash transactions of the Office.

Context: This deficiency became apparent through our testing of the Collector's and Prosecuting Attorney's cash accounts and the related reconciliations.

Effect: Not preparing timely bank reconciliations and cash journals does not allow timely detection of errors and correction to these office holder's cash accounts.

Cause: Management has not maintained cash transaction journals and bank reconciliations on a timely basis.

Recommendation: We recommend that the County Collector and Prosecuting Attorney prepare monthly bank reconciliations and adjustments to the cash accounts.

Management Response: The County will consider the auditor's recommendation.

II. FINANCIAL STATEMENT FINDINGS (continued)

FS 08/09-05

Criteria: All supporting documentation must be made available for all financial transactions of the County.

Condition: The County could not provide all receipts to support the credit card statements.

Context: This deficiency became apparent through our examination of credit cards.

Effect: We were unable to assess the reasonableness of the disbursements that occurred through the credit card purchases of the County.

Cause: Credit card receipts were not provided to the Clerk's office by the other office holders for their purchases with the County credit card.

Recommendation: We recommend the County create and enforce a policy of complete support for credit card purchases.

Management Response: The County will implement a system of collecting and safeguarding documentation for future years.

FS 08/09-06

Criteria: Financial information should be collected and communicated in a manner where an individual with a reasonable understanding of accounting can determine that financial statements flow from one year to the next. This entails proper closing entries and the use of proper revenue and expenditure account coding.

Condition: The County Treasurer's office accounts for the activities of the special purpose funds individually but only through their own account, this account does not differentiate between what is an expense or revenue. Furthermore, these accounts are closed at the end of the year and a completely new file is opened.

Context: This deficiency became apparent through our examination of the general ledger detail for the special purpose fund analytical testing.

Effect: The fund balance of special purpose funds may allow for errors to occur between years. Also a lack of the use of expenditure and revenue codes makes budget compliance difficult for the controlling office.

Cause: The Treasurer's office was unaware of the necessity of proper accounting data collection and entry.

II. FINANCIAL STATEMENT FINDINGS (concluded)

Recommendation: We recommend the Treasurer's office obtain training for their software in order to prepare financial information useful for budget compliance and future budget preparation.

Management Response: The County will take steps to ensure financial information is prepared and reported in a manner sufficient for budget examination.

FS 08/09-07 Criteria: Documentation should be readily available for examination upon request of audit staff.

Condition: The Shannon County Sheltered Workshop (SB40) could not provide the minutes of the board meetings before October 2009 and the budget for 2008.

Context: This deficiency became apparent through correspondence with the SB40.

Effect: We were unable to determine whether significant disclosure may have been included within the minutes of the SB40's minutes and were unable to determine their compliance as to them operating within the constraints of their budget.

Cause: This information was not safeguarded by the SB40's management in order to make documents available for examination.

Recommendation: We recommend the SB40 take steps to safeguard their documents; such as, redundancy in copies, fire safes, and/or offsite data back up.

Management Response: The SB40 will implement a system of safeguarding documentation for future years.

III. FEDERAL AWARD FINDINGS AND QUESTIONED COSTS

The following findings, recommendations, and questioned costs are the results of the single audit of Shannon County, Missouri for fiscal years ended December 31, 2009 and 2008. Each finding is referenced with a two-digit number representing the fiscal years audited, an "SA" to indicate that it is a single audit finding, and a sequential number. The findings are presented by federal program and are classified according to federal and state department, type of compliance requirement, category of internal control weakness, and category of noncompliance.

A. Category of Internal Control Weakness

If the finding represents a weakness in internal control, one of the following designations will appear:

1. Significant Deficiency: A significant deficiency in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

2. Material Weakness: A material weakness in internal control over compliance is a deficiency, or combination of deficiencies in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis.

B. Category of Noncompliance Findings

If the finding represents an instance of noncompliance, one of the following designations will appear:

1. Material Noncompliance: A material noncompliance finding is a finding related to a major federal program which discusses conditions representing noncompliance with federal laws, regulations, contracts, or grants, the effects of which have a material effect in relation to a type of compliance requirement or audit objective identified in OMB Circular A-133 *Compliance Supplement*.

2. Questioned Cost Finding: A questioned cost finding is a finding which discusses known or likely questioned costs that are greater than $10,000 for a type of compliance requirement, unless the conditions giving rise to the questioned costs are otherwise reported as a material noncompliance finding.

III. FEDERAL AWARD FINDINGS AND QUESTIONED COSTS (continued)

C. Federal Award Findings and Questioned Costs

SA 08/09-01

Other Information: Significant Deficiency

Federal Grantor:	U.S. Department of Homeland Security
Pass-Through Grantor:	Missouri Department of Public Safety
Federal CFDA Number:	97.036
Program Title:	Public Assistance Grants
Federal Grantor:	U.S. Department of the Interior
Federal CFDA Number:	15.226
Program Title:	Payment in Lieu of Taxes

Information on the federal program: The Schedule of Expenditures of Federal Awards contained errors.

Criteria: OMB Circular A-133 requires the auditee to prepare the Schedule of Federal Expenditures and Awards.

Condition: Through auditing procedures, we were able to correct and support the amounts reported on the Schedule of Expenditures of Federal Awards (SEFA). Prior to these corrections, The Schedule of Expenditures of Federal Awards (SEFA) was prepared with incorrect financial information.

Questioned Costs: Not applicable

Context: During the audit of federal programs we discovered a number of errors related to the Schedule of Expenditures of Federal Awards (SEFA).

Effect: No control monitoring or control over federal expenditures reporting, as required by *Governmental Accounting and Financial Reporting Standards*.

Cause: Adequate emphasis was not placed on the preparation of the Schedule of Expenditures of Federal Awards (SEFA).

Recommendation: The County should implement procedures to ensure that the SEFA is prepared in accordance with federal requirements. The County should continue in its efforts to establish an accounting system that will capture grant transactions in a manner sufficient to readily report the necessary information required on the SEFA. The cost center listing that identifies federal expenditures should be defined and cross matched in a table that is updated monthly by a designee of the County Clerk's Office.

Views of responsible officials and planned corrective actions: The County will ensure that the Schedule of Expenditures of Federal Awards (SEFA) is correct.

III. FEDERAL AWARD FINDINGS AND QUESTIONED COSTS (concluded)

SA 08/09-02

Other Information: Significant Deficiency

Federal Grantor: U.S. Department of the Interior
Federal CFDA Number: 15.226
Program Title: Payment in Lieu of Taxes

Information on the federal program: Payment in Lieu of Taxes was not included in the County's schedule of expenditures and federal awards.

Criteria: OMB Circular A-133, §___.300 Auditee responsibilities (a): The auditee shall identify, in its accounts, all Federal awards received and expended and the Federal programs under which they were received. Federal program and award identification shall include, as applicable, the CFDA title and number, award number and year, name of the Federal agency, and name of the pass-through entity.

Condition: Although, through auditing procedures, we were able to correct and support the amounts reported on the Schedule of Expenditures of Federal Awards (SEFA). Prior to these corrections, the SEFA did not include the funding expensed from the above federal funding source during 2008 and 2009.

Questioned Costs: Not applicable

Context: During the audit of federal programs we discovered a number of errors related to the Schedule of Expenditures of Federal Awards (SEFA).

Effect: No control monitoring or control over federal expenditures reporting, as required by *Governmental Accounting and Financial Reporting Standards*.

Cause: Adequate emphasis was not placed on the preparation of the Schedule of Expenditures of Federal Awards.

Recommendation: The County should implement procedures to ensure that the SEFA is prepared in accordance with federal requirements. The County should continue in its efforts to establish an accounting system that will capture grant transactions in a manner sufficient to readily report the necessary information required on the SEFA. The cost center listing that identifies federal expenditures should be defined and cross matched in a table that is updated monthly by a designee of the County Clerk's Office.

Views of responsible officials and planned corrective actions: The county will ensure that the Schedule of Expenditures of Federal Awards (SEFA) is correct.

I. FOLLOW-UP PRIOR YEAR FINDINGS

There were no prior year findings related to the financial statements.

II. FEDERAL AWARD FINDINGS AND QUESTIONED COSTS – PRIOR YEAR

05-1	Federal Grantor:	U.S. Department of Homeland Security
	Pass-Through Grantor:	Missouri Department of Public Safety
	Federal CFDA Number:	97.036
	Program Title:	Public Assistance Grants
	Pass-Through Entity Identifying Number:	Not Applicable
	Award Years:	2005 and 2004
	Questioned Costs:	Not applicable
	Federal Grantor:	U.S. Department of Agriculture
	Pass-Through Grantor:	Missouri Office of Administration
	Federal CFDA Number:	10.665
	Program Title:	Schools and Roads – Grants to States
	Pass-Through Entity Identifying Number:	Not Applicable
	Award Years:	2005 and 2004
	Questioned Costs:	Not applicable

The county does not have adequate procedures in place to track federal awards for the preparation of the Schedule of Expenditures of Federal Awards (SEFA), and as a result, the county's SEFA contained significant errors and omissions. Total federal expenditures were understated by $588,000 and $237,400 for the years ended December 31, 2005 and 2004, respectively.

Section .310(b) of Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, requires the county to prepare a SEFA for the period covered by the county's financial statements. The county is required to submit the SEFA to the State Auditor's Office as a part of the annual budget.

Expenditures relating to several federal grants were reported incorrectly or not included on the schedule. In particular, two significant errors and omissions caused the majority of the understated expenditures. The County Clerk failed to include federal expenditures of $177,421 and $209,922 in 2005 and 2004, respectively, for Schools and Roads – Grants to States (CFDA# 10.665) because she indicated she was not aware that this program represented federal assistance. In addition, the County Clerk reported revenues instead of expenditures for Public Assistance Grants (CFDA# 97.036) in 2005, resulting in an understatement of federal expenditures of approximately $418,500. The SEFA also did not include the required CFDA number or pass-through grantor's number for several programs.

II. FEDERAL AWARD FINDINGS AND QUESTIONED COSTS – PRIOR YEAR (concluded)

Compilation of the SEFA requires consulting county financial records and requesting information from other departments and/or officials. The County Commission and County Clerk should take steps to ensure all departments and/or officials properly track federal awards to ensure all federal awards are properly accounted for on the SEFA.

Without an accurate SEFA, federal financial activity may not be audited and reported in accordance with federal audit requirements which could result in future reductions of federal awards.

WE RECOMMEND the County Commission and County Clerk work to ensure the SEFA is complete and accurate.

AUDITOR'S EVALUATION: The stated corrective action has not been implemented in the current year being audited. See single audit finding 08/09-01.

MISSOURI SOCIETY OF CPA'S
AMERICAN INSTITUTE OF CPA'S

To the County Commissioners
County of Shannon

In planning and performing our audit of the financial statements of the County of Shannon (County) as of and for the years ended December 31, 2009 and 2008, in accordance with auditing standards generally accepted in the United States of America, we considered the County's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the County's internal control. Accordingly, we do not express an opinion on the effectiveness of the County's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be significant deficiencies or material weaknesses and, therefore, there can be no assurance that all such deficiencies have been identified. However, as discussed below, we identified certain deficiencies in internal control that we consider to be significant deficiencies.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. We did not identify any deficiencies in internal control that we consider to be material weaknesses.

A significant deficiency, is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the deficiencies in the County's internal control to be significant deficiencies as noted in section I.

Our comments concerning internal control and other material and significant matters are presented as follows:

I. Deficiencies Considered to be Significant
II. Changes Impacting Governmental Organizations
III. Information Required by Professional Standards

County of Shannon's management has provided written responses to the comments in this report that were identified in our audit. These responses have not been subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on them.

This communication is intended solely for the information and use of the County Commission, County Officeholders, Missouri State Auditor and others within the County, and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

Daniel Jones & Associates

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT

FS 08/09-01

Criteria: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, under Statement on Auditing Standards (SAS) No. 112, Communicating Internal Control Related Matters in an Audit, which is effective for periods ending on or after December 15, 2006, conditions necessitating the entity's auditor to provide such assistance is at least indicative of a significant deficiency.

Condition: During the current year, auditors of the County assisted with the preparation of the financial statements and the notes to financial statements.

Context: During the audit planning phase of the audit the client informed us that we would be preparing the audited financials.

Effect: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, SAS 112 indicates that conditions necessitate the entity's auditor to provide such assistance is at least indicative of a significant deficiency in internal control over financial reporting.

Cause: Due to the short time frame for the implementation of the new SAS requirements, management did not prepare the financial statements or the notes to financial statements.

Recommendation: Due to the changing standards, the County may wish to consider alternatives available that would eliminate this situation.

Management's Response: Shannon County prepared financial statements as prescribed by the Missouri State Auditor's Office. A detail of all transactions are printed in local newspapers annually.

FS 08/09-02

Criteria: Statement on Auditing Standards (SAS) No. 112, *Communicating Internal Control Related Matters in an Audit*, which is effective for periods ending on or after December 15, 2006, considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Context: During walkthroughs the County informed us that internal control documentation had not been prepared.

Effect: The new SAS 112 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: Due to the short time frame for the implementation of the new SAS requirements, the County did not prepare the required documentation.

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT (continued)

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Management's Response: The County follows procedures set forth by the Missouri State Statutes. At this time no formal document is required.

FS 08/09-03

Criteria: Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During our audit, we noted there is no formal fraud risk assessment in place.

Context: During walkthroughs the County informed us that the necessary risk assessment documentation had not been prepared.

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identified risks and mitigating controls.

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

Management's Response: The County follows procedures as set forth by the Missouri State Statutes. Furthermore, the County carries applicable liability insurance as well as office holders being bonded to help protect the County against fraudulent acts.

FS 08/09-04

Criteria: Bank reconciliations should be prepared monthly on a timely basis by the Collector's and Prosecuting Attorney's office. Adequate cash journals should also be maintained to ensure reconciliations are being prepared correctly to reflect actual outstanding items.

Condition: During our audit, we discovered that bank reconciliations were not prepared to where they could be reconciled to a detail of the cash transactions of the Office.

Context: This deficiency became apparent through our testing of the Collector's and Prosecuting Attorney's cash accounts and the related reconciliations.

Effect: Not preparing timely bank reconciliations and cash journals does not allow timely detection of errors and correction to these office holder's cash accounts.

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT (continued)

Cause: Management has not maintained cash transaction journals and bank reconciliations on a timely basis.

Recommendation: We recommend that the County Collector and Prosecuting Attorney prepare monthly bank reconciliations and adjustments to the cash accounts.

Management Response: The County will consider the auditor's recommendation.

FS 08/09-05

Criteria: All supporting documentation must be made available for all financial transactions of the County.

Condition: The County could not provide all receipts to support the credit card statements.

Context: This deficiency became apparent through our examination of credit cards.

Effect: We were unable to assess the reasonableness of the disbursements that occurred through the credit card purchases of the County.

Cause: Credit card receipts were not provided to the Clerk's office by the other office holders for their purchases with the County credit card.

Recommendation: We recommend the County create and enforce a policy of complete support for credit card purchases.

Management Response: The County will implement a system of collecting and safeguarding documentation for future years.

FS 08/09-06

Criteria: Financial information should be collected and communicated in a manner where an individual with a reasonable understanding of accounting can determine that financial statements flow from one year to the next. This entails proper closing entries and the use of proper revenue and expenditure account coding.

Condition: The County Treasurer's office accounts for the activities of the special purpose funds individually but only through their own account, this account does not differentiate between what is an expense or revenue. Furthermore, these accounts are closed at the end of the year and a completely new file is opened.

Context: This deficiency became apparent through our examination of the general ledger detail for the special purpose fund analytical testing.

Effect: The fund balance of special purpose funds may allow for errors to occur between years. Also a lack of the use of expenditure and revenue codes makes budget compliance difficult for the controlling office.

Cause: The Treasurer's office was unaware of the necessity of proper accounting data collection and entry.

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT (continued)

Recommendation: We recommend the Treasurer's office obtain training for their software in order to prepare financial information useful for budget compliance and future budget preparation.

Management Response: The County will take steps to ensure financial information is prepared and reported in a manner sufficient for budget examination.

FS 08/09-07

Criteria: Documentation should be readily available for examination upon request of audit staff.

Condition: The Shannon County Sheltered Workshop (SB40) could not provide the minutes of the board meetings before October 2009 and the budget for 2008.

Context: This deficiency became apparent through correspondence with the SB40.

Effect: We were unable to determine whether significant disclosure may have been included within the minutes of the SB40's minutes and were unable to determine their compliance as to them operating within the constraints of their budget.

Cause: This information was not safeguarded by the SB40's management in order to make documents available for examination.

Recommendation: We recommend the SB40 take steps to safeguard their documents; such as, redundancy in copies, fire safes, and/or offsite data back up.

Management Response: The SB40 will implement a system of safeguarding documentation for future years.

Views of responsible officials and planned corrective actions: The County will ensure that the Schedule of Expenditures of Federal Awards (SEFA) is correct.

II. CHANGES IMPACTING GOVERNMENTAL ORGANIZATIONS

Governments frequently establish governmental audit requirements for entities to undergo an audit of their compliance with applicable compliance requirements. To address such governmental audit requirements, the Auditing Standards Board has issued Statement on Auditing Standards (SAS) No. 117, *Compliance Audits*, which supersedes SAS No. 74, *Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistanc*e. SAS No. 117 was primarily developed in response to the results of a federal study on the quality of audits performed under Office of Management and Budget Circular A-133, *Audits of States, Local Governments and Non-Profit Organizations* (also referred to as single audits), which showed that improvements were needed in many areas.

SAS No. 117 establishes standards and provides guidance on performing and reporting (in accordance with GAAS, *Government Auditing Standards*, and a governmental audit requirement that requires an auditor to express an opinion on compliance) on an audit of an entity's compliance with applicable compliance requirements of a governmental audit requirement. Examples of such engagements include single audits and audits performed under the U.S. Department of Housing and Urban Development (HUD) *Consolidated Audit Guide for Audits of HUD Programs.*

SAS No. 117 updates SAS No. 74 to reflect changes in the compliance audit environment and incorporates the risk assessment standards. It requires the auditor to adapt and apply the AU sections of AICPA *Professional Standards* to a compliance audit and provides guidance on how to do so. It identifies the AU sections that are not applicable to a compliance audit, defines terms related to compliance audits and used in the SAS, and identifies the elements to be included in an auditor's report on a compliance audit. The SAS is effective for compliance audits for fiscal periods ending on or after June 15, 2010 with earlier application permitted.

III. INFORMATION REQUIRED BY PROFESSIONAL STANDARDS

Our Responsibilities under U.S. Generally Accepted Auditing Standards

As stated in our engagement letter dated April 29, 2010, our responsibility, as described by professional standards, is to express an opinion about whether the financial statements prepared by management with your oversight are fairly presented, in all material respects, in conformity with the regulatory basis of accounting. Our audit of the financial statements does not relieve you or management of your responsibilities.

In planning and performing our audit, we considered County of Shannon's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on the internal control over financial reporting. We also considered internal control over compliance with requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133.

III. INFORMATION REQUIRED BY PROFESSIONAL STANDARDS (continued)

As part of obtaining reasonable assurance about whether the County's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit. Also in accordance with OMB Circular A-133, we examine on a test basis, evidence about the County's compliance with the types of compliance requirements described in the "U.S. Office of Management and Budget (OMB) Circular A-133 Compliance Supplement" applicable to each of its major federal programs for the purpose of expressing an opinion on the County's compliance with those requirements. While our audit will provide a reasonable basis for our opinion, it will not provide a legal determination on the County's compliance with those requirements.

Planned Scope and Timing of the Audit

We performed the audit according to the planned scope and timing previously communicated to you in our meeting about planning matters on April 29, 2010.

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the County of Shannon are described in Note I to the financial statements. No new accounting policies were adopted and the application of existing policies was not changed during 2009 and 2008. We noted no transactions entered into by the governmental unit during the year for which there is a lack of authoritative guidance or consensus. All significant transactions have been recognized in the financial statements in the proper period.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected.

The disclosures in the financial statements are neutral, consistent and clear. Certain financial statement disclosures are particularly sensitive because of their significance to financial statement users.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements. In addition, none of the misstatements detected as a result of audit procedures and corrected by management were material, either individually or in the aggregate, to the financial statements taken as a whole.

III. INFORMATION REQUIRED BY PROFESSIONAL STANDARDS (concluded)

Disagreements with Management

For purposes of this letter, professional standards define a disagreement with management as a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated December 20, 2010.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the governmental unit's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards with management each year prior to retention as the governmental unit's auditors. During the course of our audit we became aware that certain purchases of sunglasses within the sheriff's office were questionable. In addition, the County was missing credit card receipts and incurring fees for late payments and exceeding the credit limit.

THOMAS A. SCHWEICH
Missouri State Auditor

INDEPENDENT AUDITOR'S REPORT

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the state of Missouri, as of and for the year ended June 30, 2010, which collectively comprise the state's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the state's management. Our responsibility is to express opinions on these financial statements based on our audit.

We did not audit the financial statements of certain entities that comprise the state of Missouri. Those financial statements were audited by other auditors whose reports thereon have been furnished to us, and our opinions, insofar as they relate to the amounts included for those entities, are based on the reports of the other auditors. Those entities were:

1. The Missouri Department of Transportation and blended transportation corporations identified in Note 1A., the Conservation Employees' Insurance Plan, the Transportation Self-Insurance Plan, the Missouri State Employees' Insurance Plan, the Missouri Consolidated Health Care Plan, and the Missouri Department of Transportation and Missouri State Highway Patrol Medical and Life Insurance Plan, which represent 78 percent and 13 percent of the assets and revenues, respectively, of the governmental activities.

2. The State Lottery and the Petroleum Storage Tank Insurance Fund, which represent 35 percent of both the assets and revenues of the business-type activities.

3. The component units.

4. The pension (and other employee benefit) trust funds and the Missouri Department of Transportation Local Fund, which represent 94 percent and 97 percent of the assets and additions, respectively, of the fiduciary funds.

P.O. Box 869 • Jefferson City, MO 65102 • (573) 751-4213 • FAX (573) 751-7984

Except as discussed in the following paragraph, we conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The financial statements of the Missouri Highway 63 Transportation Corporation and the Wentzville Parkway Transportation Corporation, blended component units; the Conservation Employees' Insurance Plan, the Missouri State Employees' Insurance Plan, and the Missouri Consolidated Health Care Plan, internal service funds; the Missouri Development Finance Board and Northwest Missouri State University, discretely presented component units; and the pension (and other employee benefit) trust funds were not audited in accordance with *Government Auditing Standards*. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit and the reports of other auditors provide a reasonable basis for our opinions.

We were not allowed access to tax returns and related source documents for income taxes. Access was denied based on the Director of Revenue's interpretation of the decision rendered by the Missouri Supreme Court in the case of Director of Revenue v. State Auditor 511 S.W.2d 779 (Mo. 1974). Approximately 22 percent of governmental activity revenues and 25 percent of General Fund revenues are from this source. We were unable to satisfy ourselves by appropriate auditing procedures as to the income tax revenue beyond the amounts recorded.

In our opinion, based on our audit and the reports of other auditors, and except for the effects of such adjustments, if any, as might have been determined to be necessary had we been allowed access to tax returns and related source documents for income taxes, the financial statements referred to previously present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the state of Missouri, as of June 30, 2010, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

As described in Note 2, the state of Missouri implemented Governmental Accounting Standards Board Statement No. 51, *Accounting and Financial Reporting for Intangible Assets*; Statement No. 53, *Accounting and Financial Reporting for Derivative Instruments*; Statement No. 57, *OPEB Measurements by Agent Employers and Agent Multiple-Employer Plans*; and Statement No. 58, *Accounting and Financial Reporting for Chapter 9 Bankruptcies*.

In accordance with *Government Auditing Standards*, our report on our consideration of the state of Missouri's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters is issued under separate cover in the Single Audit Report. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the

results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

The management's discussion and analysis and budgetary comparison information, as listed in the table of contents, are not a required part of the basic financial statements but are supplementary information required by accounting principles generally accepted in the United States of America. We and the other auditors have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the state's basic financial statements. The supplementary information, as listed in the table of contents, is presented for purposes of additional analysis and is not a required part of the basic financial statements. The supplementary information has been subjected to the auditing procedures applied by us and the other auditors in the audit of the basic financial statements and, in our opinion, based on our audit and the reports of other auditors, and except for the effects, if any, of the matters discussed in paragraph four, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole. The information in the introductory section and statistical section, as listed in the table of contents, has not been subjected to the auditing procedures applied by us and the other auditors in the audit of the basic financial statements and, accordingly, we express no opinion on it.

YELLOW SHEET

Findings in the audit of Shannon County

Financial Condition
As noted in our prior audits, the financial condition of the General Revenue Fund has remained weak, and the financial condition of the Special Road and Bridge Fund has declined. Also, $202,598 is still due to the Special Road and Bridge Fund from the General Revenue Fund for excess administrative transfers and incorrect payment of payroll taxes from prior years. The county has not developed a repayment plan and has made no payments toward this inter-fund liability since August 2006. Because of the poor financial condition of the General Revenue Fund, the County Commission did not appropriate sufficient monies for emergency purposes in the 2010 General Revenue Fund budget as required by state law.

Disbursements
Several concerns were noted regarding county efforts to establish a quarry and the related disbursements of approximately $250,000 since 2007. There was no evidence an adequate cost/benefit analysis was performed prior to spending money to establish the quarry, and the quarry is still not operational. The county did not obtain an appraisal for land purchased for $31,675 in 2007 to be used as the quarry site. The county entered into an agreement to purchase a rock crusher for $215,000 in 2007, and paid this amount in three installments; however, as of December 2010, the county has not received delivery of the crusher. In addition, the County Commission and County Clerk need to improve disbursement review procedures to ensure all county disbursements are proper and adequately documented.

Payroll and Related Matters
Some employees do not prepare timesheets, some timesheets are not provided to the County Clerk's office, and some timesheet information is based on estimated hours worked. Overtime and compensatory time policies are not adequate and do not appear to comply with the Fair Labor Standards Act of 1938 (FLSA). The county accrues straight time off (compensatory time) to employees who work more than the county's normal 40-hour work period, although the FLSA requires compensatory time to be accrued at time and one-half.

Fuel and Vehicle Use
The county has not established effective monitoring procedures regarding fuel use. Mileage and fuel use logs are not maintained for county vehicles and equipment, and fuel use is not reviewed or reconciled to fuel purchases. The personal commuting use of county trucks by county road and bridge employees is not reported to the Internal Revenue Service.

Capital Assets
As noted in previous audits, procedures and records to account for county property are not adequate. The county has no procedure in place to identify capital asset purchases and dispositions throughout the year. County property records only include road and bridge and Sheriff vehicles and equipment, as well as some Local Emergency Planning Committee equipment. In addition, property is not tagged for specific identification and annual physical inventories are not performed.

Property Tax System
The County Clerk does not maintain an adequate account book or other records summarizing all property tax transactions. In addition, there is inadequate documentation of reconciliations between the property tax additions and abatements approved by the County Commission and the related changes made to the property tax system by the County Collector.

Susan Montee, JD, CPA
Missouri State Auditor

YELLOW SHEET

County Collector's Controls and Procedures

The County Collector has not prepared annual settlements of property tax transactions since taking office on March 1, 2007. The County Collector does not adequately reconcile daily and monthly tax abstract totals to monthly settlements, and as a result, the monthly settlements were not always accurate. As of June 30, 2010, $51,813 remained in the former County Collector's bank account which represents monies collected prior to February 28, 2007. The County Collector does not always disburse monies on a timely basis. The County Collector does not compare reconciled bank account balances to liabilities, and at February 28, 2010, the liabilities exceeded the reconciled bank balance by $4,127. The County Collector does not properly assess some delinquent tax fees.

Prosecuting Attorney's Controls and Procedures

The duties of receiving, recording, depositing, and disbursing monies, and reconciling the Prosecuting Attorney's bank account are not adequately segregated. The Prosecuting Attorney's office does not have procedures to ensure all monies received are disbursed. Bank reconciliations are not documented and unidentified amounts have accumulated in the bank account. In addition, deposits are normally made only once a month.

Organization and Statistical Information 19

SUSAN MONTEE, JD, CPA
Missouri State Auditor

To the County Commission
and
Officeholders of Shannon County

We have audited certain operations of Shannon County in fulfillment of our duties under Section 29.230, RSMo. In addition, Daniel Jones and Associates, Certified Public Accountants, has been engaged to audit the financial statements of Shannon County for the 2 years ended December 31, 2009. The scope of our audit included, but was not necessarily limited to, the 2 years ended December 31, 2009. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Shannon County.

Susan Montee, JD, CPA
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice Fast, CPA, CGFM, CIA
Audit Manager:	Mark Ruether, CPA
In-Charge Auditor:	Candi Copley
Audit Staff:	David Olson
	Michelle Crawford, M.Acct

1. Financial Condition

As noted in our prior audits, the financial condition of the General Revenue Fund has remained weak. In addition, the financial condition of the Special Road and Bridge Fund has declined. The following table reflects the ending cash balances of these funds for the 3 years ended December 31, 2009, as well as the anticipated balances for the year ended December 31, 2010:

	Ending Cash Balance, Year Ended December 31*			
Fund	2010 (Budgeted)	2009 (Actual)	2008 (Actual)	2007 (Actual)
General Revenue	$ 0	40,445	46,485	89,824
Special Road and Bridge	311,722	592,632	656,191	659,514

*Amounts were obtained from the county's budget documents.

Total receipts and disbursements of the General Revenue Fund have remained fairly consistent during the past 3 years. Sales tax receipts had increased and reached a high point in 2007, but decreasing sales tax revenues since 2007 and only slight increases in other revenues have made it difficult for the county to prepare a balanced budget.

Receipts of the Special Road and Bridge Fund have also remained fairly consistent while operating disbursements have steadily increased. Start-up costs of approximately $250,000 for establishing a county quarry (see MAR finding number 2) have contributed to the decrease in the Special Road and Bridge Fund balance.

As similarly discussed in our prior audit, $202,598 is still due to the Special Road and Bridge Fund from the General Revenue Fund for excess administrative transfers and incorrect payment of payroll taxes from the Special Road and Bridge Fund for non-road and bridge employees. Although related recommendations were made in our prior 3 audit reports, the county has not developed a repayment plan and has made no payments toward this inter-fund liability since August 2006. This amount is not reflected in the cash balances shown in the chart above.

Because of the poor financial condition of the General Revenue Fund, the County Commission did not appropriate sufficient monies for emergency purposes in the 2010 General Revenue Fund budget. Although $6,253 was budgeted for the emergency fund in 2010, this amount was insufficient by approximately $24,000. Had the required minimum emergency fund amount been budgeted, the county would not have had a balanced budget for the General Revenue Fund for 2010. The county budgets $100,000 in emergency disbursements from the Special Road and Bridge Fund. County officials indicated this is done because there is normally funding available for emergency purposes in the Special Road and Bridge Fund while emergency funding is not normally available in the General Revenue Fund; however, Special Road and Bridge Fund monies are restricted for road and

bridge purposes and cannot be used for other emergency expenses. Section 50.540.4, RSMo, requires the county to budget for an emergency fund within the General Revenue Fund in an amount equal to at least 3 percent of total estimated receipts.

It is essential the County Commission address the county's financial condition both in the immediate and long-term future. To improve the county's financial condition, the County Commission should reduce spending as much as possible, evaluate controls and management practices to ensure efficient use of county resources, attempt to maximize all sources of revenue, and closely monitor the county's budgets.

Recommendation

The County Commission closely monitor the county's financial condition and take the necessary steps to improve the financial condition of the General Revenue Fund and Special Road and Bridge Fund. The County Commission should perform long-term planning and ensure receipts are maximized and disbursements are closely monitored. Further, the County Commission should establish a plan to repay the General Revenue Fund liability to the Special Road and Bridge Fund, and budget the required emergency fund amounts within the General Revenue Fund.

Auditee's Response

The County Commission provided the following written response:

The county's financial condition has been an ongoing problem. We will continue to monitor General Revenue and Special Road and Bridge revenues and expenditures, and will evaluate the repayment of money owed to the Special Road and Bridge Fund as funds become available. We understand an emergency fund is required by law and will consider budgeting the required amount if funds are available.

2. Disbursements

Policies and procedures over disbursements are in need of improvement.

2.1 Quarry

Several concerns were noted regarding county efforts to establish a quarry and the related disbursements of approximately $250,000 since 2007. There was no evidence an adequate cost/benefit analysis was performed prior to spending money to establish the quarry, and the quarry is still not operational. While there were some general comments in the County Commission minutes that the county would save money by operating its own quarry, the County Commission did not document the anticipated costs and the associated benefits prior to spending county funds to establish the quarry. In addition, the county did not obtain an appraisal for 12 acres of land purchased for $31,675 in 2007 to be used as the quarry site.

The county entered into an agreement in November 2007 to purchase a rock crusher for $215,000. This amount was paid in three installments with the final installment in December 2009; however, as of December 2010, the

county has not received delivery of the crusher. County officials indicated there is no benefit for the crusher to be delivered until the quarry is operational, and delays in receiving permits from the Missouri Department of Natural Resources have been the main reason the quarry is still not operational.

Good business practices require that major projects involving the expenditure of public funds be adequately planned and documented. A cost/benefit analysis would have allowed the County Commission to better justify its decision for spending funds to establish a quarry. Land purchases should be formally and independently appraised to ensure a reasonable price is paid. Entering into a purchase agreement and paying for the rock crusher more than 3 years prior to delivery of the equipment has tied up a significant amount of county funds for which no benefit has yet to be received.

2.2 Disbursement review procedures

The County Commission and County Clerk need to improve disbursement review procedures to ensure all disbursements are proper and adequately documented. Our review noted the following concerns with specific county disbursements:

- Payments of $55,000 (grader payment) and $4,500 (logging truck rental) were documented on handwritten notes prepared by county officials and were not supported by vendor invoices. Additionally, there was no vendor invoice or other documentation for $1,200 paid to a funeral home for autopsy costs.

- Approval for disbursements from the Law Enforcement Restitution Fund (LERF) is not adequately documented. The county made various disbursements from the fund during 2008 and 2009 totaling approximately $52,000; however, the county could not provide documentation of LERF Board approval for the disbursements. The County Clerk indicated payments from the LERF are generally made upon verbal request of the Sheriff or a LERF board member. Section 50.565, RSMo, provides money from the LERF shall only be spent upon the approval of a majority of the board members.

- The county paid the Coroner $1,484 twice for his annual 2008 mileage reimbursement request. According to the County Clerk, the original request was not properly cancelled or filed after payment, causing it to be processed and paid a second time. In addition, the request did not take into account changes in the county's mileage reimbursement rate during 2008 and a portion of the miles were reimbursed at a rate higher than approved by the County Commission resulting in an additional overpayment of approximately $100. The review of the request was not sufficient to detect the incorrect mileage rate. Neither the duplicate payment nor the overpayment were identified by the county prior to our review.

The County Commission is currently working with the County Coroner to obtain reimbursement of the overpayments.

- Invoices for prisoner meals are not reviewed or approved by the Sheriff's office and are not compared to the Sheriff's jail logs to ensure the accuracy of the meal billings. Sheriff's personnel indicated prisoner meal invoices had been sent directly to the Sheriff's office and were compared to jail logs, but at some point prior to 2008 the invoices were sent directly to the County Clerk's office. Our review of meal billings and jail logs for 2008 and 2009 noted some discrepancies between billings and logs.

Adequate review and approval of all county disbursements is necessary to ensure all disbursements are reasonable and comply with state law, and to prevent overpayments or duplicate payments.

Recommendations

The County Commission:

2.1 Perform a cost/benefit analysis prior to the approval of major projects involving the expenditure of county funds. In addition, the County Commission should obtain independent appraisals prior to the purchase of real property and ensure major equipment purchases are not made years in advance of receiving the equipment.

2.2 And County Clerk improve the payment and approval process to ensure all disbursements are supported by vendor invoices approved by the county officeholder who incurred the expense, and cancelled by the County Clerk upon payment.

Auditee's Response

The County Commission provided the following written response:

2.1 The County Commission's responsibility is to maintain county roads. Startup and operating costs for a county quarry were researched, and it was determined that a county quarry was the best plan to maintain roads for the long term. By producing road materials with county employee labor, we will be able to apply a better product on county roads at a more economical cost. During the preliminary stages of planning, state officials indicated obtaining the proper quarry operation permits would take about 3 months; however, the county has just recently obtained a draft of the final permit for public comment. Future county endeavors will include obtaining an independent appraisal for real property purchases, if necessary, and we will improve the procedures of documenting our efforts.

2.2 All LERF expenditures are approved by the LERF Board, and we will ensure minutes of LERF Board meetings include this approval

and are sent to the County Clerk. We will evaluate the county's expenditure process to ensure adequate invoice documentation is obtained and properly cancelled during the payment process. We will offset the overpayment to the County Coroner against future mileage claims.

3. Payroll and Related Matters

As similarly noted in our prior audit report, weaknesses were noted which reduced the effectiveness of county payroll processing and related controls. The county processes payroll disbursements of approximately $925,000 per year.

3.1 Timesheets

Some employees do not prepare timesheets, some timesheets are not provided to the County Clerk's office, and some timesheet information is based on estimated hours worked.

Salaried employees of the Sheriff's office do not prepare timesheets, and road and bridge employee timesheets are not provided to the County Clerk's office. In addition, timesheets were not always signed by employees or reviewed and signed by a supervisor.

Payroll is processed twice a month, and the county policy is to have each department submit timesheets or total hours worked for each employee to the County Clerk's office 2 days in advance of the pay date to enable the payroll to be processed. The time reported for each employee represents actual hours worked from the beginning of the pay period through the date the information is submitted and estimated hours to be worked during the last 2 days of the pay period. No documentation was available to indicate the hours actually worked were subsequently compared to the hours estimated.

Paying county employees for estimated hours may lead to errors, inconsistencies in the calculation of overtime and accumulated leave balances, and the potential for employees to be over/under paid. In addition, detailed timesheets signed by the employee and approved by a supervisor are necessary to document hours actually worked, provide information necessary to monitor overtime, leave, and compensatory time, and are beneficial in demonstrating compliance with county policies and the requirements of the Fair Labor Standards Act of 1938 (FLSA). If the county continues to use estimated hours worked for the last days of the pay period, the county should establish procedures to obtain documentation from the employees' supervisors for any differences between estimated and actual time worked, and fully document any applicable adjustments to the employees' pay or leave records when actual time worked is different from estimated time worked.

3.2 Compensatory time

Overtime and compensatory time policies are not adequate and do not appear to comply with the FLSA. The county accrues straight time off (compensatory time) to employees who work more than the county's normal 40-hour work period. The FLSA requires the county to pay overtime or provide compensatory time at time and one-half to any nonexempt employees who work more than 40 hours during a normal work week.

Additionally, the county considers nonworking time (vacation, sick leave, and compensatory time taken) when calculating employee overtime. As a result, the county may be awarding more compensatory time to employees than required. The FLSA indicates nonworking time should not be used in the calculation of overtime worked and compensatory time earned.

Overtime and compensatory time policies, including procedures to compute overtime and compensatory time in compliance with the FLSA, are necessary to ensure all employee benefits comply with the FLSA and all employees are treated equitably.

Recommendations

The County Commission:

3.1 Require all employees to prepare timesheets which are signed by the employee, approved by a supervisor, and submitted to the County Clerk's office. In addition, the County Commission should develop payroll procedures which require all county employees to be paid based on actual hours worked.

3.2 Adopt overtime and compensatory time policies which comply with the FLSA, and ensure employee overtime and compensatory time calculations do not include nonworking time such as leave and compensatory time used.

Auditee's Response

The County Commission provided the following written response:

3.1 We agree and will develop procedures to ensure timesheets are prepared which agree to payroll records and are submitted to the County Clerk.

3.2 We agree and will review the county's compensatory time policy and amend as necessary.

4. Fuel and Vehicle Use

Several concerns were identified related to fuel and vehicle use.

4.1 Fuel use

The county has not established effective monitoring procedures regarding fuel use. Mileage and fuel use logs are not maintained for county vehicles and equipment, and fuel use is not reviewed or reconciled to fuel purchases.

The Road and Bridge department and Sheriff's department incur the majority of county fuel costs. During the 2 years ended December 31, 2009, the county incurred fuel costs of approximately $267,000 for the Road and Bridge Department and approximately $23,000 for the Sheriff's department.

The Road and Bridge department maintains bulk fuel tanks at five locations: one at each of the two road sheds and three at employees' residences. County personnel indicated the tanks at the employees' residences are not metered, and the meter at one road shed tank is not working. While the county has attempted to maintain some logs of fuel pumped at the road sheds, the records were not always complete and accurate. For example, beginning meter readings did not always match the previous ending readings, and some meter readings were left blank on the logs. In addition, the county does not maintain adequate bulk fuel inventory records or attempt to reconcile fuel used to fuel purchased. As a result, theft and misuse of fuel could go undetected.

The Sheriff's department purchases fuel from gas stations, and dispatchers record each fuel purchase. However, odometer readings are not provided to or recorded by the dispatcher. Thus, fuel purchases are not compared to vehicle mileage readings to help determine the reasonableness of fuel use.

Maintenance and review of vehicle and equipment mileage and fuel use logs and bulk fuel inventory records, and comparison of log information and inventory records to fuel purchases, are necessary to ensure vehicles and equipment are properly utilized, to prevent paying vendors for improper billing amounts, and to decrease the risk of theft or misuse of fuel occurring without detection. Logs should provide sufficient details so the county can effectively monitor vehicle and equipment use and fuel costs.

4.2 Commuting mileage

The personal commuting use of county trucks by county road and bridge employees is not reported to the Internal Revenue Service (IRS). The county's 13 road and bridge employees use county vehicles to commute between their homes and work sites. County officials indicated that because of the large geographic area of the county, road and bridge worksites in many instances are closer to the employees' homes than to the two county road sheds. Because vehicle logs are not maintained, the county cannot distinguish between personal commuting and county business-related mileage, and personal mileage is not reported on employee W-2 forms.

The IRS reporting guidelines indicate personal and commuting mileage are reportable fringe benefits and require the full value of the provided vehicle to be reported if the employer does not require the submission of detailed logs that document business and personal use. Because procedures have not been established to ensure IRS regulations are followed, the county may be subject to penalties and/or fines for failure to report all taxable benefits.

Recommendations

The County Commission:

4.1 Require mileage and fuel use logs for all vehicles and equipment and review the logs for reasonableness. In addition, bulk fuel inventory records should be maintained, fuel use should be reconciled to fuel purchases, and any significant discrepancies should be investigated.

4.2 Comply with IRS guidelines for reporting fringe benefits related to commuting miles and require mileage logs which distinguish between business and commuting use.

Auditee's Response

The County Commission provided the following written response:

4.1 We believe our current procedures allow for adequate review of fuel use by county employees and have determined the installation of fuel meters and the additional time for recordkeeping would not be cost effective.

4.2 Due to the size of the county, it is more economical to allow county road employees to drive a county vehicle from their residence to the work sites. We will review IRS guidelines and implement a county policy for employees commuting to the work site.

The Sheriff provided the following response:

4.1 We are now keeping mileage logs for all vehicles.

5. Capital Assets

As noted in previous audits, procedures and records to account for county property are not adequate. The county has no procedure in place to identify capital asset purchases and dispositions throughout the year. County property records only include road and bridge and Sheriff vehicles and equipment, as well as some Local Emergency Planning Committee equipment. In addition, property is not tagged for specific identification and annual physical inventories are not performed.

Adequate capital asset records and procedures are necessary to ensure effective internal controls, meet statutory requirements, and provide a basis for determining proper insurance coverage. Procedures to track capital asset purchases and dispositions throughout the year and compare to physical inventory results would enhance the county's ability to account for capital assets and potentially identify unrecorded additions and dispositions, identify obsolete assets, and deter and detect theft of assets. Proper tagging of county property items and specific identification of property locations are necessary to reduce the possibility of improper personal use of county property. Section 49.093, RSMo, provides that the officer or their designee of each county department is responsible for performing annual inspections

and inventories of county property used by their department and for submitting an inventory report to the County Clerk.

Recommendation

The County Commission and the County Clerk work with other county officials to ensure complete and accurate inventory records are maintained and annual physical inventories are conducted, and implement procedures for tracking capital asset purchases and dispositions throughout the year. In addition, all capital assets should be tagged and identified as county property.

Auditee's Response

The County Commission and County Clerk provided the following written response:

We agree and will attempt to work with the other county officials to create an adequate asset listing and request the annual submission of asset records from county officials.

6. Property Tax System

As similarly noted in our prior audit reports, controls and procedures over the property tax system need improvement.

6.1 Account book

The County Clerk does not maintain an adequate account book or other records summarizing all property tax transactions. The County Clerk maintains a spreadsheet which includes beginning tax book totals, monthly collections, and monthly totals for additions and abatements, but does not include protested taxes or delinquent balances. In addition, the County Collector has not prepared annual settlements of property tax transactions (see MAR finding number 7), and the County Clerk and County Commission do not perform procedures to verify the accuracy of the County Collector's monthly settlements.

Section 51.150.1(2), RSMo, requires the County Clerk to maintain accounts with all persons chargeable with monies payable into the county treasury. An account book or other records which summarize all tax charges and credits should be maintained by the County Clerk. Such records could be used by the County Clerk and the County Commission to verify the County Collector's monthly and annual settlements. Such procedures are intended to establish checks and balances related to the collection of property taxes.

6.2 Additions and abatements

There is inadequate documentation of reconciliations between the property tax additions and abatements approved by the County Commission and the related changes made to the property tax system by the County Collector. Additions and abatements are prepared by the County Assessor and approved by the County Clerk as they occur, and subsequently approved by the County Commission at the next commission meeting. The County Collector makes changes to the computerized tax books for all additions and abatements. The County Clerk prepares a summary of additions and

abatements and indicated she reconciles this summary to the changes made by the County Collector; however, a summary of changes made is not generated from the property tax computer system, so there is no documentation to show that the summary records prepared by the County Clerk are in agreement with changes to the property tax system. As a result, additions and abatements, which constitute changes to the amount of taxes the County Collector is charged with collecting, are not properly monitored and errors or irregularities could go undetected.

If it is not feasible for the County Clerk to make changes directly to the property tax system, the county should generate reports of all changes made to the computerized property tax system and the County Clerk should verify all changes are complete and accurate. Sections 137.260 and 137.270, RSMo, assign responsibility to the County Clerk for making corrections to the tax books with the approval of the County Commission.

Recommendations

The County Clerk:

6.1 Maintain an account book of all property tax transactions with the County Collector. Additionally, the County Commission and County Clerk should perform a thorough review of the County Collector's monthly and annual settlements.

6.2 Develop procedures to ensure all additions and abatements are posted to the computerized property tax books.

Auditee's Response

The County Clerk provided the following written response:

6.1 The County Clerk attempted to prepare an account book since the prior audit but did not have enough information to reconcile the account book to delinquent tax totals. The county is currently upgrading the county's computerized property tax system which will allow the County Clerk access to the county's property tax records and allow for reconciliations to the County Collector's monthly and annual settlements.

6.2 The County Clerk attempted to correct this situation since the prior audit. The system upgrades currently in progress should allow us to fully implement this recommendation.

7. County Collector's Controls and Procedures

Several weaknesses exist in the County Collector's procedures. The County Collector's office processed property tax receipts of $4.7 million for the 2 years ended February 28, 2010, and the weaknesses in the County Collector's procedures do not provide adequate assurance that all property tax receipts and disbursements are accounted for properly.

7.1 Annual settlements

The County Collector has not prepared annual settlements of property tax transactions since taking office on March 1, 2007. In addition, the former County Collector did not file an annual settlement for her last year in office. By not preparing annual settlements, the County Collector has not provided the County Commission or the taxpayers with a complete accounting of property tax transactions.

Section 139.160, RSMo, requires the County Collector to annually settle with the County Commission the accounts of all monies received from taxes and other sources. To help ensure the validity of tax book charges, collections, and credits, and for the County Clerk and County Commission to properly verify these amounts, it is imperative the County Collector file annual settlements on a timely basis.

7.2 Monthly settlements

The County Collector does not adequately reconcile daily and monthly tax abstract totals to monthly settlements, and as a result, the monthly settlements were not always accurate. The County Collector obtains information from the daily and monthly abstract totals generated by the computerized property tax system and manually inputs this information into a separate computer spreadsheet. This spreadsheet then generates the monthly settlements which contain the tax and fee amounts distributed to the various taxing authorities. Our review noted the spreadsheets used for preparing monthly settlements contained some inaccurate formulas. In addition, amounts from the tax abstracts were not always input correctly into the monthly settlement spreadsheets. While the extent of these problems was not determined, these monthly spreadsheet errors have resulted in inaccurate distributions to some taxing authorities.

Reconciliations between abstract totals and monthly settlements are necessary to ensure monthly settlements and distributions are accurate, and to enable the County Collector to prepare accurate annual settlements.

7.3 Former County Collector's bank account

As of June 30, 2010, $51,813 remained in the former County Collector's bank account which represents monies collected prior to February 28, 2007. The current County Collector indicated the balance in this account has not been identified to specific collections and she has requested the former County Collector to distribute these monies and close the account; however, the former County Collector has failed to take action on this matter and the bank has notified the county that the account can only be closed under the authority of the former County Collector. To ensure the property taxes collected by the former County Collector are properly distributed, the County Collector should continue efforts to work with the former County Collector to distribute these monies and close the account. Consulting with legal counsel may be necessary should such efforts be unsuccessful and the bank continues to require authorization of the former County Collector.

7.4 Distributions

The County Collector does not always disburse monies on a timely basis. For example, collections in December 2009 were not disbursed until February 2010, and collections in January 2010 were not disbursed until April 2010. The County Collector indicated the workload of the office is the main cause for delays in distributing tax collections.

Section 139.210, RSMo. requires all collections to be distributed to the political subdivisions by the fifteenth day of the following month. In addition, timely and proper distribution of property tax collections to the political subdivisions is important because the political subdivisions rely on property tax revenues to fund operations.

7.5 Bank accounts and liabilities

The County Collector does not compare reconciled bank account balances to liabilities. Based on a review of the County Collector's records, we identified liabilities totaling $155,896 at February 28, 2010, which consisted of February tax collections and undistributed surtax and interest. The liabilities exceeded the reconciled bank balance of $151,769 by $4,127. While the County Collector could not determine the reasons for the difference between liabilities and the reconciled bank balance, errors in the monthly settlements and potential erroneous distributions (see section 7.2) could have contributed to the differences.

To ensure records are in balance, errors are detected and corrected on a timely basis, and sufficient cash is available for the payment of all amounts due, liabilities should be identified monthly and reconciled to cash balances. Prompt follow up on discrepancies is necessary to identify and resolve errors.

7.6 Delinquent tax fees

The County Collector does not properly assess some delinquent tax fees. State laws require fees totaling 7 percent of all delinquent taxes and interest be assessed and collected for each delinquent tax payment; however, the County Collector does not assess the 7 percent fee on the amount of delinquent interest. The County Collector computes the 7 percent fee manually on each delinquent tax payment, and she indicated she was not aware that this fee should be computed on delinquent interest. Based on the County Collector's records of total delinquent interest collected during the 2 years ended February 28, 2010, the county could have collected as much as $5,600 in additional delinquent tax fees (which are distributed to various county funds).

To ensure county revenues are maximized, the County Collector should ensure the 7 percent fee on delinquent taxes is computed and assessed in accordance with Section 52.290, RSMo.

Similar conditions previously reported

Similar conditions to points 7.4 and 7.5 were noted in our prior audit report.

Recommendations

The County Collector:

7.1 Prepare and file annual settlements as required by state law.

7.2 Reconcile daily tax abstract information to the monthly settlements and correct the formulas in the monthly settlement spreadsheets. The County Collector should review prior monthly settlements and correct any significant tax distribution errors.

7.3 Continue efforts to work with the former County Collector to distribute the monies in the old bank account and consult with legal counsel as appropriate.

7.4. Distribute monthly tax collections in a timely manner in accordance with state law.

7.5 Prepare monthly lists of liabilities, reconcile the lists to the reconciled bank balances, investigate any unreconciled differences, and make appropriate adjustments to correct any deficiencies noted.

7.6 Ensure fees are properly assessed on all delinquent tax payments in accordance with state law.

Auditee's Response

The County Collector provided the following written response:

7.1 I agree. Current property tax system upgrades will aide in the preparation and filing of annual settlements.

7.2 I agree. Current property tax system upgrades will allow for the accurate completion of monthly settlements. Prior monthly settlements will be reviewed and corrected as needed.

7.3 I agree and will work with the former County Collector and County Commission to distribute monies as appropriate.

7.4 I agree and will distribute monthly tax collections in a timely manner.

7.5 I agree. Current property tax system upgrades will allow the computerized system to generate more accurate reports that can be reconciled to current liabilities.

7.6 I agree. Current property tax system upgrades will allow the correct assessment of fees on delinquent tax payments.

8. Prosecuting Attorney's Controls and Procedures

Weaknesses exist in accounting controls and procedures in the Prosecuting Attorney's office. The Prosecuting Attorney's office collected approximately $40,000 and $35,000 during the years ended December 31, 2009 and 2008, respectively.

8.1 Segregation of duties

The duties of receiving, recording, depositing, and disbursing monies, and reconciling the Prosecuting Attorney's bank account are not adequately segregated. One clerk performs all of these duties, and a documented supervisory review of the accounting records is not performed. As a result, there is little assurance all transactions are accounted for properly and accounting records are complete and accurate.

Proper segregation of duties is necessary to ensure all transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of duties cannot be achieved, the Prosecuting Attorney should implement a documented independent or supervisory review to ensure the bank records are in agreement with the accounting records.

8.2 Bank reconciliations

As similarly noted in our prior audit, the Prosecuting Attorney's office does not have procedures to ensure all monies received are disbursed. Bank reconciliations are not documented and unidentified amounts have accumulated in the bank account. Office personnel indicated all monies received are disbursed at the end of the month and the bank account should zero out. However, at December 31, 2009, the bank account had a balance of $1,345 which was unidentified, and the unidentified amount has fluctuated over time. Our prior audit noted an unidentified balance of $217 at December 31, 2005.

Procedures to ensure all receipts are properly deposited and disbursed and the preparation of monthly bank reconciliations are necessary to ensure the accounting records are in balance and to identify errors in a timely manner. Unidentified monies should be disposed of in accordance with state law.

8.3 Deposits

Receipts are not always deposited timely. Deposits are normally made only once a month. Additionally, monies are sometimes disbursed prior to deposit of the corresponding receipts. For example, receipts collected from November 19 through December 8, 2009, totaling $590 were not deposited until December 16, 2009. The Prosecuting Attorney's office transmitted the November 2009 bad check fees to the County Treasurer on December 1, 2009, prior to the deposit of all November receipts. Unidentified monies (see section 8.2) prevented the bank account from being overdrawn.

To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, deposits should be made timely, and monies should not be disbursed prior to deposit.

Similar conditions previously reported

Similar conditions to points 8.2 and 8.3 were noted in our prior audit report.

Recommendations

The Prosecuting Attorney:

8.1 Adequately segregate accounting duties to the extent possible or ensure supervisory reviews of accounting records are performed and documented.

8.2 Adopt procedures to ensure all amounts received are deposited and disbursed. In addition, monthly bank reconciliations should be prepared to ensure the bank account zeroes out, and any differences between the accounting records and bank reconciliations should be investigated and resolved. Unidentified monies should be disposed in accordance with state law.

8.3 Deposit receipts on a timely basis and ensure all monies are deposited prior to disbursement.

Auditee's Response

The Prosecuting Attorney provided the following written response:

8.1 I will implement appropriate review procedures since adequate segregation of duties is not possible.

8.2 Procedures for monthly bank reconciliations will be implemented. I will review and determine how to distribute unidentified monies in the appropriate manner.

8.3 Monies will be deposited at least once a week or more frequently if necessary.

Shannon County
Organization and Statistical Information

Shannon County is a county-organized, third-class county. The county seat is Eminence.

Shannon County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 28 full-time employees and 5 part-time employees on December 31, 2009.

In addition, county operations include the Senate Bill 40 Board and the Senior Citizens Service Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2010	2009
Tony Orchard, Presiding Commissioner	$	22,064
Dale Counts, Associate Commissioner		20,064
Herman Kelly, Associate Commissioner		20,064
Melany Williams, Circuit Clerk and Ex Officio Recorder of Deeds (1)		
Shelly McAfee, County Clerk		30,400
Jodie R. Greear-Brumble, Prosecuting Attorney		37,050
Stephen Blunkall, Sheriff		36,100
Allen L. Akers, County Treasurer		30,400
Tim Denton, County Coroner		8,550
James Orchard, Public Administrator		15,000
Susie Needels, County Collector (2), year ended February 28,	31,092	
Summer J. Crider, County Assessor, year ended August 31,		30,400

(1) Compensation is paid by the state.

(2) Includes $692 of commissions earned for collecting city property taxes.

SUSAN MONTEE, JD, CPA
Missouri State Auditor

To the County Commission
and
County Collector
Marion County, Missouri

Section 52.150, RSMo, requires the State Auditor to audit the office of the County Collector after being notified of a vacancy in that office. On August 28, 2010, a vacancy occurred in the office of the County Collector of Marion County. A successor was appointed and sworn into office effective September 28, 2010.

To satisfy our statutory obligation, we have audited the operations of the County Collector of Marion County. The scope of our audit included, but was not necessarily limited to, the period March 1 to August 28, 2010, and the year ended February 28, 2010. The objectives of our audit were to:

1. Determine the financial condition of the accounts of the office of the County Collector.

2. Evaluate the County Collector's internal controls over significant financial functions.

3. Evaluate the County Collector's compliance with certain legal provisions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the County Collector, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the County Collector and county's management and was not subjected to the procedures applied in our audit of the County Collector.

Section 52.150, RSMo, requires the County Commission to accept the State Auditor's report and, if necessary, to take certain specific actions if the State Auditor finds any monies owing to the county or the past County Collector. No findings resulted from our audit of the County Collector of Marion County.

Marion County Collector
Organization and Statistical Information

The County Collector bills and collects property taxes for the county and most local governments. Pursuant to Section 52.015, RSMo, the term for which collectors are elected expires on the first Monday in March of the year in which they are required to make their last final settlement for the tax book collected by them. Annual settlements are to be filed with the county commission for the fiscal year ended February 28 (29).

Lee Viorel served as County Collector until August 28, 2010. Mary Ann Viorel was appointed the Marion County Collector and sworn into office on September 28, 2010.

The County Collector received compensation of $34,235 for the period March 1 to August 28, 2010. During the year ended February 28, 2010, the County Collector received compensation of $70,128. Compensation was in accordance with statutory provisions.
